6. Consideration of Motion to Adjourn Meeting.

Audit and Appropriations Committee Meeting

STATUS OF MEETING: Open.

MATTERS TO BE CONSIDERED:

1. Approval of Agenda.
2. Approval of Minutes of September 26, 1992 Meeting.
3. Consideration of Report by the Provision for the Delivery of Legal Services Committee.
4. Consideration of Status Report on the Leasing of the Corporation's Former Headquarters Office Space.
5. Consideration of Inspector General's Report on the Fiscal Year 1993 Budget Request for the Office of the Inspector General.
6. Consideration and Review of Proposed Fiscal Year 1993 Consolidated Operating Budget.

CONTACT PERSON FOR INFORMATION:

Patricia Batie (202) 336–8896.

Date issued: October 7, 1992.

Patricia D. Batie,

Corporate Secretary.

[FR Doc. 92–24826 Filed 10–7–92; 3:44 pm]

BILLING CODE 7050-01 M

Consumer Product Safety Commission

16 CFR Part 1500

Labeling Requirements for Art Materials Presenting Chronic Hazards; Guidelines for Determining Chronic Toxicity of Products Subject to the FHSA; Supplementary Definition of "Toxic" Under the Federal Hazardous Substances Act; Final Rules

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1500

Labeling Requirements for Art Materials Presenting Chronic Hazards; Guidelines for Determining Chronic Toxicity of Products Subject to the FHSA; Supplementary Definition of "Toxic" Under the Federal Hazardous Substances Act

AGENCY: Consumer Product Safety Commission.

ACTION: Final rules.

SUMMARY: This document announces three actions taken by the Consumer Product Safety Commission.[1] The Commission is finalizing the codification of ASTM standard D–4236 as a Commission rule which was mandated by the Labeling of Hazardous Art Materials Act ("LHAMA").

LHAMA also directed the Commission to issue guidelines specifying criteria for determining when any customary or reasonably foreseeable use of an art material can result in a chronic hazard. The Commission is issuing final chronic hazard guidelines as directed by LHAMA. Because the substance of the guidelines directed by LHAMA applies equally to materials other than art materials, these guidelines also may be used by the manufacturers of other products subject to the FHSA to determine whether their products present a chronic hazard and, therefore, require labeling under section 2(p) of the FHSA. The guidelines are not mandatory.

Finally, the Commission is issuing a final regulatory definition of toxic that will define chronic toxicity under the Federal Hazardous Substances Act (FHSA). This definition supplements the Commission's existing regulatory definition of toxic that concerns acute toxicity. The definition will apply to all products subject to the FHSA.

DATES: The codification of ASTM D–4236 (31500.14(b)(8)) which is effective on October 9, 1992.

I. Introduction

A. The Proposals

On April 17, 1991, the Commission proposed (1) a codification of ASTM D–4236 standard for labeling hazardous art materials as a Commission rule under the Labeling of Hazardous Art Materials Act ("LHAMA"); (2) guidelines for determining when an art material or other product subject to the FHSA may present a chronic health hazard; and (3) a supplemental regulatory definition of "toxic" (under the FHSA) to include chronic toxicity. 56 FR 15672 and 56 FR 15705 (1991). (The proposed guidelines and definition were together in one document.) The Commission proposed that the guidelines and the supplemental definition would apply to all products subject to the Federal Hazardous Substances Act ("FHSA").

The proposal originally provided for submission of comments until July 1, 1991. In response to numerous requests for more time to respond, the Commission extended the comment period to October 1, 1991.

LHAMA required the Commission to conduct a public hearing on guidelines issued under LHAMA. 15 U.S.C. 1277(d)(1). The Commission originally scheduled a hearing for July 18, 1991. However, when the period for written comments was extended, the Commission rescheduled the public hearing for October 17, 1991. The Commission has considered all written and oral comments on the three proposed actions.

This document summarizes the most significant public comments received and explains the Commission's responses to those comments. It attempts to clarify some points in the proposed actions that engendered confusion, and in doing so it addresses the major issues raised by comments. The preamble also explains the statutory bases for the Commission's actions and makes some changes in the proposals.

B. Overview of this Document

The Commission is finalizing three actions. Each is described in greater detail in a separate section of this preamble. First, the Commission is issuing the final codification of ASTM D–4236. LHAMA made this voluntary standard for labeling hazardous art materials a mandatory Commission rule under section 3(b) of the FHSA. Congress made some changes in provisions of ASTM D–4236, such as the definition of art material. Although LHAMA did not require the Commission to codify ASTM D–4236, the Commission decided to do so for the convenience of those subject to the LHAMA. Since the codification reflects changes by Congress, contains some editorial changes to make the standard consistent with other standards in the Code of Federal Regulations, and reflects the Commission's interpretation of the standard, the Commission determined to publish the codification as a proposed rule. 56 FR 15705. Today the Commission issues the codification in final form. The substance of the codification and the Commission's interpretation of certain provisions are explained in section III. of the preamble.

The second action taken by the Commission is the finalization of guidelines for determining chronic toxicity. LHAMA required the Commission to issue guidelines for determining when customary or reasonably foreseeable use of an art material can result in a chronic hazard. 15 U.S.C. 1277(d)(1). The guidelines proposed by the Commission on April 17, 1991, explained the principles used by the Commission staff in making this determination. The proposed guidelines specified conditions under which an art material would be considered to contain a carcinogen, neurotoxin, or a developmental or reproductive toxicant. The proposed guidelines also explained certain principles to be used in evaluating the risk resulting from exposure.

Because the principles behind the proposed guidelines apply to other products subject to the FHSA as well as to art materials, the Commission proposed that the guidelines could be used by manufacturers of all products subject to the FHSA to determine if the product presents a chronic hazard. As explained more fully in section II A. of this preamble, the FHSA requires that all products subject to that act must be properly labeled if they present a chronic hazard.

The Commission continues to believe that the principles behind the guidelines are applicable to all products subject to the FHSA. Thus, manufacturers of all such products may use the final guidelines to aid in their determination of whether their products present chronic health hazards. The Commission reiterates that the guidelines are not mandatory. Producers of art materials or any other product will not be required to follow the guidelines in determining chronic toxicity. However, as explained in section V.C. of the preamble, the Commission does expect that products subject to the FHSA will be appropriately labeled according to section 2(p) of the FHSA if they present a chronic hazard. The Commission may bring enforcement actions against such misbranded products.

Finally, the Commission is issuing a final rule under section 10 of the FHSA to supplement the current regulatory definition of "toxic." The existing

regulatory definition specifies tests to determine if a substance presents an acute toxic hazard but does not specify a similar means for defining a chronic toxicant. As explained more fully in section VII A. of this preamble, the statutory definition of "toxic" is quite broad and includes chronic as well as acute toxicity. The supplemental definition will close this gap between the statutory definition and the regulatory definition. As the definition is issued under the FHSA, it will apply to all products subject to the FHSA, not just art materials. As explained in section VII.B. of the preamble, the final definition is broader and more flexible than the one proposed.

II. Applicable Statutes

The Commission's actions are taken pursuant to two statutes: LHAMA and the FHSA. It is important to understand both statutes and how they work together.

A. The Federal Hazardous Substances Act

The FHSA, enacted in 1960, requires labeling of "hazardous substances" if they are "intended, or packaged in a form suitable, for use in the household or by children." 15 U.S.C. 1261(p). A hazardous substance that does not bear the labeling specified by section 2(p)(1) of the FHSA is misbranded and its introduction or receipt in interstate commerce is a prohibited act under the FHSA, 15 U.S.C. 1263, subjecting the violator to certain penalties, 15 U.S.C. 1264.

A hazardous substance under the FHSA includes "any substance or mixture of substances which (i) is toxic * * * if such substance or mixture of substances may cause substantial personal injury or substantial illness during or as a proximate result of any customary or reasonably foreseeable handling or use, including reasonably foreseeable ingestion by children." 15 U.S.C. 1261(f)(1)(A). This definition encompasses two components: that the substance be "toxic" and that its reasonably foreseeable or customary use may cause substantial personal injury or illness.

The FHSA broadly defines the term "toxic" to apply to "any substance (other than a radioactive substance) which has the capacity to produce personal injury or illness to man through ingestion, inhalation, or absorption through any body surface." 15 U.S.C. 1261(g).

The FHSA's labeling requirement for a hazardous substance (as defined in the act) that is intended or packaged for household use or for children is essentially self-executing. The FHSA does not establish a program of pre-marketing approval of products. Nor does it require the Commission to develop lists of hazardous substances. Rather, it is the manufacturers' responsibility to determine if their products are or contain a hazardous substance and must be labeled under the FHSA. Section 3(a)(1) of the FHSA does provide for the Commission to declare a particular substance to be a "hazardous substance" under the act in order to avoid or resolve uncertainty 15 U.S.C. 1262. But the Commission is not required to designate a substance as hazardous before enforcing the labeling requirements of section 2(p).

The Commission's regulations specify tests that can be used to determine whether a product presents a hazard of acute toxicity. 16 CFR 1500.3(c)(2). The existing regulations do not contain criteria to determine if a product presents a risk of chronic toxicity.

B. The Labeling of Hazardous Art Materials Act

The Labeling of Hazardous Art Materials Act (LHAMA), enacted November 18, 1988, amended the FHSA. 15 U.S.C. 1277. It provided that, as of November 18, 1990, the requirements for the labeling of art materials set forth in the 1988 version of ASTM D–4236 shall be deemed to be a Commission regulation issued under section 3(b) of the FHSA. Section 3(b) of the FHSA authorizes the Commission to issue labeling regulations different from or in addition to those of section 2(p)(1).

ASTM D–4236 requires producers and repackagers of art materials to submit the material's formulation to a board certified toxicologist for review. The toxicologist must determine whether the art material has the potential to produce a chronic health hazard and must recommend appropriate labeling. The requirements of ASTM D–4236 are explained in greater detail in section III. of this preamble.

LHAMA made some changes and additions to ASTM D–4236. LHAMA requires each producer or repackager of art materials to describe in writing the criteria used to determine whether the product has the potential to produce chronic adverse health effects. The producer or repackager must submit to the Commission those criteria and a list of the art materials that require chronic hazard warning labels. *Id.* sec. 1277(b)(3). Upon request of the Commission, the producer or repackager must also submit to the Commission the product formulations. *Id.* sec. 1277(b) (4).

In addition to the labeling required by ASTM D–4236, LHAMA provides that art materials that require chronic hazard labeling must include on the label the name and address of the producer or repackager, an appropriate telephone number, and a statement that the art materials are inappropriate for use by children. *Id.* sec. 1277(b)(5). LHAMA requires that 12 months after a producer or repackager has discovered significant information regarding hazards of the art material or ways to protect against the hazards, the new information must be incorporated into the chronic hazard label. *Id.* sec. 1277(b)(6).

LHAMA states that a toxicologist must "take into account opinions of various regulatory agencies and scientific bodies" in determining whether an art material has the potential to produce adverse chronic health effects. 15 U.S.C. 1277(b)(8). In a separate section, the statute requires the Commission to issue guidelines containing criteria for determining when "customary or reasonably foreseeable use of an art material can result in a chronic hazard." Congress directed the Commission to issue these guidelines within one year of enactment of LHAMA. *Id.* sec. 1277(d)(1). Due to the complexity of the scientific issues involved and the lack of a Commission quorum for a period of time, issuance of the guidelines was delayed.

III. Issues Concerning the Codification of D–4236

A. General Requirements

ASTM D–4236 requires the producer or repackager of an art material to submit the product's formulation to a toxicologist who will review the formulation to determine if the art material has the potential to produce chronic adverse health effects through customary or reasonably foreseeable use. The toxicologist will advise the producer or repackager of appropriate chronic hazard labeling and the producer or repackager must adopt suitable precautionary labeling. The labeling recommended must be in accordance with section 5 of ASTM D–4236. Such labeling includes a signal word, a list of potential chronic hazards, the name(s) of the chronically hazardous component(s), safe handling instructions, a list of sensitizing components, an identification of a source for additional health information, and, where appropriate, more detailed technical information in supplemental documents.

If the art material presents an acute hazard the labeling must also warn of it. Labeling of art materials subject to LHAMA must also conform to labeling

requirements of section 2(p) of the FHSA and regulations issued thereunder.

ASTM D–4236 states certain considerations that the reviewing toxicologist must "take into account." These include "opinions of various regulatory agencies and scientific bodies * * *on the potential for chronic adverse health effects of the various components of the formulation."

B. Statement of Conformance

ASTM D–4236 provides for a statement of conformance that informs the purchaser that the product complies to the standard. The standard specifies that the conformance statement "should appear whenever practical on the product," but it could also be placed on (1) the individual product package, (2) a display or sign at the point of purchase, (3) separate explanatory literature available on request at the point of purchase, or (4) a response to a formal request for bid or proposal.

The Commission interprets this provision of ASTM D–4236 to require that with every art material product there must be a conformance statement or, if it presents a chronic hazard, the product must have an appropriate precautionary label. Although the language of ASTM D–4236 does not clearly mandate a conformance statement for all art materials, the Commission believes that allowing use of conformance statements for some products but not others would result in confusion to purchasers. Purchasers would be in doubt whether an unmarked art material has been found not to present a chronic hazard or simply has not been reviewed at all. ASTM D–4236 expresses a preference that the conformance statement appear on the product, but the other options mentioned in the standard will also satisfy the conformance statement requirement.

C. Telephone Number

ASTM D–4236 requires that the precautionary label on an art material that has been determined to present a potential chronic health hazard must identify a source for additional health information. The ASTM D–4236 standard provides three examples of such a statement: (1) provision of a 24-hour toll free telephone number, (2) a statement to contact a physician, or (3) a statement to call the local poison control center.

The LHAMA requires, however, that "art materials that require chronic hazard labeling * * * must include on the label * * *, an appropriate telephone number." 15 U.S.C. 1277(b) (5). Thus, Congress has required that an actual telephone number appear on the label. The Commission believes that "an appropriate telephone number" is one which will enable the purchaser to obtain additional information about the product's potential chronic hazard. The number could be that of the producer or repackager or another source that could provide such information. However, the label must contain a phone number, not just a statement to contact a doctor, and it must be a United States telephone number.

D. Standard is Applicable only to Art Materials

The Commission emphasizes that the requirements of ASTM–D4236 as modified by LHAMA are applicable only to art materials. Thus, only producers and repackagers of art materials must submit product formulations to toxicologists to determine the product's chronic hazard potential and appropriate labeling. Non-art materials must be properly labeled under the FHSA if they are hazardous, but the FHSA does not impose any specific review procedure upon manufacturers of non-art materials. Rather it is the manufacturers' responsibility to determine by appropriate means whether their non-art material product is hazardous.

Congress provided a very broad definition of art material or art material product in LHAMA. The term is defined as "any substance marketed or represented by the producer or repackager as suitable for use in any phase of the creation of any work of visual or graphic art of any medium," excluding products subject to the Federal Insecticide, Fungicide, and Rodenticide Act or to the Federal Food, Drug, and Cosmetics Act. Although the Commission believes that the determination of what is or is not an art material must be made on a case by case basis, there are some general principles that the Commission believes will be helpful in enforcing the requirements for art materials.

The broad statutory definition could be interpreted to include many items not traditionally considered art materials, such as the many kinds of tools and implements used in the process of creating a work of art. The Commission does not believe that such a broad sweeping definition was intended by Congress. Statements during floor debates on the LHAMA amendment indicate a narrower interpretation. Examples noted are solvents in cements, permanent markers, and inks; lead in paints, clay, and glazes; cadmium in silver solders. 134 Cong. Rec. S16838 (Oct. 19, 1988) (statement of Sen. Gore). Similar examples also cited were solvents in oil painting and silk screening; solders for stained glass; lead in paints and ceramics; and asbestos in talcs and clays. *Id.* at S16838 (statement of Sen. McCain).

The Commission believes that under the statutory definition of "art material" three general categories can be discerned as follows:

1. Those products which actually become a component of the work of visual or graphic art, such as paint, canvas, inks, crayons, chalk, solder, brazing rods, flux, paper, clay, stone, thread, cloth, and photographic film.

2. Those products which are closely and intimately associated with the creation of the final work of art, such as brush cleaners, solvents, ceramic kilns, brushes, silk screens, molds or mold making material, and photo developing chemicals.

3. Those tools, implements, and furniture that are used in the process of the creation of a work of art, but do not become part of the work of art. Examples are drafting tables and chairs, easels, picture frames, canvas stretchers, potter's wheels, hammers, chisels, and air pumps for air brushes.

Although products falling in the third category could come within a broad interpretation of the term "art material," the Commission does not believe that Congress intended such a sweeping interpretation. Therefore, as a matter of enforcement policy, the Commission will not require that products falling in this third category comply with the standard for art materials. This means that the Commission will not require that formulations for such products be reviewed by a toxicologist. Manufacturers of such products would not be required by the Commission to submit their review criteria or lists of products requiring chronic hazard labels to CPSC. Nor do they have to provide a conformance statement for their products. However, the FHSA requires that all household or children's products (whether art materials or not) must be appropriately labeled if they are or contain a hazardous substance. 15 U.S.C. 1261(p). Thus, even a product that falls in the third category above must be appropriately labeled if it is toxic (acutely or chronically) and may cause serious injury or illness through reasonably foreseeable use.

This discussion is intended to provide some guidance on how the Commission interprets the statutory definition. Examples given are intended to illustrate the categories the Commission envisions. In making the determination of whether a product is an art material,

the Commission would consider the intended and anticipated uses of the product as indicated by, for example, its packaging and promotion. Firms that are uncertain whether their materials fall within the scope of this enforcement policy may request guidance from the Commission staff by addressing their inquiries to the compliance staff of the headquarters or the regional offices.

LHAMA made ASTM D–4236 a Commission regulation issued under section 3(b) of the FHSA. Section 3(b) authorizes the Commission to issue additional labeling requirements for "hazardous substance(s) intended, or packaged in a form suitable, for use in the household or by children." 15 U.S.C. 1262(b). When Congress enacted LHAMA it did not expand the Commission's authority under section 3(b) of the FHSA. Thus, there is a very narrow category of art material products, those that have no significant marketing except to schools for adults or to businesses for the use of adults away from the household, that are not subject to the FHSA. The Commission anticipates that very few products would fall within this category. The Commission's regulations at 16 CFR 1500.3(c)(10)(i) provide guidance on what types of products are considered to be intended, or packaged in a form suitable for use in the household. That regulation states in part: "the test shall be whether under any reasonably foreseeable condition of purchase, storage, or use the article may be found in or around a dwelling."

E. Board-Certified Toxicologist

ASTM D–4236 requires that art material formulations be reviewed by a toxicologist. It defines the term "toxicologist" as "any individual who through education, training, and experience has expertise in the field of toxicology, as it relates to human exposure, and is either a toxicologist or a physician certified by a nationally recognized certification board."

LHAMA did not alter this requirement of review or the definition of toxicologist. Several commenters expressed concern that allowing only board-certified toxicologists and physicians is too limited and that many toxicologists who are not certified would also be capable of making the determinations required under ASTM D–4236. However, this requirement of board certification is part of the standard made mandatory by LHAMA. LHAMA provides for the Commission to amend the standard if it follows certain procedures. The Commission cannot abolish the requirement of board certification without following these procedures. However, in enforcing LHAMA the Commission is primarily concerned that the person reviewing formulations has sufficient knowledge based on a combination of education, training, and experience and that the reviewer uses appropriate criteria to recommend complete and accurate labeling. Any enforcement action would be based on the failure to conduct an adequate product review resulting in noncomplying cautionary labeling, rather than on the fact that a toxicologist is not certified. As a matter of enforcement policy, the Commission will not require that all art material reviews be done by a board-certified toxicologist. When the Commission considers rulemaking to amend the codified ASTM standard, it will consider deleting the requirement of board certification.

F. Amendment of ASTM D–4236

Congress provided that the Commission can revise the standard LHAMA mandated if the Commission determines that the standard is "inadequate for the protection of the public interest" and that the Commission's amendment will adequately protect the public interest. The amendment must be issued in accordance with the procedures of section 553 of the Administrative Procedure Act allowing an opportunity for notice and comment. In addition, the Commission must allow interested persons an opportunity to present oral comments.

If ASTM proposes a revision to D–4236, LHAMA provides that the Commission shall incorporate it if the Commission determines that the revision is in the public interest. The Commission must provide for notice and comment concerning the revision. 15 U.S.C. 1277(c).

G. Annexes and Appendix

ASTM D–4236 contained two annexes and one appendix. One of the annexes provides chronic hazard statements. Section 5.2 of ASTM D–4236 (§ 1500.14(b)(8)(i)(E)(*2*) in the codification) states that potentially chronic hazards must be stated "substantially in accordance with statements" in the first annex. The second annex provides precautionary statements. Section 5.4 (§ 1500.14(b)(8)(i)(E)(*4*) in the codification) states that "appropriate precautionary statements as to work practices, personal protection, and ventilation requirements shall be used substantially conforming to those" in the second annex. These annexes are §§ 1500.14(b)(8)(i) (F) and (G) in the codification below.

The Commission considers the chronic hazard statements and the precautionary statements to be examples of appropriate statements when a product presents a chronic hazard. The Commission considers these lists to be suggestive, and does not consider these to be the only statements of hazard or precaution that could be used.

Because products other than art materials that are subject to the FHSA may present similar chronic hazards, manufacturers of non-art materials may find these lists of chronic hazard statements and precautionary statements helpful in labeling their products under section 2(p) of the FHSA. All products subject to the FHSA must be appropriately labeled for any acute hazards they present.

In addition, the staff is in the process of updating its 1979 labeling guide for products that present an acute hazard. The updated version would include recommendations on designing warning labels and examples of warning statements for products that pose a chronic hazard. This labeling guide would be appropriate for all products subject to the FHSA.

ASTM D–4236 also contained an appendix which provided guidelines for organizations that certify an art material conforms to the requirements of ASTM D–4236. In the proposed codification published on April 17, this appendix was erroneously listed as § 1500.14(b)(8)(i)(H) of the codified standard rather than as an appendix. The final codification corrects this and clarifies that these guidelines are not mandatory.

IV. Issues Concerning the Chronic Hazard Guidelines

A. Broad Scope

LHAMA requires the Commission to issue guidelines for determining when an art material presents a chronic hazard. When the Commission published proposed guidelines, it stated that the guidelines could be used for non-art materials as well because the basic principles behind the guidelines would apply broadly to all products subject to the FHSA. Although the Commission received several comments concerning the scope of the guidelines, the Commission is maintaining the broad scope of the proposed guidelines.

Essential to understanding this view is the fact that the guidelines are not mandatory. The Commission's purpose in issuing these guidelines is not to

create a static classification system that must be followed by manufacturers. Rather, the FHSA makes it the manufacturers' responsibility to properly label their products. The guidelines are intended to help the manufacturer in making that determination. The process set out in the guidelines would not be affected by the classification of a product as an art material or other product subject to the FHSA. The scientific principles upon which the guidelines are based are the same. It makes sense then, that the guidance available for art materials would also be useful for non-art materials. (The codification of ASTM D–4236, however, applies only to art materials. Thus, only manufacturers and repackagers of art materials must submit their products' formulation to a toxicologist and must supply the Commission with their criteria for determining chronic toxicity and a list of art materials that require chronic hazard labeling.)

The Commission has authority to issue these guidelines under the FHSA as part of its ability to regulate hazardous substances under that statute. As discussed in section VII.A. of the preamble, the FHSA provides the Commission with clear authority over household and children's products that present a chronic hazard. Section 2(p) of the FHSA requires appropriate labeling of hazardous substances, chronic as well as acute. It is within the Commission's general authority under the FHSA to provide guidance to manufacturers on determining whether a product presents such a hazard and therefore must be labeled. By issuing the guidelines the Commission is not imposing new requirements beyond those already made by section 2(p) of the FHSA.

B. Complexity of Determination

The Commission recognizes that determining if a product presents a chronic hazard is highly complex and often relies upon incomplete or non-conclusive data. The determination requires the exercise of professional judgment.

Under the FHSA, for a substance to be a "hazardous substance" (and thus require labeling) it must have the potential both to be toxic *and* to "cause substantial personal injury or illness during or as a proximate result of any customary or reasonably foreseeable handling or use, including reasonably foreseeable ingestion by children." The fact that a product contains a toxic substance does not make the product a "hazardous substance" under the FHSA. The second component of the definition must be considered. For instance, the manufacturer must account for the amount of the substance in the product, for the bioavailability of the substance, and for exposure to the substance. This second aspect of the definition makes the determination of the need for labeling a complex decision.

C. Customary or Reasonably Foreseeable Handling or Use

Some comments expressed concern that the Commission had not provided sufficient guidance on the meaning of the phrase "customary or reasonably foreseeable handling or use" that is part of the definition of "hazardous substance" in the FHSA. The precise meaning of the phrase will, of course, depend on the product at issue. However, the Commission's regulations at 16 CFR 1500.3(c)(7)(iv) provide some general guidance and state:

> Reasonably foreseeable handling or use includes the reasonably foreseeable accidental handling or use, not only by the purchaser or intended user of the product, but by all others in a household, especially children.

Thus, in general, the Commission has taken a fairly broad view of what is reasonably foreseeable handling or use.

As far as the guidelines are concerned, defining a reasonable use scenario can be the most uncertain part of exposure assessment. As the guidelines indicate, there are many variables to consider. Exposure assessment is a mixture of science, knowledge of the product under consideration, and common sense. Unfortunately, due to the large number of art materials and other household and children's products, it is impossible to specify typical scenarios for all cases. Nevertheless, scientists have conducted exposure and risk assessments for many products.

D. Guidelines Do Not Require Submission of Data

The guidelines are intended as an aid to manufacturers in making their determination of whether a product is a hazardous substance due to chronic toxicity and thus would require labeling under the FHSA. The guidelines themselves establish no mandatory requirements.

LHAMA and the modified version of ASTM D–4236 mandated by that law do place certain requirements upon the manufacturers and repackagers of art materials. Thus, only the formulations of art materials must be submitted to a toxicologist for review. For other products, as has always been the case under the FHSA, it is up to the manufacturer to determine proper labeling. The FHSA does not establish a required procedure for doing this. The guidelines do not change this arrangement, but they provide guidance for making that determination.

E. Risk Assessment for Children's Products

For the reasons explained below, the Commission has decided not to include additional safety factors for children's products in the final guidelines and definition. As with other scientific issues of this type, support exists both for applying an additional safety factor of ten for children's products and for not doing so. For example, a child might be more sensitive than an adult in the case of lead poisoning, while adults may be more sensitive than children in the case of neurotoxicity of certain pesticides.

Since, on the basis of much of the theory and data, it was very possible that children would be more susceptible to many substances, the additional factors of ten were proposed to provide an extra margin of safety for children. After reviewing the comments relating to this issue and considering how the additional protective levels would be implemented, the Commission has decided not to include these additional safety factors for children's products. A more detailed response to these comments and a discussion of the analysis followed by the Art & Craft Materials Institute ("ACMI") compared with that recommended in the guidelines is contained in the comment section of the preamble, section VIII.

As a result of analysis of the comments, several overall themes have become clear. First, CPSC's proposed methods of calculating the allowable daily intake ("ADI") for adults are similar, or result in a lower allowable risk, to those allowed by other agencies for both children and adults. Second, ACMI's conclusion that the labeling status of many art materials would be affected is not consistent with the intended use of CPSC's guidelines, since it appears that in many cases, ACMI has applied redundant safety factors in its exposure assessments which result in the overestimation of risk. Third, the ten-fold factor for children, if applied as the staff intended and without redundant safety factors, would have minimal economic impact.

However, there are difficulties in determining if a product that poses a chronic hazard would be used by children. Because many factors would have to be considered, determination of whether children would use these materials would have to be made on a

case-by-case basis. Factors that would be considered include the appeal of the product in attracting and sustaining use; ability of a child to use the product; ability to appreciate the product; adult's perception of intended use, marketing, packaging, advertising, and promotion of the product; and the manufacturer's stated intent. In many cases, it may be impossible to conclude that a given product would not be used by children. Thus, most products could be subject to the additional factor of ten for children. A net effect of requiring labeling for all products exceeding a cancer risk of 1×10^{-7}, for example, was not the intent of the proposed guidelines. Thus, the final guidelines do not provide additional safety factors for children's products.

F. Legal Effect of Guidelines

The guidelines are not issued as substantive binding rules, but are a non-mandatory statement of Commission policy. They explain how the Commission determines whether a product presents a chronic hazard, and they provide guidance to those in industry whose responsibility it is to determine if their product is properly labeled under the FHSA. Some minor changes have been made in the final guidelines to clarify their non-mandatory nature.

LHAMA required the Commission to issue chronic hazard guidelines for art materials. Congress directed the Commission to develop guidelines, not a binding rule that would automatically categorize all art materials. Thus, the guidelines set forth recommended procedures to be followed with the use of expert judgment rather than mechanically. As explained elsewhere, the Commission believes that these guidelines will also be helpful to the manufacturers of non-art materials subject to the FHSA.

V. Issues Pertinent to All Three Actions

A. Preemption

The Commission received numerous comments concerning the issue of preemption of state laws and regulations.

Section 18(b)(1)(A) of the FHSA provides generally that:

> If a hazardous substance or its packaging is subject to a cautionary labeling requirement under section 2(p) or 3(b) designed to protect against a risk of illness or injury associated with the substance, no State or political subdivision of a State may establish or continue in effect a cautionary labeling requirement applicable to such substance or packaging and designed to protect against the same risk of illness or injury unless such cautionary labeling requirement is identical to the labeling requirement under section 2(p) or 3(b).

15 U.S.C. 1261n.

LHAMA mandated ASTM D–4236, with certain modifications, as a Commission rule under section 3(b) of the FHSA. Since LHAMA amended the FHSA, the FHSA's preemption provision applies. Thus, this standard for labeling of art materials, as a 3(b) rule, preempts non-identical state and local labeling requirements that are designed to protect against the same risk of illness or injury as ASTM D–4236, as modified by LHAMA.

LHAMA directed the Commission to issue chronic hazard guidelines. The guidelines finalized today are issued pursuant to that provision of LHAMA and the Commission's general authority under the FHSA. As explained above, the standard ASTM D–4236 as mandated by LHAMA has preemptive effect if the other conditions of FHSA section 18(b)(1)(A) are met. The guidelines, however, are not a labeling requirement. They do not require that any particular product be labeled. The requirement that hazardous substances be labeled appropriately comes from section 2(p), not the guidelines. The guidelines are a non-mandatory guide for determining whether a product presents a chronic hazard. Thus, the guidelines themselves do not have a direct preemptive effect. As may affect labeling for chronic hazards, however, they may have an indirect preemptive impact because the labeling requirement of section 2(p) could preempt different state or local requirements.

The supplemental definition of "toxic" is not itself "a cautionary labeling requirement" and would not, in itself, preempt a state or local definition of "toxic." However, the supplemental definition defines a term that is necessary to the labeling requirements of section 2(p) and section 3(b) just as the existing regulatory definition of toxic, which applies to acute toxicity, works together with the labeling requirement. For example, while a different state definition of "toxic" might not be preempted automatically, a state labeling requirement that exempts from labeling a hazardous substance that is hazardous because of the risk of chronic toxicity (as defined by the supplemental regulatory definition) could be preempted.

B. The CHAP Process

Another comment raised frequently concerned the appropriateness of convening a Chronic Hazard Advisory Panel ("CHAP") to develop or evaluate chronic hazard guidelines. As most commenters seemed to recognize, neither the FHSA nor LHAMA requires the Commission to convene a CHAP before issuing chronic hazard guidelines. The Commission must establish a CHAP before initiating rulemaking to ban a substance under section 2(q)(1) of the FHSA relating to the risk of cancer, birth defects, or gene mutations from a consumer product. 15 U.S.C. 2080(b)(1). The CHAP must submit a report to the Commission concerning whether a substance in the product is a carcinogen, mutagen, or teratogen. *Id.* Thus, the only action under the FHSA that requires the Commission to consult a CHAP is rulemaking to ban a particular substance.

In issuing these guidelines, however, the Commission is not promulgating a binding rule, is not seeking to ban a substance, and is not taking action with respect to any particular substance. Issuance of these guidelines is not appropriate for CHAP review. The CHAP's purpose is to review particular products and advise the Commission on the chronic risk posed by that product or by specific substances contained in the product. The chronic hazard guidelines being issued do not relate to any particular products or substances, but they provide guidance for determining, in general, whether a product can present a chronic health hazard.

The Commission certainly agrees that the guidelines should reflect sound scientific judgment and should be widely reviewed and commented upon. Other Federal agencies and interagency groups have reviewed relevant parts of the guidelines at CPSC staff's request prior to their publication for public comment, to ensure that the latest science has been addressed. The Commission published proposed guidelines and sought written comments even though LHAMA did not require the Commission to do so. The Commission also received comments as a result of the public hearing held in October. The Commission does not believe, however, that the CHAP process is the most appropriate means to obtain views on the guidelines.

CPSC staff is involved in many government and nongovernment activities to ensure consistency, use of the latest data, and use of the most current scientific approaches to the risk assessment process. These groups include the Federal Coordinating Council on Science, Engineering, and Technology (FCCSET), the International Life Sciences Institute (ILSI), and the National Academy of Sciences (NAS) Committee on Risk Assessment Methodology (CRAM) processes. CPSC staff is also involved with a number of

interagency committees such as the Interagency Pharmacokinetics Group and the Interagency Committee on Neurotoxicity (which, at CPSC's request, reviewed the neurotoxicity guidelines before they were proposed). Participating in these efforts, the consideration of the comments received by expert scientists, and the fact that there are very few departures in the guidelines from generally accepted risk assessment methodology, lends credence to the assertion that the guidelines are scientifically defensible and reasonable.

C. Enforcement

The Commission emphasizes that there has not been, nor will there be, enforcement of the guidelines as such. Even once the guidelines become final they will not be treated as mandatory requirements which must be followed by manufacturers. A firm could follow a different but sound and scientifically supportable analysis to determine whether a product presents a chronic hazard.

However, the Commission has enforced, and will continue to enforce, the FHSA requirements that a household product that is or contains a hazardous substance must be appropriately labeled to advise of the hazard. In addition, the Commission has sought to enforce the specific, and largely procedural, requirements that LHAMA mandated for art materials. During 1991, the Commission staff contacted all known manufacturers and repackagers of art materials to advise them of the procedural requirements of LHAMA which went into effect on November 18, 1990. In 1992, inspections are being made of firms that have not given some indication of compliance or if there is some other reason to suspect noncompliance. When firms are found with products or practices that are not in compliance, they will normally be given the opportunity to voluntarily make the necessary corrections. Only when a firm has demonstrated a refusal to cooperate voluntarily would legal action be sought to obtain compliance.

VI. The Chronic Hazard Guidelines

A. General

1. Toxicity and Exposure

As explained earlier, the definition of "hazardous substance" requires both that the substance fall into one of the designated hazard categories, in this case that of "toxic," and that the substance "may cause substantial personal injury or illness during or as a proximate result of any customary or reasonably foreseeable handling or use, including reasonably foreseeable ingestion by children." Any of the chronic hazards, including but not limited to cancer, neurotoxicity, or developmental or reproductive toxicity addressed by this notice constitute "substantial personal injury or illness." In order to determine whether a product should be regarded as a hazardous substance, one must determine not only that the product has the potential to be toxic, but that in any customary or reasonably foreseeable handling or use persons are exposed to the toxic component(s) in a way that presents a significant risk of the substantial adverse health effect potentially associated with the product. This latter factor can be considered to reflect the person's exposure to the toxic component or the bioavailability of the component.

2. Nature of the Guidelines

Except as specifically noted, the current scientific knowledge concerning chronic hazards is insufficient to allow the guidelines to specify criteria that can be mechanically applied to determine whether a product is toxic. Interpretation of certain points in the guidelines will likely require expert knowledge and the application of professional judgment. Thus, the guidelines do not present a simple blueprint into which a given set of facts may be inserted to receive a certain determination. Rather, careful expert judgment must be used. If questions arise concerning matters not clarified by these guidelines, guidance may be obtained from previous Commission toxicity, exposure, and risk assessments; or from the Commission's Directorate for Health Sciences.

These guidelines contain a number of assumptions, methodologies, and procedures for determining chronic hazard and risk. While these are currently the most scientifically justified choices in the opinion of the Commission, the Commission recognizes that new data and methodologies continue to be developed. Accordingly, all default assumptions (i.e., numerical factors to be used in the absence of data for the particular substance or circumstance) contained in the following sections on hazard and risk determination may be replaced as new data become available.

In determining whether a substance should be regarded as hazardous all available scientific evidence should be considered. However, the guidelines do not require any additional laboratory tests to determine toxicity or exposure.

A condensed version of the guidelines will appear at 16 CFR 1500.135. A supplemental definition of "toxic" that defines chronic toxicity will appear at 16 CFR 1500.3(c)(2)(ii). The guidelines summarize discussions contained in documents prepared by the Commission's Directorate for Health Sciences. This preamble is also drawn from the backup documents and is intended to aid in interpretation of the guidelines. Copies of the backup documents are available at the Commission's Office of the Secretary, Consumer Product Safety Commission, room 428, 5401 Westbard Avenue, Bethesda, Maryland.

B. Carcinogenicity

1. Introduction

This section discusses the chronic hazard guidelines concerning carcinogenicity. The guidelines for determining chronic hazards by reason of carcinogenicity are especially needed because of (1) the long latency period between the initial exposure to a carcinogen and the appearance of tumors, (2) the fact that humans are exposed to multiple carcinogenic agents during the latency period under generally uncontrolled conditions (and other factors discussed below), and (3) the controversies that have surrounded the conditions under which tests showing a carcinogenic response in animals should be considered relevant to human risk. These factors make it impossible to demonstrate conclusively that such substances are human carcinogens. Nevertheless, considerable agreement exists in the scientific community as to the nature and amount of evidence that should exist in order to conclude that a substance is a likely human carcinogen.

The intent of the guidelines is to incorporate those areas where there is a substantial consensus as to the evidence needed to support a conclusion that a substance is a likely human carcinogen. For substances where the available evidence does not meet this standard, or where there is controversy about how the evidence should be evaluated, the Commission may proceed by rulemaking, as provided in section 3(a) of the FHSA, or by enforcement actions on a case-by-case basis to resolve the question of whether the substance presents sufficient evidence of an ability to be carcinogenic in humans that the substance should be considered toxic.

Evidence for carcinogenicity largely comes from two sources: Human studies (epidemiology) and animal studies (long-term carcinogen bioassay). Epidemiology is a broad medical science that deals with the incidence,

distribution, and control of disease in a population. Results from these epidemiologic and animal studies are supplemented with available information from short-term tests, pharmacokinetics (absorption, distribution, metabolism, and elimination of substances), and other relevant toxicological data. The guidelines would evaluate the toxicity of a substance on the basis of potential carcinogenicity by evaluating the available human and animal data. Under the guidelines, substances for which "sufficient evidence" exists to demonstrate carcinogenicity from studies in humans would be considered to be toxic. In addition, those substances for which there is "limited evidence" of carcinogenicity in humans or "sufficient evidence" of carcinogenicity in animals are considered toxic, except that evidence derived from animal studies that has been shown not to be relevant to humans is not included.

As noted above, it will be necessary to continue to rely on rulemaking under section 3(a) of the FHSA, or on enforcement actions, to resolve uncertainties that are not addressed by these guidelines. In this regard, the Commission is aware that the criteria stated in the guidelines do not lend themselves to a mechanical application. A number of the criteria include statements that themselves can be applied to particular chemicals only by the exercise of expert technical judgment. For example, one of the factors stated below for determining that an epidemiological study shows a causal relationship between exposure to an agent and cancer is that all possible confounding factors which could account for the observed association are eliminated after consideration. Expert technical judgment is required to identify possible confounding factors and to evaluate whether the available data are adequate to eliminate the factors as causes of the observed association. In some instances, this determination will not be straightforward. In these cases, the guidelines will not resolve the controversy, and it may be appropriate for the Commission to conduct rulemaking to resolve the controversy, or to bring enforcement actions in which the toxicity of the substance would be established on a case-by-case basis.

Although there are many difficult issues related to the interpretation of cancer studies in animals and humans, criteria for defining carcinogenicity have been established by several groups, such as the International Agency for Research on Cancer (IARC), the American National Standards Institute (ANSI), and the U.S. Environmental Protection Agency (EPA)

The following discussion explains the scientific principles and evidentiary approach upon which a determination that a substance is a "sufficient evidence" human or animal carcinogen or a "limited human evidence" carcinogen would be based. The criteria that are commonly used to evaluate the evidence derived from human and animal carcinogenesis data outlined in the following sections are similar to those of IARC and EPA, except for a few differences that are explained below.

2. Assessment of Evidence for Carcinogenicity from Studies in Humans.

a. *Discussion.* Epidemiological studies are the only direct means of assessing carcinogenicity of a substance in humans (the Office of Science Technology Assessment and Policy (OSTP), 1985, Principle # 15). Epidemiologic data are obtained from occupational, therapeutic or consumer exposure to a substance. These studies can provide sufficient evidence for a causal hypothesis (such as that between cigarette smoking and lung cancer) and compelling reasons for prevention of a health hazard (OSTP, 1985, p. 10421). They examine both the distribution of a disease using descriptive studies (correlational approaches) and determinants of a disease using analytical studies (case control and cohort methods) (OSTP, 1985, Principles ##16 & 17, p. 10377).

A good quality epidemiological study should have a clear and detailed description of the study population, disease, and exposure. The design of the study should have dealt with bias and confounding factors that can influence the risk of disease by matching, or the analysis should have dealt with bias and confounding factors by statistical adjustments (IARC, 1987, Suppl. 7, p. 26). The study should describe the determination of statistical parameters, such as relative risk, odds ratio, absolute disease rate, confidence intervals, significance tests, and adjustments made for confounding factors. The study should also describe the selection and characterization of exposed and control population, the adequacy of duration, the quality of follow up, and the identification of bias and confounding factors. A causal relationship is strengthened by the observation of a dose-response relationship, the consistency and reproducibility of results, the strength and specificity of the association, the mechanism of action, and other considerations (OSTP, 1985, p. 10421).

In assessing the strength of epidemiological studies, it is necessary to take into account the possible role of bias, confounding factors, and chance (IARC, 1987, Suppl. 7, p. 26; OSTP, 1985, Principle #18, p. 10377). "Bias" means that the operation of certain factors in the design and execution of a study lead erroneously to a stronger or weaker association between an agent and the disease than in fact exists. Confounding factors are factors associated with a test agent which create a situation in which the relationship between the test agent and a disease is made to appear stronger or weaker than it truly is as a result of the association between the confounding agent(s) and the test agent. Chance relates to the statistical significance of the observed causal association between the exposure to the agent and the development of the disease. This is ascertained by proper statistical analysis of the data. The statistical power of a study depends upon the size of the study group, the number of subjects exposed, and the level of excess risk which is required to be detected (OSTP, 1985, p. 10423).

The common problems encountered in epidemiological studies involving chemicals are: Long latent periods that exist between exposure to a carcinogenic agent and the development of cancer; inability to control for confounding risk factors; exposures to mixtures of chemicals; frequent absence of appropriate groups from the study; and difficulty in obtaining accurate and unbiased historical exposure assessment, disease ascertainment, and direct detection of relatively low level cancer risk (OSTP, 1985, p. 10424). These studies are inherently capable of detecting only comparatively large increases in the relative risk of cancer. Negative results even from high quality epidemiological studies cannot prove the absence of an association between the carcinogenic effect and the exposure (OSTP, 1985, Principle # 19, p. 10377). However, a well-designed and conducted epidemiological study with well-defined and usable exposure data can be used to assess upper limits of risk. Such a study is especially useful in this regard if there is animal evidence from well-conducted studies to show that the agent is potentially carcinogenic in humans (EPA, 1986, p. 33996).

The criteria stated below for assessing the evidence of carcinogenicity derived from human studies agree with those outlined by EPA, except that the "No Data Available" and the "No Evidence of

Carcinogenicity" classifications are deleted because they are not necessary for the purpose of determining toxicity. The criteria also agree with those of IARC, except that the "Evidence Suggesting Lack of Carcinogenicity" classification is deleted for the same reason, and the criteria suggested below include life-threatening benign tumors in the evaluation of human studies for the purpose of protecting public health. In this regard, the Commission agrees with EPA's position on benign tumors, because the threat to life is the most important consideration in health risk evaluations. Benign tumors could be life threatening if they are critically located, such as brain tumors (gliomas), which can compress and destroy the surrounding brain tissue, or tumors located in endocrine glands (hormone producing glands, like the pancreas, or pituitary), which can cause an imbalance of critical hormones.

The American National Standards Institute (ANSI, Z129.1–1988) did not specify criteria for the evidence of carcinogenicity derived from epidemiological studies but made use of epidemiological data in its overall categorization of carcinogens.

A causal relationship between exposure to an agent and cancer is established if one or more epidemiological investigations that meet the following criteria show an association between cancer and exposure to the agent: (1) No identified bias that can account for the observed association has been found on evaluation of the evidence; (2) all possible confounding factors which could account for the observed association can be ruled out with reasonable confidence, and (3) based on statistical analysis, the association has been shown unlikely to be due to chance.

b. *Categories of human evidence.* The following categories of evidence from human studies have been developed.

i. Sufficient evidence of carcinogenicity in humans. The evidence is considered sufficient when all three of the above criteria for establishing a causal relationship between exposure to the agent and development of cancer are fully met. Evidence in this category would establish that a substance is toxic.

ii. Limited evidence of carcinogenicity in humans. The evidence is considered limited for establishing a causal relationship between exposure to the agent and cancer when a causal interpretation is credible, but chance, bias, or other confounding factors could not be ruled out with reasonable confidence. Evidence in this category would establish that a substance is toxic.

iii. Inadequate evidence of carcinogenicity in humans. The evidence is considered inadequate when all of the above three criteria for establishing a causal relationship between exposure to the agent and cancer are not met, leaving an alternative explanation to be equally likely. Evidence in this category is insufficient to establish that a substance is toxic, but does not imply that non-carcinogenicity has been proven.

3. Assessment of Evidence for Carcinogenicity in Animals

a. *Relevance of animal data to humans.* In the absence of adequate human data, the next best source of evidence of the carcinogenicity of chemicals is animal data, which are considered relevant to humans for the following reasons. (1) Mechanistically, an induction of heritable changes in the cellular DNA is generally considered to be the first and major event in carcinogenesis, and DNA is chemically similar in humans and animals. (2) Several agents, *e.g.*, 4-aminobiphenyl, bis (chloromethyl) ether, diethylstilbestrol, melphalan, methoxalen plus ultraviolet radiation, mustard gas and vinyl chloride were first found to be carcinogenic in animal studies before they were found to be carcinogenic in human studies (IARC, 1987, Suppl. 7, p. 22). (3) Information evaluated by IARC shows that, out of the 44 agents for which there is "sufficient" or "limited" evidence of carcinogenicity to humans available, all 37 agents that have been tested adequately were found to produce cancer in at least one animal species. Based on this observation, IARC stated: "Although this association can not establish that all agents that cause cancer in experimental animals also cause cancer in humans, nevertheless, in the absence of adequate data on humans, it is biologically plausible and prudent to regard agents for which there is sufficient evidence (see p. 30) of carcinogenicity in experimental animals as if they presented a carcinogenic risk to humans." (IARC, 1987 Suppl. 7, pp. 22 & 30).

b. *Factors in the consideration of animal data.* Animal studies to determine the carcinogenicity of an agent involve both exposure of laboratory animals to the agent for a long period of time (several months to the entire life span) and histopathologic examination of the animals at the end of the study to detect an exposure-related increase in tumor incidence. Criteria for assessing the quality and adequacy of animal studies have been discussed by various groups (OSTP, 1985; National Toxicology Program (NTP), 1984). A good animal study (carcinogen bioassay) requires consideration of a variety of factors. For example: (1) The species and strain of animals used in the study should have a sufficient historical data base; (2) animals should be disease free and kept under good housing conditions and animal care; (3) the number of animals/group/sex should be adequate; generally 50 or more animals of each sex/group should be used; (4) animals should be randomly distributed in the groups; (5) dose levels selected should be adequate; at least one of the doses should be close to the maximum tolerated dose (MTD); doses in excess of the MTD may lead to increased mortality excessive toxicity, or other unphysiologic conditions not considered desirable in a carcinogen bioassay (OSTP, 1985, p. 10413, Principle #4, p. 10376); and (6) exposure duration and frequency should be adequate (daily exposure by oral or inhalation routes for a two-year period is generally used in rodents) (NTP, 1984).

Other factors associated with a good animal cancer bioassay or study that must be considered in assessing the evidence are: (1) Whether data collection and reporting are complete and clear, (2) whether routes, exposure patterns, and possible mechanisms of cancer induction are relevant to the human situation, *e.g.*, tumor development only at the site of transplant or injection of a material, or bladder tumors in the presence of bladder stones (OSTP, 1985, p. 10414; Principle # 4, p. 10376), (3) whether metabolic-pharmacokinetic properties are affected, and whether pathways required for activation of the agent to produce cancer are lacking in humans; if humans do not have the same metabolic pathway found necessary in the test animal for the carcinogenic effect, the evidence may not be relevant to humans, (4) results of short-term *in vivo* and *in vitro* tests provide additional information concerning a judgment of carcinogenicity of a chemical (OSTP, 1985, Principle #5, p. 10376), and (5) whether the methods used for statistical analysis are clearly stated and are generally accepted techniques for analyzing carcinogen bioassays (IARC, 1987, Suppl. 7, p. 26; OSTP, 1985, p. 10417).

The confidence in evidence of carcinogenicity derived from animal studies increases: With an increase in the number of responding species, strains, sites, dose levels, experiments, or unusual tumor types; with the

increase in the statistical significance of increased tumor incidence over controls; with dose-related increases in the proportion of malignant tumors and total tumors; and with shorter times between the start of chemical exposure and the onset of the tumor.

Benign tumors in experimental animals frequently represent a stage in the evolution of malignant neoplasms, but they may be endpoints that do not readily undergo transition to malignancy (IARC, 1987, Suppl. 7, p. 23; OSTP, 1985, p. 10416). However, if an agent is found to induce only benign neoplasms, it should be suspected of being a carcinogen and it requires further investigation. Consistent with this observation is a recent review of over 300 National Toxicology Program (NTP) cancer bioassays which found only a few chemicals (3%) causing only benign tumors (Huff, 1989). Thus, when benign tumors occur together with malignant tumors from the same cell type in an organ or tissue, the benign tumors should be combined with the malignant tumors for evaluating the carcinogenic effect (OSTP, 1985, principle 8, p. 10376; see McConnell et al., 1986 for guidelines for combining benign and malignant tumors).

In evaluating carcinogenicity studies, tumor data at sites with high background rates, such as testicular, pituitary, and mammary tumors in certain strains of rats and lung and liver tumors in certain strains of mice, may require special consideration (OSTP, 1985, p. 10417; principle #9, p. 10377). For example, in the case of the male $B6C3F_1$ mouse (which has a high background of liver tumors), if the only tumor response is the increase in liver tumors in males, the evidence will normally be considered "sufficient" evidence of carcinogenicity if the other criteria of "sufficient" evidence as outlined in the following section (such as, tumor response in another strain, species, or experiment) are met. However, the determination could be changed on a case-by-case basis to "limited evidence" if the liver response or other high background response is necessary for the original "sufficient evidence" determination but consideration of certain factors, stated below, relating to the high background response support such a change. Factors to be considered are: (1) The tumor incidence is increased only in the highest dose, and/or only at the end of the study; (2) the proportions of malignant tumors are not substantially increased in a dose-related manner; (3) the tumors are predominantly benign; (4) shortening of the time to the appearance of tumors did not occur in a dose-related manner; (5) negative or inconclusive results are obtained from a spectrum of short-term tests for mutagenic activity; and (6) excess tumors are found to occur only in a single sex (EPA, 1986).

c. *Comparison with EPA criteria.* The guidelines concerning carcinogenicity derived from evidence from animal studies agrees with criteria promulgated by EPA, except for the following differences.

i. The "No Data Available" and the "No Evidence of Carcinogenicity" classifications of EPA are not used because they are not necessary for the purpose of assessing the toxicity of consumer products. CPSC does not maintain an inventory of chemicals, as EPA does for all chemicals in commerce (except for drugs, food additives, and cosmetics), and therefore such categories are not needed.

ii. An increased incidence of benign tumors, with an indication that the tumors have the ability to progress to malignancy, is included as a contributing response in the criteria for "sufficient evidence" of carcinogenicity. Such evidence of carcinogenicity would not be treated this way by EPA's criteria. The Commission, after careful review of the available studies, has concluded that if a benign tumor is known to have the potential to progress to malignancy, then for all practical purposes the tumor should be considered to have the same potential health risk as if it is a malignant tumor. In addition, benign tumors in experimental animals frequently represent a stage in the evolution of a malignant tumor, as stated earlier.

iii. Increased tumor incidences at independent multiple sites of origin in the same species and study are considered as separate responses. Such evidence would be considered as a single response by the EPA's criteria. The Commission believes that the ability of a chemical to independently produce tumors at multiple sites indicates that it has a wide range of carcinogenic potential, similar to such an indication from responses in multiple strains, species, or experiments.

d. *Comparison with IARC's criteria.* The consideration of carcinogenicity derived from animal studies is also in agreement with that formulated by IARC, with the following exceptions.

i. The "Evidence Suggesting Lack of Carcinogenicity" classification is deleted since it is not necessary for the purpose of determining toxicity.

ii. According to IARC's criteria, increases in incidence rates of certain neoplasms that are known to have high background rates could be viewed as a "limited evidence," as opposed to a "sufficient evidence," classification. EPA's criteria, on the other hand, provide that such evidence should contribute to the "sufficient evidence" determination, which could be changed to "limited evidence" on a case-by-case basis, depending upon the specific information as described above in the section dealing with tumor data at sites with high background rates (EPA, 1986). The Commission, after careful review of available data, concludes that EPA's criteria provide a more thorough analysis of whether the high background rate of tumors is confounding the observed correlation between exposure and cancer.

iii. An increased incidence of benign tumors only, with an indication of the ability of the tumors to progress to malignancy, would contribute to the "limited evidence" classification by IARC's criteria. However, such evidence is viewed by the Commission as a contributing response in the criteria for "sufficient evidence" of carcinogenicity, for the reasons described above in section B.3.c.(ii) discussing how the criteria differ from EPA's classification scheme.

iv. Increased incidence of tumors at independent multiple sites of origin in the same species and study are treated as discussed above in section B.3.c.(iii) concerning differences from EPA's classification scheme. IARC's approach is similar to that of EPA's.

e. *ANSI definitions.* ANSI Z129.1 (1988) did not specify criteria for the evidence of carcinogenicity derived from animal studies, but it made use of animal data in its overall definitions of carcinogenicity.

f. *Categories of animal evidence.* Based on current information, the Commission concludes that the following classifications represent the best scientific assessment and are most appropriate to classify the evidence derived from animal cancer bioassay studies.

i. Sufficient evidence of carcinogenicity in animals. "Sufficient evidence" of carcinogenicity requires that the substance has been tested in well-designed and -conducted studies (*e.g.*, as conducted by National Toxicology Program, or consistent with the OSTP guidelines) and has been found to elicit a statistically significant ($p<0.05$) exposure-related increase in the incidence of malignant tumors, combined malignant and benign tumors, or benign tumors if there is an indication of the ability of such benign tumors to progress to malignancy: (a) in one or

both sexes of multiple species, strains, or sites of independent origin or in experiments using different routes of administration or dose levels; or (b) to an unusual degree in a single experiment (one species/strain/sex) with regard to unusual tumor type, unusual tumor site, or early age at onset of the tumor. The presence of positive effects in short-term tests, dose-response effects data, or structure-activity relationships are considered additional evidence. If evidence of carcinogenicity in animals is sufficient, the substance will be considered toxic, in the absence of adequate conflicting data.

ii. Limited evidence of carcinogenicity in animals. "Limited evidence" of carcinogenicity means that the substance has been tested and found to cause any of the following: (a) a statistically significant ($p<0.05$) exposure-related increase in malignant, benign, or combined malignant and benign tumors in one or both sexes of only one species, strain, and site and such evidence otherwise does not meet the criteria defined for "sufficient evidence" in the above section; (b) evidence derived from studies which can be interpreted to show positive carcinogenic effects but which have some qualitative or quantitative limitations with respect to particulars, such as doses, exposure, followup, survival time, number of animals/group, or reporting of the data, which would prevent consideration of the evidence as "sufficient" (category i above); or (c) an increase in the incidence of benign tumors if there is no indication of the ability of the tumors to progress to malignancy. If only "limited" animal data exist for a substance, the substance will not be considered toxic under the definition on the basis of the limited animal data.

iii. Inadequate evidence of carcinogenicity in animals. "Inadequate evidence" of carcinogenicity includes that evidence which cannot be placed into "sufficient" or "limited" categories, or which is derived from poorly conducted studies with major qualitative and quantitative limitations, such as inadequate doses, too few animals/group, poor survival, or inadequate reporting, so that there can be no interpretation of the data as showing either the presence or absence of a carcinogenic effect. Data in this category do not establish a substance as toxic.

C. Neurotoxicity

1. Introduction.

This section discusses "neurotoxicity" for purposes of providing guidelines concerning neurotoxicity. The discussion presents a synopsis of criteria for the determination of the neurotoxicity of substances based on animal or human data. All neurotoxic effects, except those immediate effects which are rapidly and completely reversible following a short-term exposure, are considered chronic effects in the guidelines.

This discussion reflects the Commission's assessment of the most current scientific knowledge and consensus in this field (WHO, 1986; EPA, 1985; Spencer and Schaumburg, 1985; Hartman, 1988; OTA, 1990). For substances where the available evidence does not meet this standard, or where there is controversy about how the evidence should be evaluated, the Commission may proceed by rulemaking, as provided in section 3(a) of the FHSA, or by enforcement actions on a case-by-case basis to resolve the question of whether the substance presents sufficient evidence of an ability to be neurotoxic in humans that the substance should be considered toxic.

Test methods to determine certain neurotoxicity endpoints (manifestation of a neurotoxicological effect) are available (Anger, 1985, 1986, 1989; Baker, *et al.*, 1990; Johnson and Anger, 1983; Hartman, 1988; Tilson, 1989; EPA, 1985; WHO, 1986). Several federal agencies regulating toxic substances and drugs have guidelines to evaluate neurotoxicity as a part of acute and chronic toxicity testing and safety evaluation. The EPA has published neurotoxicity test guidelines (EPA, 1985) and is currently developing neurotoxicity risk assessment guidelines.

The U.S. National Institute of Occupational Safety and Health (NIOSH) has recommended national strategies for the prevention of neurotoxic disorders (NIOSH, 1988). NIOSH has listed 65 historically established human neurotoxic agents, major sources of exposure to them, neurotoxic effects associated with various agents, and chemicals for which neurobehavioral effects have been reported.

Evidence of neurotoxicity is evaluated by the quality and adequacy of the data and consistency of responses induced by a suspect neurotoxicant. Criteria to evaluate evidence derived from human and animal neurotoxicity data and the associated terminology outlined in the following sections are based on those of the World Health Organization (WHO), NTP, EPA, and NIOSH.

Evidence for neurotoxicity comes largely from human studies and animal studies. The guidelines would evaluate the toxicity of a substance on the basis of potential neurotoxicity based on available human and animal data. Under the guidelines, substances would be considered to be toxic if "sufficient evidence" or "limited evidence" exists to demonstrate neurotoxicity from studies in humans. In addition, those substances for which there is "sufficient evidence" of neurotoxicity in animals are considered toxic except that evidence derived from animal studies that has been shown not to be relevant to humans is not included.

The criteria in these guidelines are not intended to be mechanically applied, but rather should be interpreted with the exercise of expert technical judgment.

a. *Definition of neurotoxicity.* Neurotoxicity is any adverse effect on the structure or function of the nervous system by any substance, physical, chemical or biological in nature. The term "adverse effect" as used here means any undesirable effect on the nervous system caused by direct or indirect actions on the nervous system following acute, subchronic, or chronic exposures. The effect may be immediate or delayed, reversible or irreversible.

Characteristics of "adverse effects" include the following: (1) Side effects (unwanted effects) or effects due to overdosing; (2) functional or structural responses in the nervous system that promote compensation to restore normal function; or (3) any alteration from baseline (the individual's particular normal state), although still within "normal" range, which may diminish the ability to survive, undergo repair, or adapt to the environment. This definition includes chemicals that act directly on elements within the nervous system, such as glutamate which directly stimulates receptors, or indirectly, such as carbon monoxide which decreases the availability of oxygen.

"Adverse effects" must be considered within the context of agent usage and exposure scenario (ICON, 1990).

b. *The nervous system: Background and definition.* Effects on the nervous system will be considered in relation to the two major anatomical divisions: central and peripheral. The central nervous system consists of the parts of the nervous system contained within the skull (brain) and the vertebral column (spinal cord). The peripheral nervous system consists of nerve cells (neurons)

and their processes (axons, dendrites) which conduct information between muscles, glands, sense organs, and the spinal cord and brain. The peripheral nervous system includes afferent (sensory) and efferent (motor) fibers; both types of fibers are represented in the components of the nervous system (WHO, 1986).

Basic cellular elements of the nervous system are neurons, glial cells associated with blood vessels, and other specialized epethelial and connective tissue cells (WHO, 1986). Neurons contain multiple short processes, called dendrites, which receive information from other nerve cells, and a single long axon that conducts electrical signals to other neurons and muscles, and to and from skin, muscles, and glands. The axon terminates at a synapse where chemically-encoded information is conveyed to neurons or muscles. Glial cells in the central nervous system comprise the supporting structure of nervous tissue.

Neurons are atypical cells because the dendrites and the axon are metabolically inactive and collectively are much larger than the cell body (somata), which alone is responsible for all the metabolic activity required for maintenance of the entire cell (WHO, 1986). The structure of neurons provides an enormous surface area for chemical exposure, and consequently, chemical injury. For example, a peripheral neuron located in the lumbar portion of the spinal cord and innervating a muscle in the foot is about a meter long and contains a long column of cytoplasm.

Some chemicals may interfere in the maintenance of this cytoplasm column by, for example, interrupting transportation of nerve impulses along the axon. In this way a chemical such as n-hexane, and n-methylbutyl ketone may affect the nervous system. Chemicals such as triethyl tin may induce changes in the metabolic system of the somata, which may then cause degenerative changes in the entire neuron. A chemical such as triethyl tin, hexachlorophene, or lead, may alter myelinating cells (myelin is a fatlike substance forming a sheath around certain nerve fibers), cytoplasmic processes, or the myelin sheath, thereby causing neurotoxic effects. Intracellular elements of intraneural blood vessels may be altered by chemicals such as lead and misonidazole. Secondary changes may then occur in other tissues, such as voluntary muscles (WHO, 1986).

Several means exist for chemicals to enter the nervous system. Although the nervous system is largely protected from chemicals entering into nerve cells through blood, the blood-brain barrier is not complete. Some chemicals, especially the lipid soluble type, may still cross the barrier. Another mode of entry of chemicals is by uptake into peripheral nerve terminals. The chemical is then transported to the cell bodies in the CNS through the axon. Parts of the nervous system such as neurons of the autonomic nervous system and the sensory ganglia, certain parts of the brain (*e.g.*, near the beginning of the spinal cord), and to a limited extent, the retina in the eye, are outside the blood-brain barrier and are likely to be more exposed to neurotoxic chemicals than are other parts (WHO, 1986).

Some other factors that may influence susceptibility to effects are the size and type of the nervous system cell, the level and type of the various neurotransmitters in different regions of the nervous system, the integrity of cellular membranes, the type of intracellular organelles, and the degree of vascularity (Baker, *et al.*, 1990). For example, a poorly vascularized (*i.e.*, has fewer vessels) nervous tissue, such as the globus pallidus, is likely to be more susceptible to hypoxia (abnormal condition resulting from decrease in oxygen supplied to or used by body tissue) than a more vascularized tissue of the nervous system, such as the cerebral cortex. However, in some cases where cells have a high requirement for oxygen, they may be more sensitive to hypoxia in spite of the high vascularization than less vascularized tissue having a low requirement for oxygen. For example, neurons of the grey matter of the cerebral cortex are more vascularized than the myelinated axons of the cerebral white matter. However, the neurons are more sensitive than the axons to hypoxia because they have a higher requirement for oxygen than the axons for metabolism.

c. *Manifestations of neurotoxicity.* Common manifestations of neurotoxicity may be categorized into four types: sensory effects, motor effects, autonomic effects, and pathophysiological effects (changes to the structure and function of nerve cells and tissue).

Common signs and symptoms of sensory effects include anxiety, irritability, apathy, lethargy, attention difficulty, illusion, delusion, hallucinations, dementia (mental deterioration), depression, euphoria, stupor (partial or nearly complete unconsciousness), and coma. Other signs and symptoms of sensory effects are abnormalities of (a) smell, vision, taste, hearing, skin senses (for example, numbness, pain); (b) proprioception (reception of information given by sensory nerve terminals concerning movements and position of the body; it occurs chiefly in the muscles, tendons, and the labyrinth).

Common signs and symptoms of cognitive effects include effects upon short-term memory, learning, verbal and non-verbal long-term memory, problem solving, attentional and arousal decrement and vigilance disturbances.

Common signs and symptoms of motor effects are muscle weakness, abnormal body posture or gait, paralysis, spasticity, rigidity, tremor, dystonia (abnormal muscle tone), incoordination, hyperactivity, myoclonus (alternate cycles of rigidity and spasm in rapid succession of a muscle or of a group of muscles), fasciculations (spontaneous contractions of a number of muscle fibers supplied by a single motor nerve filament), cramps, seizures, and convulsions.

Common signs and symptoms of autonomic effects are abnormalities in control of functions related to (a) temperature that may be manifested, for example, in sweating; (b) the gastrointestinal tract that may be shown in diarrhea, salivation, or a change in appetite; (c) the cardiovascular system, for example, a change in heart rate; and (d) changes in other functions, such as, urination, sexual functions, and lacrimation (tearing).

Common pathophysiological effects on the nervous system are as follows: (a) Neuronopathies (partial or complete loss of the neuronal cell body, its processes, collaterals, or terminations); (b) myelinopathies (segmental or focal demyelination which means destruction of myelin, a fatlike substance forming a sheath around certain nerve fibers); (c) axonopathies (axonal degeneration); (d) disruptions in synaptic transmission (synthesis, storage, degradation, transport, release, and binding to specific membrane receptors of neurotransmitter chemicals); (e) changes in levels and functions of ion channels (sodium and potassium ions responsible for depolarizing and repolarizing the membrane respectively) and changes in related enzymes such as neurotoxic esterases.

2. Evidence of Neurotoxicity: General Discussion

Evidence of neurotoxicity is derived from toxicological studies related to neurobehavior, neurochemistry, neuropathophysiology, and neurodevelopment in humans and in animals. Major objectives of a neurotoxicity study are to detect and

characterize toxicity endpoints, identify changes in the structure and function of the nervous system, characterize the changes associated with exposure, assess the existence of any dose-time-response association, and elucidate the mechanism of neurotoxicity (Hartman, 1988; WHO, 1986).

Neurobehavioral studies determine the effect of a chemical exposure based on observations of the behavioral functions of the subject. Some of the behavioral functions generally tested in these studies are motor speed and steadiness, attention/response speed, manual dexterity, visual perception/memory, auditory memory, verbal abilities, attention/vigilance, profiles of mood state, and respondent and operant behavior.

Neurochemical studies determine the effect of chemical exposure on changes in the level, activity, and pattern of neurotransmitter chemicals, such as acetylcholine, noradrenaline, dopamine, glycine, serotonin, and of enzymes like neurotoxic esterases.

Neuropathophysiolgical studies determine the effect of chemical exposure on the structure and function of the nerve tissues. Observed effects and types of studies include: (1) Degeneration, or demyelination of nerve tissues; (2) encephalography (electrical activity measurements of the brain); (3) evoked potential (electrical phenomena evoked in the brain by external activity such as auditory, visual, or somatosensory stimuli); (4) electromyography (recording electrical activity from a muscle); (5) electroneurography (measurement of both motor and sensory nerve conduction velocities); (6) temperature threshold; and (7) quantitative testing for cutaneous (skin) sensation.

Developmental neurotoxicity studies are concerned with adverse effects on the structure of the nervous system or on neurobehavioral functions related to physical growth and development (Wier, *et al.*, 1989).

Several major difficulties in determining neurotoxicity of chemicals exist. Problems may arise regarding the ability of the nervous system to conform with the immediate environment, due to the scientific community's incomplete understanding of the neurotoxic effects, due to interspecies differences in structure and complexity of functions, and due to a very wide range of normal neurological and physiological functions of the nervous system which can mask the ability to observe effects due to chemical exposure. Suitable methods are unavailable to detect changes with a reasonable degree of certainty in adaptive capacity of the nervous system, in homeostatic functioning, as well as in movement pattern, fatigue, and the ability to perform complex tasks. It is, therefore, clear that a single test may not suffice to detect neurotoxicity (WHO, 1986).

Evidence for neurotoxicity comes from two sources, namely, studies in humans and studies in animals. Results from these studies are evaluated in view of the available information on histopathology (changes in tissues), enzyme inhibition, metabolism, and other relevant toxicological data to determine if there is a causal association between exposure to a chemical and neurotoxicity.

3. Evidence of Neurotoxicity Derived From Studies in Humans

a. *Discussion.* Direct evidence of human neurotoxicity comes from observations of humans. A good quality human study should have a clear and detailed description of the studied population, disease, and exposure. A neurotoxicant can produce more than one neurotoxic effect including those related to sensory, motor, learning/memory, or mood activity. The history of occurrence of the effect should be relatively complete, and past events should be substantiated by medical records if possible. The design of the study should have dealt with bias and confounding factors that can influence the risk of disease by matching, or in the analysis by statistical adjustments. The study should describe the determination of statistical parameters, such as relative risk, odds ratio, absolute disease rate, confidence intervals, significance tests, and adjustments made for confounding factors. It should also describe the selection and characterization of exposed and control populations, size of the population groups, adequacy of duration, completeness, and quality of follow up. A causal association is strengthened by the observation of a dose-response relationship, consistency and reproducibility of results, strength and specificity of the association, and an established mechanism of action.

The evaluation of human neurotoxicity studies should consider many factors including: Age, sex, socioeconomic status, health, neurological disorders and other diseases, drug treatment history, recreational drug use, motivation of the test and reference groups, life style (alcohol, smoking, etc.), education level, individual levels of alertness, emotional state, and levels of sleep and fatigue. Tests should be blind and test sites free from distractions. Confounding factors to be considered in evaluation of these studies include allergic and idiosyncratic reactions. Other complex issues to be considered are: immediate versus delayed toxicity, reversible versus irreversible effects, local versus systemic effects, acute versus chronic effects, and tolerance development (Hartman, 1988; OTA, 1990; Anger, 1989; Jonson and Anger, 1983; Hooper, 1987).

Major difficulties encountered in studies in humans are the delayed neurotoxic effects, exposures to mixtures of chemicals, and the lack of information on the effects of acutely non-toxic low-dose levels of neurotoxicants over a long period of time.

b. *Evidence of neurotoxicity derived from studies in humans.* Since neurotoxic effects are very complex and often subtle in nature, scientific judgment is necessary in classifying the evidence. The confidence in evidence of neurotoxicity derived from human studies increases with the observation of a dose-response relationship, consistency and reproducibility of results, strength and specificity of the association, and conformance with an established mechanism of action.

i. Sufficient evidence of neurotoxicity. "Sufficient evidence" for a causal association between exposure to a chemical and neurotoxicity is considered to be present when the following four criteria are met. (1) A consistent pattern of neurological dysfunction is observed in multiple studies. (2) The adverse effects/lesions in the nervous system account for the neurobehavioral dysfunction with a reasonable degree of certainty. (3) All identifiable bias and confounding factors are discounted after consideration. (4) Based on statistical analysis, the association has been shown unlikely to be due to chance with reasonable certainty.

ii. Limited evidence of neurotoxicity. "Limited evidence" of neurotoxicity means that evidence is less than convincing, *i.e.*, one of the above "sufficient evidence" criteria for establishing a causal association is not met. Thus, uncertainties exist in establishing the association between exposure to a chemical and the neurotoxic effect.

iii. Inadequate evidence of neurotoxicity. "Inadequate evidence" of neurotoxicity means that evidence does not meet the criteria of the above two categories and that no interpretation of the data shows either the presence or absence of a chemical exposure-related neurotoxic effect.

4. Evidence of Neurotoxicity Derived From Studies in Animals

a. *General considerations.* In the absence of human data, the next best source of evidence of neurotoxicity is animal data which may be considered relevant to humans for the following reasons: (1) Anatomy, physiology, histology, and biochemistry of the nervous system in humans and mammals are essentially similar; (2) chemical agents first found to be neurotoxic in humans, such as methylmercury, carbon disulfide, n-hexane, methyl ethyl ketone, methyl butyl ketone, and dichloroacetaldehyde are also neurotoxic in animals; and (3) agents, like aluminum and pyridoxin phosphate (vitamin B6), first identified in animal studies as neurotoxic were later found to be neurotoxic in humans (WHO, 1986). In neurotoxicity studies, animals are dosed acutely, subchronically, or chronically. Neurotoxicity endpoints are studied using different test methodologies designed either to screen or investigate a mechanism of action of neurotoxicity, or to gather additional data.

Criteria for assessing quality and adequacy of animal studies have been discussed by various groups (WHO, 1986; EPA, 1985; Hartman, 1988; Tilson, 1987, 1989; OTA, 1990). The major factors indicative of a good quality animal study are the following. (1) Species, sex, age, health, housing conditions, and nutrition of the animals are suitable for the test. (2) The number of animals/group/sex are adequate. (3) Animals are randomly distributed in the groups. (4) Dose levels, duration, and frequency selected are adequate to detect the adverse neurotoxic effects. (5) Data collection and reporting are complete and clear. (6) Routes and exposure pattern are relevant to the human situation. (7) Test methods used for statistical analysis are appropriate, clearly stated, and are the generally accepted techniques for analyzing neurotoxicity studies (WHO, 1986; EPA, 1985; Hartman, 1988; Tilson, 1989; OTA, 1990).

A good quality animal study requires consideration of reliability, sensitivity, and validity of the results (Vorhees, 1987). Interpretation of neurotoxicity data should consider: (1) If the neurotoxic effects are caused by a single dose (such as cholinesterase inhibitors and pyrethrins); (2) if effects are reversible or irreversible (reversible effects may indicate compensation or adaptation rather than a simple acute effect); (3) if neurotoxicity is delayed; (4) if a threshold exists (effects may appear only after changes in the nervous system caused by repeated exposures have reached a threshold limit); and (5) if circadian rhythms may influence behavior, such as, feeding, drinking, sleeping, and mating (WHO, 1986).

b. *Categories of neurotoxicity studies.* Six common representative categories of neurotoxicity studies, with a few examples of test methods in each category, to determine various neurotoxicity endpoints are listed below.

i. Neurobehavioral studies are concerned with adverse effects of a chemical on the behavior of an organism. Behavior may be defined as movement of an organism or its parts within contexts pertaining to time and space. Behavioral responses typically have been divided into three types based on the functional relations that control their occurrence (WHO, 1986). These three types are respondent behavior, operant behavior, and mixed behavior.

Respondent behavior is controlled mainly or exclusively by the prior occurrence of an event (stimulus) in the environment. The events are referred to as eliciting stimuli. A classic example of unconditioned respondent behavior is a dog's salivation when food, an unconditioned stimulus, is placed in the dog's mouth.

Operant behavior is apparent exclusively from its consequences and is also referred to as emitted behavior. Operant behavior occurs with no known observable eliciting stimulus. For example, when an animal is exposed to a novel environment, it will show a characteristic pattern of exploratory activity initially, followed by a slowdown. The environment is not an eliciting stimulus. However, the motor activity is associated with the environment.

Some behavior, known as mixed behavior, is known to have both respondent and operant components. For example, bird pecks are controlled partly by eliciting stimuli and partly by response consequences.

Both respondent and operant behaviors may be modified by the conditioning (learning) process. For example, when food (a non-conditioning stimulus) is placed in a dog's mouth only after a special note is sounded (a conditioning stimulus) and the procedure is repeated for some time, the sound of the note alone starts inducing salivation, without placing food in the dog's mouth: a conditioned respondent behavior. A conditioned operant behavior occurs, for example, when a food-deprived rat is placed in a chamber with a food dispenser and a lever, and the depression of the lever results in presentation of food, then the consequence of the behavior (pressing the lever and presentation of food) comes to control the occurrence of the response.

Common neurobehavioral studies include detection and evaluation of changes in the following neurotoxicity endpoints: cognitive functions; eating and drinking behavior; social behavior involving two or more individuals; tremors, convulsions (threshold dose of convulsants is considered in view of other unrelated toxicity), ataxia (effects on muscular coordination), paralysis, lacrimation, and the presence and absence of certain reflexes; spontaneous motor activity; motor functions; and sensory processes.

ii. Neurophysiological studies basically measure various physiological functions; such as, (1) nerve conduction velocity, (2) peripheral nerve terminal function, (3) electromyographic activity, (4) spinal reflex excitability, (5) electrocardiographic activity (EKG), (6) blood pressure, (7) electroencephalographic activity (EEG), (8) general excitability, (9) convulsive activity, (10) stimulation of the cerebral motor cortex, (11) recovery functions, (12) cognitive functions, and (13) synaptic and membrane activity.

iii. Morphological studies assess structural changes in neural and non-neural cells of the nervous system. Such changes may include: (1) The accumulation, proliferation, or rearrangement of structural elements like intermediate filaments, microtubules, or organelles (*e.g.*, mitochondria, lysosomes); (2) the degeneration of neural cells in whole or in part; (3) gross changes in morphology of cells; (4) changes in brain weight; (5) discoloration of and hemorrhage in nerve tissue; and (6) changes in glial and fibrillary acidic protein (GFAP).

iv. Biochemical and endocrinological studies may include determination of changes in: (1) RNA, DNA, and protein synthesis in nerve cells; (2) enzyme levels; (3) lipids, glycolipids, and glycoproteins synthesis; (4) synthesis, uptake, release, reuptake, metabolism, stimulation and inhibition of acetyl choline, epinephrine, serotonin and other neurotransmitters; (5) ion channels and energy metabolism; (6) anterior pituitary hormones, *e.g.*, follicle stimulating hormone, thyrotropic hormone, hypothalamic control of pituitary secretions; and (7) peripheral metabolism of endocrine secretions.

v. Developmental neurotoxicity studies consist of a battery of tests to evaluate physical growth/

developmental and neurobehavioral functions. The tests given at the preweaning stage, for example, may include measuring brain weight and pup weight, and monitoring physical development at various intervals of time. Examples of the tests given at the postweaning stage are tests of sensory and neuromuscular functions, reactivity, problem solving, and neuroendocrine functions. (Wier, *et al* 1989). Neurotoxic agents may cause qualitatively different toxicity syndromes in developing animals than in adult animals.

vi. *In vitro* neurotoxicity studies may be used to support the animal studies. However, they are not considered adequate by themselves to classify neurotoxicants. These studies generally use primary cell cultures of various tissues, such as adult mouse sensory neurons, rodent fetal cells, and cerebellar cells. The studies may also use free-living soil nematodes, *e. g., caenorhabditis elegans,* and various microorganisms (Harvey, 1988; Reinhartz, *et al.,* 1987; Davenport *et al.,* 1989; Williams, *et al.,* 1987).

vii. Other studies may include studies dealing with pharmacokinetics, blood-brain barrier, bioavailability, and structure-activity relationships.

c. *Classification of neurotoxicity evidence derived from studies in animals.* Because of the complex and often subtle nature of the neurotoxic effects, scientific judgment is necessary in classifying neurotoxicity evidence. The confidence in evidence of neurotoxicity derived from animal studies increases (becomes convincing) with (1) an increase in the number of responding species, strains, dose-levels, experiments, severity and multiplicity of effects; (2) the observation of a dose-response relationship, consistency and reproducibility of results, and specificity and strength of the association; (3) supportive *in vitro* and other studies; and (4) an increase in statistical significance of neurotoxic effects over controls.

1. Sufficient evidence of neurotoxicity. "Sufficient evidence" for a causal association between exposure to a chemical and neurotoxicity means that (1) the substance has been tested in well-designed and -conducted studies (*e.g.,* NTP's neurobehavioral test battery, Tilson 1989; EPA's neurotoxicity test guidelines, EPA, 1985), and (2) the substance has been found to elicit a statistically significant ($p < 0.05$) increase in any neurotoxic effect in one or both sexes of multiple species, strains, or experiments using different routes of administration and dose-levels.

Evidence derived from animal studies that has been shown not to be relevant to humans is not included. Such evidence would result, for example, when there was an identified mechanism of action for a chemical that causes neurotoxicity in animals that has been shown not to apply to the human situation. For example, metabolic-pharmacokinetic properties concerning the need for activation of the agent to produce neurotoxicity may come into play. If humans do not have the same metabolic pathway found necessary in the test animal for the neurotoxic effect, then the study may not be relevant to humans.

ii. Limited evidence of neurotoxicity. "Limited evidence" of neurotoxicity means that the substance has been tested and (1) found to cause a statistically significant ($p < 0.05$) increase in a neurotoxic effect in one or both sexes of only one species, strain, and experiment and such evidence otherwise does not meet the criteria defined for "sufficient evidence" above; or (2) evidence derived from studies which can be interpreted to show positive neurotoxic effects, but have some qualitative or quantitative limitations with respect to particulars, *e.g.,* doses, exposure, follow-up, number of animals/group, and reporting of the data, which would prevent classification of the evidence as "sufficient" in the category above.

iii. Inadequate evidence of neurotoxicity. "Inadequate evidence" of neurotoxicity means that evidence does not meet the criteria of the above categories and that there can be no interpretation of the data as showing either the presence or absence of a chemical exposure-related neurotoxic effect. Data in this category would not establish a substance as toxic under the guidelines.

D. Reproductive and Developmental Toxicity

1. Introduction

a. *General discussion.* This section discusses the guidelines concerning reproductive and developmental toxicity. Section 2(g) of the FHSA defines toxic as applying "to any substance (other than a radioactive substance) which has the capacity to produce personal injury or illness to man through ingestion, inhalation, or absorption through any body surface." 15 U.S.C. 1261(g).

The Commission is issuing these guidelines to specify criteria that will offer consistent guidance for identifying developmental or reproductive toxicants. This guidance reflects the Commission's assessment of the most current scientific knowledge and consensus in this field.

The intent of the guidelines is to incorporate those areas in which there is a substantial consensus as to the evidence needed to support a conclusion that a substance is a likely human developmental or reproductive toxicant. For substances where there is controversy about how the evidence should be evaluated, the Commission may proceed by rulemaking, as provided in section 3(a) of the FHSA, or by enforcement actions on a case-by-case basis to resolve the question of whether the substance presents sufficient evidence of an ability to produce developmental or reproductive toxicity in humans so that the substance should be considered toxic.

Evidence for developmental or reproductive toxicity largely comes from two sources: Human studies (epidemiology) and animal studies. Results from these studies are supplemented with available information from short-term tests, pharmacokinetics, and other relevant toxicological data. The guidelines issued by the Commission evaluate the toxicity of a substance on the basis of developmental or reproductive toxicity based on human and animal data. Under the guidelines, substances would be considered to be toxic if "sufficient evidence" or "limited evidence" exists to demonstrate developmental or reproductive toxicity from studies in humans. In addition, those substances for which there is "sufficient evidence" of developmental or reproductive toxicity in animals are considered toxic, except that evidence derived from animal studies that has been shown not to be relevant to humans is not included.

As noted above, it will be necessary to continue to rely on rulemaking under section 3(a) of the FHSA, or on enforcement actions, to resolve uncertainties that are not addressed by these guidelines. In this regard, the Commission notes that the criteria stated in the guidelines do not lend themselves to unambiguous application. A number of the criteria include statements that themselves can be interpreted only by the exercise of expert technical judgment. For example, one of the factors stated below for determining that an epidemiological study shows a causal relationship between exposure to an agent and developmental or reproductive toxicity is that confounding factors such as socioeconomic status, age, smoking, alcohol consumption, drug use, environmental or occupational exposure, and other diseases should be

adjusted for. Expert technical judgment is required to identify possible confounding factors and to evaluate whether the available data are adequate to eliminate such factors as causes of the observed association. In some instances, this will not be straightforward. The guidelines will not resolve such controversy, and it may be appropriate for the Commission to conduct rulemaking to resolve the controversy or bring enforcement actions in which the toxicity of the substance would be established on a case-by-case basis.

Although there are many difficult issues related to the interpretation of developmental or reproductive toxicity studies in animals and humans, criteria for defining developmental or reproductive toxicity have been established by several groups, such as the Food and Drug Administration (FDA), the EPA, and the European Economic Community (EEC). The Commission also believes that this approach for defining known or potential developmental or reproductive toxicants in consumer products is appropriate and feasible. The evidence of developmental or reproductive toxicity is determined by the quality and adequacy of the data and the consistency of responses induced by a suspect developmental or reproductive toxicant.

The following paragraphs describe definitions and terminology used in this section and suggest guidelines for identification and classification of reproductive and developmental toxicants. These guidelines may be used as a basis for labeling of consumer products under the FHSA.

b. *Definitions and terminology.* For these guidelines, the following definitions and terminology will be used. Some of these definitions were adapted from EPA (1988a), EPA (1988b), EPA (1989), and the Medical Dictionary by Saunders (1985).

Altered growth: An alteration in offspring organ or body weight or size.

Blastocyst: A structure resulting from the repeated divisions of the fertilized ovum.

Conceptus: The whole product of conception at any stage of development from fertilization of ovum to birth.

Developmental toxicity: Adverse effects on the developing organism that may result from its exposure during prenatal development, or postnatally to the time of sexual maturation. The adverse developmental effects may be detected at any point in the life span of the organism. The major manifestations of developmental toxicity include: (1) Death of the developing organism, (2) structural abnormalities, (3) altered growth (4) functional deficiencies, and (5) behavioral deficiencies.

Embryo: Developing young in the human uterus before eight weeks. The time period varies from one species to another in animals.

Embryotoxicity: Any toxic effect on the embryo as a result of prenatal exposure. These include malformations, altered growth and in utero death.

Epididymis: The elongated cordlike structure along the posterior border of the testis, containing ducts in which sperm are stored.

Estrogen: A female sex hormone secreted by the ovary.

Estrous cycle: The cycle of changes in the female genital tract of lower mammals, which are produced as a result of ovarian hormonal activity. It is equivalent to the menstrual cycle in humans and other primates.

Female reproductive toxicant: An agent which can adversely affect the ability of a sexually mature female to produce normal offspring.

Fertility: The capacity to conceive or induce conception.

Fertilization: The fusion of a sperm with an ovum resulting in the formation of a zygote.

Fetotoxicity: Any toxic effect on the fetus as a result of prenatal exposure. These include malformations, altered growth and in utero death.

Fetus: Developing young in the human uterus after eight weeks. The time period varies from species to species in animals.

Follicle Stimulating Hormone (FSH): A pituitary hormone responsible for the development of ova and production of estrogen in females, and the development of seminiferous tubules and production of sperms in males.

Gonad: An ovary or testis.

Implantation: Attachment of the blastocyst to the epithelial lining of the uterus.

Luteinizing Hormone (LH): A pituitary hormone responsible for ovulation, development of corpus luteum, and production of progesterone in the females, and production of testosterone in males.

Male reproductive toxicant: An agent which can adversely affect the ability of a sexually mature male to produce normal offspring.

Malformation: A permanent structural change that may adversely affect survival, development, or function.

Neonate: Newborn.

Ova: Plural of ovum.

Ovary: The female gonad.

Ovum: The female reproductive cell.

Pituitary gland: A gland which is located in the brain and secretes many hormones which control growth and functions of many organs of the body including the testis in males and the ovary in females.

Postnatal: After birth.

Prenatal: Before birth.

Progesterone: An ovarian hormone primarily responsible for the maintenance of pregnancy.

Prostate: An accessory male sex gland which secretes a part of semen.

Seminal plug: A wax like material found in the vagina of the female rodents approximately 12–24 hours after successful mating.

Seminal vesicle: An accessory male sex gland which secretes a part of semen.

Sperm: The male reproductive cell.

Terotogen: An agent or factor that causes the production of a structural defect in the developing embryo or fetus.

Testis: The male gonad.

Testosterone: The male sex hormone secreted by testis.

Variation: A structural deviation that may not adversely affect survival, development, or function.

2. Identification of Developmental and Reproductive Toxicity Hazards from Studies in Humans

a. *Discussion.* Good epidemiologic studies provide the most relevant information for assessing human risk. Epidemiologic data are obtained from occupational, environmental, therapeutic, or consumer exposure to a substance. A positive good quality epidemiologic study should meet the following criteria (EPA, 1988a; EPA, 1988b; EPA, 1989): (1) There should be no identifiable bias which can be introduced through a faulty design of the experiment. For example, if hospital records are used, embryonic or early fetal loss may be underestimated since women are not necessarily hospitalized for these outcomes. These parameters may be better ascertained by random interviews. (2) Confounding factors such as socioeconomic status, age, smoking, alcohol consumption, drug use, environmental or occupational exposure, and other diseases should be adjusted for. (3) The association between an endpoint and a causal factor should not be due to chance; there must be a statistically significant association.

b. *Categories of human evidence.* The following categories of evidence from human studies have been developed.

i. Sufficient evidence of developmental or reproductive toxicity in humans. The evidence for a substance causing an adverse reproductive or developmental effect(s) is considered sufficient when it is based on good

quality human epidemiology which meets all the requirements stated in the above discussion of human studies; the results are statistically significant and without identifiable bias or confounding factors.

ii. Limited evidence of developmental or reproductive toxicity in humans. The evidence for a substance causing an adverse reproductive or developmental effect(s) is considered limited when the human epidemiology meets the criteria for sufficient evidence except that it lacks one of the criteria described in the above discussion of human studies. Thus, evidence is limited when statistical significance is borderline as opposed to clear-cut, there is a source of bias, or there are confounding factors that have not been or cannot be corrected for.

iii. Inadequate evidence of developmental or reproductive toxicity in humans. The evidence is considered inadequate when more than one of the above criteria for establishing a causal association between exposure to the agent and reproductive or developmental effects are not met, leaving an alternative explanation to be equally likely.

3. Identification of Developmental and Reproductive Toxicity Hazards from Studies in Animals

Although human data are most relevant for predicting human hazard, in its absence animal information becomes a valuable tool for predicting effects in humans. Many chemicals which are reproductive and developmental toxicants in humans have been shown to produce similar effects in animals (Council on Environmental Quality (CEQ), 1981). Some examples are alcohol, busulfan, chlorobiphenyls, diethylstilbestrol, isotretinoins, organic mercury, thalidomide, valproic acid, aminopterin, lead, ethylenedibromide, kepone, and carbondisulfide (CEQ, 1981; EPA, 1989). In a review by FDA (1980) of 38 compounds known to be associated with birth defects in humans, 37 were found to produce similar effects in at least one species of animals (45 FR 69,823). In another review of the data of the teratologic potential of 203 chemicals by FDA (1980), FDA stated: "it is reasonable to conclude that positive animal teratology studies are at least suggestive of potential human response." (45 FR 69,824). In addition, Wilson (1977) has described the mechanism(s) and pathways which could be applicable to both humans and animals in the initiation and development of birth defects.

a. *Study protocols for studying developmental and reproductive toxicity in animals.* EPA has developed protocols for studying developmental, male reproductive, and female reproductive toxicities in laboratory animals. Each of these three study protocols is discussed briefly below.

A protocol for studying developmental toxicity has been described by EPA (1989). Developmental toxicity can be studied in animals by administering a test substance during pregnancy, and evaluating embryonal, fetal, and/or neonatal toxicity. The protocol may also include exposure of the organism during a specific period of development (*e.g.*, during organ development), evaluation of toxicity over several generations, evaluation of toxicity during the early postnatal period or even up to sexual maturity. Animals used for developmental toxicity studies are usually mice, rats, or rabbits The most important endpoints of developmental toxicity are embryonal mortality, fetal mortality, neonatal mortality, malformations (external, visceral, skeletal) at any stage of development, altered growth, as well as functional and behavioral abnormalities.

A protocol for studying male reproductive toxicity has been described by EPA (1988a). Male reproductive toxicity can be studied by exposing sexually mature male rats to a test substance for a certain period followed by cohabitation with untreated sexually mature female rats. The exposure of the males to the test material is continued during the mating period. The main endpoints for evaluating toxicity are mating ability, fertility, prenatal and postnatal developmental effects, and weight and histopathological evaluations of reproductive organs (testis, epididymus, prostrate, seminal vesicle and pituitary). Mating ability is ascertained by determining the number of animals with seminal plugs or the presence of sperm in a vaginal lavage, per number of pairs of rats cohabited. Fertility is ascertained by determining the number of animals pregnant per number of confirmed matings. The prenatal and postnatal developmental effects are ascertained by determining litter size, pre- and post-implantation loss, number of live and dead pups, sex ratios, malformation, birth and postnatal weight, and survival. Positive findings for supplemental endpoints such as sperm evaluation (count, morphology, and motility) and hormone evaluation (testosterone, FSH, and LH) increase the evidence for hazard identification.

EPA has also described a protocol for studying female reproductive toxicity (1988b). Female reproductive toxicity can be studied by exposing sexually mature female rats to a test material for a certain period followed by cohabitation with untreated sexually mature male rats. Exposure of females to the test material is continued during the mating period and throughout gestation and lactation. The main endpoints for evaluating toxicity are mating ability, fertility, prenatal and postnatal developmental effects, weight and histopathological evaluations of reproductive organs (ovary, uterus, and pituitary). Positive findings for supplemental endpoints such as estrous cycle abnormalities, and hormone evaluations (estrogen, progesterone, FSH, LH) increase the evidence for hazard identification.

Studies on reproductive toxicity are often performed where both males and females are treated, in a manner such as described above for the individual sexes. Such studies may not distinguish between "male" and "female" reproductive toxicity.

b. *Criteria for a good quality developmental or reproductive toxicity animal study.* Any reliable study of developmental or reproductive toxicity should be designed and carried out in accordance with certain recognized criteria. The following criteria should be met for a good quality developmental or reproductive toxicity animal study.

1. The study should include at least one dosed (treated) group and one concurrent control group. However, two or more differently dosed groups are preferred.

2. Maternal toxicity (*e.g.*, a reduction in maternal body weight or organ weight) should be evaluated and accounted for in the interpretation of a study. In an ideal situation, the toxic effect(s) observed in a positive study are significant at one or more doses in the absence of maternal toxicity. However, such toxicity is not automatically discounted as secondary when associated with maternal toxicity.

3. Test animals are selected based on consideration of species, strain, age, weight and health status, and should be randomized into dose groups in order to reduce bias and provide a basis for performing valid statistical tests.

4. Good historical data on developmental and reproductive toxicity should be available for the species/strain tested; ideally, such data should be obtained for animals from each supplier.

5. The number of animals per dose group should be adequate. Generally, 20 litters per group for rodents and 12 litters per group for rabbits are used (Sowinski, *et al.*, 1987).

6. Toxicity is evaluated using acceptable laboratory methods, and

data are analyzed using appropriate statistical methods.

Sufficient evidence derived from animal studies is used as a basis to predict probable developmental or reproductive toxicity of an agent in humans. The evidence for toxicity derived from animal studies is supported by observance of (1) dose-related effects over an increased number of doses, (2) an increased number of different endpoints, (3) the same route of exposure as the expected human exposure route, (4) multiple species/strains, or routes of administration exhibiting the response(s), and (5) pharmacokinetic data and information on the likely mechanism of action.

c. *Categories of evidence for developmental or reproductive toxicity derived from animal studies.* The following categories of animal evidence have been developed.

i. Sufficient evidence of developmental or reproductive toxicity in animals. The evidence for a substance is considered sufficient when obtained from a good quality animal study and there is a statistically significant ($p < 0.05$) treatment-related increase in multiple endpoints (as described in the toxicity study protocol section) in a single species/strain, or in the incidence of a single endpoint at multiple dose levels or with multiple routes of administration in a single species/strain, or increase in the incidence of a single endpoint in multiple species/strains/experiments. Evidence from animal studies which has been shown to be not relevant to humans is not used for this purpose.

ii. Limited evidence of developmental or reproductive toxicity in animals. The evidence for a substance is considered limited when (1) obtained from a good quality study and there is a statistically significant ($p < 0.05$) treatment-related increase in the incidence of a single endpoint in a single species/strain/experiment at a single dose level administered through only one route and such evidence otherwise does not meet the criteria defined for "sufficient evidence" above; or (2) the evidence is derived from studies which can be interpreted to show positive effects but have some qualitative or quantitative limitations with respect to experimental procedures (e.g., doses, exposure, follow-up, number of animals/group, reporting of the data, etc.) which would prevent classification of the evidence in the category of "sufficient evidence" above.

iii. Inadequate evidence of developmental or reproductive toxicity in animals. "Inadequate evidence" means that evidence does not meet the criteria of the above categories and that there can be no interpretation of the data as showing either the presence or absence of a chemical exposure-related effect.

E. Sensitization

The Commission already has issued a supplemental definition concerning sensitization, which is at 16 CFR 1500.3(c)(5). While that discussion relates to the separate category of hazardous substance referred to in the FHSA as a "strong sensitizer," the principles contained in that section will serve also as a guide to determine when a substance is toxic due to the chronic hazard of allergic sensitization.

F. Evaluation of Risk From Exposure to Substances That May Present a Chronic Hazard

1. Guidelines for Assessing Exposure—a. *Introduction.* The FHSA defines as toxic "any substance which has the capacity to produce personal injury or illness to man through ingestion, inhalation, or absorption through any body surface." 15 U.S.C. 1261(g). Under the FHSA, a toxic substance is "hazardous" if that substance "causes personal injury or substantial illness during or as a proximate result of any customary or reasonably foreseeable handling or use," 15 U.S.C. 1261(f)(1)(A). In order for a substance to be considered a hazard by this definition, it must not only have the potential to be toxic, but it must be demonstrated that (a) persons are exposed to the substance, (b) the substance can enter the body, and (c) there is a significant risk of an adverse health effect(s) associated with the handling and use of the substance. These represent, in turn: exposure, bioavailability, and risk. This section discusses the subject of exposure, and is intended to be used in the determination of significant risk of chronic toxicity of art materials or other products subject to the FHSA.

A discussion by the Office of Science Technology Assessment and Policy (OSTP) concerning the level of evidence that a chemical or product poses a carcinogenic risk to humans and the level of exposure of the consumer when the product is used is presented in the **Federal Register** (50 FR 10372 (March 14, 1985)). Although advances have been made in the area of modeling and monitoring exposures during the five years since this publication, many of the variables concerning the use patterns, distribution of pollutants, sources, sinks, relationships between physical parameters and market penetration of products have not been defined to a level where predictive modeling can in any sense replace well-conducted field studies. Many of the strengths and weaknesses of the approaches discussed by the OSTP remain the same today as in 1985. These approaches are discussed in the following subsections.

Three routes of exposure—inhalation, dermal absorption, and oral ingestion—will be discussed in separate subsections in the following discussion. The largest current technical effort has been driven by the recent interest in indoor air quality. Thus, inhalation is the most thoroughly investigated exposure route. Oral ingestion has been largely addressed in dietary and food additive studies, while dermal contact is largely of interest to the cosmetics industry and hence also to FDA.

Protocols exist for both oral and dermal contact for foods, drugs, and cosmetics. They include procedures for considering the form of the material being studied, the site of application (for cosmetics), and amounts potentially consumed (for food). Similarly, the form of the product as used should be taken into consideration when designing exposure studies. Using pure chemicals to assess consumer exposure and subsequent health effects when the product under consideration is a mixture, is not likely to provide an accurate reflection of exposure. For example, in assessing exposure from di-2-ethylhexylphthalate (DEHP) rather than studying pure DEHP, the staff performed experiments with actual products in order to demonstrate release of DEHP from the products' plastic matrix and transfer to either skin or saliva. Exposure studies with paint removers demonstrated that studies using methylene chloride alone, rather than a formulated paint remover, would have resulted in erroneous exposure estimates.

There are a number of procedures for assessing exposure of individuals or populations to chemicals which may cause cancer or other adverse health effects. Reasonably accurate exposure data are important in the assessment of risk. The accuracy needed can not be categorically stated since such factors as potency, concentration, and strength of evidence for toxicity of the chemical of concern are all important in defining the resources required to obtain the data necessary to perform an exposure assessment. Further, when using population estimates, the broad range of use patterns, frequency of use, diversity of products, and the variations in the types of housing where the products are used, will lead to exposure limits that

are often several-fold multiples of the predicted average exposure. Information concerning use patterns, frequency of use, definition of housing stock, and definition and market penetration of the products of interest is often lacking.

b. *Background: the three routes of exposure.*—i. Inhalation. Active interest and advances in exposure assessment have been largely driven by the current concern about indoor air quality and past activities involving occupational exposure and ambient air quality criteria and monitoring. Although exposure estimation techniques are becoming more sophisticated, there is no universally accepted minimum set of specifications for either data collection or estimation of exposure from the collected data. Generally, exposure is assessed by direct monitoring of populations, predictions of exposure, or use of surrogate data. These three approaches are briefly discussed below.

(a) *Direct monitoring* involves monitoring the general population or select segments of the population for exposure to a chemical or chemicals. Past monitoring studies have provided concentrations averaged for various periods of time and concentration measured at discrete times. Such data were obtained for carbon monoxide and nitrogen dioxide, power plant plume dispersion/reaction and concentrations of various chemicals in such locations as work places, point sources, cities, and even regions. Similar data bases do not exist for equivalent populations for residential indoor air. Examples of recent studies addressing residential air quality are: The EPA TEAM study (Wallace, 1987), the Pierce Foundation New Haven study (Stolwijk, 1983), the Gas Research Institute Texas unvented gas space heater study (Koontz, 1988), the CPSC Atlanta unvented gas space heater study (TRC, 1987), and the Harvard Six Cities Study (Spengler, 1985).

These studies provide measurements of the concentration and duration of concentration for combustion products, volatile organics, particulates, and biological materials. In addition, they provide limited real time monitoring and information concerning selected health effects information. With field monitoring studies, due to the potential for exposure to pollutants other than those monitored, a health effect associated with one of the monitored pollutants may not be accurate.

(b) *Predictions of exposure (through modeling)* to a chemical(s) can be based on physical and chemical principles, mass balance principles and mathematical models. Examples of such studies are: (1) The exposure predictions presented in various CPSC staff reports on unvented kerosene and gas space heaters; (2) the CPSC–EPA and CPSC–LBL methylene chloride exposure studies from use of paint strippers; and (3) the CPSC–EPA exposure studies of perchloroethylene from dry cleaning and other uses.

Data necessary for use in predictive modeling are often obtained from studies on products in small chambers (50 to 100 liters), large chambers (20,000 to 30,000 liters), or in research houses. The studies are usually designed for specific products. In general, protocols, although having common features, are not directly applicable to other products which may be investigated.

Often such modeling studies are based on data obtained from representative products used in room-size chambers or research houses. The distinction between a modeling study and a field monitoring study is that often the modeling relates to a specific product while a field study may only attempt to identify the pollutants and their concentrations, not their sources.

(c) *Surrogate data* (data of exposure derived from chemicals of similar structure, reactivity and volatility as the chemical of interest) are used by some investigators when no data exist for the chemical of interest. Surrogate data have not been used extensively by the Commission but have been used in some instances by EPA in pesticide exposure estimates. Surrogate data should only be used for preliminary evaluations to establish the scope of additional studies that will be needed to define exposure more accurately.

ii. Ingestion. Ingestion studies have been performed for organics and inorganics in foods. The bioaccumulation of pesticides and chlorinated compounds has been studied in shellfish and edible fish. In its "total diet studies" the FDA has provided data on the concentrations of selected chemicals in approximately 200 foods purchased in grocery stores throughout the United States. These data, in conjunction with data obtained from tissue analyses for pesticides, provide estimates of the exposure, body burden and effectiveness of regulatory programs intended to limit exposure to certain pesticides.

These studies involve direct monitoring of sources of chemicals as well as fate of the chemicals in products such as foods. Laboratory simulations have been developed to estimate exposure to chemicals on a smaller scale. These latter studies do not usually involve a living species but are based on leaching or extraction of the chemical from a product with a simulated saliva or gastric fluid. Examples of such studies are studies performed by the FDA concerning lead released from decorated glassware (Soc. Glass Decorators, 1979), CPSC's studies concerning lead released from printed paper products, and CPSC's studies of nitrosamine and DEHP released from pacifiers.

The estimation of exposure from ingestion of chemicals present in foods or consumer products is then predicted based upon estimates of use of the product and its release from the product. In the case of oral ingestion of consumer products containing chemicals, data on chemical content of the products may be known. However, the exposure directly resulting from those products must be predicted on the basis of population studies of random households inquiring into the products used and their composition.

iii. Dermal exposure. Dermal exposure involves estimating the amount of substance contacting the skin. This may involve experiments measuring the amount of material leached from a product contacting a liquid layer which interfaces with the skin, or the amount of substance which migrates from a product (in solid or liquid form) which is in contact with the skin. Parameters which must be considered include surface area of the skin contacted, duration of contact, frequency of contact, and thickness of a liquid interfacial layer. Examples of how these types of experiments might be applied to exposure assessments can be found in the Commission's exposure assessments on dioxin and arsenic leached from children's playground equipment.

More recently, *in vitro* testing using animal or human skin held in specially designed cells has allowed the rate constants of penetration of various chemicals to be determined. This approach can be performed in the laboratory and, thus, is more controlled than experiments involving live animals or humans. Examples of studies using this approach are studies of the penetration of cosmetics and topical drugs performed by the FDA, and studies of the penetration of DEHP and formaldehyde performed by the CPSC.

c. Discussion of exposure estimates. Each of the three approaches for exposure assessment described above have certain strengths and weaknesses as discussed below.

i. Inhalation.—(a) *Direct monitoring.* Direct monitoring will provide the strongest data for demonstrating and quantifying exposure and should be used when available. The data obtained from such studies represent

measurements made in actual living conditions. The effects of weather, a residence's structural characteristics and contents, and human behavior are all reflected in the data obtained. With proper monitoring protocols, various human activities, weather conditions, source use (where the source of chemical is known), and other information directly of interest can be obtained. The resulting data base will reflect measurements of actual maximum and minimum concentrations and may provide adequate information to determine the effect of various parameters which affect the ultimate exposure. Such parameters include, but are not limited to, air exchange rate, ambient-indoor temperature differences, wind speed, type of heating system, and frequency of use of the source of interest. Direct monitoring studies can be of either randomly selected populations or selected specifically to represent a segment of the population expected to be at risk of exposure.

Data from such population studies are important not only because they provide direct measurement of human exposure, but also because, when well-designed and -conducted, they provide valuable information for the development of models to predict human exposure.

(b) *Modeling.* Mathematical modeling, another approach for assessing exposure, is based on the principles of conservation of mass; these models are often called mass balance models. The models may be one compartment where the whole house or building is treated as a single volume, or two or more compartments where rooms or portions of rooms are treated as individual exposure entities.

Model development with field validation has been largely performed using single story houses in investigations of unvented space heating appliances and gas ranges and ovens. In these cases the single compartment model has described the distribution of pollutants throughout the living space (Traynor 1983). A single compartment model in a house where there are multiple rooms appears to be adequate for predicting exposure to combustion products with heating appliances (Traynor 1987). This is a result of the heat produced by the appliances which rapidly disperses the pollutant throughout the house, leading to a uniform distribution of the pollutant. The case of multistory houses is less clear. In a study by the Gas Research Institute (Gas Research Institute in press) in a split entry research house, the distribution of pollutants from unvented gas space heaters or gas ranges/ovens was uniform at or above the levels where the heater was located. When the heater was in the lower "game room" area, pollutant distributions were uniform throughout the house. However when the heater or range/oven was operated on the second level which contained the kitchen, living room, and bedrooms, the pollutant concentrations were uniform on the second level and near background on the lower level.

During these studies the central heating system was not used. Thus, the effect of the furnace fan in distributing pollutants in the house is not known. The concent'rations of the reactive pollutant, nitrogen dioxide (NO_2), were nearly always higher in rooms distant from the heater than in the room where the heater was located. This effect was attributed to a combination of the reactive decay and convective transfer of pollutants within the house. Modeling pollutant concentrations in houses of three or more stories will be further complicated by the stack effect of the house itself and the more convoluted path required for the pollutant to move from room to room.

The following criteria are minimum inputs for use of mass balance models:

(1) Source strength of the pollutant-emitting product (obtained from literature and field or laboratory studies).

(2) Housing characteristics (obtained from literature or housing surveys specific to the pollutant source of interest), such as:

(a) Number and size of rooms,

(b) Level of insulation in floors, ceilings, and exterior and interior walls,

(c) Reactive decay rates if appropriate for certain pollutants,

(d) Air exchange rates for the sample being modeled,

(e) Construction characteristics of the housing sample,

(f) Occupant behavior involving the house,

(g) The number and usage of the pollutant source in the structure, and

(h) The type of central heating and air conditioning used in the house.

(3) Ambient conditions which are likely to be encountered for the population under study, such as:

(a) Ambient wind speed which can affect the infiltration rate (air exchange rate) and, thus, alter the concentration ranges predicted,

(b) Ambient temperature which is an important factor in air exchange and air distribution within a house, and

(c) Ambient surroundings that can affect the wind's and sun's effect on the house by providing shading or breaking the normal wind velocity.

All of these factors should be considered in modeling exposures.

The list of criteria needed for modeling is extensive and often the information is not available in the necessary detail to fill all cells of the model. It is often necessary to review the existing literature and use as inputs data representing the average and range of values reported. Although data from field studies of occupied housing should be used in exposure assessments, they are not always available. When field study data are available they should be used not only for the exposure assessment, but also for determining averages and distributions for the purpose of model development. Alternatively, where data are lacking, averages and ranges from laboratory chamber studies can be incorporated. Examples of such data are emission rates from unvented space heaters which have largely been determined in laboratory chambers the size of a small room. These data are often supplemented by small field studies of select populations using the appliance or product of interest. Such studies are used to confirm the laboratory-determined emission rates and to provide a limited validation of the predictive capability of the model. Examples of such studies are those performed by LBL (Traynor, 1983) and the Pierce Foundation (Stolwijk, 1983) with unvented gas and kerosene space heaters.

Exposure assessment models should be validated. The assumptions and limitations of the model, the validation process, and validation results should be described. Validation is generally done by comparing model predictions with the results of field or laboratory studies. Where possible, model validation should utilize input parameters independent of the field study house(s) being monitored for validation purposes. The model validation comparison should reflect the ability of the model to predict average, high, and low concentrations in a house.

Models have provided much of the exposure information for combustion products used by various federal agencies, both to determine the need for extensive field studies and to determine regulatory approaches. The modeling studies performed for combustion products predicted the concentrations measured in dwellings reasonably well, in large part, because the appliances under investigation produced a large amount of heat which drove the combustion products rapidly throughout

the dwellings. Thus, a relatively simple, one compartment model was suitable for assessing exposure. However, when there is no driving force to distribute the chemical of interest throughout the dwelling, *i.e.*, heat or a central ventilation system, the prediction of concentrations throughout a dwelling becomes less accurate. An example of the latter was the LBL study (Hodgson 1987) of paint removers tested in a room-size chamber and used inside dwellings to remove paint from standard panels or furniture. Until validation data from research house and field studies is obtained, models should only be relied on as preliminary estimates of exposure.

(c) *Surrogate data.* Surrogate data should be used only when data on a particular pollutant or source are sparse or unavailable. Care should be taken in interpreting surrogate data in order to minimize potential errors due to the following differences between the surrogate substance and the "real" substance of interest.

There may be differences in product composition. Linear extrapolation of pollutant concentrations based on differences in concentrations in the surrogate and "real" product are not appropriate. Matrix effects of the surrogate product may not be defined in sufficient detail to permit a valid extrapolation to another product.

Differences in the physical properties of the surrogate and the "real" substance may exist. Differences in such physical properties as vapor pressure, viscosity, and diffusion constants may be great enough to introduce substantial errors into the exposure assessment.

Finally, differences in reactivity/absorptivity may affect the ultimate emission rate and, thus, concentration measured or predicted.

In general, surrogate data should be used as a screening process to determine whether additional studies are necessary and what the parameters for those studies are.

ii. Oral ingestion. When chemicals are suspected to leach from a product, such as pacifiers or flame retardant treated sleepwear, studies designed to assess solubilization of the chemical using simulated saliva and chewing are required. If portions of the product may be swallowed, the product should be subjected to simulated gastric fluids to assess the chemical's release.

The diverse nature of consumer products precludes a standard protocol for exposure based on oral ingestion studies. Generally, each product will require specific procedures and techniques to assess exposure. However, once human factors data defining product use are available, the following criteria should be established to assess exposure:

(1) A stimulant or range of stimulants should be carefully selected to mimic the possible range of conditions which can occur in humans. Such conditions may represent full and empty stomachs, or various saliva compositions which differ during the course of the day.

(2) The mechanical action to which a product is submitted must be chosen to represent some range of realistic conditions to which a human may subject the product. This consideration should encompass the population using the product, such as infants, toddlers, young adults, and older adults.

(3) The simulation to be used to mimic the use of the product (*i.e.*, rubbing, abrasion, body area and areas in contact with the product) should be defined.

iii. Dermal exposure. Dermal exposure concerns the amount of a substance in contact with the skin over a period of time. In order to adequately define the amount of dermal exposure the following factors need to be considered: concentration of the substance in the product, migration of the substance from the product to the skin, site of application, skin surface contacted by the product (or substance), duration of exposure, and frequency of exposure. Examples of dermal exposure assessments previously performed by the Commission include those on dioxin in paper products (Babich, 1989), arsenic in wood playground equipment (Lee, 1990), and TRIS flame retardant in infant sleepwear (CPSC, 1977).

The diverse nature of consumer products and exposure scenarios precludes the development of a standard protocol for dermal exposure. The general protocols described below are given to illustrate the numerous factors which should be considered. One can envision that dermal exposure may occur by one of the following general pathways: (1) the substance is contained or bound in a solid matrix which is exposed to a liquid that contacts the skin (*e.g.*, dioxin in infant diapers, TRIS in infant sleepwear); (2) the substance is contained or bound in a solid matrix which contacts dry skin (*e.g.*, dioxin in communications paper, TRIS in infant sleepwear, arsenic in wood playground equipment); (3) the substance is dissolved in a liquid which contacts the skin (*e.g.*, dish detergent); and (4) the substance contacts the skin directly.

In pathways 1 and 2, the critical factor in assessing exposure is estimating the rate or extent of migration of the substance from the matrix to the skin. In pathway 1, migration is mediated by the liquid (*e.g.*, urine, perspiration), whereas migration in pathway 2 is unmediated. The distinction between pathways 1 and 2 may be contrived. Migration of dioxin from communications paper to the skin was modeled as unmediated migration by the Commission (Babich, 1989) and as liquid mediated migration with sebum as the liquid phase (A.D. Little, 1987). In pathway 1, migration may be described by a solid: liquid partition coefficient (K), defined by:

$$K = C(solid)/C(liquid)$$

where C(solid) is the concentration in the solid matrix and C(liquid) is the concentration in the liquid phase. Partition coefficients are generally measured in the laboratory. The conditions used in the laboratory should mimic the intended use. For example, for dioxin in infant diapers, fluff pulp with a known dioxin concentration was extracted with synthetic urine at 32 degrees for intervals up to twenty-four hours (NCASI, 1989).

The migration rate in pathway 2 may be determined by direct measurement (*e.g.*, Ulsamer, *et al.*, 1978).

d. *Conclusion.* Due to the multitude of consumer products and art materials, it is not possible to describe default scenarios for each product. Exposure scenarios should include customary or reasonably foreseeable use, including reasonably foreseeable accidental handling and use.

In most cases the best estimate of exposure (average exposure) is acceptable. Conservative estimates (i.e., those which may lead to overestimation of exposure, such as the upper confidence limit, "reasonable worst case," or "maximum exposed individual") are not required, but may be more appropriate in some cases. For example, conservative estimates should be used in cases where exposure data are lacking. Conservative estimates may also be useful to demonstrate that a certain exposure is not of concern. Exposure distributions are preferable to point estimates, provided that there are sufficient data for their development. In some cases, a range of exposures is appropriate, such as when the exposure distribution is bimodal.

It is important to note that exposure assessments for a single consumer product often represent only incremental additions to the total exposure that results from use of multiple products in the home. Thus, it may be useful to define what portion the incremental exposure is of the total environmental exposure. However, this determination may be difficult since data concerning other sources, and use

and duration of use patterns for a population or population segment, are often unavailable from the current base of human factors knowledge. While the focus of the guidelines is on individual products, exposures from other sources should be considered if they are known to the toxicologist.

In assessing exposure, all available data should be considered, including data from field studies, modeling studies, and studies of surrogate products. In general, field data are preferred over modeling studies, which are preferred over surrogate data. On a case by case basis, one must decide, for example, whether a good modeling study is better than a poor field study. Typically, the Commission uses both field data, when available, and model predictions. In most cases the Commission has utilized surrogate data only when there is reasonable assurance that they will accurately represent the chemical of interest.

2. Guidelines for Assessing Bioavailability

a. *Introduction.* The LHAMA directs the Commission to issue guidelines specifying criteria for determining when any customary or reasonably foreseeable use of an art material can result in a chronic hazard. This section discusses the LHAMA's directive to specify criteria for assessing bioavailability of chronically hazardous substances contained in art materials. Since the content of the guidelines can also apply to sources other than art materials, these guidelines should be considered for other products subject to the FHSA.

As explained in the previous section, bioavailability, which is concerned with the ability of a substance to be absorbed into the body, is one part of the inquiry into whether a toxic substance is "hazardous" under the FHSA. Therefore, these bioavailability guidelines will serve as part of a larger effort to outline the principles to be used in evaluating the risk resulting from exposure to materials that may present a chronic hazard.

b. *Bioavailability.*—i. *Background.* Bioavailability is a term used to indicate the extent to which a substance is absorbed by the body. The bioavailable dose can differ from the dose available for exposure (such as the amount ingested, the amount available for respiration, the amount deposited on the skin, etc.) and can also vary widely depending on the chemical nature of the substance and the route of entry into the body. For example, the estimated fraction of dietary lead absorbed by adults is only about eight percent (Rabinowitz, 1973). On the other hand, a volatile solvent, such as chloroform, whose vapors have high blood solubility can be expected to be almost completely absorbed during inhalation (Klaassen, 1980).

For purposes of these guidelines, an assessment of bioavailability will include, when necessary, the rate as well as the extent of absorption. Depending on the exposure scenario, the bioavailable dose may be directly affected by the rate at which a substance enters the body, particularly in the case of short-term inhalation and dermal exposures of slowly absorbed compounds. The rate of absorption may also be important when toxicity is related to a concentration of the toxicant above a critical level rather than the cumulative body burden.

The bioavailable dose, as defined in these guidelines, should also be distinguished from the dose of toxic substance that is delivered to its site of action. In addition to absorption, this delivered dose takes into account distribution, metabolism, and excretion. Therefore, estimation of delivered dose and its application to risk assessment cannot be addressed by bioavailability considerations alone, but requires a more complete pharmacokinetic (absorption, distribution, metabolism and elimination of substances) analysis. Use of pharmacokinetic information in the assessment of risk is addressed in the set of guidelines on risk assessment procedures.

The need to consider bioavailability in estimating the risk from use of a product containing a toxic substance arises when a difference is anticipated between the absorption characteristics of a substance to which there is human exposure and those characteristics for the substance when it is tested in animal toxicity or human epidemiological studies used to define the dose-response relationship. Some situations in which this might occur are outlined below.

ii. Physical or chemical forms of a toxic substance. If the physical or chemical form of a toxic substance in a product differs from the form present in the dose-response studies used to assess risk, the comparative bioavailability of the forms of the substance must be evaluated. This is particularly true of toxic metals which can exist as water soluble salts, water insoluble salts, alkyl compounds, and in various states of polymeric aggregation. All of these forms differ in their ability to be absorbed across biological surfaces. The bioavailability of toxic substances inhaled as particulates and aerosols will also vary based on particle size.

iii. Route of exposure. Bioavailability should be evaluated when it is anticipated that the route of human exposure to a toxic substance will differ from that used in the dose-response study. This could be a relatively common situation since the test substance is often administered orally in animal toxicity studies yet human exposure to chemicals from use of consumer products is frequently through the skin or by inhalation.

iv. Presence of other constituents. When a product contains constituents that are not accounted for during the dose-response study and that are reasonably anticipated to interfere with or enhance the absorption of a toxic substance, bioavailability must be considered. For example, the extent of dermal absorption of a compound can be influenced by the type of solvent present. Toxicity studies by the dermal route often use a vehicle that maximizes dermal absorption of the test substance. However, the dermal bioavailability of the substance might be quite different in the environment present in a consumer product.

v. Dose. Bioavailability should be considered during the exposure/risk assessment of a toxic substance if there is reason to believe that the dosing conditions used in the dose-response study would introduce a non-linearity in absorption when extrapolating to conditions encountered during human exposure. Animal toxicity and human epidemiology studies on which risk assessment is based often involve chemical exposures that are higher than exposures resulting from use of consumer products. Risk assessments usually predict toxicity at those lower doses using mathematical models that do not fully apply the biological non-linearities that can sometimes exist. In certain instances, non-linearities in absorption can influence low dose extrapolation. Some toxicants are absorbed from the gastrointestinal tract by carrier mediated transport systems [2] that may be saturated at the dose utilized in dose-response studies. Saturable metabolism (level of metabolism which cannot be exceeded) of toxic substances can produce non-linearities in bioavailability. This is particularly true following gastrointestinal absorption since the major metabolic organ in the body, the liver, receives the absorbed materials

[2] Carrier mediated transport requires the existence of a macromolecular carrier responsible for binding the substrate on one side of a biological membrane and releasing it on the other side. This process can be saturated at high doses.

via the portal circulation before the materials are available to the systemic circulation. The fraction of the applied dose absorbed as measured during dermal penetration studies is frequently less at high doses than at lower doses. Therefore, extrapolation of absorption data at high dermally applied doses without further study at lower doses could underestimate bioavailability.

vi. Other conditions. Other aspects of a dose-response study may make it inappropriate to estimate human risk without making adjustments in bioavailability, particularly if the animal model or human population under investigation does not adequately approximate the absorption characteristics anticipated in the population of concern. For example, certain metals, notably lead and cadmium, are more efficiently absorbed in the gastrointestinal tract of younger animals (and humans) than adults (Hoffmann, 1982). Thus, it is necessary to correct for this absorption difference when estimating risk to children based on a toxicity study in adult animals. In addition to age, other factors that might affect adjustments in bioavailability are animal species, sex, and strain. It may also be necessary to adjust bioavailability to reflect differences in dosing regimen. Often animal studies are conducted under conditions of repeated dosing while human exposure from use of a product may be intermittent.

vii. Special cases where bioavailability has been accounted for in exposure and risk assessments. Sometimes certain aspects of bioavailability are inherently accounted for during the assessment of either risk or exposure. Risk assessments that rely on pharmacokinetic models to account for non-linearities in delivered dose will usually have made a correction for bioavailability. Exposure assessments based on biological monitoring data, such as urinary metabolites or adducts present in the blood, will often have accounted for bioavailability due to the nature of the measurement. In these cases, it may be unnecessary to assess bioavailability separately.

c. *Guidelines for the assessment of bioavailability*—i. General strategy for assessing bioavailability. Three routes of exposure are normally encountered during use of consumer products: inhalation, ingestion, and dermal contact. Once the exposure assessment has established the routes of concern and the amount of toxic substance available to the appropriate absorptive surface (*i.e.*, respiratory tract, gastrointestinal tract, and skin), bioavailability should be addressed if any of the conditions described above requires it. This should be done for each toxic substance and each route of exposure presented by the product.

Two general approaches may be used to account for bioavailability in the process of estimating risk: a default value can be assumed for the amount of substance absorbed or a bioavailability assessment can be performed. The default value should be used when there are no adequate data which would lead to an alternative approach. The goal of the bioavailability assessment is to provide a quantitative estimate for the amount of substance absorbed into the body. There may be several acceptable measurements from which bioavailability can be determined.

Although all available data should be considered, it is usually best to use *in vivo* absorption studies for the substance of interest. *In vitro* data can often be used to supplement *in vivo* data. (With *in vivo* studies, the substance of interest is introduced into a live animal. With *in vitro* studies, the substance's effect on tissue or cells isolated from the animal is studied.) Bioavailability assessments based on *in vitro* data are acceptable if *in vivo* studies are not available, if *in vitro* data are shown to be of superior quality, or if *in vitro* data more closely approximate the exposure conditions anticipated from use of the product in question. In the absence of substance-specific absorption data, it is acceptable to use a bioavailability estimate based on the default assumption or a surrogate measurement of a related compound that is known or anticipated to be no less than the actual extent of absorption. In instances where no other acceptable data exist, a bioavailability estimate of a related compound whose bioavailability is expected to be less than that of the substance of interest, but not beyond the magnitude of reasonable experimental error, can be used. However, if a related compound has been chosen based on a surrogate measurement, it must be justified that small differences in the surrogate data will not cause the extent of absorption to be underestimated beyond reasonable acceptability limits. The acceptability limits and the conditions on their use apply in subsequent discussions of surrogate bioavailability data. These approaches are also useful when the risk is anticipated to be negligible as might occur with products containing very low concentrations of a toxicant or products whose use leads to very low human exposure. A bioavailability estimate that is known or anticipated to underestimate the extent of absorption should not be used. A qualitative assessment can sometimes assist in choosing a method to estimate the bioavailability of a substance. In cases where bioavailability is considered, exposure estimates must be adjusted for the fraction of substance absorbed relative to the dose-response study.

(a) *Default approach.* The default value for bioavailability assumes that 100 percent of a substance to which a person is exposed will be absorbed. Although the default assumption may overestimate absorption, it usually has the advantage of allowing a relatively quick and easy determination of an upper bound on risk without the need for a more time-consuming quantitative bioavailability assessment. Because exposure estimates must be adjusted for relative bioavailability, risk assessments based on the default value may still require a quantitative evaluation of the fraction absorbed under conditions of the dose-response study (see discussion below).

(b) *Bioavailability assessment.—Qualitative approach.* A qualitative assessment may be useful in choosing the final quantitative approach necessary to account for bioavailability. If a qualitative assessment can demonstrate that the bioavailability from use of a product is anticipated to be no greater than the bioavailability that would result under the conditions of the dose-response study, it is acceptable to assess risk based on the assumption that a substance is absorbed to the same extent as occurred in the dose-response study. Like the default assumption, this approach may overestimate bioavailability but could, nevertheless, provide an acceptable value with minimal time and effort.

A qualitative assessment can also justify utilizing bioavailability data for a related compound when data are not available for the substance of interest, provided all critical factors related to absorption by the route under consideration are taken into account. In this case, there must be compelling evidence to indicate that the bioavailability of the surrogate compound is no less than the substance under consideration. Because these are not quantitative determinations, data other than direct bioavailability measurements are sufficient to complete the assessment. For example, a knowledge of the relative solubilities of two forms of a toxicant may be sufficient to allow data on gastrointestinal bioavailability of the more soluble form to be used to estimate

the risk from ingestion of the less soluble form of the same substance. The type of measurements sufficient to produce a qualitative determination are route-specific and will be discussed below.

Quantitative approach. If a bioavailability assessment is needed and the default assumption is not used, then quantitative estimates for the amount absorbed must be determined. The necessary data may be available to sufficiently quantify bioavailability or the appropriate experimental studies can be conducted to generate this information. Acceptable methods for determining bioavailability depend on the route of exposure. However, there are some general considerations common to most bioavailability measurements that will be discussed here.

Bioavailability measurements from in vivo exposure. The most definitive method of determining bioavailability is to measure it directly after *in vivo* administration by the exposure routes of interest. When systemic bioavailability (the fraction of the administered dose that enters the systemic circulation) is the appropriate measure, the relative availability between exposure conditions and those of the dose-response study can be determined by a comparison of the total areas under the substance concentration in plasma versus time curve (area under the curve or AUC). This procedure estimates the amount of a substance to which a specific part of the body is exposed over time. The ratio of the AUCs can be shown to be equal to the relative extent of absorption (Gibaldi and Perrier, 1982) and can be used directly to adjust exposure estimates for calculation of risk. In cases where the toxicity of interest occurs at the site of exposure, such as effects on the skin following dermal exposure or respiratory toxicity from inhalation, systemic bioavailability is not a relevant measure; extent of absorption must be determined from the concentration in the tissue of interest.

For example, if a substance was given orally in a dose-response study and the principal route of exposure from use of a product was by inhalation, relative bioavailability can be calculated as $AUC_{inhalation}/AUC_{oral}$, provided comparable doses of the substance were administered. Mathematical accommodations can be made if different doses are given. The AUC method requires that plasma concentration of the substance be determined at several time points after dosing until at least 2 to 3 half-lives of elimination have occurred. Relative systemic bioavailability can also be determined using cumulative excretion data. This necessitates that excreta be collected from the major routes of elimination (urine, feces, expired air, etc.) until virtually all the substance has been expelled from the body. Regardless of the measure used, it is important to account for both the parent compound and its major breakdown products.

Use of radiolabeled compounds is usually the most effective way of insuring a complete accounting of the parent and its metabolites. Bioavailability measurements for at least two doses that span 1 to 2 orders of magnitude may be necessary in order to address possible non-linearities. In all situations, the doses employed should be such that the processes of absorption and metabolism (when it affects bioavailability) are not compromised. In general, bioavailability testing should conform with the EPA Good Laboratory Practice Standards (EPA, 40 CFR part 792) and applicable test standards for pharmacokinetics (EPA, 40 CFR part 798.7485).

Other data that may be used to quantitate bioavailability. Types of data other than *in vivo* measurement may be used to estimate bioavailability. Under the proper circumstances, absorption can be determined from *in vitro* preparations utilizing isolated organs. When estimating bioavailability from any *in vitro* preparation, it is important to ensure that it is truly representative of *in vivo* processes. For example, an isolated segment of intestine should not be utilized to assess absorption of a substance that also enters the body through the stomach or another part of the gastrointestinal tract. In most situations, it must also be demonstrated that the preparation was viable during the period of measurement and that those factors critical to bioavailability of a particular substance, such as specialized transport or metabolism, approximate the *in vivo* condition. Uptake studies using isolated cell systems, or subcellular fractions where cellular organization has been disrupted, are usually not sufficiently representative of the *in vivo* situation.

In certain defined circumstances, use of surrogate data to estimate bioavailability is acceptable. For example, the amount of substance absorbed from ingestion of a solid material can sometimes be estimated by measuring its solubility in media designed to mimic the gastrointestinal environment. Blood:gas partitioning (the relative amount in blood versus the amount in air) can sometimes assist in determining systemic bioavailability following inhalation of gases and vapors. The respirable fraction of dust and aerosols is sometimes an adequate estimate of that portion available for absorption through the alveoli of the lung. In order to use surrogate data, the test method used must accurately reflect the absorption process it is subetituting for, and any results must be reproducible. Data that overestimate the bioavailability are also acceptable, as noted previously.

Physiologically based models can also provide estimates of absorption. These models mathematically describe absorption in terms of physiological and biochemical parameters, such as, ventilation rate, blood flow, partition coefficients, and absorption rate constants. Physiological models have the advantage of being able to predict systemic or tissue bioavailability under different conditions, but they frequently require access to large amounts of input data. Model-dependent parameters should always be identified and the methods used to determine their values clearly stated. Like other methods used to generate surrogate data, models must be validated to ensure that they adequately estimate the particular measurement of interest.

(c) *Adjusting exposure estimates for bioavailability.* Route-specific exposure resulting from a particular product use can be expressed as the amount of substance to which one is exposed per body weight per day. This average daily dose can then be multiplied by a relative bioavailability ratio to give the amount of substance that contributes to the body burden for a particular situation. The relative bioavailability ratio determined by the bioavailability assessment is defined as the fraction of a substance absorbed from a specified exposure as a result of product use divided by the fraction absorbed during the dose-response study. Exposure estimates must be adjusted by the relative bioavailability ratio whenever exposure to a substance from product use leads to the conditions outlined in subsection b. above. This ratio takes a value of 1 when the bioavailability is assumed to be approximated by the dose-response study itself. If a use scenario involves multiple routes of exposure, the route-specific average daily doses may be summed to get the total average daily dose for a particular use scenario.

ii. Routes of exposure. The predominant routes of exposure encountered during use of consumer products are ingestion, inhalation, and dermal contact. The biological surfaces that function as bioavailability barriers

are different for each exposure route and, thus, the factors that control and the methodologies used to measure absorption can vary. This section will discuss the critical features that must be considered in determining absorption across the gastrointestinal tract (ingestion), respiratory tract (inhalation), and skin (dermal contact).

(a) Gastrointestinal tract.—Transport characteristics. The gastrointestinal tract is the site of potential absorption for ingested substances. Although, in principle, absorption can take place along the entire length of the gastrointestinal tract from mouth to rectum, most absorption takes place in the stomach and small intestine where larger surface areas, longer residence times, and higher perfusion rates are most conducive to transport across the mucosal barrier. The most common mechanism by which toxicants are absorbed across the gastrointestinal tract is by passive transport [3] through the absorptive cells. Absorption by this mechanism is greatest for small uncharged lipid soluble molecules with adequate aqueous diffusivity. In fact, for a series of non-electrolytes of similar molecular size, gastrointestinal absorption can be shown, in general, to be proportional to lipid solubility as measured by oil:water partition coefficients. Ionizable compounds such as organic acids and bases are not well absorbed in their ionized form, and the extent and rate of absorption will be governed by the pH at the absorption site and the pKa of the chemical. Thus, organic acids are likely to be better absorbed in the acidic environment of the stomach, while organic bases would be expected to be better absorbed in the more basic pH of the intestine. While lipid soluble compounds diffuse through the gastrointestinal cells, small water soluble compounds are capable of diffusing through aqueous pores located at the junctions of the intestinal epithelial cells. This is a major mechanism by which water and small electrolytes, such as potassium and sodium ions, penetrate the gastrointestinal tract. Other water soluble chemicals with a molecular weight below about 200 daltons have also been shown to be absorbed this way (Schanker, 1962).

Several more specialized transport systems exist in the gastrointestinal tract that can be responsible for absorption of selected substances. Some chemicals are transported by a carrier mediated mechanism. This type of transport is primarily responsible for absorption of some nutrients and endogenous substances, but sometimes non-essential chemicals, including metals, such as lead and aluminum, and several quaternary ammonium compounds, are capable of utilizing these systems. Intestinal absorption of large macromolecules (10,000–60,000 daltons) have been documented in man and experimental animals. This is believed to occur by pinocytosis.[4] Particles up to 5–6 micrometers (um) in diameter can be absorbed by phagocytosis [3] (Aungst and Shen, 1986). However, the extent of absorption by pinocytosis and phagocytosis is generally low. Gastrointestinal absorption of charged substances of high molecular weight is particularly poor.

Physiological and physicochemical factors. Aside from the transport characteristics, there are several physicochemical, biochemical, and physiological factors that can influence gastrointestinal absorption and systemic bioavailability. The nature of a substance can sometimes be substantially altered during the absorption process: degradation can occur in the acid environment of the stomach; a toxicant can be altered by the action of digestive enzymes or the bacterial flora present in the intestines; once absorbed, some chemicals can undergo extensive metabolism in the liver before reaching the systemic circulation.

Most substances must be solubilized before absorption can take place. The rate and extent of dissolution can often limit the rate of absorption of a chemical ingested as a solid material. A key determinant of dissolution of solid material, as well as absorption of complex mixtures, is aqueous solubility. Absorption of some substances can be changed by formation of insoluble salts or molecular complexes. Dissolution of a compound in a solid matrix is influenced by particle size: Smaller particles are more easily absorbed than large particles because of their greater surface area. Sometimes the way in which a substance is formulated can have profound effects on gastrointestinal absorption. Lipid soluble substances administered in oily vehicles are often absorbed directly into the blood through the lymphatics bypassing the liver. The result could be a significant increase in systemic bioavailability if the substance is known to undergo extensive hepatic metabolism. Highly viscous suspensions can affect absorption by slowing dissolution of a substance and delaying gastric emptying.

Physiological factors must be considered when assessing gastrointestinal bioavailability. Delayed gastric emptying caused by a test substance or its vehicle can affect absorption particularly in the case of acid-labile (*i.e.*, decomposes in the presence of acid) compounds or situations where acidity influences dissolution. Gastrointestinal motility can affect absorption by altering the time spent at the site of absorption. This is critical for compounds whose bioavailability is limited by the amount of time they reside in the intestine. The gastrointestinal absorption of some substances is known to be age dependent: the absorption of many metals such as cadmium, iron, mercury, lead, and zinc is highest in newborns and decreases with age (Hoffmann, 1982).

Physicochemical properties can sometimes indirectly aid in the determination of bioavailability estimates. When a chemical is ingested as a solid material, measurements of solubility in media that mimic the gastrointestinal environment may be used to estimate absorption, assuming certain conditions are met. Use of solubility measurements as an estimate of bioavailability implicitly assumes that absorption of the soluble material is known. Other assumptions about absorption are acceptable provided that the actual extent of absorption will not be underestimated. It must be shown that the test method under which solubility is measured will not lead to a lower solubility than is expected to occur following ingestion. This requires that the surrogate method be validated against the appropriate *in vivo* models for the substance of interest, the type of material for which it is present, and its dose range.

Relative solubilities, pKa's and oil:water partition coefficients can also be utilized to justify using gastrointestinal bioavailability data for a related compound. A chosen surrogate compound should never be expected to have a lower bioavailability than the compound of interest. Absorption of a more soluble form of a toxicant should never be estimated using data from a less soluble form of the same toxicant. Absorption of organic acids should never be estimated using data from a related acid with a lower pKa. On the other hand, bioavailability of organic bases should never be estimated from a

[3] Passive transport refers to simple diffusion of a substance from one compartment to another controlled by a diffusion coefficient and the concentration or electrochemical gradient across the membrane.

[4] Pinocytosis and phagocytosis refer to transport processes by which substances are engulfed by the cell membrane.

related base with a higher pKa. The oil:water partition coefficient of the surrogate substance should never be lower than the compound under consideration. In these cases, it is essential that other factors critical to bioavailability, such as transport mechanism, molecular weight, first pass metabolism, and physiological effects do not cause the bioavailability of the surrogate compound to be less than the substance of interest.

(b) Respiratory tract: Factors that affect absorption from the respiratory system. Chemicals that are absorbed through the respiratory tract are gases, such as, carbon dioxide or nitrogen dioxide; vapors of volatile liquids, such as, benzene or methylene chloride; and aerosols, such as, silica, asbestos, and other dusts, smokes, fogs or mists. Aerosol deposition and the efficiency of absorption is dependent on particle size and charge. The majority of aerosol particles with a mass median aerodynamic diameter ("MMAD") greater than 5 um are deposited in the nasopharyngeal region of the respiratory tract following nasal breathing. The particles are usually trapped in the thick mucus blanket of the nasal surface and are rapidly removed by either mucociliary clearance,[5] sneezing, or nose blowing. Much of this particulate matter is made available to the gastrointestinal tract after swallowing of the secreta. As nasal breathing becomes augmented by mouth breathing, which might occur during exercise or periods of nasal blockage, nasopharyngeal deposition is reduced while both the fraction and size of particles reaching the deeper regions of the respiratory tract are enhanced. Some sufficiently soluble aerosols can dissolve in the mucus and be absorbed through the epithelium of the nasopharyngeal region into the blood.

Particles with a MMAD in the range of 2 to 5 um are increasingly deposited in the tracheobronchial region of the respiratory tract following nasal breathing. These are also cleared by the upward movement of the mucus layer lining this portion of the respiratory tract. However, the mucus is generally thinner and the clearance times longer, particularly in the terminal bronchiolar regions of the lung, allowing for greater opportunity of being absorbed across the epithelial cells into the blood. Coughing and sneezing can result in more rapid movement of particulate matter from the larger airways to the glottis to be swallowed.

Particles with diameters around 5 um also begin to reach the alveolus of the lung during nasal breathing; this region becomes the major site of deposition for particles with diameters less than 2 um. Lipid soluble aerosols are very readily absorbed from this zone of the respiratory tract due to the large surface area, high blood flow, and thin diffusion barriers. Because of the relatively inefficient clearance mechanisms available in the alveoli, insoluble particles can remain for long periods until they are either removed by the bronchial mucociliary system, phagocytysed by alveolar macrophages, cleared by lymphatic drainage, or slowly undergo dissolution and vascular removal. The long residence times of particulates deposited in the inner regions of the respiratory tract, combined with the relative ease of diffusion across the alveolar membranes, make the lung a significant site of absorption for those substances that adsorb on the surface of small aerosols. Inhaled particles less than 1 um in diameter can be expected to reach the deepest regions of the lung easily. However, the total deposition/retention of these smaller particles in the respiratory system is generally less since they can be exhaled. Recent data using nasal casts of humans and experimental animals suggest that ultrafine aerosols less than 0.2 um in diameter become increasingly deposited in the nasopharyngeal region of the respiratory tract. Other particle characteristics such as density, shape, and hygroscopicity [6] may influence the site of deposition and absorption.

The uptake of gases and vapors can occur throughout the respiratory system. The predominant mechanism for most gases is passive diffusion driven by the higher concentration in the inspired air relative to the tissue and blood. Aqueous soluble gases tend to be taken up by the nasopharyngeal region and upper airways. A greater percentage of the less water soluble gases reach the lower airways and alveolar region of the lung where absorption into the systemic blood occurs much more readily. Once in the alveoli, the amount of a gaseous substance that enters the blood is controlled not only by its concentration in the inspired air, but also by its solubility in blood, pulmonary ventilation, and blood flow. As one continues to breathe a gas or vapor at a constant tension, a steady state concentration in the blood will eventually be achieved. The time needed for a gas to reach steady-state is primarily a function of its solubility in blood, which is characterized by a blood:gas partition coefficient defined as the ratio of the concentration of dissolved gas in the blood to that in the gas phase at equilibrium.

A highly soluble gas with a large partition coefficient will be almost completely transferred to the blood with each inspiration, but the time needed to reach steady-state may be several hours. On the other hand, only a small fraction of a gas with low blood solubility will be absorbed into the blood and saturation may be achieved more quickly. Other factors will influence the ability of a gas to be absorbed in the blood: Time to steady-state will be more prolonged for gases that are highly lipid-soluble and can be stored in body fat; insoluble gases that are rapidly cleared by metabolism will also be absorbed to a greater extent than a gas of similar solubility that is not metabolized; an increase in pulmonary ventilation will often increase the absorption of a highly soluble gas, while an increase in pulmonary blood flow can increase the absorption of an insoluble gas; some carrier mediated or other specialized transport systems are known to exist in the respiratory tract, but are uncommon.

Other considerations may affect absorption from the respiratory tract. Inhaled substances that alter mucociliary flow, cause bronchconstriction, or directly damage the respiratory epithelium can significantly influence the bioavailability from this route of exposure. Although the metabolic capability of the lung is generally more limited than that of the liver, certain selected substances may undergo extensive pulmonary metabolism that could result in reduced systemic bioavailability. A more detailed discussion of the factors that determine the bioavailable dose following inhalation can be found in the EPA Interim Guidelines for Development of Inhalation Reference Doses (EPA, 1989).

The determination of administered dose from inhalation studies is more complex than with other routes since it is dependent on duration of exposure, respiratory rate and tidal volume as well as concentration. It is best for *in vivo* respiratory measurents to be done by plethysmography, but in its absence, appropriate values for the particular species of experimental animal may be assumed based on literature values.

[5] Mucociliary clearance refers to a mechanism by which particulates and bacteria are entrapped in a layer of mucus lining the respiratory tract and swept upward out of the system by the movement of small hairs called cilia attached to the epithelial cells of the tracheobronchial and nasal regions.

[6] Hygroscopicity refers to the ability of particles to accumulate moisture.

Administered dose calculations from experimental animals must be defined in terms of an equivalent human dose. This means that the airborne concentration has to be adjusted to reflect differences in exposure duration and breathing rate between experimental conditions and humans. The default human breathing rate during typical product use is assumed to be 20 cubic meters per day. This produces a default alveolar ventilation rate of 13.4 cubic meters per day since only a fraction of the air breathed is available for gas exchange. Appropriate ventilation rates for a number of animal species have been documented (EPA, 1988). If the test material is an aerosol, particle size distribution needs to be determined as the mass median aerodynamic diameter (MMAD). For insoluble aerosols, the amount deposited in the various regions of the lung can be estimated from the aerosol size distribution, deposition efficiency, and lung surface area. Adjustments can be made to account for differences in aerosol deposition between animals and humans (Jurabek, *et al.*, 1989).

Absorption by the respiratory tract can also be predicted using physiologically based models. These can be developed to estimate blood concentration over time resulting from inhalation of a substance or doses reaching different sites of the respiratory tract. The accuracy of these models depends on precise values for a number of physiological (ventilation rate, blood flow, airway diameter, etc.), biochemical (metabolic rates), and physiochemical (blood:gas partition, diffusion coefficients, etc.) parameters. All models should be adequately validated before being used in assessing bioavailability.

Certain surrogate data may be used to assist in determining bioavailability estimates following inhalation. Aerosol/dust particulates with a MMAD less than 10 um can sometimes be used as an estimate of that fraction available for absorption across the alveolar region of the lung. Studies indicate that only a very small fraction (<10%) of aerosols greater than this size reach the respirable region even with ventilation rates that occur during moderate to heavy exercise (Miller, *et al.*, 1988). Although bioavailability from alveolar deposition of aerosols greater than 10 um may be eliminated from consideration, potential absorption of these particulates from other portions of the respiratory tract or from gastrointestinal exposure as a result of mucociliary clearance must be evaluated.

Blood:gas partition coefficients for gases and vapors can be utilized to justify the substitution of respiratory bioavailability data from a related compound, provided certain criteria are met. The blood:gas coefficient of the surrogate compound must not be less than the compound under consideration. In addition, it must be shown that other factors that control transport from the respiratory tract such as metabolism, clearance, tissue distribution, and uptake from other regions of the respiratory tract cannot be expected to cause absorption of the surrogate to be less than that of the substance of interest.

(c) Skin: permeability characteristics. The skin serves as a relatively impermeable barrier to many chemical agents. In contrast to the gastrointestinal tract and lung in which a chemical must only pass through two cells to reach the blood, the skin has multiple cell layers that must be crossed before systemic absorption takes place. The rate-limiting step in this process is usually diffusion across the stratum corneum, the outermost densely packed layer of keratinized epidermal cells. The stratum corneum of different regions of the body will vary in thickness and diffusivity, and will be reflected in different dermal permeabilities. For example, the palms and soles are much less permeable than other skin areas because of their very thick outer layer of skin. Chemicals diffuse much more readily across the inner epidermis and dermis than the stratum corneum. Some chemicals may be partially absorbed through the cells of the sweat glands and hair follicles. However, because the cross sectional area occupied by these structures in human skin is only 0.1 to 1 percent of that occupied by the epidermis, this route of absorption is unlikely to play a major role for most substances.

Absorption from the skin is believed to occur by passive diffusion. The overriding determinants for the rate of percutaneous absorption are, therefore, the concentration gradients from skin surface to blood and the permeability of the penetrant for the stratum corneum. In addition to skin thickness and membrane diffusivity, dermal permeability is controlled by molecular size and partitioning between the stratum corneum and the vehicle in which the penetrant is present. Except for some extremely nonpolar compounds, the permeability constants for many substances in aqueous solutions have been shown to correlate well with their lipid solubility as measured by the octanol:water partition coefficient, provided their diffusivity does not greatly vary. The correlation is not as strong for the highly nonpolar compounds because the transfer of chemical out of the stratum corneum into the inner epidermis can become rate-limiting. This could possibly lead to an overestimation of dermal permeability based on the octanol:water partition coefficient. The degree of polarity can influence the diffusivity of a substance in the stratum corneum. Very polar compounds appear capable of partially diffusing through the outer surface of protein filaments, while the less polar molecules must exclusively dissolve in, and diffuse through, the lipid matrix between the protein filaments. These differences in molecular mechanism can lead to quantitative differences in the diffusion coefficient among substances. Although small moderately lipid soluble molecules appear to be best absorbed from the skin, larger molecular weight and/or ionized substances will usually be absorbed to a lesser extent. More information on how physicochemical properties influence dermal absorption can be found in the EPA Guidance for Conducting Dermal Exposure Assessments (EPA, 1992).

The vehicle in which the substance of interest is applied to the skin can affect dermal absorption in several ways. A vehicle may improve skin absorption by increasing solubility, thus, providing a greater concentration gradient for diffusion. The vehicle can increase or decrease the partitioning of the penetrant in the stratum corneum, thereby altering absorption. Some vehicles such as dimethylsulfoxide, and certain lipid extraction solvents and detergents, can accelerate dermal penetration by altering the diffusivity of the dermal barrier. This can occur by chemically destroying the integrity of the stratum corneum, either by functioning as a swelling agent, removing lipid, or altering the conformational structure of the cell layer.

A number of other factors might affect dermal bioavailability. The rate of absorption is directly proportional to the amount of surface area contacted by the penetrant: a toxicant applied over a large area of skin will be absorbed faster than an equal amount over a smaller area. Diffusion across the skin increases exponentially with rising temperature. Skin hydration affects percutaneous absorption by altering the diffusivity and thickness of the stratum corneum; dehydration can decrease permeability by as much as tenfold (Klassen, 1980). Disease or damage to

the stratum corneum can cause an abrupt increase in percutaneous absorption. Like the respiratory tract, metabolism of certain chemicals by cells in the inner epidermis may significantly decrease the bioavailability from skin. Binding of penetrant within the different cell layers may also limit bioavailability. Volatility, chemical instability, and pH of the vehicle may alter the amount of toxicant in a form available for absorption. Finally, variability in skin permeability exists among species. Good models for human skin are dependent on the compound of interest; pig and monkey skin generally appear to share the greatest similarity to human skin in terms of percutaneous absorption, but skin from other animals may also be adequate. Human skin may also be available.

Percutaneous absorption can be estimated with physiologically based models. These use physiochemical, biochemical, and physiological data, such as, diffusion and partition coefficients, molecular weight, clearance, and blood flow to predict bioavailability. The parameters used as input to the model should be experimentally determined by legitimate methods and the values being estimated by the model should be appropriately validated.

Octanol: Vehicle partition coefficients can sometimes be utilized to justify using dermal bioavailability data from a related compound. The chosen surrogate must not have a partition coefficient lower than the substance of interest. Other factors that influence bioavailability, such as membrane diffusivity and skin metabolism, also should not be expected to cause the absorption of the surrogate to be less than the compound under consideration. Since dermal absorption data are often available as an experimentally determined or a mathematically derived (based on surrogate measurements) permeability constant when the skin contact is with a liquid, this measurement needs to be converted into the absorbed dose. This can be determined by multiplying the permeability constant (cm/min) by the concentration of the chemical in the medium contacting the skin, the exposed surface area (square centimeters) and the duration of exposure (min).

3. Risk Assessment Guidelines.—a. *Introduction.* The purpose of this section is to describe the procedures to be used when estimating risk for substances which are defined as toxic by nature of their carcinogenicity. Such risks are used in conjunction with exposure information to determine whether an acceptable daily intake (ADI) has been exceeded, as described in the section concerning that subject. As explained in that section, the process of quantitative risk assessment will not be applied to other chronic endpoints (reproductive/developmental effects and neurotoxicological effects) at this time. Thus, this section will only deal with carcinogenic risk assessment.

Although these guidelines will be fairly specific, further information on the rationale behind some of the assumptions, examples of how the guidelines are applied, and examples of the application of pharmacokinetics can be found in the Commission risk assessments on methylene chloride (dichloromethane) and formaldehyde (M.S. Cohn, Inhaled methylene chloride unit carcinogenic risk assessment, June, 1985; M.S. Cohn, Estimated carcinogenic risks due to exposure to formaldehyde released from pressed wood products, February, 1986; M.S. Cohn, Updated risk assessment for methylene chloride (dichloromethane), June 1987).

b. Guidelines for carcinogenic risk assessment.—i. Selection of data upon which risk is based. For a given carcinogenic substance, the data used will be obtained from those studies used to define the substance as "toxic" by virtue of its carcinogenicity. Among these, the study leading to the highest risk should normally be used. However, other factors may be considered in the choice of the study. For example, a study with three administered doses, showing a dose-response relationship, can be given more weight than a study in the same species/strain with a single administered dose. Similarly, a study with the same route of exposure as that anticipated for human use of the product under consideration can be given more weight than a study that uses the same species/strain, but uses a different route of exposure. If both sexes in the study respond significantly, they can be combined before risk analysis if the responses are similar (as done in the case of formaldehyde). Alternatively, the risks for each sex can be determined individually and then averaged for the final estimate (as done in the case of methylene chloride). If there is more than one significantly responding endpoint, the risks for each are determined individually and then added for the final estimate. See the risk assessments on methylene chloride referenced above for an example of this treatment.

ii. High-to-low dose extrapolation. The multistage model (Global83 or later version) is used in all cases unless a convincing argument can be made for an alternative model such as one addressing a distribution of thresholds. Linearity at low dose is always the default assumption, in light of the high probability that the action of any carcinogen will interact with background cancer processes and environmental agents, as opposed to acting independently. Upon request, a copy of Global83 that will run on a personal computer is available without charge from the Commission.

The risk will be based on the maximum likelihood estimate from the multistage model, unless the maximum likelihood estimate is not linear at low dose (which happens when the first-order coefficient, q_1, is zero). In such a case, the 95% upper confidence limit on risk (*i.e.*, the 95% lower confidence limit on dose) should be used. In the example risk assessments cited above, the maximum likelihood estimate was used in the case of methylene chloride and the upper confidence limit on risk was used in the case of formaldehyde.

Modification of doses put into the multistage model may be made if sufficient pharmacokinetic information is available. See the above referenced risk assessments on methylene chloride for an example of how such information can be used to account for nonlinearities in the dose-response curve due to pharmacokinetic influences.

iii. Species to species extrapolation. For systemic carcinogens, that is, those that exert an effect remote from the site of contact, a "surface area" correction will be used if estimates of human risk are made based on animal data. At present, this correction is a factor derived from dividing the assumed human weight (usually 70 kg) by the average animal weight during the study, and taking that to the ⅓ power. On a miligram per kilogram per day (mg/kg/day) basis, the human is assumed to be more sensitive than the animal by this factor. See the risk assessments on methylene chloride for an example of this approach. There is the possibility that this factor may be changed, using the ¼ power instead of the ⅓ power, as part of a unified Federal regulatory approach. If such an approach is adopted, it will apply here.

In cases where the concentration is expressed as parts per million (such as, in air or in diet) and the carcinogen acts at the site of contact (such as, nasal passages or the lung), species may be assumed to be of equivalent sensitivity on such a basis. In other words, humans and animals exposed to the same concentration (in parts per million) in air or diet for the same proportion of lifetime are assumed to be equally

sensitive. See the risk assessment on formaldehyde for an example of this approach.

At this time, pharmacokinetics should not be used to adjust for differences between species in sensitivity to a carcinogen; briefly, this is because information on sensitivity of various species to a "target" dose is not currently available. The rationale for this decision is explained in depth in the risk assessment for methylene chloride.

iv. Route to route extrapolation. If no experimental study having the same route of exposure as that anticipated for human use of a substance is available, a study by another route of exposure is used. In such cases, pharmacokinetic methods may be used if sufficient data are available, or methods described in the bioavailability section may be used. The less information available, however, the more one has to rely on default assumptions (as discussed in the bioavailability section).

v. Scenario extrapolation. Where exposure scenarios are different from those used in the underlying study upon which estimates of risk are based, proportionality should be applied. For example, if an experimental study is performed under conditions of exposure for six hours a day, five days a week for lifetime, then the risk for a single hour of exposure is the risk from the experimental study divided by a factor of: 6 (hours/day exposure) × 5 (days/week) × 52 (weeks/year) × 70 (assuming a 70-year lifetime). If pharmacokinetic methods are used to adjust for risks at high versus low exposure levels, one must be careful not to combine level-time measures (such as in calculating a lifetime average daily dose) without taking the non-linearity into account. Where such pharmacokinetic information is available, it may be used to adjust scenario extrapolations. For example, two uninterrupted days of exposure may lead to a different time versus concentration (area under the curve) estimate than two interrupted days of exposure, due to factors such as incomplete elimination of the substance after twenty-four hours, saturation of uptake processes, or saturation of metabolic processes.

4. Acceptable Risks to Children and Adults

a. *Introduction.* Under the LHAMA, the Commission is required to develop a number of criteria to be used in the determination of whether an art material is to be labeled. Two of these are addressed here, namely, (1) "criteria for determining when art materials may produce chronic adverse health effects in children and criteria for determining when art materials may produce such health effects in adults," with the added provision that "where appropriate, criteria used for assessing risks to children may be the same as those used for adults," and (2) "criteria for determining daily intake levels for chronically hazardous substances contained in art materials."

The first of these two criteria, effects in children and effects in adults, is addressed in this section. The second, criteria for acceptable daily intake, consists of two general parts: Guidelines for determination of the quantitative risk estimated to be incurred from use of an art material containing a toxic substance, and whether or not this risk is acceptable. The first general part is addressed in other sections regarding whether or not a substance is toxic, how exposure is assessed, and how risk is estimated. The second general part, what risk is acceptable, will be addressed here. This discussion is intended to address the issue of acceptable risk with regard to all products subject to the FHSA, not just art materials.

The reasons for the inclusion of these two particular elements (risks to children and adults, and whether such risks are acceptable) in this section become clear when one considers that hazard, as well as risk, cannot normally be distinguished relative to age of the person exposed. It would be extremely rare, if at all, that a case could be made that a specific chronic hazard would apply only to children and not to adults, or vice-versa. For cancer and chronic neurotoxicological effects, hazard identification is normally based on long-term studies in animals or humans, and unless there is some rare phenomenon indicating otherwise, both adults and children would be expected to be susceptible to substances causing such effects. Similarly, exposure of an adult or child to a reproductive toxicant could lead to effects in eventual offspring. A special case is that in which a substance has an effect only during pregnancy—a child exposed to such a substance would not be at risk, but exposure to a pregnant adult could affect the unborn child.

Although children may be more susceptible to the effects of chronic toxicants, current methodologies for carcinogenic or other chronic hazard risk assessment are usually unable to distinguish between risk to children and adults for most substances. This is because (1) data do not usually exist which relate ultimate risk to age at first exposure to a substance, and (2) in the absence of such data, the basic methodologies used for risk assessment have not developed to the point where such projections can be made. Such an endeavor may be further confounded by scenarios where exposure to a substance in childhood may lead to manifestation of a disease in adulthood. Of course, there are rare occasions when data have been available to allow distinction of risks relative to age of exposure, such as the methodology applied for the estimation of risk of mesothelioma due to exposure to asbestos. In this case, there are epidemiological data relating risks observed (after a lengthy period of followup) to the age at which members of the group were first exposed.

Since currently available hazard and risk assessment methods are unable to distinguish susceptibility of children and adults in most situations, the procedures for risk assessment and determination of acceptable daily intake will apply to both children and adults. Thus, the two subjects (children and adult hazard/risk, and acceptable risk) are discussed together in this section.

b. *Acceptable daily intake (ADI) based on acceptable risk.* As mentioned above, the concept of acceptable daily intake (ADI) for a substance depends upon the projected exposure to users of a product (and possibly others affected by the product) and the estimated risks at such exposures. Thus, for any specific product the ADI of a constituent hazardous substance is defined as that exposure which leads to or is below an "acceptable risk." The recommended value of such a risk is explored below.

1. ADI for carcinogens. Although no universal figure exists, several reviewers have observed that Federal agencies, when setting a value of acceptable risk to the public for carcinogens, have often used the figure of one in a million or less. A one in a million risk means that when exposure to an agent of concern occurs, the exposed individual has an estimated additional one chance in a million during his or her lifetime of developing the deleterious effect, such as cancer. The exposure scenario being evaluated can be one use, one year's use, "normal product utility," or anticipated use over a lifetime, depending on the nature of the situation being addressed. Thus, the choice of the exposure situation evaluated is important to the concept of what risk is "acceptable." The greater the exposure, the higher the risk. Risk can be expressed in terms of exposure. For example, risk can be expressed as a risk of one in a million of developing cancer from a certain level of radon measured in a house, if the person

exposed lives in the house for a lifetime. Alternatively, risk can be expressed as lifetime risk—eating an apple treated with a pesticide every day for an entire lifetime results in a certain risk of cancer.

Federal agencies have wrestled with the notion of "acceptable risk" for many years. The FDA in 1977 (42 FR 54148), and in 1979 (44 FR 17075), concluded that a lifetime risk of below one in a million imposes no additional risk of cancer to the public. The latter Federal Register notice dealt with diethylstilbestrol (DES). Since the industry was unable to show that use of DES led to risks of less than one in a million, DES was banned (Marraro, 1982). EPA has considered risks in the area of one in a million to one in 100,000 as a value for "acceptable risk," although other values have certainly been considered (Lave, 1985). The range reflects the attitude that, although the line for a specific regulatory action on a substance might normally be drawn at one in a million, there is flexibility if the benefits of the particular substance drive the definition of "acceptable risk" to a higher value. Industry has also noted the one in a million value. Mieure (1984) of Monsanto Company has stated that risks less than one in a million "are not normally considered relevant for regulatory consideration; FDA, OSHA, and EPA have all stated that substances having risks below one in a million ought not be subjected to regulation."

The Commission has also acted to require labeling at estimated risks on the order of one in a million for a carcinogen. In the case of methylene chloride, some 30 products containing this compound were identified and evaluated in terms of estimated individual risks. By and large, those products having estimated risks of over one in a million were subject to a labeling requirement under an enforcement policy, and those under one in a million were exempt from this requirement. Additionally, the Commission took an action to minimize the amount of DEHP allowed in baby pacifiers when the maximum estimated risks were within the range of one to ten in a million.

The above discussion gives examples of past, present, and proposed definitions of "acceptable risk" used by Federal regulatory agencies that center around the figure of one in a million. While the discussion does not give examples of the many other figures that have also been considered or proposed, the use of one in a million has been most prominent and also has the most precedent in the case of actions taken by the Commission and other agencies for carcinogens. Other chronic endpoints (reproductive effects and neurotoxicity) should receive a similar level of concern. Therefore, for purposes of the LHAMA (and for other products subject to the FHSA), the maximum ADI under the guidelines is that exposure of a toxic (by virtue of its carcinogenicity) substance estimated to lead to a lifetime excess risk of one in a million. The term "exposure," as used in the guidelines, refers to the anticipated exposure from normal lifetime use of the product, including use by artists, art teachers, and art students. The assessment of exposure is covered in the section on exposure in these guidelines.

ii. ADI for neurotoxicological and developmental/reproductive agents. As mentioned in the section on risk assessment, no numerical risk assessment method for neurotoxicological or developmental/reproductive agents will be specified at this time. Although other Federal agencies such as EPA are developing and considering such methods for these types of chronic agents, the development is still ongoing, and they are not ready for implementation in guidelines such as these. When implementation is feasible, the Commission will specify appropriate amendments to these guidelines.

Therefore, as an alternative, a safety factor approach is specified for handling neurotoxicological or developmental/reproductive agents. Safety factors have been used extensively in the past for non-carcinogenic substances, and even for carcinogens as late as the early 1970's. Typically, a factor of ten is applied to account for potential differences in sensitivity between humans and animals, and another factor of ten is applied to account for differences in sensitivity among humans (Hutt, 1985).

Using the safety factor approach, the ADI under the guidelines is the following. If the hazard is ascertained from human data, such as that derived from epidemiological studies, a safety factor of ten will be applied to the lowest no observed effect level ("NOEL") seen among the relevant studies. For each study, the NOEL is considered to be the highest experimental exposure or dose level at and below which no significant response is observed (presumably, the next higher experimental point reflects a significant, positive response). The ADI is then tenfold less than the lowest (among the relevant studies) of these doses or exposures. If the hazard is ascertained from animal data, the ADI is one hundredfold less than the lowest NOEL.

The above concepts require some clarification. First, in the event that the only study or studies available have significantly positive responses at all levels tested (for example, only two single-point studies are available), a NOEL cannot be determined. Therefore, in such cases, the safety factor used to determine ADI will be applied to the lowest exposure or dose yielding positive results, known as the lowest observed effect level ("LOEL"). The safety factor will include an additional factor of ten (*i.e.*, ADI's of 100 and 1000 below the LOEL for situations based on human and animal data, respectively) to account for the probability that a response would occur at a lower dose or exposure.

Second, the NOEL (or LOEL) and ADI reflect daily dose levels, that is, the NOEL (or LOEL) is calculated in terms of amount per day experienced by the animals or humans under study, and the safety factor is applied to that number to determine ADI. When a specific art material (or other material subject to the FHSA) containing a toxic substance is used, if the daily exposure during use (with use, again, referring to anticipated use pattern(s)) exceeds the ADI, the product should be labeled according to provisions of the LHAMA and the FHSA.

Third, where only specific populations are susceptible, the product is still subject to the provisions of the LHAMA and the FHSA, although any labeling would identify such populations. For example, if a developmental toxicant acts only during pregnancy, this quality would be so noted on the labeling.

VII. The Supplemental Definition of Toxic

A. The Existing Statutory and Regulatory Scheme

Section 2(g) of the FHSA defines the term "toxic" very broadly as "any substance (other than a radioactive substance) which has the capacity to produce personal injury or illness to man through ingestion, inhalation, or absorption through any body surface." 15 U.S.C. 1261(g). This broad statutory definition covers both acute and chronic toxicity.

The Commission's regulatory definitions that interpret and supplement the statutory definitions provide specific tests that can be used to determine whether a product is acutely toxic by oral ingestion, inhalation, and skin contact. 16 CFR 1500.3(c)(2). However, there currently is no

corresponding regulatory definition to apply to products presenting a risk of chronic toxicity.

The Commission has long taken the position that the statutory definition of toxic includes both acute and chronic toxicity. Several regulations issued under the FHSA have addressed chronic hazards associated with a variety of products, such as lead (a neurotoxin), 16 U.S.C. 1500.17(a)(6), asbestos (a carcinogen), *id.* § 1500.17(a)(7), and vinyl chloride (a carcinogen), *id.* § 1500.17(a)(10). Another example of the Commission's action regarding chronic hazards is its Statement of Interpretation and Enforcement Policy on methylene chloride which notified the public that, due to risk of cancer, the Commission considered household products containing methylene chloride to be hazardous substances subject to FHSA labeling requirements. 52 FR 34698 (1987).

Congress and the courts have also recognized the Commission's authority to regulate chronic hazards under the FHSA. In *Gulf South Insulation* v. *CPSC*, 701 F.2d 1137, 1148–50 (5th Cir. 1983), the Fifth Circuit ruled that the FHSA would be the proper statute under which the Commission could ban urea-formaldehyde foam insulation if the Commission could establish a proper evidentiary basis for concluding that the product presented a cancer risk (a chronic hazard). Also, Congress indicated its expectation that the Commission would address chronic hazards through the FHSA. 15 U.S.C. 2080(b)(1)(C) and (2)(A)(iii) (CHAP to review data before Commission can ban a product that contains a carcinogen, teratogen, or mutagen).

B. The Supplemental Definition

The supplemental regulatory definition finalized today amends the regulatory definition of "toxic" to provide a definition that will include chronic toxicity, not just acute. The Commission hopes that this will clarify the definition and fill the gap in the Commission's current regulatory definition of "toxic."

The Commission is issuing the supplemental definition under the authority of section 10 of the FHSA which authorizes the Commission to issue regulations "for the efficient enforcement of this Act." Having this definition will improve the Commission's enforcement capabilities since the staff would not have to prove the meaning of chronic toxicity in each enforcement action. The Commission also believes that the definition will be helpful to manufacturers since it will clarify that chronically toxic substances are "toxic" (and must be labeled appropriately) under the FHSA. The supplemental definition discusses the particular chronic hazards of cancer, neurotoxicity, and developmental or reproductive toxicity. However, the definition is not limited to these hazards, but includes other chronic hazards.

The Commission has simplified the proposed definition. Some commenters felt that the proposed definition would eliminate the flexibility necessary to properly consider all factors affecting risk. They objected to an automatic risk level and automatic safety factors.

The Commission's intention in issuing the proposed guidelines and definition was to provide a balance of flexibility and certainty. The Commission did not intend to impose an automatic system that leaves no room for expert judgment. The general principle that determination of chronic hazards is a complex matter requiring the assessment of many factors is stated throughout the proposed and final guidelines.

After reviewing the comments and considering how the proposed definition would be implemented, the Commission decided to issue a broad definition rather than the more rigid one proposed. The final definition will clearly inform the public that chronic hazards are covered under the FHSA. It will also allow the flexibility intended by the Commission. This does not mean, however, that manufacturers will lack direction on when to label products that may present chronic hazards. The guidelines present exhaustive discussions of the chronic hazards of cancer, neurotoxicity, and reproductive and developmental toxicity, as well as the principles of exposure and risk assessment. The guidelines clearly recommend a risk level of 1×10^{-6} for carcinogens and certain safety factors for neurotoxins and reproductive and developmental toxicants. The guidelines provide that these levels should generally be followed in making labeling decisions, but they recognize that sound scientific data may warrant deviation from these levels.

Rather than requiring set risk levels, the final supplemental definition defines "toxic" as including such chronic toxicants as carcinogens, neurotoxins and reproductive and developmental toxicants.

VIII. Significant Comments and Responses

A. Comments Concerning the Codification

Comment. Several commenters expressed concern that art materials intended for adults and for use outside of the household are not covered by the Commission's interpretation of LHAMA.

Response. As explained more fully in section III.D of the preamble, the Commission construes this exclusion to be very narrow. LHAMA mandated ASTM D–4236 as a Commission rule under section 3(b) of the FHSA. Section 3(b) applies to substances intended or packaged in a form suitable for use in a household or by children. Thus, a substance that is not so packaged or intended is not covered by a section 3(b) rule. However, the Commission believes that it will be a very rare art material whose use is not anticipated in the household or by children.

This is particularly true since many artists do not separate their households from the area where they use art materials.

Comment. Some commenters stated that the final rule should clearly require a conformance statement on all art material products.

Response. As explained in section III.B. of the preamble, the Commission understands ASTM D–4236 to require that art material products that do not require chronic hazard labeling provide a conformance statement indicating that they conform to the requirements of ASTM D–4236.

Comment. A few commenters observed that the Commission needs to be able to amend ASTM D–4236 if ASTM changes any provisions of the standard.

Response. LHAMA provided for the Commission to amend the standard once it has provided an opportunity for written comments. If the change is not one initiated by ASTM, oral comments must also be permitted. The procedure for amending the standard is discussed in section III.F. of the preamble.

Comment. Several commenters noted the difficulty in defining "reasonably foreseeable or customary use" of an art material. This problem was also noted for other materials.

Response. The Commission agrees that this concept is difficult to define and may be particularly so with art materials. As the discussion in section IV.C. of the preamble indicates, the Commission has generally given a broad interpretation to the term.

Comment. Several commenters questioned the need for boardcertified toxicologists to review the formulations of art materials, and some recommended deleting this requirement from ASTM D–4236.

Response. As explained in section III.E. of the preamble, ASTM D–4236 defines the term "toxicologist" for

purposes of that standard as a board certified toxicologist or physician. The Commission can only change this requirement by the rulemaking process that LHAMA provided to amend the standard. The process for amending the standard is discussed in section III.F. of the preamble.

However, the staff does not believe that, in most instances, whether a toxicologist is board certified or not will be crucial to the analysis performed. Rather, the Commission is primarily concerned that the review is conducted by a person who has sufficient knowledge based on education, training, and experience and that the review is based on appropriate criteria. Section III.E. of the preamble explains that as a matter of enforcement policy, the Commission will not require that all art material reviews be conducted by a board certified toxicologist.

Comment. One commenter stated that no scientific and epidemiological data exist to suggest that consumers are being harmed by current use of art materials.

Response. The Commission is not asserting that any particular art material does or does not present a hazard. The guidelines set up a process to determine whether a product presents a chronic hazard. Congress has made the judgment that there is a need for a standard relating to the chronic health risk of art materials and that the Commission should develop guidelines.

Comment. Some individuals and organizations have sought clarification of the term "art material," and they have asked for some guidance on how the Commission will interpret the term as defined in LHAMA.

Response. Congress provided a broad definition of the term "art material." With the exception of certain products regulated under other statutes, the term is defined as "any substance marketed or represented by the producer or repackager as suitable for use in any phase of the creation of any work of visual or graphic art of any medium." 15 U.S.C. 1277(b)(1). The Commission has not developed any supplemental definition that would further define this term. However, some guidance on the Commission's interpretation of this term is provided in the discussion earlier in the preamble in section III.D.

B. General Comments Concerning Guidelines

Comment. One commenter suggested that the Commission should issue chemical-by-chemical "guidelines" somewhat like the lists that are developed by the state of California under Proposition 65. Similar comments suggested that the Commission develop substance-specific lists of carcinogens, sensitizers, neurotoxins, and developmental/reproductive toxins.

Response. The Commissions's action fulfills the Congressional intent behind LHAMA and is consistent with the FHSA. The Commission believes that its approach strikes a balance between the desire for certainty and the need to allow expert judgment. As explained in the preamble and the guidelines, many factors must be considered and assessments made to come to the determination that a substance is a "hazardous substance" under the FHSA. A simple list of substances would not reflect the complexities involved in this determination.

Comment. Commenters expressed views on both sides of the issue of the scope of the guidelines, that is, whether they should apply to products other than art materials. Chemical Manufacturers Association ("CMA"), for one, suggested that the Commission address non-art materials in a separate proceeding.

Response. As stated elsewhere in the preamble, the guidelines are intended to help manufacturers and others in determining whether their product presents a chronic hazard and, therefore, must be labeled under the FHSA. These same considerations are equally appropriate for art materials and for other products subject to the FHSA. The guidelines are not mandatory. Thus, to say that they only "apply" to art materials makes no sense since their use will be equally helpful to the manufacturers of art materials and of other products subject to the FHSA.

Comment. Several commenters suggested that the Commission convene a Chronic Hazard Advisory Panel ("CHAP"). CMA, for example, envisions the CHAP as a "screening mechanism" to identify particular consumer products "that deserve a full evaluation for potential chronic health risks." The CHAP would conduct hazard determinations on materials nominated by CPSC. There would be an opportunity for public comment. If warranted, the CHAP would assess potential exposure and, if there was significant exposure potential, conduct a risk assessment. The CHAP would then make recommendations to CPSC regarding labeling. CSMA recognized that the Commission is not required to consult a CHAP before issuing the guidelines, but suggested this "as a matter of sound administrative practice." Another commenter suggested that the Commission should establish a CHAP to review the need to expand the chronic hazard guidelines to product categories other than art materials

Response. As explained more fully in section V.B. of the preamble, the Commission must establish a CHAP in certain specified situations. The only action under the FHSA that requires the Commission to consult a CHAP is rulemaking to ban a particular substance.

In issuing these guidelines, however, the Commission is not promulgating a binding rule, is not seeking to ban a substance, and is not taking action with respect to any particular substance. The CHAP's purpose is to review particular products and substances. CHAP review is not appropriate in this case. The chronic hazard guidelines do not relate to any particular products or substances, but they provide guidance for determining, in general, whether a product can present a chronic health hazard.

Comment. In a somewhat similar vein, some commenters suggested that the Commission should regulate chronic hazards under the CPSA rather than the FHSA. They thought that the Commission should address specific consumer products and consult CHAPs in the process of doing this.

Response. As discussed in the preamble, the FHSA provides authority for the Commission to regulate chronic hazards. Although the Commission may have the authority to proceed under the CPSA, the FHSA is the more appropriate statute. The FHSA specifically requires the labeling of hazardous substances. The Commission has acted in the past to provide for chronic hazard labeling under the authority of the FHSA (e.g., methylene chloride). In fact, if the Commission were to issue chronic hazard guidelines under the CPSA, it may have to first issue a rule under section 30(d) of the CPSA finding that it is in the public interest to proceed under the CPSA rather than the FHSA.

Comment. CMA commented that the Commission has not given adequate notice to extend the chronic hazard guidelines from art materials to other products covered by the FHSA. CMA stated that the proposed guidelines did not adequately explain the Commission's authority and did not address the economic effects of the extension.

Response. The Commission believes that adequate notice was provided. The proposed guidelines clearly stated that because the scientific principles behind the guidelines are not affected by the types of products under consideration, manufacturers could use the proposed guidelines to aid their determination of whether a product covered by the FHSA presents a chronic hazard. The

commission received 47 written comments, including several on the very issue of the scope of the guidelines, and 15 people presented testimony at the public hearing in October.

Moreover, as explained in the preamble, the chronic hazard guidelines are not mandatory and are not being issued as substantive, binding rules. Rather, they are intended as guidance for manufacturers and others who must determine if their product requires labeling under the FHSA.

The Commission believes that it has adequately addressed the economic effects of the chronic hazard guidelines. The guidelines impose no new requirements on manufacturers. It is the FHSA that requires proper labeling of hazardous substances. The guidelines represent the CPSC's interpretation of the current scientific concensus regarding chronic health hazard assessment. Furthermore, the guidelines do not require any review of non-art materials by a toxicologist. This is a requirement of LHAMA and is directed exclusively at art materials.

Some commenters, including CMA may incorrectly believe that toxicological review would be required of all products subject to the FHSA. The requirements associated with the codification of the ASTM D-4236 apply only to art materials.

Comment. Several commenters stated that the Commission should clarify that chronic hazards covered by the FHSA are those that have the potential for "substantial" injury or illness.

Response. The FHSA definition of "hazardous substance" at issue in these guidelines does concern substances that may cause "substantial personal injury or substantial illness." 15 U.S.C. 1261(f)(1). The Commission's regulatory definitions provide guidance in interpreting this term. The applicable regulation states: "Substantial, personal injury or illness' means any injury or illness of a significant nature. It need not be severe or serious. What is excluded by the word 'substantial' is wholly insignificant or negligible injury or illness." 16 CFR 1500.3(c)(7)(ii).

C. Comments On Scientific Issues of the Guidelines and Definition

I. General

Comment. Commenters noted that it is important to keep the guidelines flexible and that rigid adherence to default factors (i.e., numerical factors to be used in the absence of data for the particular substance or circumstances) should not be required.

Response. The guidelines are intended to be flexible. This is stated very clearly in the guidelines as proposed and finalized. Default assumptions such as those used in exposure and risk assessment are, by definition, to be used in the absence of appropriate data. The guidelines permit the replacement of default assumptions with data-based alternatives. Alternative approaches should be scientifically defensible and supported by appropriate data.

Comment. Some commenters suggested that the guidelines should clarify that lack of significant bioavailability (or exposure) of a substance that would otherwise be a chronic toxicant will result in that substance being exempt from consideration as a "hazardous substance" under the FHSA.

Response. The proposed guidelines explained that for a substance to be a "hazardous substance" under the FHSA it must have the potential to be toxic and present a significant risk of adverse health effect through customary or reasonably foreseeable handling or use. The proposed guidelines also explained that this second factor reflects the person's exposure to the toxic component or the component's bioavailability. 56 FR 15674. The final guidelines reiterate this point.

Comment. Several commenters suggested that CPSC should specify using a species extrapolation method based on body weight since the use of the proposed "surface area correction" is not supported by the science.

Response. The science does not more strongly support one specific choice for a species extrapolation factor over another. Such a factor is commonly used to predict human cancer risks on the basis of results in animals. It is generally agreed that the best choice for such a factor lies within the range of the body weight method cited by the commenters, and the "surface area" method proposed in the guidelines. The FDA has used the body weight method in the past, and CPSC and the EPA have used the "surface area" method.

However, CPSC staff has been working closely with EPA, FDA, OSHA, and other Federal agencies to adopt a unified approach for species extrapolation (a factor related to weight ratio of humans and animals to the three-fourths power, which is in the middle of the range previously described). The guidelines state that this approach should be used when the unified Federal effort is adopted. There is extensive scientific justification and much peer review associated with this process. The Commission does not believe any change to this discussion in the proposed guidelines is warranted.

Comment. A few commenters stated that CPSC proposes to select data which produces the highest risk estimate. They suggested that the CPSC should encourage users to evaluate all appropriate data sets, and that the most scientifically relevant data, preferably human epidemiology, should be regarded as the key data to use for dose-response modeling.

Response. The proposed and final guidelines do not specify using data that produce the highest risk estimate. In choosing which data sets will serve as the basis for risk estimates, toxicologists should review all the data. The guidelines state that expert judgment is to be used in this, as well as in the many other choices which are part of the risk characterization process. For example, a method is presented which combines the results from different sexes, as opposed to only calculating risk from the highest responding sex. Furthermore, statements are made within the guidelines indicating that human epidemiology, when adequate, is the preferred source of data for human risk characterization.

Comment. Several commenters objected that the proposed definition of "toxic" would remove flexibility and require automatic application of a specified risk level for carcinogens and safety factors for other chronic toxicants.

Response. After considering these comments and how the proposed definition would work in practice, the Commission decided to revise the definition so that it defines "toxic" with respect to chronic toxicity but does not specify particular trigger levels. The definition is discussed in section VII of the preamble.

2. Cancer

Comment. Several commenters suggested that the guidelines' consideration of benign tumors as evidence of carcinogenicity should be similar to the approach of the Environmental Protection Agency and the International Agency for Research on Cancer (IARC), which consider such tumors as "limited evidence," and not "sufficient evidence." The grouping of benign and malignant lesions, they assert, is controversial and is only appropriate when certain criteria, like histogenic cell type, are met.

Response. The basis for considering benign tumors as part of "sufficient evidence" under certain conditions, and combining benign tumors with malignant tumors was discussed in the proposed guidelines. The CPSC believes that a benign tumor, if it has the potential to progress to malignancy, or is

life-threatening, should be considered to have the same potential health risk as if it is a malignant tumor. Current information supports combining benign and malignant tumors when scientifically defensible (e.g., same cell type in an organ or tissue). This is one of the principles of the consensus document proposed by Federal government agencies under the aegis of the Office of Space and Technology Policy. As it is rarely found that chemicals cause only benign tumors (in a review of 300 National Toxicology Program bioassays by Huff in 1988), the CPSC staff believes since a benign tumor may be life-threatening itself, or may be transitioning to malignancy, it should be treated as a malignant tumor unless there is adequate evidence showing that these possibilities are unlikely to occur.

Comment. Several commenters observed that increased tumor incidence at independent multiple sites are not necessarily independent observations and should not be treated as such in the guidelines. Tumors resulting from metastasis are not considered as separate tumors. Significance of multiple site tumors should be considered in the same way as that by EPA.

Response. The issue of tumors produced at multiple sites was discussed in the proposed guidelines. The phrase "sites of independent origin" means independent cancers which originate at unique sites and not that the same cancer metastasizes to a different site where cancer is reestablished. Thus, metastasis of a primary tumor to different sites will not be counted as different primary tumors because they would not have independently originated. The staff believes that the ability of a chemical to independently produce tumors at multiple sites indicates that the chemical has a wider range of carcinogenic potential similar to such an indication from responses in multiple strains, species, or experiments. No information was found in the comments to warrant any change in this position.

Comment. Several commenters stated that according to the Commission's proposals, a single study in humans which shows only limited evidence, or a study in animals which shows "sufficient evidence," is all that is required to determine that a substance is toxic under the FHSA due to chronic toxicity. They observed that in general, consistent findings from multiple human studies or multiple species are necessary to ensure valid hazard identification for this type of toxicity.

Response. Evidence from a study or studies taken together must be evaluated by the toxicologist. If a single extremely well conducted, non-biased study shows a powerfully significant effect, it by itself can serve as a basis for "sufficient evidence" of a toxic effect.

Epidemiological studies are very complex, and generally have inherent problems, such as exposure to multiple chemicals and problems ascertaining exposure. Much of this complexity leads to the evidence falling into the "limited evidence" category. CPSC staff believes that an epidemiological study or studies, which provides convincing evidence of a causal relationship between the incidence of cancer (or other chronic effects) and exposure to a chemical, but in which chance, bias, or other confounding factors could not be absolutely ruled out (limited evidence), may warrant the characterization of a chemical as toxic (probable human carcinogenic substance) under the FHSA. The criteria in these guidelines are not intended to be mechanically applied, but rather should be interpreted with the exercise of expert technical judgment. A single animal study with a response at only one dose will not normally lead to a conclusion that the substance is "toxic" under the guidelines.

Comment. Several commenters suggested that a "weight of the evidence" approach used by EPA should be followed in place of a "strength of the evidence" approach used by IARC in categorizing the evidence. CPSC, they observed, seems to have adopted the "strength of the evidence" approach. The commenters suggested that the guidelines should emphatically direct the consideration of all available information, including tests that show negative responses, as part of any evaluation.

Response. Both approaches include evaluation of all the available data regardless of the positive or negative results. CPSC's approach, which is not designated by any name, is similar to that of EPA and IARC; it also includes evaluation of all the available data. CPSC's approach does require a certain amount and quality of positive data before a finding of "toxic" can be made, but CPSC's guidelines also state that certain data and evidence can negate the impact of the positive data. The Commission believes that the approach adopted in the guidelines to evaluate carcinogens is a sound one, because it allows consideration of all the available data and not just the positive data.

3. Neurotoxicity

Comment. Numerous commenters noted that since LHAMA is concerned with only chronic effects, acute neurotoxic effects should not be considered. Discussion in the proposed guidelines on neurotoxicity, they stated, is too broad and would cover everything including water. Consideration should be limited to the agents which primarily affect the nervous system; only direct neurotoxic effects should be included in the definition. Effects due to overdosing, or alterations from baseline should not be considered as an indication of neurotoxicity unless statistical significance can be demonstrated.

Response. The guidelines do address only chronic effects. The nervous system is integrally connected to the functioning of all the other systems in an organism, which complicates the interpretation of neurotoxic effects. Effects can be chronic under several circumstances. These include long-term exposure followed by the effect, short-term exposure followed by an effect occurring at some time in the future, and an immediate effect due to short-term exposure which then lasts for a prolonged period of time. "Acute" in this case would refer to only those immediate effects, from short-term exposure, which are rapidly and completely reversible. The terms "short," "prolonged," and "immediate" are general guides to the interpreting toxicologist, who must decide from the nature of the studies if the effect is acute or chronic.

Comment. Several commenters stated that defining "sufficient evidence" by statistics is not appropriate since some results may be statistically significant due to random variability. They suggested that results must be statistically significant and biologically plausible, that "limited evidence" should also require biological plausiblity, and that the "possible neurotoxic substances" class should be deleted. Neurotoxicity criteria, they commented, are impractical to determine an appropriate hazard warning.

Response. Although it is possible that some neurotoxicity findings may be the result of false positives, this is accounted for by the guidelines. For human studies, the studies must be of high quality, and bias (which could lead to a false positive) must be considered. For animal studies, the effects must be statistically significant in more than one good quality study. Expert technical evaluation includes examination of reliability, sensitivity, and validity along with the requirement that a study should be well designed and conducted. Biological plausibility is a factor that increases confidence in a result, but by no means is it a prerequisite for using

the study as a basis for a finding of toxicity. In addition, it is clearly stated that evidence derived from animal studies that has been shown not to be relevant to humans is not included in the consideration of the neurotoxicity of a substance. The "possible neurotoxic substances" class is important to retain because it could indicate that more work is necessary on a particular chemical, and it gives the basis why the current evidence is not sufficient to conclude that a substance is toxic.

4. Reproductive and Developmental Toxicity

Comment. Some commenters stated that it is inappropriate to list a chemical in the "sufficient" category if it has been found to be active in only one species, regardless of the number of endpoints. A single statistically significant endpoint is not "sufficient" evidence to classify a material as a reproductive or developmental toxicant.

Response. The staff believes a good quality study with significant changes in multiple endpoints using multiple doses, routes of administration, or strains, constitutes a degree of toxicity in animals that is predictive of probable harm to humans and thereby warrants further assessment of exposure, risk, and bioavailability. If an effect occurs more than once (at two dose levels or two sites, for example), or if there are multiple effects, the possibility that the observed reproductive or developmental toxicity is an anomoly is greatly reduced.

Comment. Some commenters stated that maternal toxicity and its relationship to developmental toxicity should be evaluated and integrated into the interpretation of a study. Developmental toxicity, they stated, should not be automatically discounted as secondary when it is associated with maternal toxicity.

Response. The Commission agrees with this comment. The proposed guidelines stated "maternal toxicity * * * must be evaluated and accounted for in the interpretation of a study. The toxic effect(s) observed in a positive study *should* be significant at one or more doses in the absence of maternal toxicity." 56 FR 15684 (emphasis added). The final guidelines have been revised to clarify this point and state that toxicity is not automatically discounted as secondary when associated with maternal toxicity.

5. Bioavailability.

Comment. One commenter observed that CPSC proposes to set the dermal penetration rate for chemicals present in mixtures at 100 percent. CPSC should require skin penetration rates based on the physical-chemical characteristics of an art material, the commenter stated. While direct measurement of the skin penetration is desirable, in numerous instances it is impractical. Alternatively, other indirect approaches must be relied upon to estimate systemic doses from skin contact; and any default value, particularly one as severe and overly simplistic as 100 percent, must be left to rare and extreme circumstances.

Response. The proposed CPSC bioavailability guidelines did not set the dermal penetration rate for chemicals at 100 percent. In fact, the guidelines as proposed and finalized specify the use of indirect approaches, including use of physicochemical data, to estimate dermal bioavailability where appropriate. The proposed guidelines, at section III.F.2.c.i (56 FR 15660) clearly indicated that either a default value may be assumed or a bioavailability assessment may be performed. That paragraph also states that "the default value should be used when there are no adequate data which would lead to an alternative approach." The following paragraph of the proposed guidelines generally describes the alternative approaches and the conditions under which they can be used to estimate bioavailability.

The type of data which may be used in a quantitative bioavailability assessment are discussed in subsection (b) of VI.F.2.c.i. A number of acceptable methods of measuring dermal penetration are also specifically identified in the technical support document for the bioavailability guidelines available through the CPSC's Office of the Secretary. They include *in vivo* bioavailability studies, isolated perfused skin studies, *in vitro* studies using excised skin, physiologically based dermal absorption models, surrogate data such as octanol:vehicle partition coefficients and bioavailability data from surrogate compounds. It is stressed throughout the guidelines that all factors expected to affect dermal penetration must be considered in the assessment. This is especially important when bioavailability is based on *in vitro*, surrogate compound, or physicochemical data.

Comment. One commenter states that in the proposed guidelines, CPSC fails to acknowledge the range of information that may be relied upon to make estimates of systemic doses from skin contact with chemicals reliably in the absence of direct empirical measurements. The information lacking from CPSC's proposed guidelines, the commenter states, includes viscosity of a chemical mixture, the molecular weight of each substance, the polarity of each substance in a mixture, and the lipophilicity of each compound.

Response. This comment is incorrect. Section III.F.2.c.ii(c) of the proposed guidelines (56 FR 15684) acknowledged a large number of factors that impact dermal bioavailability including three of the four examples cited in this comment. Lipophilicity, molecular size, and degree of polarity are all discussed in the second paragraph of the section as important chemical-specific determinations of dermal absorption.

This section of the guidelines describes several vehicle-specific determinants of dermal absorption but does not include viscosity. The commenter claims that "high viscosity acts as a barrier to absorption through the skin" based on "many incidental observations" related to pen and marker inks. The staff is unaware of scientific data that show viscosity retards skin penetration, although it is generally recognized that viscosity will affect dermal migration (migration of a substance from a product to the skin surface). Dermal migration is discussed in the guidelines for assessing exposure (VI.F.1.c.iii). Finally, the fourth paragraph of the skin permeability section describes the major physiological and other factors expected to influence dermal absorption. Hydration of the stratum corneum and volatility of the mixture, also mentioned elsewhere by the commenter, are discussed in that section.

Comment. One commenter asked how a hazard can be established and estimated when the exposure is infinitesimally smaller than doses known to produce any effects in animals. The commenter stated that hazards are estimated by direct exposure to a substance regardless of the route of exposure, and, more often than not in art materials, the particular ingredients of concern are not readily bioavailable.

Response. This comment is interpreted to question the basis on which CPSC can ever consider ingredients contained in art materials as hazardous when: (a) Users are exposed to much smaller amounts of these substances than cause adverse effects in experimental animals, and (b) the routes of human exposure to art materials are often such that the ingredients would not be readily bioavailable.

The first part of the question was addressed in section III.F.4.b of the proposed guidelines on acceptable daily intake. The ADI is the maximum daily dose of a chronically toxic substance (as determined by other sections of the

guidelines) to which a person can be exposed without presenting an unacceptable risk of injury and illness. The ADI will usually be considerably less than the dose observed to cause an adverse health effect in animals as discussed in subsection (i) and (ii) of this discussion in the guidelines. This is because the observed adverse effect levels in animals, in most instances, have to be adjusted (1) to assure that the toxicity observed at the high levels is acceptably reduced or eliminated at the human exposure levels, (2) to protect for the possibility that humans may be more sensitive to the toxic effect at equivalent administered doses, and (3) to account for the larger expected variation within the human population. Unfortunately, scientific data on which to determine the magnitude of these adjustments are rarely available, necessitating the use of assumptions based on longstanding policies within the regulatory community. However, the guidelines indicate that these assumptions should be replaced with biologically-based approaches when there is valid and convincing scientific evidence that an alternative is clearly superior.

The second part of the comment is addressed within the guidelines for assessing bioavailability. That section of the guidelines describes the situations in which there is a need to assess bioavailability, including when it is anticipated that the routes of human exposure to a toxic substance will differ from those used in an animal toxicity study.

If it is true that exposure to ingredients within art materials are "infinitely smaller" than the doses that produce chronic toxicity in animals and that the ingredients of concern are not bioavailable, then of course there is no hazard. However, this needs to be established through the hazard assessment process.

6. Exposure Assessment.

Comment. One commenter suggested that exposure assessment should be done in accordance with handling instructions on the product package, such as, "use with adequate ventilation."

Response. ASTM D–4236 states that reasonably foreseeable misuse should be considered in assessing risk. Use with inadequate ventilation, for example, is likely to be reasonably foreseeable. Commission regulations also state that under the FHSA "reasonably foreseeable handling or use" includes foreseeable accidental handling or use. 16 CFR 1500.3(c)(7)(iv). Thus, in the context of LHAMA and the FHSA, exposure assessment should not be limited to the manufacturer's instructions.

Comment. Two commenters suggested that CPSC eliminate consideration of incremental exposures when judging the need to label an art material, as suggested in the guidelines for assessing exposure. This provision, they stated, is impractical and unnecessary, and CPSC fails to provide adequate guidance for its implementation. They stated that it will create confusion among users if a product is labeled due to incremental exposures from other sources.

Response. It is often impractical to consider exposures from other sources, although it is sometimes desirable to do so. One example is products containing lead since there is an existing background level near the point where an effect can occur. However, in the context of LHAMA and the FHSA, the focus is clearly on individual products. The proposed guidelines stated in the discussion only that "it may be useful" to define what portion the product-specific exposure is of the total environmental exposure, but the discussion acknowledged the difficulties. The final guidelines clarify that assessment of exposures from other sources is not required, but should generally be noted. Whether other sources should be considered must be determined on a case-by-case basis.

7. Risk Assessment.

Comment. Several commenters objected to CPSC's proposal in the chronic hazard guidelines that an additional ten-fold safety factor be applied to products intended for use by children for all chronic endpoints when calculating the acceptable daily intake, to account for the possibility that children may be more sensitive than adults. Several stated that this was not supported by the scientific data. Some commenters stated that this additional ten-fold factor would have an adverse economic impact on the art materials industry, especially on manufacturers of unleaded glazes used for ceramics. As a result of this safety factor, they stated, 92 product lines which currently do not require warning labels under the Art and Craft Materials Institute's review program will be required to carry warning labels.

Response. As discussed in section IV.E. of the preamble, the Commission has decided not to include additional safety factors for children's products in the final guidelines and definition.

Although children may be more susceptible to many substances than adults, it may be difficult to differentiate between products for children and those for adults, particularly in the area of art materials. This could result in a more widespread use of the ten-fold safety factor than the Commission had intended.

Even if CPSC's proposed ten-fold safety factor were implemented, however, it is questionable whether the extra safety factor for children would actually affect the labeling status of unleaded glazes. According to Dr. Stopford (ACMI's consulting toxicologist), ACMI applies safety factors of its own to risk assessments involving children. In many cases, the ACMI safety factors, which are not required in the proposed guidelines, may be equivalent to or greater than CPSC's proposed ten-fold safety factor. In effect, ACMI's toxicologist has applied redundant safety factors and, as a result, has overestimated risk.

Multiple overestimations of exposure, in total greater than a factor of ten, have been incorporated by ACMI's analysis; these would not be used if CPSC staff were to do the analysis. Of course, ACMI's overestimation of exposure is intentional. It is its means of providing an additional safety factor for children.

In addition, for assessing cancer risk, according to Dr. Stopford, ACMI assumes that children are exposed for 70 years. In comparison, the Directorate for Health Sciences would assume that a child is exposed to a children's product only during childhood. If childhood is considered to last for ten years, then ACMI in effect is applying a seven-fold safety factor of its own which is not directed by CPSC's guidelines. Taken together, ACMI's self-imposed seven-fold safety factor and the 1×10^{-7} acceptable risk directed by the CPSC guidelines, are equivalent to a 70-fold safety factor, while the proposed guidelines required only a ten-fold factor.

Comment. Several commenters stated that the Commission's guidelines and rules should be consistent with those of other agencies, such as OSHA, EPA, and FDA.

Response. Congress mandated the voluntary standard as a Commission standard. The Commission cannot change these provisions without going through the amendment procedures specified in LHAMA. The CPSC's chronic hazard assessment guidelines are almost entirely consistent with the guidelines and methodologies of other agencies, including those mentioned by the commenters. Some of the differences relate to what is required by Congress; for example, LHAMA requires CPSC to address the determination of acceptable daily intake for chronic hazards.

The few technical differences between CPSC and other agencies have been carefully considered by CPSC. For example, two major differences between CPSC's guidelines and EPA's guidelines are the use of benign tumors and the treatment of tumor responses at multiple sites. EPA, which is in the process of revising its cancer guidelines, is reconsidering its position on these two points. It is quite possible that EPA's revised guidelines will be in agreement with CPSC's on these points.

CPSC is working with other agencies to harmonize risk assessment methodologies. For example, CPSC staff has been working with EPA, FDA, and OSHA to adopt a uniform approach for species-to-species extrapolation. CPSC's proposed guidelines state clearly that the uniform approach (body weight ratio to the three-fourths power) will be used when the proposal is finally adopted.

Under the Hazard Communication Act, OSHA may require manufacturers to warn workers if there is a single, well designed study showing a statistically significant effect for a health hazard such as cancer. The toxic potency and exposure are not necessarily considered, as they are under LHAMA and the FHSA. Therefore, it is possible that a product could require a warning in the workplace, but not require a label when sold as a consumer product. Occupational exposures are typically greater than consumer exposures from similar materials.

Regarding labels themselves, the Commission is not requiring any labeling beyond what is required by LHAMA and FHSA. The staff is revising its 1979 labeling guide so that it will provide guidance on developing chronic hazard labeling.

D. Comments Concerning Labeling

Comment. CMA suggests that the Commission adopt the ANSI standard for Hazardous Industrial Chemicals (Z129.1–1988) for precautionary labeling of chronic hazards.

Response. The Commission is not prescribing particular labeling requirements. Some requirements for art materials are mandated by LHAMA. Other materials must adhere to the requirements of section 2(p) (1) of the FHSA and regulations previously issued under that authority (e.g. for prominence, placement, and conspicuousness at 16 CFR 1500.121). The staff will, in the future, develop some general guidance about the design and content of labels warning of chronic hazards.

Comment. Several commenters noted that while the proposed guidelines and supplemental definition of toxic would apply to all products subject to the FHSA, not just art materials, the Commission did not include additional labeling requirements for what the chronic hazard labels should say except in the case of art materials.

Response. Neither the guidelines nor the definition specify labeling requirements beyond those already in force under the FHSA. ASTM D–4236, now codified as a Commission standard for art materials, does provide some examples of labels that may be appropriate to warn of chronic hazards. These warnings may also be appropriate for other products subject to the FHSA that present a chronic hazard. However, the suggested labeling may not be sufficient to satisfy all the requirements of section 2(p)(1) of the FHSA for art materials or other household products, especially mixtures containing various chemicals. It is the manufacturer's responsibility to determine the product's characteristics and to design appropriate labeling. The staff is in the process of revising its 1979 labeling guide for products that present an acute hazard. The updated version will provide guidance on developing warning statements for products that pose a chronic hazard.

Comment. One commenter suggested that since it is not known how various components of art materials interact, the most informative labeling might be to state "Contains (name of toxic substance). Use this product with caution and as intended or instructed."

Response. Art material mixtures may be more or less hazardous than the components themselves because of synergistic or antagonistic reactions. For this reason, labeling may not reflect the true effect of the mixture if it is based on the extent to which one component is a carcinogen, neurotoxicant, or reproductive or developmental toxicant. Moreover, as explained in the guidelines, bioavailability and exposure must be considered. Labeling of art materials should be accurate and as specific as possible in terms of precautionary statements and consequences of ignoring the warning. Specificity increases the likelihood that users would take precautionary measures and reduces the likelihood that the product will be used in a manner perceived as safe, but which may not include the appropriate safety measures. Thus, mixtures should be evaluated based on existing scientific data so that the label can reflect the true nature of the hazard.

E. Comments Concerning Economic Impact

Comment. Some commenters expressed concern about the burden that would be placed on each manufacturer having products assessed by toxicologists and submitting to the Commission assessments of the potential chronic hazard of each product. Additionally, if a product were mistakenly required to have chronic hazard labeling under the guidelines, this would be tantamount to banning the product, since no consumer would buy the product. Thus, the guidelines should be carefully thought through. CMA suggested that the Commission issue a separate notice of proposed rulemaking to address such economic concerns.

Response. The preamble attempts to clarify that the requirement that a manufacturer provide a toxicologist with formulations of the manufacturer's products and that the manufacturer submit to the Commission the criteria used to determine chronic toxicity only applies to art materials. As discussed in the preamble, with products other than art materials, it is the manufacturer's responsibility to see that products are properly labeled, but the means used to reach this goal are left to the manufacturer. The guidelines impose no labeling requirements beyond those already in existence in the FHSA.

Even with art materials, however, LHAMA and ASTM D–4236 do not require a risk assessment of each product be submitted to the Commission. Rather, the producer or repackager of an art material must provide the Commission with a summary of the criteria a reviewing toxicologist uses to determine chronic toxicity and a list of those specific products that require chronic hazard labeling.

Manufacturers who have credible reasons to believe that their products are safe or else are applying the appropriate warning labels, would not need to reevaluate their products against the guidelines. The guidelines and supplemental definition, in and of themselves, do not increase the regulatory burden on manufacturers. The labeling of hazardous substances is mandated by the FHSA, not by the guidelines. The choice of means used for evaluating the hazardousness of a product is left to the manufacturer. However, because failure to properly label a hazardous substance is a violation of the FHSA, and because unnecessary labeling of non-hazardous products may put the firm at a competitive disadvantage, it is in the

firm's interest to have a "carefully thought through" method for evaluating its products. The guidelines and definition should aid the manufacturer in the determination that a product must be labeled under the FHSA. As the preamble and other responses to comments explain, the Commission has given a great deal of thought to the guidelines and definition. The Commission believes that it has adequately addressed the economic concerns expressed and that a separate rulemaking is unnecessary.

Comment. Two commenters requested that the Commission extend the effective date of the final guidelines and definition to six months or one year rather than the 90 days proposed. They stated that additional time is necessary for manufacturers to ensure labeling compliance without excessive hardship.

Response. Neither of the commenters requesting an extension of the effective date are producers of art materials. Thus, only the guidelines and supplemental definition of toxic would apply to these commenters. The guidelines and definition do not impose new requirements on manufacturers of consumer products subject to the FHSA. Therefore, manufacturers of consumer products will not incur additional costs solely because of the adoption of the final guidelines and definition. It is possible that in reviewing the guidelines and definition, a firm may realize that its interpretation of the FHSA requirements has been in error and will incur costs correcting its mistake. However, these costs would be incurred whenever and for whatever reason a firm discovered that it was not in compliance with the FHSA. Furthermore, one of the above commenters stated that it has already "conducted extensive testing to ensure the safety of [its] products and has not discovered any chronic hazard concerns." If responsible evaluation has occurred, the firm is likely to be in compliance with the FHSA. The Commission does not believe that there is any economic justification to extend the effective date.

F. Comments Concerning all Actions

Comment. Several comments raised the issue of preemption. Some commenters stated that the proposed rules might lend strength to an argument that they would preempt state laws dealing with toxic chemicals, and these commenters requested the Commission to state that the rulemaking would not preempt state law. Other comments requested the Commission to indicate that its actions would preempt state law.

Response. The issue of preemption is quite complex and cannot be resolved simply by stating that all contrary state laws are or are not preempted. As the preamble explains more fully, under section 18 of the FHSA, a cautionary labeling requirement under section 2(p) or 3(b) of the FHSA designed to protect against a risk of injury or illness associated with a hazardous substance would preempt non-identical state or local cautionary labeling requirements applicable to that hazardous substance and designed to protect against the same risk of injury or illness. LHAMA mandated ASTM D–4236 as a Commission rule under section 3(b) of the FHSA. As a labeling requirement under section 3(b) of the FHSA, it has preemptive effect in the circumstances stated in section 18(b)(1)(A).

The final chronic hazard guidelines, however, are not mandatory and do not themselves impose any cautionary labeling — requirements. The requirement to place hazard labeling on a substance that is a "hazardous substance" comes from sections 2(p) and 3(b) of the FHSA. The guidelines, in contrast, are an aid to manufacturers and producers in determining whether a product is a hazardous substance. Thus, the guidelines themselves would not directly preempt any non-identical state guidelines.

The supplemental regulatory definition of "toxic" is not itself a cautionary labeling requirement. However, it does work with the labeling requirements under section 2(p) and 3(b). The regulatory definition in itself does not have direct preemptive effect, but the labeling requirements under sections 2(p) and 3(b) would preempt state and local labeling requirements that applied to hazardous substances (as defined in the FHSA and its regulations) covered by section 2(p) or 3(b) and designed to protect against the same risk.

Comment. An ancillary comment was made that the labeling requirements under the FHSA are too weak and vague to preempt state laws.

Response. The requirements of the FHSA are not vague. The FHSA defines the term "misbranded hazardous substance" at section 2(p)(1)(E) as a hazardous substance that "fails to bear a label (I) which states *conspicuously* * * * an affirmative statement of the principal hazard or hazards, * * * or similar wording *descriptive* of the hazard" (emphasis added). This means the labeling must communicate to the consumer an understanding of the potential principal hazard or hazards presented by the product in order to avoid being misbranded and subject to legal action.

In some cases simply restating the defined hazard, such as "FLAMMABLE" will provide a meaningful statement of hazard. In other cases, more descriptive language is necessary, such as for corrosive hazards, statements like "CAUSES BURNS" or "CAUSES SEVERE BURNS" are required to satisfy the FHSA.

The cautionary labeling required under the FHSA must present a balanced perspective of the potential hazards of the product. Many products which may cause chronic health effects may also be acutely toxic and present physical hazards, such as flammability. The suggested labeling for methylene chloride paint strippers had to take into consideration the product's acute inhalation toxicity in addition to the carcinogencity hazard. Therefore, the suggested front panel label statement is "VAPOR HARMFUL" with the instruction "Read Other Cautions and HEALTH HAZARD INFORMATION on back panel" and the back panel statement is "Contains methylene chloride, which has been shown to cause cancer in certain laboratory animals." For products where the only hazard is carcinogenicity and the evidence of increased risk of cancer to humans is clear, the labeling would be more straight forward. In its policy statement regarding the labeling of asbestos containing consumer products, 51 FR 33911, September 24, 1986, the following signal word and statement of hazard were suggested as adequate for asbestos cement sheet products, "WARNING: BREATHING FIBERS MAY CAUSE CANCER" with the hazardous component declared as "Contains asbestos which is known to cause cancer in humans."

Comment. The Chemical Manufacturers Association ("CMA") commented that the Commission should provide explicit protection for trade secrets.

Response. Again, there is confusion over requirements of ASTM D–4236 for art materials and requirements for other products. The requirement to submit formulation data to a toxicologist and the determining criteria to the Commission applies only to art materials. Thus, the protection of trade secret information is not as wide-spread a problem as some may have believed. A provision of ASTM D–4236, now codified at 16 CFR 1500.14 (b)(8)(i)((C)(2), states that only the reviewing toxicologist shall have access to the product formulation submitted for review. There is an exception if written

permission is given or if the data are provided on a confidential basis to a physician for purposes of diagnosis or treatment.

Section 2(p)(1) of the FHSA requires that the name of the hazardous substance be listed on the label. This is a statutory requirement and is not something the Commission can change. Listing the generic name is acceptable. There is no requirement to spell out the product formulation or the amount of the hazardous substance.

As for submission of data to the Commission, in general, the Commission does provide for protection of trade secret or proprietary information submitted to it if the material is so marked (16 CFR 1015.18). These provisions would apply to the information submitted by art material producers or repackagers under LHAMA, as well as others subject to the FHSA.

IX. Effective Dates

In order to allow sufficient time for manufacturers and packagers to evaluate the guidelines and supplemental definition, the guidelines and definition will take effect 90 days after publication. The final guidelines and definition will apply to products initially introduced into commerce on or after the effective date. The codification of ASTM D–4236 (§ 1500.14(b)(8)) will be effective upon publication.

X. Environmental Considerations

These actions are unlikely to have any effect on the quantity or physical characteristics of, or other changes in, product, materials, or packaging that could impact the environment beyond normal formulation, packaging, or promotional changes currently common among these producers of art materials and other products subject to the FHSA. Therefore, the Commission concludes that the guidelines, definition, and codification will have little or no potential for affecting the human environment and that neither an environmental assessment nor an environmental impact statement is required. See 16 CFR part 1021.

XI. Regulatory Flexibility Act Certification

The Commission is finalizing guidelines which will provide guidance for determining when a product presents a chronic hazard based on animal or human data. The supplemental definition of "toxic" reflects these guidelines and clarifies the meaning of chronic toxicity. The Commission is also codifying the provisions of ASTM D–4236 which Congress mandated as a Commission standard.

The Commission certifies that the guidelines, definition, and codification will not have a significant economic effect on a substantial number of small entities, and therefore no regulatory flexibility analysis need be prepared

List of Subjects in 16 CFR Part 1500

Arts and crafts, Consumer protection, Hazardous materials, Hazardous substances, Imports, Infants and children, Labeling, Law enforcement, Toys.

For the reasons discussed above, the Commission amends 16 CFR part 1500 as follows:

PART 1500—[AMENDED]

1. The authority citation for part 1500 is revised to read as follows

Authority: 15 USC 1261–1277

2. A new § 1500.135 is added to read as follows:

§ 1500.135 Summary of guidelines for determining chronic toxicity.

A substance may be toxic due to a risk of a chronic hazard. (A regulatory definition of "toxic" that pertains to chronic toxicity may be found at 16 CFR 1500.3(c) (2).) The following discussions are intended to help clarify the complex issues involved in assessing risk from substances that may potentially cause chronic hazards and, where possible, to describe conditions under which substances should be considered toxic due to a risk of the specified chronic hazards. The guidelines are not intended to be a static classification system, but should be considered along with available data and with expert judgment. They are not mandatory. Rather, the guidelines are intended as an aid to manufacturers in determining whether a product subject to the FHSA presents a chronic hazard. All default assumptions contained in the guidelines on hazard and risk determination are subject to replacement when alternatives which are supported by appropriate data become available. The following are brief summaries of more extensive discussions contained in the guidelines. Thus, the guidelines should be consulted in conjunction with these summaries. Copies of the guidelines may be obtained from the Office of Compliance and Enforcement, Consumer Product Safety Commission, Washington, DC 20207. (In addition to the chronic hazards discussed below, issues relating to the chronic hazard of sensitization are discussed in 16 CFR 1500.3(c) (5).)

(a) *Carcinogenicity.* Substances are toxic by reason of their potential carcinogenicity in humans when they are known or probable human carcinogenic substances as defined below. Substances that are possible human carcinogenic substances or for which there is no evidence of carcinogenic effect under the following categories lack sufficient evidence to be considered toxic by virtue of their potential carcinogenicity.

(1) *Known Human carcinogenic Substances ("sufficient evidence" in humans).* Substances are toxic by reason of their carcinogenicity when they meet the "sufficient evidence" criteria of carcinogenicity from studies in humans, which require that a causal relationship between exposure to an agent and cancer be established. This category is similar to the Environmental Protection Agency's (EPA) Group A, the International Agency for Research on Cancer's (IARC) Group 1, or the American National Standards Institute's (ANSI) Category 1. A causal relationship is established if one or more epidemiological investigations that meet the following criteria show an association between cancer and exposure to the agent.

(i) No identified bias that can account for the observed association has been found on evaluation of the evidence.

(ii) All possible confounding factors which could account for the observed association can be ruled out with reasonable confidence.

(iii) Based on statistical analysis, the association has been shown unlikely to be due to chance.

(2) *Probable Human Carcinogenic Substances.* Substances are also toxic by reason of their probable carcinogenicity when they meet the "limited evidence" criteria of carcinogenicity in humans or the "sufficient evidence" criteria of carcinogenicity in animals described below. This category is similar to EPA's Group B, IARC's Group 2, or ANSI's Categories 2 and 3. Evidence derived from animal studies that has been shown not to be relevant to humans is not included. For example, such evidence would result when there was an identified mechanism of action for a chemical that causes cancer in animals that has been shown not to apply to the human situation. It is reasonable, for practical purposes, to regard an agent for which there is "sufficient" evidence of carcinogenicity in animals as if it presented a carcinogenic risk to humans.

(i) *"Limited evidence" of carcinogenicity in humans.* The evidence is considered limited for establishing a causal relationship between exposure to the agent and cancer when a causal interpretation is

credible, but chance, bias, or other confounding factors could not be ruled out with reasonable confidence.

(ii) *"Sufficient evidence" of carcinogenicity in animals.* Sufficient evidence of carcinogenicity requires that the substance has been tested in well-designed and -conducted studies (*e.g.*, as conducted by National Toxicology Program (NTP), or consistent with the Office of Science Technology Assessment and Policy (OSTP) guidelines) and has been found to elicit a statistically significant ($p < 0.05$) exposure-related increase in the incidence of malignant tumors, combined malignant and benign tumors, or benign tumors if there is an indication of the ability of such benign tumors to progress to malignancy:

(A) in one or both sexes of multiple species, strains, or sites of independent origin; or experiments using different routes of administration or dose levels; or

(B) to an unusual degree in a single experiment (one species/strain/sex) with regard to unusual tumor type, unusual tumor site, or early age at onset of the tumor.

The presence of positive effects in short-term tests, dose-response effects data, or structure-activity relationship are considered additional evidence.

(3) *Possible Human Carcinogenic Substance ("limited evidence" animal carcinogen).* In the absence of "sufficient" or "limited" human data, agents with "limited" evidence of carcinogenicity from animal studies fall into this category. Such substances, and those that do not fall into any other group, are not considered "toxic." This does not imply that the substances are or are not carcinogens, only that the evidence is too uncertain to provide for a determination. This category is similar to EPA's Group C, IARC's Group 3, or ANSI's category 4.

(b) *Neurotoxicity.* Substances are toxic by reason of their potential neurotoxicity in humans when they meet the "sufficient evidence" or "limited evidence" criteria of neurotoxicity in humans, or when they meet the "sufficient evidence" criteria of neurotoxicity in animals.

(1) *Known Neurotoxic Substances ("sufficient evidence in humans").* Substances are toxic by reason of their neurotoxicity and are considered "known neurotoxic substances" when they meet the "sufficient evidence" criteria of neurotoxicity derived from studies in humans which require that a causal association between exposure to an agent and neurotoxicity be established with a reasonable degree of certainty. Substances in this category meet the definition of "neurotoxic" as stated above. "Sufficient evidence," derived from human studies, for a causal association between exposure to a chemical and neurotoxicity is considered to exist if the studies meet the following criteria.

(i) A consistent pattern of neurological dysfunction is observed.

(ii) The adverse effects/lesions account for the neurobehavioral dysfunction with reasonable certainty.

(iii) All identifiable bias and confounding factors are reasonably discounted after consideration.

(iv) The association has been shown unlikely to be due to chance, based on statistical analysis.

(2) *Probable Neurotoxic Substances.* Substances are also toxic by reason of their probable neurotoxicity when they meet the "limited evidence" criteria of neurotoxicity in humans, or the "sufficient evidence" criteria derived from animal studies. Evidence derived from animal studies that has been shown not to be relevant to humans is not included. Such evidence would result, for example, when there was an identified mechanism of action for a chemical that causes neurotoxicity in animals that has been shown not to apply to the human situation.

(i) *"Limited evidence" of neurotoxicity in humans.* The evidence derived from human studies is considered limited for neurotoxicity when the evidence is less than convincing, *i.e.*, one of the criteria of "sufficient evidence" of neurotoxicity for establishing a causal association between exposure to the agent and neurotoxicity is not met, leaving some uncertainties in establishing a causal association.

(ii) *"Sufficient evidence" of neurotoxicity in animals.* Sufficient evidence of neurotoxicity derived from animal studies for a causal association between exposure to a chemical and neurotoxicity requires that:

(A) The substance has been tested in well-designed and -conducted studies (*e.g.*, NTP's neurobehavioral battery, or conforming to EPA's neurotoxicity test guidelines); and

(B) The substance has been found to elicit a statistically significant ($p < 0.05$) increase in any neurotoxic effect in one or both sexes of multiple species, strains, or experiments using different routes of administration and dose-levels.

(3) *Possible Neurotoxic Substances.* "Possible neurotoxic substances" are the substances which meet the "limited evidence" criteria of neurotoxicity evidence derived from animal studies in the absence of human data, or in the presence of inadequate human data, or data which do not fall into any other group. Substances in this category are not considered "toxic."

(c) *Developmental and Reproductive Toxicity.—(1) Definitions of "Sufficient" and "Limited" Evidence.* The following definitions apply to all categories stated below.

(i) "Sufficient evidence" from human studies for a causal association between human exposure and the subsequent occurrence of developmental or reproductive toxicity is considered to exist if the studies meet the following criteria:

(A) No identified bias that can account for the observed association has been found on evaluation of the evidence.

(B) All possible confounding factors which could account for the observed association can be ruled out with reasonable confidence.

(C) Based on statistical analysis, the association has been shown unlikely to be due to chance.

(ii) "Limited evidence" from human studies exists when the human epidemiology meets all but one of the criteria for "sufficient evidence"; *i.e.*, the statistical evidence is borderline as opposed to clear-cut, there is a source of bias, or there are confounding factors that have not been and cannot be accounted for.

(iii) "Sufficient evidence" from animal studies exists when

(A) Obtained from a good quality animal study; and

(B) The substance has been found to elicit a statistically significant ($p < 0.05$) treatment-related increase in multiple endpoints in a single species/strain, or in the incidence of a single endpoint at multiple dose levels or with multiple routes of administration in a single species/strain, or increase in the incidence of a single endpoint in multiple species/strains/ experiments.

(iv) "Limited evidence" from animal studies exists when:

(A) Obtained from a good quality study and there is a statistically significant ($p < 0.05$) treatment-related increase in the incidence of a single endpoint in a single species/strain/ experiment at a single dose level administered through only one route and such evidence otherwise does not meet the criteria for "sufficient evidence"; or

(B) The evidence is derived from studies which can be interpreted to show positive effects but have some qualitative or quantitative limitations with respect to experimental procedures (*e.g.*, doses, exposure, follow-up, number of animals/group, reporting of the data,

etc.) which would prevent classification of the evidence in the group of "sufficient evidence."

(2) *Developmental Toxicants.* Substances are toxic by reason of their potential developmental or reproductive toxicity when they meet the "sufficient evidence" or "limited evidence" criteria of developmental or reproductive toxicity in humans, or when they meet the "sufficient evidence" criteria of developmental or reproductive toxicity in animals. The Food and Drug Administration (FDA) and the European Economic Community (EEC) have developed categories for teratogens but not other developmental toxicants. The teratogen guidelines limit the information only to structural birth defects and do not include other hazards of developmental toxicity such as embryonal death, fetal death, or functional deficiencies which are also important in assessing the overall toxicity of a substance when administered during pregnancy. Recently, EPA has proposed a system for classifying developmental toxicity. The Occupational Safety and Health Administration (OSHA) has not yet developed any classification for developmental toxicity. The commission has established the following categories for determination of developmental toxicity according to the available evidence.

(i) *Known Human Developmental Toxicant ("sufficient evidence in humans").* A substance is considered a "known human developmental toxicant" if there is "sufficient" human evidence to establish a causal association between human exposure and the subsequent occurrence of developmental toxicity manifested by death of the conceptus (embryo or fetus), or structural or functional birth defects. This category (Human Developmental Toxicant) is comparable to category 1 of the EEC and categories D and X of FDA, except that these guidelines are limited to teratogens. This category is also comparable to the category "definitive evidence for human developmental toxicity" proposed by EPA.

(ii) *Probable Human Developmental Toxicant.* A substance is considered a "probable human developmental toxicant" if there is "limited" human evidence or "sufficient" animal evidence to establish a causal association between human exposure and subsequent occurrence of developmental toxicity. This group (Probable Human Developmental Toxicant) is comparable to the category "adequate evidence for human developmental toxicity" proposed by EPA. This category is also comparable to category 2 of the EEC and category A1 of FDA, except that these guidelines are limited to teratogens.

(iii) *Possible Human Developmental Toxicant.* A substance is considered a "possible human developmental toxicant" if there is "limited" animal evidence, in the absence of human data, or in the presence of inadequate human data, or which does not fall into any other group, to establish a causal association between human exposure and subsequent occurrence of developmental toxicity. EEC, FDA, and EPA have not developed a category comparable to this group. The Commission believes that data from well planned animal studies are important to consider even though they may provide only limited evidence of developmental toxicity.

(3) *Male Reproductive Toxicants.* Male reproductive toxicants can be grouped into the following different categories based on evidence obtained from human or animal studies.

(i) *Known Human Male Reproductive Toxicant.* A substance is considered a "known human male reproductive toxicant" if there is "sufficient" human evidence to establish a causal association between human exposure and the adverse effects on male reproductive main endpoints which are mating ability, fertility, and prenatal and postnatal development of the conceptus. This category is comparable to the one termed "Known Positive" in the EPA guidelines on male reproductive risk assessment.

(ii) *Probable Human Male Reproductive Toxicant.* A substance is considered a "probable human male reproductive toxicant" if there is "limited" human evidence or "sufficient" animal evidence to establish a causal association between human exposure and the adverse effects on male reproductive main endpoints. This category is comparable to the one termed "Probable Positive" in the EPA guidelines on male reproductive risk assessment. However, the EPA category is based only on sufficient animal evidence. CPSC believes that limited human evidence is also sufficient for a chemical to be placed in this category.

(iii) *Possible Human Male Reproductive Toxicant.* A substance is considered a "possible human male reproductive toxicant" if there is limited animal evidence, in the absence of human data, or in the presence of inadequate human data, or which does not fall into any other group, to establish a causal association between human exposure and adverse effects on male reproductive main endpoints. This category is comparable to the one termed "Possible Positive A" in the EPA guidelines on male reproductive risk assessment. EPA proposes to use either limited human or limited animal evidence data to classify a toxicant as a "Possible Positive A" toxicant. As described above, CPSC would elevate limited human evidence to the category "Probable Human Male Reproductive Toxicant."

(4) *Female Reproductive Toxicants.* Female reproductive toxicants can be grouped into the following different categories based on evidence obtained from human or animal studies. EPA has proposed guidelines for assessing female reproductive risk but has not yet proposed a specific system for categorization of female reproductive toxicants.

(i) *Known Human Female Reproductive Toxicant.* A substance is considered a "known human female reproductive toxicant" if there is "sufficient" human evidence to establish a causal association between human exposure and adverse effects on female reproductive function such as mating ability, fertility, and prenatal and postnatal development of the conceptus.

(ii) *Probable Human Female Reproductive Toxicant.* A substance is considered a "probable human female reproductive toxicant" if there is "limited" human evidence or "sufficient" animal evidence to establish a causal association between human exposure and adverse effects on female reproductive function.

(iii) *Possible Human Female Reproductive Toxicant.* A substance is considered a "possible human female reproductive toxicant" if there is "limited" animal evidence, in the absence of human data, or in the presence of inadequate human data, or which does not fall into any other group, to establish a causal association between human exposure and adverse effects on female reproductive function.

(d) *Other Subjects Related to the Determination that a Substance is Toxic.* Under the FHSA, for a toxic substance to be considered hazardous, it must not only have the potential to be hazardous but there must also be the potential that persons are exposed to the substance, that the substance can enter the body, and that there is a significant risk of an adverse health effect associated with the customary handling and use of the substance. Under these guidelines, existence of an adverse health effect means that such exposure is above the "acceptable daily

intake" ("ADI"). The ADI is based on the risks posed by the substance, and whether they are acceptable under the FHSA. This section addresses those issues by providing guidelines concerning assessment of exposure, assessment of bioavailability, determination of acceptable risks and the ADI to children and adults, and assessment of risk.

(1) *Assessment of Exposure.* An exposure assessment may comprise a single exposure scenario or a distribution of exposures. Reasonably foreseeable use, as well as accidental exposure, should be taken into consideration when designing exposure studies. The following guidelines should be used in the assessment of exposure.

(i) *Inhalation.* Inhalation studies to assess exposure should be reliable studies using direct monitoring of populations, predictions of exposure through modeling, or surrogate data.

(A) *Direct Monitoring.* Populations to be monitored should be selected randomly to be representative of the general population, unless the exposure of a particular subset population is the desired goal of the assessment. The monitoring technique should be appropriate for the health effect of interest.

(B) *Modeling.* Predictions of exposure to a chemical using mathematical models can be based on physical and chemical principles, such as mass balance principles. Mass balance models should consider the source strength of the product of interest, housing characteristics, and ambient conditions likely to be encountered by the studied population.

(C) *Surrogate Data.* Surrogate data should only be used when data concerning the chemical of interest are sparse or unavailable and when there is a reasonable assurance that the surrogate data will accurately represent the chemical of interest.

(ii) *Oral Ingestion.* Oral ingestion studies may involve direct monitoring of sources of chemicals as well as laboratory simulations. The estimation of exposure from ingestion of chemicals present in consumer products is predicted based upon estimates of use of the product and absorption of the chemical from the gastrointestinal tract. The following criteria should be established for laboratory simulations to estimate exposure:

(A) A simulant or range of simulants should be carefully selected to mimic the possible range of conditions which occur in humans, such as full and empty stomachs, or various saliva compositions at different times of the day.

(B) The mechanical action to which a product is submitted must be chosen to represent some range of realistic conditions to which a human may subject the product.

(iii) *Dermal Exposure.* (A) Dermal exposure involves estimating the amount of substance contacting the skin. This may involve experiments measuring the amount of material leached from a product contacting a liquid layer which interfaces with the skin, or the amount of substance which migrates from a product (in solid or liquid form) which is in contact with the skin.

(B) Parameters to be considered include: Surface area of the skin contacted, duration of contact, frequency of contact, and thickness of a liquid interfacial layer.

(2) *Assessment of Bioavailability.* (i) The need to consider bioavailability in estimating the risk from use of a product containing a toxic substance only arises when it is anticipated that the absorption characteristics of a substance to which there is human exposure will differ from those characteristics for the substance tested in the studies used to define the dose-response relationship.

(ii) In determining the need to assess bioavailability, the factors to be examined include:

(A) The physical or chemical form of the substance,

(B) The route of exposure (inhalation, ingestion, or through the skin),

(C) The presence of other constituents in the product which interfere with or alter absorption of the toxic substance, and

(D) Dose.

(3) *Assessment of Risk.* This section on quantitative risk assessment applies to estimates of risk for substances that are toxic by reason of their carcinogenicity.

(i) Generally, the study leading to the highest risk should be used in the risk assessment; however, other factors may influence the choice of study.

(ii) Risk should be based on the maximum likelihood estimate from a multistage model (such as Global83 or later version) unless the maximum likelihood estimate is not linear at low dose, in which case the 95% upper confidence limit on risk should be used.

(iii) For systemic carcinogens, if estimates of human risk are made based on animal data, a factor derived from dividing the assumed human weight (70 kg) by the average animal weight during the study and taking that to the ⅓ power should be used. There is the possibility that this factor may be changed, using the ¼ power instead of the ⅓ power, as part of a unified Federal regulatory approach. If such an approach is adopted, it will apply here.

(iv) When dose is expressed as parts per million, and the carcinogen acts at the site of contact, humans and animals exposed to the same amount for the same proportion of lifetime should be assumed to be equally sensitive.

(v) If no experimental study having the same route of exposure as that anticipated for human use of a substance is available, a study by another route of exposure may be used. Pharmacokinetic methods may be used if sufficient data are available.

(vi) When exposure scenarios are different from those used in the underlying study upon which estimates of risk are based, proportionality should be applied. If pharmacokinetic methods are used to adjust for risks at high versus low exposure levels, level-time measures should not be combined without taking the non-linearity into account.

(4) *Acceptable Risks.*—(i) *ADI for Carcinogens.* The maximum acceptable daily intake ("ADI") is that exposure of a toxic (by virtue of its carcinogenicity) substance that is estimated to lead to a lifetime excess risk of one in a million. Exposure refers to the anticipated exposure from normal lifetime use of the product, including use as a child as well as use as an adult.

(ii) *ADI for Neurotoxicological and Developmental/Reproductive Agents.* Due to the difficulties in using a numerical risk assessment method to determine risk for neurotoxicological or developmental/reproductive toxicants, the Commission is using a safety factor approach, as explained below.

(A) *Human Data.* If the hazard is ascertained from human data, a safety factor of ten will be applied to the lowest No Observed Effect Level ("NOEL") seen among the relevant studies. If no NOEL can be determined, a safety factor of 100 will be applied to the Lowest Observed Effect Level ("LOEL"). Both the NOEL and LOEL are defined in terms of daily dose level.

(B) *Animal Data.* If the hazard is ascertained from animal data, a safety factor of one hundred will be applied to the lowest NOEL. If no NOEL can be determined, a safety factor of one thousand will be applied to the lowest LOEL. Both the NOEL and LOEL are defined in terms of daily dose level.

3. Section 1500.3(c)(2) is amended by revising paragraph (c)(2) introductory text, redesignating paragraphs (c)(2) (i) through (iii) as paragraphs (c)(2)(i) (A) through (C) and adding new paragraphs

(c)(2)(i) introductory text and (c)(2)(ii) to read as follows:

§ 1500.3 Definitions.

* * * * *

(c) * * *

(2) To give specificity to the definition of "toxic" in section 2[g] of the act [and restated in paragraph (b)(5) of this section), the following supplements that definition. The following categories are not intended to be inclusive.

(i) *Acute toxicity.* "Toxic" means any substance that produces death within 14 days in half or more than half of a group of:

(ii) *Chronic toxicity.* A substance is toxic because it presents a chronic hazard if it falls into one of the following categories. (For additional information see the chronic toxicity guidelines at 16 CFR 1500.135.)

(A) *For Carcinogens.* A substance is toxic if it is or contains a known or probable human carcinogen.

(B) *For Neurotoxicological Toxicants.* A substance is toxic if it is or contains a known or probable human neurotoxin.

(C) *For Developmental or Reproductive Toxicants.* A substance is toxic if it is or contains a known or probable human developmental or reproductive toxicant.

4. Section 1500.14 is amended by adding a new paragraph (b)(8) to read as follows:

§ 1500.14 Products requiring special labeling under section 3(b) of the Act.

(b) * * * * *

(8) *Art materials.*

Note: The Labeling of Hazardous Art Materials Act ("LHAMA"), 15 U.S.C. 1277 (Pub. L. 100-695, enacted November 18, 1988) provides that, as of November 18, 1990, "the requirements for the labeling of art materials set forth in the version of the standard of the American Society for Testing and Materials ["ASTM"] designated D-4236 that is in effect on [November 18, 1988] * * * shall be deemed to be a regulation issued by the Commission under section 3(b)" of the Federal Hazardous Substances Act, 15 U.S.C. 1262(b). For the convenience of interested persons, the Commission is including the requirements of ASTM D-4236 in paragraph (b)(8)(i) of this section, along with other requirements (stated in paragraph (b)(8)(ii) of this section) made applicable to art materials by the LHAMA. The substance of the requirements specified in LHAMA became effective on November 18, 1990, as mandated by Congress.

(i) *ASTM D-4236.*—(A) *Scope.*—(*1*) This section describes a procedure for developing precautionary labels for art materials and provides hazard and precautionary statements based upon knowledge that exists in the scientific and medical communities. This section concerns those chronic health hazards known to be associated with a product or product component(s), when the component(s) is present in a physical form, volume, or concentration that in the opinion of a toxicologist (see paragraph (b)(8)(i)(B)(*11*) of this section) has the potential to produce a chronic adverse health effect(s).

(*2*) This section applies exclusively to art materials packaged in sizes intended for individual users of any age or those participating in a small group.

(*3*) Labeling determinations shall consider reasonably foreseeable use or misuse.

(*4*) Manufacturers or repackagers may wish to have compliance certified by a certifying organization. Guidelines for a certifying organization are given in paragraph (b)(8)(i)(H) of this section.

(B) Descriptions of Terms Specific to This Standard.—(*1*) Art material or art material product—any raw or processed material, or manufactured product, marketed or represented by the producer or repackager as intended for and suitable for users as defined herein.

(*2*) Users—artists or crafts people of any age who create, or recreate in a limited number, largely by hand, works which may or may not have a practical use, but in which aesthetic considerations are paramount.

(*3*) Chronic adverse health effect(s)—a persistent toxic effect(s) that develops over time from a single, prolonged, or repeated exposure to a substance. This effect may result from exposure(s) to a substance that can, in humans, cause sterility, birth defects, harm to a developing fetus or to a nursing infant, cancer, allergenic sensitization, damage to the nervous system, or a persistent adverse effect to any other organ system.

(*4*) chronic health hazard(s) (hereafter referred to as "chronic hazard")—a health risk to humans, resultant from exposure to a substance that may cause a chronic adverse health effect.

(*5*) Analytical laboratory—a laboratory having personnel and apparatus capable of performing quantitative or qualitative analyses of art materials, which may yield information that is used by a toxicologist for evaluation of potentially hazardous materials.

(*6*) Label—a display of written, printed, or graphic matter upon the immediate container of any art material product. When the product is unpackaged, or is not packaged in an immediate container intended or suitable for delivery to users, the label can be a display of such matter directly upon the article involved or upon a tag or other suitable labeling device attached to the art material.

(*7*) Producer—the person or entity who manufactures, processes, or imports an art material.

(*8*) Repackager—the person or entity who obtains materials from producers and without making changes in such materials puts them in containers intended for sale as art materials to users.

(*9*) Sensitizer—a substance known to cause, through an allergic process, a chronic adverse health effect which becomes evident in a significant number of people on re-exposure to the same substance.

(*10*) Toxic—applies to any substance that is likely to produce personal injury or illness to humans through ingestion, inhalation, or skin contact.

(*11*) Toxicologist—an individual who through education, training, and experience has expertise in the field of toxicology, as it relates to human exposure, and is either a toxicologist or physician certified by a nationally recognized certification board.

(*12*) Bioavailability—the extent that a substance can be absorbed in a biologically active form.

(C) Requirements.—(*1*) The producer or repackager of art materials shall submit art material product formulation(s) or reformulation(s) to a toxicologist for review, such review to be in accordance with paragraph (b)(8)(i)(D) of this section. The toxicologist shall be required to keep product formulation(s) confidential.

(*2*) Unless otherwise agreed in writing by the producer or repackager, no one other than the toxicologists shall have access to the formulation(s); except that the toxicologists shall furnish a patient's physician, on a confidential basis, the information necessary to diagnose or treat cases of exposure or accidental ingestion.

(*3*) The producer or repackager, upon advice given by a toxicologist in accordance with paragraph (b)(8)(i)(D) of this section and based upon generally accepted, well-established evidence that a component substance(s) is known to cause chronic adverse health effects adopt precautionary labeling in accordance with paragraph (b)(8)(i)(E) of this section.

(*4*) Labeling shall conform to any labeling practices prescribed by federal and state statutes or regulations and shall not diminish the effect of required acute toxicity warnings.

(*5*) The producer or repackager shall supply a poison exposure management information source the generic formulation information required for dissemination to poison control centers or shall provide a 24-hour cost-free

telephone number to poison control centers.

(6) The producer or repackager shall have a toxicologist review as necessary, but at least every 5 years, art material product formulation(s) and associated label(s) based upon the then-current, generally accepted, well-established scientific knowledge.

(7) Statement of Conformance—"Conforms to ASTM Practice D–4236," or "Conforms to ASTM D–4236," or "Conforms to the health requirements of ASTM D–4236." This statement may be combined with other conformance statements. The conformance statement should appear whenever practical on the product; however, it shall also be acceptable to place the statement on one or more of the following:

(*i*) The individual product package,

(*ii*) a display or sign at the point of purchase,

(*iii*) separate explanatory literature available on requirements at the point of purchase,

(*iv*) a response to a formal request for bid or proposal.

(D) Determination of Labeling.—(*1*) An art material is considered to have the potential for producing chronic adverse health effects if any customary or reasonably foreseeable use can result in a chronic hazard.

(*2*) In making the determination, a toxicologist(s) shall take into account the following:

(*i*) Current chemical composition of the art material, supplied by an analytical laboratory or by an industrial chemist on behalf of a manufacturer or repackager.

(*ii*) Current generally accepted, well-established scientific knowledge of the chronic toxic potential of each component and the total formulation.

(*iii*) Specific physical and chemical form of the art material product, bioavailability, concentration, and the amount of each potentially chronic toxic component found in the formulation.

(*iv*) Reasonably foreseeable uses of the art material product as determined by consultation with users and other individuals who are experienced in use of the material(s), such as teachers, or by market studies, unless such use information has previously been determined with respect to the specific art material(s) under review.

(*v*) Potential for known synergism and antagonism of the various components of the formulation.

(*vi*) Potentially chronic adverse health effects of decomposition or combustion products, if known, from any reasonably foreseeable use of the hazardous art material product.

(*vii*) Opinions of various regulatory agencies and scientific bodies, including the International Agency for Research on Cancer and the National Cancer Institute, on the potential for chronic adverse health effects of the various components of the formulation.

(*3*) Based upon the conclusion reached in conformance with review determinations set forth herein, the toxicologist(s) shall recommend precautionary labeling consistent with paragraph (b)(8)(i)(E) of this section.

(E) Labeling Practices.—(*1*) Signal Word.—(*i*) When a signal word for an acute hazard(s) is mandated and a chronic hazard(s) exists, the signal word shall be that for the acute hazard.

(*ii*) When only a chronic hazard(s) exists, the signal word WARNING shall be used.

(*iii*) The signal word shall be prominently visible and set in bold capitals in a size equal to or greater than the statement of potential chronic hazards.

(*2*) List of Potentially Chronic Hazards—Potentially chronic hazards, as determined under the procedures of paragraph (b)(8)(i)(D) of this section, shall be stated substantially in accordance with the statements listed in paragraph (b)(8)(i)(F) of this section. Potentially chronic hazards noted shall be those that are clinically significant and that might be expected with any reasonably foreseeable use of the art material. The hazards should be grouped in the order of relative descending severity.

(*3*) Name of Chronically Hazardous Component(s)—All components and known decomposition products of the formulation with a potential for chronic hazards, as determined under the procedures of paragraph (b)(8)(i)(D) of this section, shall be listed prominently. Generically equivalent names may be used.

(*4*) Safe Handling Instructions—Appropriate precautionary statements as to work practices, personal protection, and ventilation requirements shall be used substantially conforming with those listed in paragraph (b)(8)(i)(G) of this section.

(*5*) List of Sensitizing Components—To protect users from known sensitizers found within art materials, each label shall contain a list of those sensitizers present in sufficient amounts to contribute significantly to a known skin or respiratory sensitization.

(*6*) Combined Statement—If an art material contains more than one component capable of causing a chronic adverse health effect, or if a single chemical can cause several different chronic adverse health effects, the potential effects may be combined into one statement.

(*7*) Information Sources—The precautionary label shall contain a statement identifying a source for additional health information substantially in conformance with one of the phrases listed below:

(*i*) For more health information—(24 hour cost-free U.S. telephone number).

(*ii*) Contact a physician for more health information, or

(*iii*) Call your local poison control center for more health information.

(*8*) Labeling Content, Product Size—Any art material product in a container larger in size than one fluid ounce (30 ml) (if the product is sold by volume) or one ounce net weight (28 g) (if the product is sold by weight) shall have full precautionary labeling, as described in paragraph (b)(8)(i) (E) of this section. Any art material product in a container equal to or smaller than one fluid ounce or one ounce net weight shall have a label that includes a signal word in conformance with paragraph (b)(8)(i)(E)(*1*) of this section and a list of potentially harmful or sensitizing components in conformance with paragraphs (b)(8)(i)(E) (*3*) and (*5*) of this section.

(*9*) The information described in paragraph (b)(8)(i)(E) of this section must appear on:

(*i*) The outside container or wrapper, if any, unless it is easily legible through the outside container or wrapper and

(*ii*) All accompanying literature where there are directions for use, written or otherwise. Where a product that requires warning labels under paragraphs (b)(8)(i) (D) and (E) of this section is packed within a point-of-sale package that obscures the warning statement(s), the point-of-sale package shall carry the signal word conforming to paragraph (b)(8)(i)(E)(*1*) and the following wording: "Contains: (list hazardous product(s)) that may be harmful if misused. Read cautions on individual containers carefully. Keep out of the reach of children."

(*10*) Statements required under paragraphs (b)(8)(i) (D) and (E) of this section must be in the English language and located prominently in conspicuous and legible type in contrast by topography, layout, or color with other printed matter on the label.

(*11*) Supplemental Information—Where appropriate, more detailed information that relates to chronic hazard(s), such as physical properties, decomposition products, detailed safety instructions, or disposal recommendations, shall be included in supplemental documents, such as

Material Safety Data Sheets, technical brochures, technical data sheets etc.

(F) chronic Hazard Statements

MAY CAUSE STERILITY.
CONTACT MAY CAUSE PERMANENT EYE DAMAGE.
MAY BE HARMFUL BY BREATHING VAPORS/DUSTS.
MAY BE HARMFUL IF SWALLOWED.
MAY BE HARMFUL BY SKIN CONTACT.
MAY PRODUCE BIRTH DEFECTS IN THE DEVELOPING FETUS.
MAY BE EXCRETED IN HUMAN MILK.
MAY CAUSE HARM TO THE NURSING INFANT.
CANCER AGENT! EXPOSURE MAY PRODUCE CANCER.
CANCER AGENT BASED ON TESTS WITH LABORATORY ANIMALS.
POSSIBLE CANCER AGENT BASED ON TESTS WITH LABORATORY ANIMALS.
MAY PRODUCE ALLERGIC REACTION BY INGESTION/INHALATION/SKIN CONTACT.
MAY PRODUCE NUMBNESS OR WEAKNESS IN THE EXTREMITIES.
EXPOSURE MAY CAUSE (SPECIFY THE ORGAN(S)) DAMAGE.
HEATING/COMBUSTION MAY CAUSE HAZARDOUS DECOMPOSITION PRODUCTS.

(G) Precautionary Statements

Keep out of reach of children.
When using do not eat, drink, or smoke.
Wash hands immediately after use.
Avoid inhalation/ingestion/skin contact.
Avoid fumes from combustion.
Keep container tightly closed when not in use.
Store in well-ventilated area.
Wear protective clothing (specify type).
Wear protective goggles/face shield.
Wear NIOSH-certified mask for dusts/mists/fumes.
Wear NIOSH-certified respirator with an appropriate cartridge for (specify).
Wear NIOSH-certified supplied-air respirator.
Use window exhaust fan to remove vapors and ensure adequate cross ventilation. (Specify explosion-proof if necessary.)
Do not heat above (specify temperature) without adequate ventilation.
Use (specify type) local exhausting hood.
Do not use/mix with (specify material).

(ii) The following shall apply with respect to the standard for art materials set forth in § 1500.14(b)(8)(i).

(A) The term *art material or art material product* shall mean any substance marketed or represented by the producer or repackager as suitable for use in any phase of the creation of any work of visual or graphic art of any medium. The term does not include economic poisons subject to the Federal Insecticide, Fungicide, and Rodenticide Act or drugs, devices, or cosmetics subject to the Federal Food, Drug, and Cosmetics Act.

(B) The standard referred to in paragraph (b)(8)(i) of this section applies to art materials intended for users of any age.

(C) Each producer or repackager of art materials shall describe in writing the criteria used to determine whether an art material has the potential for producing chronic adverse health effects. Each producer or repackager shall submit, to the Commission's Division of Regulatory Management, Consumer Product Safety Commission, Washington, DC 20207, the written description of the criteria described above and a list of art materials that require hazard warning labels under this section. Upon request of the Commission, a producer or repackager shall submit to the Commission product formulations.

(D) All art materials that require chronic hazard labeling pursuant to this section must include on the label the name and United States address of the producer or repackager of the art materials, an appropriate United States telephone number that can be contacted for more information on the hazards requiring warning labels under this section, and a statement that such art materials are inappropriate for use by children.

(E) If an art material producer or repackager becomes newly aware of any significant information regarding the hazards of an art material or ways to protect against the hazard, this new information must be incorporated into the labels of such art materials that are manufactured after 12 months from the date of discovery. If a producer or repackager reformulates an art material, the new formulation must be evaluated and labeled in accordance with the standard set forth § 1500.14(b)(8)(i).

(F) In determining whether an art material has the potential for producing chronic adverse health effects, including carcinogenicity and potential carcinogenicity, the toxicologist to whom the substance is referred under the standard described above shall take into account opinions of various regulatory agencies and scientific bodies, including the U.S. Consumer Product Safety Commission (CPSC), the U.S. Environmental Protection Agency (EPA), and the International Agency for Research on Cancer (IARC).

(iii) Pursuant to the LHAMA, the Commission has issued guidelines which, where possible, specify criteria for determining when any customary or reasonably foreseeable use of an art material can result in a chronic hazard. These guidelines include criteria for determining when art materials may produce chronic adverse effects in children and adults, criteria for determining which substances contained in art materials have the potential for producing chronic adverse effects and what those effects are, criteria for determining the bioavailability of chronically hazardous substances contained in art materials when the products are used in a customary or reasonably foreseeable manner, and criteria for determining acceptable daily intake levels for chronically hazardous substances contained in art materials. Because these guidelines apply to hazardous substances in general as well as to hazardous substances in art materials, the guidelines are set forth in § 1500.135 and a definition of "chronic toxicity" is provided in § 1500.3(c)(2)(ii) as part of supplementation of the term "toxic" in section 2(q) of the FHSA.

Appendix A to § 1500.14(b)(8)—Guidelines for a Certifying Organization (Not Mandatory)

(a) The term "certifying organization," as used in this paragraph, refers to an organization or an institute that, after assuring that all provisions are met, certifies that an art material does conform to the labeling requirements of this practice.

(b) The certifying body may be funded by member manufacturers, but should include users or their representatives, as well as manufacturers' chemists, on its technical and certifying committees.

(c) Representative samples of art materials, labeled as conforming to this section and bought at retail, should be analyzed at random and from time to time by an analytical laboratory to ensure they are the same as the formulation used by the toxicologist(s) for determining labeling requirements.

(d) The methods used by the toxicologist(s) in review and determination of the need and content of precautionary labeling for potentially chronic adverse health effects should be periodically reviewed by an advisory board composed of not less than three or more than five toxicologists, at least one of whom is certified in toxicology by a nationally recognized certification board.

(e) In cases where there is disagreement by participating producers or participating users with the determination of the toxicologist(s), there should be a method whereby the toxicologist's decision can be presented to the advisory board of toxicologists for arbitration.

Dated: September 22, 1992.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

Exchange Visitor Program; Final Rules and Proposed Rule

UNITED STATES INFORMATION AGENCY

22 CFR Part 514

Statement of Policy Regarding Exchange Visitor Au Pair Programs

AGENCY: United States Information Agency.

ACTION: Statement of policy regarding exchange visitor au pair programs.

SUMMARY: In September 1988, Congress enacted legislation extending Agency-designated au pair pilot programs for two years, upon the same terms and conditions previously authorized (Foreign Operations, Export Financing, and Related Programs Appropriation Act of 1989). In October 1990, Congress enacted legislation requiring the Agency to continue to implement the au pair programs designated by the Agency as of July 10, 1990, until such au pair program are authorized and implemented by another agency of the United States Government (Eisenhower Exchange Fellowship Act of 1990). Guidelines for the conduct of au pair programs were distributed to all designated au pair program sponsors in 1988–1989. Those Guidelines have not been materially changed or amended since. All designated au pair program sponsors will continue to adhere to the Guidelines and to the general regulations which apply to all Exchange Visitor Program sponsors until such time as au pair programs are authorized and implemented by another U.S. Government agency.

DATES: The Statement of Policy is effective October 9, 1992.

ADDRESSES: Stanley S. Colvin, Assistant General Counsel, Office of the General Counsel, room 700, United States Information Agency, 301 Fourth Street, SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Stanley S. Colvin, Assistant General Counsel, Office of the General Counsel, room 700, United States Information Agency, 301 Fourth Street, SW., Washington, DC 20547, (202) 619–6829.

SUPPLEMENTARY INFORMATION: The Agency's Exchange Visitor Program designated its first au pair program in 1986. In that year, the American Institute For Foreign Study (AIFS) and Experiment In International Living (EIL) were designated to conduct a two-year au pair pilot program in which foreign youths between the ages of 18 and 25 were to come to the U.S. for one year to learn about American culture, provide a cross-cultural exchange, improve their English, and assist their host family with child care.

The programs were to be evaluated every six months by an interagency review panel composed of representatives of the Department of State, the Immigration and Naturalization Service, the Department of Labor, and USIA. The panel found that au pairs were working up to forty-five hours per week and concluded that the program in reality was a full-time home child care work program and not a valid educational and cultural exchange. The panel recommended that the program could be continued only if the hours of work were substantially reduced, and it further recommended that the Agency draft guidelines to ensure that the program became a valid educational and cultural exchange. Concurrently, the Agency's legal research concluded that the Agency had no legal authority to designate the au pair program as then designed, an opinion shared by the General Accounting Office (GAO). The Agency sought to terminate the au pair program in December 1987.

In September 1988 Congress enacted legislation extending the AIFS and EIL pilot programs for two years. Public Law 100–461. By December 1989, the Agency had designated six more au pair programs, bringing the total to eight. Each program was authorized to bring up to 2,840 participants a year into the U.S. In October 1990, Congress passed additional legislation bearing on the au pair program. Public Law 101–454 directed the Agency to continue to implement the au pair programs previously designated under the same terms and conditions previously authorized until such programs were authorized and implemented by another U.S. Government agency.

The same section of Public Law 100–461 which extended the AIFS and EIL au pair programs for fiscal years 1989 and 1990 also required the GAO to conduct an assessment of J-visa activities, including the au pair program. In February 1990 the GAO issued its report "Inappropriate Uses of Educational and Cultural Exchange Visas," which, *inter alia*, concluded that "the currently structured au pair programs are not compatible with the original intent of the 1961 [Mutual Educational and Cultural Exchange Act of 1961—the Fulbright-Hays] Act. We hold this view because current au pair programs are essentially child care work programs that do not correlate with the qualifying categories mentioned in the J-visa statute. As currently structured, au pair programs would normally be subject to Department of Labor administrative review and certification." (GAO Report, at p. 20) (material in brackets added.)

There are presently pending in Congress two bills (S. 1914 and H.R. 3982) which, if enacted, would transfer the au pair program to the Department of Justice. In light of Public Law 101–454, which requires the Agency to continue to implement the au pair programs previously designated until such programs are authorized and implemented by another U.S. Government agency, USIA-designated au pair programs shall continue to follow the previously issued "Guidelines Governing the Administration of Au Pair Programs." In addition, currently designated au pair program sponsors are required to comply with all Exchange Visitor Program regulations which appear at 22 CFR part 514.

Pending the transfer of the au pair program to the Department of Justice or some other U.S. Government agency, no additional au pair programs will be designated. Currently designated programs are not permitted to expand their programs, i.e., they are limited to bringing in au pairs only from the countries of Western Europe, and each designated program is authorized to bring only 2,840 participants a year into the U.S.

UNITED STATES INFORMATION AGENCY

22 CFR Part 514

Sponsors of Exchange Visitor Summer Student Travel/Work Programs

AGENCY: United States Information Agency.

ACTION: Notice to sponsors of exchange visitor summer student travel/work programs; statement of policy.

SUMMARY: The General Accounting Office (GAO) issued a report entitled "Inappropriate Uses of Educational and Cultural Exchange Visas" dated February 16, 1990. The report questioned the legality of summer student travel/work programs under the J-visa. On August 13, 1990 the Agency published a Statement of Policy in the Federal Register, 55 FR 32906, which served as an interim response to the GAO report.

This notice sets forth the Agency's final response.

DATES: The Statement of Policy is effective October 9, 1992.

ADDRESSES: Questions regarding this notice should be addressed to Stanely S. Colvin, Assistant General Counsel, Office of the General Counsel, room 700, United States Information Agency, 301 4th Street, SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Stanley S. Colvin Assistant General Counsel, Office of the General Counsel, room 700, United States Information Agency, 301 4th Street, SW., Washington, DC 20547, (202) 619–6829.

SUPPLEMENTARY INFORMATION: The GAO issued a report entitled "Inappropriate Uses of Educational and Cultural Exchange Visas" dated February 16, 1992. That report questions the legality of the Summer Student Travel/Work Programs under the J-visa.

The Agency has been designating Summer Student Travel/Work programs for a number of years. Regulations covering such programs presently appear to 22 CFR 514.13(d). Those programs are designed to achieve the educational objectives of international exchange by involving foreign students during their summer vacations directly in the daily life of the host country through temporary employment opportunities. Selection of participants is limited to *bona fide* foreign university students who are between 18 and 23 years of age. A participant must have a prearranged job before he or she comes to the U.S., or have firm appointments with prospective employers, or have sufficient personal funds so as to be financially independent if not employed.

Because of the potential adverse impact on labor opportunities for U.S. youth, the Agency requires program sponsors to check in advance with the Department of Labor to obtain information regarding areas which have a high unemployment rate and sponsors are directed to advise program participants to avoid such areas in seeking employment. Potential adverse labor impact is avoided further by an Agency requirement that sponsors administer their programs on a reciprocal basis, i.e., they cannot bring more students to the U.S. than they send abroad each calendar year on similar travel/work programs.

The statutory basis under which the United States Information Agency can designate programs for a J-visa is found in section 101(a)(15)(J) of the Immigration and Nationality Act, as amended, 8 U.S.C. 1101(a)(15)(J). That section defines nonimmigrants of the J category as an alien having a residence in a foreign country which he has no intention of abandoning who is a *bona fide student, scholar, trainee, teacher, professor, research assistant, specialist, or leader in a field of specialized knowledge or skill,* or other person of similar description, who is coming temporarily to the United States as a participant in a program designated by the Director of the United States Information Agency, for the *purpose of teaching, instructing or lecturing, or studying, observing, conducting research, consulting; demonstrating special skills, or receiving training* and who, if he is coming to the United States to participate in a program under which he will receive graduate medical education or training, also meets the requirements of section 1182(j) of this title, and the alien spouse and minor children of any such alien if accompanying him or following to join him. [emphasis added.]

The GAO pointed out that summer student travel/work programs, which provide foreign university students with employment opportunities in the United States during their summer vacations, do not require participants to engage in activities cited in the legislation. Some sponsors told us that the participants work at fast food restaurants, summer resorts, amusement parks, or other places where they can find work. Participants may be placed in jobs before they arrive or find work after they arrive. These are not jobs requiring special skills or distinguished merit and ability. One of the program sponsors we interviewed brings about 8,000 to 11,000 summer students a year to the United States.

In response to the GAO report, the Agency established a Task Force on Regulatory Reform of the Exchange Visitor Program. In addition to preparing an overall revision to the Exchange Visitor Program regulations, the Task Force examined the Summer Student Travel/Work program as part of the regulatory reform. The Task Force has examined the Summer Student Travel/Work Program from the perspective of overall U.S. foreign policy interests and from the perspective of the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright Hays Act) and its legislative history. While the Agency believes that, from a foreign policy perspective, it is desirable to continue the program, it nevertheless has concluded that additional legislation will be required in order to bolster the Agency's authority to conduct such a program.

The Agency agrees with the GAO that participants in the Summer Student Travel/Work Program do not engage in the activities delineated in the Fulbright-Hays Act. In other words, they do not come to the U.S. for the purpose of teaching, instructing or lecturing, or studying, observing, conducting research, consulting, demonstrating special skills, or receiving training. For the most part, they come to work in the U.S. and take jobs requiring no special skills or distinguished merit or ability. Typical jobs accepted by participants in the program include work at fast food restaurants, summer resorts and camps, or amusement parks.

Nevertheless, while such programs do not fall squarely within the language of the Fulbright-Hays Act, the Agency believes that they accommodate certain foreign policy needs in that they promote mutual understanding between the people of the United States and the people of the other countries.

While Congress intended that the Fulbright-Hays Act be given a broad interpretation, the legislative history of the Act also strongly suggests, however, that although exchanges were not to be limited to the exchange of students and teachers, they were not to serve as vehicles for staffing regular industrial or commercial positions. The Agency believes that Congress recognized that there would be instances where the very nature of the exchange, e.g., a training program, would have a "work" or staffing component, but such programs would be permitted only where the "work" component was incidental to the training. The Agency believes that the principal activity of participants in existing summer student travel/work programs, for the most part, is working full-time for pay in a job which has no formal educational or cultural component, except perhaps as a product of chance, i.e., the educational/cultural component is merely incidental to the "work" component. This is the reverse of what Congress envisioned.

For this reason, the Agency has determined that it will propose a change in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended (the Fulbright-Hays Act) which will accommodate these programs. In the interim, the sponsors of summer student travel/work programs will continue under their present designations and will continue to abide by those regulations currently published at 22 CFR 514.13(d). Pending a legislative resolution of this issue, no new programs will be designated.

Simultaneously with the publication of this Statement of Policy the Agency is publishing, as a proposed rulemaking, an entire overhaul of the Exchange Visitor Program regulations (22 CFR part

514). When the proposed regulations become final, current § 514.13(d), which governs the Summer Student Travel/Work Program, will be renumbered as 22 CFR 514.31.

UNITED STATES INFORMATION AGENCY

22 CFR Part 514

[Rulemaking No. 100]

Exchange Visitor Program

AGENCY: United States Information Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: By this notice the Agency is proposing replacement regulations governing its administration of the Exchange Visitor Program. The Agency has undertaken a thorough review of the Program, its enabling legislation, and past history. This review has, in turn, directed the Agency upon a course of regulatory and management practice reform. The complete revision to 22 CFR part 514 set forth in detail below are proposed in an effort to define more clearly the obligations, duties and relationships of the Agency, sponsors, and exchange participants.

DATES: Comments on the proposed rule will be accepted until December 8, 1992. All written communications received by the Agency on or before the closing date will be considered by the Agency before action on a final rule is undertaken.

ADDRESSES: Please submit five copies of written comments to: Stanley S. Colvin, Assistant General Counsel, Office of the General Counsel, room 700, United States Information Agency, 301 Fourth Street, SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Stanley S. Colvin, Assistant General Counsel, (202) 619–6829.

SUPPLEMENTARY INFORMATION: The Director of the United States Information Agency ("Agency") is authorized to facilitate and direct educational and cultural exchange activities in order to develop and promote mutual understanding between the people of the United States and other countries of the world. Now governed by the provisions of the Mutual Educational and Cultural Exchange Act of 1961 ("Fulbright-Hays Act"), educational and cultural exchange is the cornerstone of United States public diplomacy efforts.

First begun pursuant to the provisions of the United States Information and Educational Exchange Act of 1948 ("Smith-Mundt"), and subsequently incorporated into and broadened under the Fulbright-Hays Act, educational and cultural exchange activities have, over the past forty years, exposed millions of foreign nationals to the United States, its culture, philosophy, business techniques, and educational institutions. The Fulbright-Hays Act mandates reciprocal exchange and Americans traveling abroad have, in similar fashion, developed an enhanced awareness of foreign people, their cultures and societies. Originally performed by the Department of State, oversight of exchange activities, occurring under the umbrella of the Exchange Visitor Program, has been the responsibility of the Agency since 1978.

The Fulbright-Hays Act prescribed categories of eligible exchange participants. The Act provides for the exchange of students, scholars, trainees, teachers, professors, researchers, specialists, leaders in a specialized field of knowledge or skill, or other person of similar description. In addition, the Act requires that exchanges participate in bona fide teaching, study, instruction, lecturing, observation, consultation, research, training or demonstration of special skill activities. Further, the Act authorizes non-immigrant aliens falling within the statutory parameters of the Act to enter the United States under the aegis of a J visa for the purpose of participation in an exchange visitor program. Necessarily, Agency determination of the appropriate usage of the J visa is an integral element of this rulemaking.

The Exchange Visitor Program is facilitated—indeed, largely conducted—by Agency-designated program sponsors who are responsible for the recruitment, placement, and supervision of exchange participants. Congress clearly intended that the private sector was to have a major role in educational and cultural exchange activities. Indeed, when Congress assigned the Agency its mission in 1978, it reemphasized, amongst other things, that the Agency was to "encourage private institutions in the United States to develop their own exchange activities, and provide assistance for those exchange activities which are in the broadest national interest." 22 U.S.C. 1461–1 (1988). Pursuant to this Congressional mandate, utilization of private sector expertise and resources has resulted in the designation of over 5,000 exchange visitor programs during the past forty years. Currently, in excess of twelve hundred program sponsors are conducting exchange activities. In 1990, these Agency-designated sponsors facilitated the entry into the United States of more than 180,000 Exchange Visitor Program participants.

Though widely hailed as an innovative and successful foreign policy initiative, the Exchange Visitor Program is not without flaw. Debate concerning the parameters of program participation and activity has arisen in recent years. In response to this debate, the Agency has undertaken a thorough review of the Program, its enabling legislation, and past history. This review has, in turn, directed the Agency upon a course of regulatory and management practice reform. The amendments to 22 CFR part 514 set forth in detail below are proposed in an effort to define more clearly the obligations, duties, and relationships of the Agency, sponsors, and exchange participants.

Acting in response to Congressional request, the General Accounting Office ("GAO") investigated Agency oversight and administration of the Exchange Visitor Program and its attendant utilization of the J visa. In its report to Congress, dated February 5, 1990 and entitled "Inappropriate Uses of Educational and Cultural Exchange Visas," the GAO determined that certain Exchange Visitor Program activities appeared to be inconsistent with the statutory grant of authority and its underlying legislative intent. GAO summarized its findings, stating:

> Most J-visa activities appear to conform to the intent of the 1961 act. However, GAO believes that certain activities and programs in the trainee and the international visitor categories, including the summer student/travel work, international camp counselor, and au pair (child care) programs, are inconsistent with legislative intent. GAO identified instances of participants working as waiters, cooks, child care providers, amusement and leisure park workers, and summer camp counselors. Authorizing J visas for participants and activities that are not clearly for educational and cultural purposes as specified in the act dilute the integrity of the J visa and obscures the distinction between the J visa and other visas granted for work purposes.
>
> Report, p. 3.

In turn, Agency response to this criticism began with a thorough review of enabling legislation authorizing the Exchange Visitor Program and admission into the United States of foreign nationals on a J visa.

Subpart A: General Provisions

Exchange Participants and Activities

The Agency has determined that it may best prevent future confusion regarding participant eligibility by establishing eligibility criteria. To this end, the Agency proposes such criteria at § 514.4. New categories of participation, those of "short-term scholar" and "government visitor" are introduced and participation as a "student" is more clearly defined. The category of "specialist" has been expanded and that of "international visitor" restricted to Agency use.

Further, the Agency has determined that camp counselor programs do in fact fall within the Agency's statutory authority to promote exchange. All of these matters are discussed below.

The Agency has determined that the academic exchange community could readily increase the velocity of academic related exchanges through the development of "short-terms scholar" exchanges. A new category of participation, such exchanges will be limited to four months duration. In similar fashion, the Agency believes exchanges within the business community could be substantially increased through the use of the "specialist" category of participant. This category allows for experts in a field of specialized knowledge or skill to engage in observation, consultation, or demonstration of special skill activities for a period of time not to exceed one year.

To correct confusion which periodically arises from the sponsorship of student participants, the Agency proposes criteria governing student status. Given the *bona findes* requirement set forth in 8 U.S.C. 1101(a)(15)(J), the Agency believes that a student participant must pursue a full course of study. In determination of what constitutes *bona fide* study, the Agency has surveyed the catalogues of various educational institutions regarding their criteria for full-time student status. The results of this survey indicate that current practice in the field of higher education generally requires an enrolled full-time student to pursue a minimum of twelve semester hours of undergraduate or nine semester hours of graduate academic credits each semester. This minimum course load is considered satisfactory evidence of appropriate advancement toward degree completion and is commonly used as the measure for payment of full-time tuition.

The Agency has also examined Immigration and Naturalization Service regulations set forth at 8 CFR 214.2(f)(6). This regulation, first promulgated by publication at 40 FR 32312 (1975), requires an undergraduate student to complete a minimum of twelve semester hours of academic credit (or equivalent) per semester of attendance and a graduate student to complete the minimum number of credits per semester which an appropriate school official certifies as a full course of study.

Based upon the above, the Agency concludes that pursuit of *bona fide* study is best evidenced by a student's successful completion of a minimum number of academic credits per semester. Pursuant to the *bona fide* requirements of 8 U.S.C. 1101(a)(15)(J), the Agency has determined that an exchange visitor entering the United States as a "student" under the J visa must be actively engaged in the pursuit of a "full course of study." In lieu of setting forth a minimum number of semester hours of academic credit (or its equivalency) per academic term, the Agency proposes that the standard for full course of study be set by the academic institution at which the exchange student is pursuing his or her studies.

In response to a perceived need in the academic community, the Agency proposes to expand student status to also encompass participation in a specialized program of instruction of less than two year's duration. Such program shall be conducted under the aegis of an accredited educational institution and must be comprised of a structured course of study devoted to a particular academic endeavor. No requirement that the participant pursue a degree is imposed. An example of such a program would include an interdisciplinary course of study in arts management comprised of courses offered by the fine arts, business, public administration and law schools of a given academic institution.

Also set forth in § 514.4 as subparts of the "other persons of similar description" participant category are "International Visitor" and "Government Visitor." Originally intended only for Agency use, the International Visitor category has devolved to "catch-all" usage over the years. As proposed, reservation of this category only for Agency use will allow definitive and statistical illustration of the nature and scope of exchanges occurring under direct Agency sponsorship. Similar in nature to International Visitor, the proposed Government Visitor category will be utilized for exchanges directly sponsored by local, state, or federal government agencies.

The GAO report discussed *supra*, concluded that camp counselor programs are inconsistent with the legislative intent of the Fulbright-Hays Act. The Agency, having reviewed this matter in great detail, is now of the opinion that camp counselor programs may be continued. This conclusion is based upon policy and legislative analysis and will require certain programmatic reforms.

International camp counselor is not a statutorily enumerated category of exchange participation. If, however, camp counselor exchange participants are students, teachers, *bona fide* youth workers, and persons with specialized skills in their home country they will fall squarely within the statutorily authorized category of "other person of similar description." As regards activities while in the United States, camp counselors are actively engaged in teaching, observation, and instruction activities, all of which are activities specifically authorized by the statute.

Given the directive of broad interpretation found in the legislative history of the Fulbright-Hays Act, Agency designation of these programs is clearly consistent with the statutorily enumerated purpose and objective of the legislation. To avoid confusion as to the categorization of camp counselor program participants, a new category, set forth at § 514.4 as a subpart of "other persons of similar description," is proposed.

Program Designations

Agency examination of its administration of the Exchange Visitor Program has resulted in a determination that certain internal program controls should be bolstered. In part, the Agency has determined that sponsor application and designation procedures should be strengthened and more clearly delineated. To this end, the Agency proposes, pursuant to provisions set forth at § 514.5 and § 514.6, modification of existing application and designation procedures and the addition of a new requirement dictating periodic redesignation.

Confusion concerning the actual number of Agency-designated Exchange Visitor Program sponsors was an initial area of GAO investigation and proved a fertile source of criticism. Actual determination of this number proved problematic given both the Department of State's and Agency's failure to cancel sponsor designations due to program inactivity or abandonment. This failure is best illustrated by the fact that over 5,400 programs designated in the last forty years, less than a third are operating today. Through utilization of its Exchange Visitor Information System the Agency has determined that slightly more than 1,200 exchange visitor programs are currently in operation. The Agency contemplates the continued utilization of existing Form IAP–37, "Application for Program Designation" for both initial purposes. Modifications to such form will be made to reflect designation and re-designation proposed changes.

The Agency proposes to prevent this confusion concerning the number of valid exchange programs through a proposed utilization of periodic designations. This action is prompted by the Agency's recognition that many

exchange programs exhibit a life cycle of establishment, maturation, and demise. The Agency proposes to designate program sponsors for five years and require sponsors desiring to continue program operations to advise the Agency affirmatively of such intent pursuant to request for redesignation as set forth in § 514.7, *infra*. Such periodic designations will allow the Agency to track program life cycles, efficiently cancel inactive programs, and monitor the activity within and direction of designated exchange programs. Programs for which designation is not sought will be canceled through administrative action. The Agency contemplates a two-year phase-in of this requirement during which all existing designations will be reviewed and extended, if appropriate.

Program Administration

In addition to delineating sponsor and participant eligibility criteria, the Agency proposes that all exchange programs designated by the Agency meet certain eligibility requirements. As set forth at § 514.8, the Agency has determined, as in the past, that all programs should have not less than five exchange participants annually. Further, with the exception of programs for the new defined "scholar" and "government visitor" participants, all programs must provide for cross-cultural activities and afford all participants an exchange program in the United States of not less than three weeks. These requirements are currently set forth in existing regulations, but have, along with a requirement for reciprocity, been reordered and will henceforth be prerequisites to program designation.

The Agency will require sponsors to be both United States citizens as such term is defined in this Part and to affirmatively demonstrate an ability to comply, and remain in continual compliance, with all regulatory provisions. As regards exchange visitors, the Agency has defined the statutorily enumerated categories of eligible participation in terms of the activity inherent to each categorical status. Thus, by way of illustration, the Agency has determined that an eligible "student" exchange participant is one entering the United States for the purpose of pursuing a full course of study at an accredited educational institution. This approach will ensure that exchanges occurring under the aegis of the Exchange Visitor Program fall squarely within the established statutory parameters of status and activity. As participation in the Exchange Visitor Program is thus limited, strict adherence and compliance with Agency promulgated definitions of status will be expected.

A statement addressing the Agency's long-standing reciprocal exchange policy is set forth in § 514.8. Such policy contemplates that exchange sponsors will make a good faith effort to facilitate reciprocal exchange of persons to the fullest possible extent. Statutorily mandated, reciprocity is inherent in the concept of mutual exchange of persons. Confusion over the nature and scope of reciprocity has been problematic for some time. As a policy consideration, the Agency seeks to promote and foster innovative and expansive responses to this critical program requirement. Although one-for-one exchange is the ultimate objective of the foreign policy underlying passage of the Act, the Agency recognizes that circumstances may permit no, or only limited, reciprocal exchange opportunities.

Related to reciprocity is the requirement that exchange visitors be exposed to various activities designed to promote cross-cultural awareness. Sponsors will be required to offer a reasonable amount of cross-cultural activities, including sports, cultural, and social activities for the purpose of enhancing the participant's knowledge and understanding of American mores, customs, and ways of life.

Agency scrutiny of existing regulations governing the Exchange Visitor Program has revealed a lack of specificity and clarity regarding sponsor obligations and program administration. Although the Agency is secure in its belief that sponsors act in the best interests of sponsored exchange participants, the existing regulations do little to ensure uniform program administration and oversight of exchange visitors. To correct this deficiency, the Agency proposes amendment to existing regulations in an effort to provide some measure of uniformity in the conduct of exchange activities.

Recognizing that exchange visitors are dependent upon the sponsors who facilitate their entry into the United States, the Agency proposes that such sponsors demonstrate, to Agency satisfaction, their organizational and financial ability to fulfill their duties and obligations as exchange sponsors. Pursuant to proposed regulations set forth at § 514.9, non-government sponsors must affirmatively establish both their ability to pay timely all financial obligations and that sufficient funds are readily available to fulfill all obligations and responsibilities attendant to exchange sponsorship.

The Agency is obligated to introduce this requirement due to evidence of financial instability among certain Agency-designated sponsors. As a matter of administrative convenience, the Agency deems it appropriate to consider public colleges and universities as government sponsors, for the purposes of this provision only, and thereby exempts them from compliance. In addition to furnishing evidence of fiscal integrity, sponsors must also comply with additional obligations pertaining to internal organizational operations.

The proposed regulation set forth at § 514.9 also requires that sponsors adhere to Agency-promulgated regulations governing the Exchange Visitor Program. This regulation is advanced, in part, to ensure that officers, employees, and agents involved in sponsor facilitation of exchange activities are aware of the Program, its intent, and regulatory requirements. this proposed regulation will require employees, officers, and agents responsible for program administration to be adequately trained and qualified to permit assigned duties relating to exchange activities. Underlying this requirement is an Agency concern that responsibility for both exchange visitors and program administration be vested in persons who have knowingly undertaken such responsibility.

Proposed amendments governing the selection and orientation of exchange participants are set forth at § 514.10. The Agency will require that sponsors ensure that prospective exchange participants meet the eligibility criteria for program participation and that such program is suitable to the participant's background, needs, and experience. Upon selection for participation and prior to commencement of the program, sponsors will be required to provide the participant with information regarding the exchange program, travel, housing, and cost. The sponsor must also inform all exchange visitors of the two-year home residency requirement which may apply to the exchange visitor due to government funding or area of study.

Upon the exchange participant's arrival, or as soon as practical thereafter, the sponsor must provide sufficient orientation to acquaint the exchange visitor with United States customs and monitor the visitor's stay in the United States. This requirement is introduced in an effort to both facilitate the exchange visitor's adjustment to life in the United States and enhance the positive impression of the United States which is the underlying purpose of all exchange activity. Although the Agency

has determined that orientation for accompanying dependents is highly desirable, a mandatory requirement that such orientation be conducted is not proposed. The Agency strongly encourages sponsors to provide dependent orientation.

Additionally, the Agency has reviewed the health and accident insurance coverage afforded Program participants. The need for such coverage is self-evident. Given the escalating costs of U.S. health care, the current levels of coverage, in place since 1983, are now woefully inadequate. As set forth in § 514.14, the Agency proposes to increase the level of coverage to $50,000 per accident or illness. The Agency is also proposing that exchange visitors obtain coverage for repatriation of remains in the amount of $7,500 and coverage for medical evacuation to their home country in the amount of $10,000. A waiting period for pre-existing conditions, reasonable as determined by industry standards, and a deductible not in excess of $500 per accident or illness will be permitted. Provision is made for co-insurance. Policies may not exclude from coverage perils or dangers inherent to the exchange activity. For example, an insurance policy secured to cover flight training participants may not exclude injury arising from operation of small aircraft. In an effort to ensure the quality of the provided coverage, the Agency proposes that only insurance corporations having an A.M. Best policyholder rating of "A" or above, an Insurance Solvency International, Ltd. (151) rating of "A" or above, or a Standard & Poor's Claims-paying Ability rating of "AA" or above, may act as underwriters.

The proposed regulation provides for self-insurance by federal, state or local governments, state colleges and universities, and public community colleges. A non-governmental sponsor may elect to self-insure or to accept full financial responsibility for the above requirements, but may do so only with the Agency's permission.

Current regulations do not require that an accompanying spouse or dependent of an exchange visitor be covered by insurance. Proposed regulations cure this programmatic flaw by requiring accompanying dependents entering the United States on a J visa to be covered under an insurance policy. An exchange visitor's failure to secure insurance coverage for his or her self and J–2 accompanying dependents will obligate their program termination. Sponsors shall also be prepared to provide exchange visitors with information on the availability of such coverage.

Notification, Annual Reporting, and Control of Form IAP–66

A proposed regulation governing certain notification requirements is set forth at § 514.13. Such requirements include notification to the Agency of material changes in a sponsor's organizational structure which affects the citizenship requirement set forth in § 514.2, and overall ownership and control. The Agency is obligated to introduce this requirement as many designated sponsoring organizations are small entities comprised of key personnel. Upon notification of a substantial change in ownership or control, the Agency will ascertain whether designation should continue based upon the experience and expertise of the new management. It must be noted that Agency designations are not transferable.

Efficient Agency oversight and administration also dictates that sponsors apprise the Agency of any changes in responsible officers, address, or telephone number. In similar fashion, loss of licensure or accreditation, change in financial circumstances or the voluntary termination of the exchange visitor program must be reported. The Agency has also determined that notification concerning a participant's early completion or withdrawal from the sponsor's exchange visitor program is necessary. Upon receipt of such notification the Agency will deem the sponsor's obligations to an exchange visitor to have ended.

The Agency has determined that a substantial correction must be made to the current practice surrounding the care and custody of the Form IAP–66. Such forms are controlled U.S. Government documents and have been found to have a substantial black market value. The Agency has also discovered unauthorized utilization of the forms by program sponsors to facilitate the entry of foreign nationals for the purpose of participation in non-designated exchange activities. The Agency proposes to correct this abuse by institution of a strict accounting of all forms disbursed to sponsors. To this end, the Agency proposes, pursuant to the provisions of § 514.12 and § 514.13, that sponsors record and destroy damaged forms, track and record forms issued, and maintain all forms on hand in a secure fashion. An accounting for all forms will be made, in part, pursuant to an expanded annual reporting requirement.

Considerable debate has surrounded the Agency's proposal regarding annual reporting requirements. The Exchange Visitor Program is an anomaly in the U.S. immigration scheme and provides extraordinary latitude in the selection of exchange participants. As a program and an extension of U.S. foreign policy a degree of accountability is required. The burden of submitting an annual report which reflects a sponsor's activity for a year and which ensures an annual reconciliation of their usage of Forms IAP–66 is viewed by the Agency as a de minimus imposition upon designated sponsors. The Agency has elected to resurrect a one page report form which has been in use for the past thirty years and which is familiar to long established exchange sponsors. Further, the Agency takes this opportunity to advise designated sponsors that this annual reporting requirement pursuant to an oral representation made by an Agency official. Be that as it may, the regulatory requirement of an annual report has been in place since the inception of the Exchange Visitor Program. The requirement that sponsors submit an annual report will be strictly enforced.

To assist the exchange community in review of these proposed regulations, the Agency has incorporated into this Rulemaking the definitions currently set forth at 22 CFR 514.1. Minor changes, not affecting underlying meaning, have been made to most of the definitional terms. Such changes, when made, are proposed in an effort to enhance overall clarity and readability. Although definition of the term "citizenship" was the subject of a separate rulemaking, such term is included here, in final form, to facilitate overall review. Comments concerning this definition are not sought.

Finally, to assist in review of these proposed regulations the Agency attaches as appendices copies of forms which are used in conjunction with sponsor administration of exchange visitor programs. At appendix A is a modified version of the certification used to attest to the citizenship of sponsors and responsible officers. Appendix B contains the IAP–37, the Exchange Visitor Application, which has been approved by the Office of Management and Budget. The Agency anticipates that it will continue to use the form with a few minor changes to reflect § 514.4, Participant Eligibility. Appendix C contains a copy of IAP–87, Update of Information on Exchange Visitor Program Sponsor. The Agency anticipates a limited modification of this form. Finally, at appendix D, a copy of the proposed annual report form is attached for examination.

Subpart B: Specific Program Provisions

Section 514.20 Professors and Research Scholars

Although professor, researcher, and scholar exchanges are the very heart of the Exchange Visitor Program, regulations which specifically govern these exchanges have never been promulgated. In an effort toward regulatory consistency and program integrity the Agency is herein proposing regulations which specifically provide guidance regarding such exchanges.

The term "scholar," although set forth as a category of exchange in the Fulbright-Hays Act, has never before been defined in Exchange Visitor Program regulations or considered a distinct category of authorized exchange activity. This lapse is possibly due to the conceptual overlap of the term with "professor" and "researcher." The Agency proposes to correct this discrepancy by introducing the category of "short-term scholar," which is discussed below. On an additional point of terminology, the Agency has been advised that a number of academic exchange sponsors prefer to retain the current category of "research scholar" rather than "researcher." Upon deliberation, the Agency agrees that retention of this term, long used and understood within the exchange community, is appropriate.

In deciding whether to facilitate the exchange of a professor or research scholar, the sponsor shall consider the underlying purpose for which the individual is visiting the United States. It is appropriate for a professor or research scholar to come to the United States as an exchange visitor only when the underlying purpose of his or her entry into the United States is to stimulate international collaborative teaching and research efforts or to promote interchange between research and educational institutions in the United States and other countries. To this end the proposed regulations require that appointments of professors and research scholars be temporary and not on a tenure track, even if the position itself is permanent.

Recognizing that the positions of professor and research scholar are intertwined, the Agency proposes to permit professors to freely conduct research and research scholars to teach or lecture, unless disallowed by the sponsor. The definition of professor and research scholar set forth in these regulations, rather than the position description utilized by the individual educational or research institutions, is to be used by sponsors in determining the category of exchange participation.

Prior to issuance of the Form IAP–66, the responsible officer must review the parameters of the individual exchange to assess whether research or lecturing will comprise the participant's primary activity. If the exchange participant will primarily be conducting research, he or she must be categorized as a research scholar on the Form IAP–66. If the exchange participant will primarily lecture, then he or she must be categorized as a professor.

Further, the proposed regulations allow sponsors to authorize a change of category from professor to research scholar, or vise versa when the principal activities of the participant so dictate. Such change of category does not require Agency approval or notification. A change of category does not extend the duration of the exchange visitor's program beyond what is permitted at § 514.20(i).

Professors or research scholars may conduct their exchange activity at the location(s) listed on the Form IAP–66, which could be either at the location of the exchange visitor sponsor or the site of a third party facilitation the exchange. Pursuant to § 514.20(g), exchange visitors may also engage in activities at locations not listed on the Form IAP–66 if such activities constitute lectures or consultations authorized in advance by the sponsor. By way of illustration, a research scholar may conduct research at the universities listed on his or her Form IAP–66, and may also conduct short-term consultations at any location when the conditions set forth in the regulations are satisfied.

Over the years the Agency has received numerous requests from the academic community to extend the permitted duration of participation for research scholars. The National Institutes of Health and other United States Government agencies have also requested greater flexibility in arranging the duration of participation for the professors and research scholars that they sponsor. In revisiting this issue, the Agency has determined that a greater degree of flexibility in the permitted period of participation is desirable.

To this end, the Agency proposes that up to three additional years beyond the duration of participation set forth in § 514.20(i) may be authorized by the Agency when exceptional or unusual circumstances so warrant. The Agency proposes the additional time in an effort to be responsive to needs which arise from the participation of exchange visitors in international research projects and in medical and biomedical research. Based upon representations made by designated sponsors, the Agency anticipates that a small percentage of professor and research scholar exchanges will encounter the exceptional or unusual circumstances which would warrant such an extension. Requests for such extensions shall be made directly to the Agency's Exchange Visitor Program Services.

The proposed regulations also allow responsible officers to approve short-term extensions of six months or less beyond the duration of participation allowed in § 514.20(i). In addition, the Agency will entertain sponsors' request to extend the permitted period of participation for a group of research scholars engaged in specific fields of endeavor on a blanket petition basis. The Agency believes that such short-term extensions and blanket approvals will provide both desired flexibility and enhanced administrative efficiency.

Section 514.21 Short-term Scholars

The agency proposes to create the category of "short-term scholar," which is defined as a professor, research scholar, specialist, or a person with similar education or accomplishments coming to the United States on a short-term visit for the purpose of lecturing, observing, consulting, training, or demonstrating special skills at research institutions, museums, libraries, post-secondary accredited educational institutions, or similar types of institutions. Educators, scientists, research fellows, writers, museum administrators, librarians, and similar persons of recognized expertise are examples of participants appropriate for this category.

The goal of short-term scholar exchanges is to increase the velocity of the interchange of knowledge and skills and collaborative research efforts between foreign and American scholars. This may be accomplished by providing foreign scholars the opportunity to share ideas with their American colleagues, participate in educational and professional programs, confer on common problems and projects, and thereby promote improved professional relationships and communications.

Because these exchanges are of limited ratio and the participants are often senior in their field, the Agency has determined that it will not be necessary for sponsors to provide orientation or cross-cultural activities for short-term scholars. The proposed regulations exempt short-term scholars from the minimum duration of participation set forth at § 514.8(b) but limit the maximum duration of participation to four months. As this category is intended only as a vehicle

for short-term collaboration and interchange, these participants will not be eligible for a program extension.

Section 514.22 Training

Following the passage of the Smith-Mundt Act in 1948, the Department of State, the Agency's predecessor in implementing exchange programs, promulgated regulations governing educational and cultural exchanges. Among other things, these regulations recited various categories of aliens allowed to participate in exchange visitor programs pursuant to the statutory language of the Act. Among these categories were "trainee", defined as an alien seeking to enter the United States temporarily in order to participate in an exchange visitor program "for the purpose of obtaining practical training in public administration, industry, medicine, agriculture, or some other specialized field of knowledge or skill * * *" 22 CFR part 68 (1949).

In 1961, Congress in turn passed the Fulbright-Hays Act, again directing the inclusion of training as a category of exchange participation. Although an integral part of Agency-administered exchanges, it was not until 1963 that separate regulations governing training activities utilizing the J-visa were promulgated. 22 CFR 514.13(c) (1963). These regulations have not been amended or revised since first promulgated.

In response to the General Accounting Office (GAO) investigation noted above, the Agency has reviewed the legislation and legislative history underlying the Exchange Visitor Program and existing regulations to determine whether such regulations comport with the statute governing this program. As discussed below, the Agency proposes to amend existing regulations in such a manner that the criticisms raised by the GAO are addressed and distinctions between training and work are obvious and clearly drawn.

The Agency is proposing regulations which address the criticisms of the GAO and clearly distinguish between training and work that is not training. Thus, the Agency proposes that all training conducted under the aegis of the Acts be clearly defined and structured, and on a level appropriate to the trainee's background and experience.

GAO Report

The controversy over the legitimacy of certain activities of foreign nationals in the United States on exchange visitor visas sparked Congressional concern as to the propriety of certain educational and cultural exchange programs administered by the Agency. A GAO investigation and report followed.

The report by GAO, entitled "Inappropriate Uses of Educational and Cultural Exchange Visas," and dated February 18, 1990, (GAO Report) concluded that:

> A number of J-visa activities in the practical training and international visitor categories, including summer student travel/work, camp counselor, and au pair activities—some of which have been ongoing for years—do not conform to the original legislative intent concerning educational and cultural exchanges.
>
> GAO Report at 23.

While the words "trainee" and "receiving training" are not expressly defined in either of the educational and cultural exchange Acts, the GAO noted that the existing training sanctioned by the Agency "did not have the same status as the categories mentioned in the statutes and would not generally be considered to have the same educational and cultural value." *Id.* at 16.

The Agency is of the opinion that the vast preponderance of the exchange visitor training programs are conducted well within the legislative authorities created by the Act. However, the GAO found that certain training programs inappropriately "consisted primarily of employment in commercial enterprises with no cultural or educational emphasis placed on the participants' activities. This training involved participants in such capacities as waiters, cooks, hotel workers, and automobile body repairers." *Id.* at 3. It is noted that the GAO Report stated only that "some" training programs consisted primarily of employment in commercial enterprises with no cultural or educational emphasis placed on the participants' activities.

Distinction Between Work and Training

As noted above, the Agency has been criticized for allowing the Exchange Visitor Program to be used to circumvent the immigration and labor laws of the United States by allowing foreign workers to use the program under the guise of educational and cultural exchange. This criticism has centered on designated private sector training programs and generated considerable debate concerning the distinction between work, i.e. gainful employment, and legitimate training. Recognizing that training more often than not occurs in a work place setting, the Agency has determined that the distinction between unauthorized gainful employment and authorized training may best be drawn through examination of the components of a *bona fide* training program. The requirements for a *bona fide* training program are set forth in § 514.22(f).

The Training Plan

As a prerequisite to Agency designation, the Agency proposes that applicants submit a training plan which describes what the training objectives are, the competencies which the trainee will obtain through participation in the training program, a general description of the schedule of the training activities, and a justification for the use of on-the-job training to achieve the objectives of the training course. Special skills, e.g., computer training, to which the trainee will be exposed should also be noted.

The Agency has received many comments suggesting that the training plan requirement will be unduly burdensome in all cases, and in some cases, impossible to comply with because the sponsor is active in many different training areas. The Agency believes that the revised proposed regulations set forth herein meet those objectives.

Applicants need not submit a training plan for each trainee. However, the applicant must submit a training plan for each type of training it intends to conduct. For purposes of these regulations, the Agency has listed eleven broad categories and it believes that every conceivable type of training will fall within one of these eleven categories. See § 514.22(i)(2). Moreover, the Agency believes that the submission of a maximum of eleven general training plans is not unduly burdensome. Specific comment on this matter is invited.

Proposed §§ 514.22 (f) and (g) set forth that information which the applicant is to include in the training plan and describes three types of training plans which an applicant may utilize in order to comply with the regulation.

The Agency recognizes that at the time the applicant is applying for designation it may not have identified individual trainees who are going to participate in the program. In such instances, the applicant need only submit a generalized, hypothetical training plan which illustrates the training the applicant proposes to provide.

In other instances, the applicant may not have prepared the training plan at the time it applied for designation. However, if the applicant has previously been engaged in the same sort of training for which it is now seeking designation it may submit a copy of a previously used training plan.

If the applicant has already designed a structured training plan at the time it is applying for designation, a copy of such training plan should be submitted with the application.

If all of the above instances, the applicant should bear in mind that the Agency's interest is not in creating needless paperwork, but in having sufficient facts to determine that the applicant is capable of conducting the training for which designation is sought.

Points to be discussed and included in the training plan are set forth in the Appendix to the proposed regulations. In addition, the general training plan must indicate whether the training is in a specialty occupation or a non-specialty occupation.

The Agency is aware that many sponsors will expand the breadth of their programs. If a sponsor desires to add additional training areas to its program, it does not need to apply formally for re-designation. The sponsor may simply request the Agency to amend its designation to include the added training areas. The sponsor must, however, submit a general training plan for each new training area added to its designation.

Specialty and Non-Specialty Occupations

The Agency does not necessarily view a specialty occupational trainee as a worthier participant in the Exchange Visitor Program than a non-specialized occupational trainee. Therefore, non-specialty occupational training programs will be designated if otherwise in compliance with the regulations. However, the Agency considers the distinction to be significant because past experience has shown that some of the non-specialty occupational training programs were, in reality, work programs designed to meet the staffing needs of an employer. Thus, the Agency has determined that non-specialty occupational programs may require closer monitoring after designation than was previously undertaken in the past.

The Agency has concluded that the potential for inappropriate usage of the J visa is most pronounced in those non-specialized occupational areas which are generally considered unskilled in nature. For example, the Agency would not approve an application for designation of a program to train persons in clerk typist skills or in nurses' aides or orderly skills. The Agency will presume that such training would in reality be designed for staffing purposes and, therefore, inconsistent with the Agency's mission. A listing of those occupations which the Agency considers to be unskilled is set forth. Applications for designation of training programs in such occupations will not be approved.

Justification for the distinction between "specialty occupation" and "non-specialty occupation" may be found in both the original regulations governing the Exchange Visitor Program and in the legislative history of the Acts. In 1949, the Department of State permitted "trainee" participants pursuing training in "public administration, industry, medicine, agriculture, or some other *specialized* field of knowledge or skill * * *." 22 CFR part 68 (1949) (emphasis added). The legislative history of the Smith-Mundt Act refers to the training of meteorologists, agricultural research by the operation of collaborative experiments and research stations, hydroelectric experts, malaria experts, and experts in the fields of economics, business administration, agricultural design and construction, communications, and distribution of electric power. United States Information and Educational Exchange Act of 1948: Hearings on H.R. 3342 Before a Special Subcomm. of the House Comm. on Foreign Affairs, 80th Cong., 1st Sess. 148–50 (1947).

While most of the early exchange visitor training programs fell in specialized areas such as those noted above, the legislative history of the 1961 Fulbright-Hays Act strongly suggests that Congress intended the program to be broadly construed and highly flexible and adaptable to changing needs and conditions. In recognition that non-specialty occupational training programs can be an important part of our foreign policy, the Agency does not propose to exclude them from the Exchange Visitor Program. Since the passage of the Fulbright-Hays Act, the world has seen a major expansion in non-specialty occupational training and such programs have become an important part of our foreign policy, which the Agency intends to continue. However, for the reasons set forth above, the Agency will monitor non-specialty occupational training on an *ad hoc* basis in order to ensure that such training is *bona fide*.

As noted above, while the Agency will not require that a detailed training plan be submitted for each trainee, we anticipate that sponsors engaged in bona fide training programs will, in the ordinary course of business, prepare such plans and retain them in their files. The Agency may from time to time request an opportunity to inspect these training plans in order to verify sponsor compliance with Agency regulations.

Sponsor Supervision

In the proposed regulations, the sponsor of the program must be directly responsible for all aspects of the trainee's activities while the trainee is in the United States, including the selection, orientation, training, supervision, and evaluation of the trainee. The purpose of this proposal is to assure that responsibility for the trainee resides in one place. It has always been the policy of the Exchange Visitor Program that sponsors be directly responsible for these aspects of the Program, yet analysis of some programs reveals that this policy has not always been observed. The proposed regulations codify and strengthen this existing long-standing policy.

In order to carry out the actual training set forth in a sponsor's approved training plan, the Agency has determined that utilization of a third party by the sponsor may be appropriate. If the sponsor elects to delegate its responsibility for providing approved training to a third party, the sponsor is nevertheless accountable for ensuring that the third party complies with these regulations. A third party's violation of these regulations shall be imputed to the sponsor; therefore, the sponsor's obligation to monitor, control, and oversee the third party is absolute. Simply put, a third party may act for or in place of the sponsor; however, the accountability of the sponsor shall be non-delegable.

When a third party is utilized by the sponsor, the Agency requires evidence of an express written agreement between the sponsor and the third party Any such agreement shall specifically recite the third party's obligation to act in accordance with all Agency promulgated regulations applicable to the sponsor. In addition, the sponsor must provide the third party with the individualized training plan to be used to train the trainee. The sponsor shall retain a copy of such training plan for a period of three years.

The Agency will no longer approve an organization as a sponsor of a training program where the organization or its agent abdicates its responsibility to directly train and supervise the trainee. The regulations, as noted, will require that the sponsor retain full responsibility for the conduct of the program. Simply placing a trainee in a third-party training program will not be allowed in the future if the sponsor abdicates accountability for the training and well-being of the trainee.

Flight Training Programs

Included amongst the exchange visitor programs currently designated by the Agency are flight training programs. The Agency considers flight training to be in an important yet sensitive occupational area which requires that particular attention be given to quality assurance. Additionally, flight training schools require more financial resources than many other types of training programs.

Over the past two years, five of the thirty Agency-designated flight training programs have met with financial failure and recently one flight training program was suspended by the Agency for various violations of Agency regulations. These incidents suggest that the Agency must monitor more closely the flight training programs in order to ensure that program participants are adequately protected.

The Agency has engaged in considerable dialogue with representatives of flight training programs during the course of the Agency's regulatory reform effort. The Agency has conveyed to the sponsors its concerns about the financial stability of a number of sponsors and its concerns about the "work vs. training" issue involved in flight training programs. Similarly, the flight training sponsors and those seeking to become designated flight training sponsors have expressed their concern over the eighteen month maximum duration, arguing that flight trainees require more time to complete their training.

Flight training sponsors have also argued that participants in flight training programs should more properly be treated by the Agency as "students" rather than as "trainees" because typically flight training programs are more like schools than training programs in that they follow fixed curricula, have classroom instruction, and, at least in some cases, are accredited by nationally recognized accrediting agencies. It is further argued that placing flight training program participants in the student, rather than the trainee category, would also entitle the flight student to a total of eighteen months of training at the conclusion of the classroom portion of the program, rather than the maximum of eighteen months period of participation permitted under the training regulations.

The Agency has considered these arguments and has concluded that the flight training participants more appropriately fit under the training category than the student category. Moreover, the stated goals of the flight training program participants are better met under the trainee category than under the student category. For example, proposed § 514.23 ("College and University Students") requires that the student be studying at a degree-granting post-secondary educational institution. Most flight training schools do not grant degrees. Also, before a student can commence "academic training," the proposed regulation requires that the student first must have been a student in the exchange visitor program for the preceding nine months. See § 514.23(g)(2)(i)(A). The Agency has been advised that most flight students spend no more than six months in a full-time classroom or academic setting.

Therefore, in order to meet the Agency's concerns about quality assurance and financial stability of flight training programs, while at the same time allowing flight trainees to gain more training time in the U.S., the Agency is proposing the following:

1. All flight training programs must be accredited by a nationally recognized accrediting authority. If the proposed regulation is made final, the Agency will consider only the applications of those programs which have already been accredited as set forth in the regulation, or which have formally commenced the accreditation process. The Agency is aware that accreditation may take as long as one year to be completed. The Agency will, therefore, accept applications for designation from flight schools which have commenced the accreditation process, but will only conditionally designate them for up to twelve months. Similarly, currently-designated flight training programs will be conditionally redesignated for up to twelve months, but only if they have commenced the accreditation process.

2. With respect to duration of participation, flight trainees are to be granted an additional six months of training time beyond the normal 18-month maximum duration of participation. The Agency believes that a longer stay is justified in the case of flight training because of the strict training requirements of the international aviation community. As under current regulations, any extension of the program beyond twenty-four months must be specifically approved by the Agency, and such extensions will be granted only under highly unusual circumstances.

The Agency believes that this proposal is a reasonable accommodation to the need of the Agency and the needs of the flight training industry. Recognizing that there are both time and cost considerations in the accreditation process, the Agency is willing to extend the training time allowed to flight trainees in return for the flight training sponsors' acceptance of the accreditation requirement.

The Duration of Participation

The Agency had considered limiting training programs to twelve months. Upon consultation with a number of current sponsors, the Agency decided to keep the duration of training programs to a maximum of eighteen months, as is presently provided for in the regulations. The primary purposes of training under the Exchange Visitor Program are to expose the visitor to uniquely American techniques, methodology, and philosophy in the visitor's field of endeavor and to provide an opportunity for open interchange of ideas between the visitors and Americans. The law envisions that exchange visitors will return to their home country to share with their compatriots their experiences in the United States, including the fruits of their training. While many of the exchange visitor training programs funded by the United States Government are for less than eighteen months in duration, the Agency concludes that many private sector programs may require eighteen months to maximize the benefits to the trainee. An exception is being proposed for flight training programs in order to allow additional time to complete this highly specialized training. As noted above, flight training programs will be given a twenty-four month duration of participation.

Section 514.23 College and University Students

In response to requests from the academic community the Agency has undertaken the task of clearly defining when and under what circumstances a student should be issued a J visa. Sponsors should place foreign college and university students in their exchange visitor program when the students academic programs are funded by the United States Government, the government of the exchange visitor's home country, an international organization of which the United States is a member, or when the program is carried out under an agreement between the United States and a foreign government. Sponsors may also place foreign students in their exchange visitor program if the program is carried out under a written agreement between American and foreign educational institutions, or when foreign students are supported substantially by scholarships designed to promote international educational exchanges.

Further, the Agency proposes that the category of college and university

students shall be limited to exchange participants at post-secondary accredited educational institutions who are (i) pursuing a recognized full course of study leading to or culminating in the award of a U.S. degree; or (ii) engaged full-time in a prescribed course of study of up to 24 months duration. The latter category is proposed in order to allow and encourage college or university students who seek to pursue a clearly defined non-degree academic program.

8 U.S.C. 1101(a)(15)(J) provides, in part, that an exchange visitor may enter the United States under the aegis of a J visa if such visitor is a *bona fide* student actively engaged in *bona fide* academic study. 22 U.S.C. 2460(b) directs the Agency to ensure that exchange visitor programs sponsored by its Bureau of Educational and Cultural Affairs are of the highest academic standards. Pursuant to these statutes, Agency stewardship of the Exchange Visitor Program requires that the *bona fides* of an exchange visitor's academic studies be ascertained.

In order to quantify *bona fide* academic study and enhance Agency administration and oversight of the Exchange Visitor Program, definition of the term "accredited educational institution" is proposed. The Agency proposed to (i) define the *bona fides* of an educational institution by way of its accreditation status; and (ii) define the *bona fides* of student status in terms of attendance at an accredited educational institution and successful completion of the minimum number of academic credits per semester which best evidences full-time study.

It is Agency opinion and belief that accreditation is an objective and independent measurement of the *bona fides* of an "established school or institution of learning." Evidence of Agency policy and practice regarding accreditation is set forth at the current 22 CFR 514.15. This regulation authorizes the Agency to require evidence of accreditation from applicants seeking sponsor designation under the Exchange Visitor Program. The absence of a specific definition concerning accreditation was, in part, the basis of recent litigation. This litigation arose due to an Agency determination that a non-accredited educational institution was not an appropriate sponsor within the purview of the Exchange Visitor Program. Although the Agency prevailed in this litigation, the Agency now desires to amend existing regulations explicitly to enunciate the Agency's accreditation policy.

Recognizing that the expertise for determining accredited educational institutions lies with various independent accrediting authorities, the proposed Agency definition makes provision for the use of such findings on accreditation made by these independent authorities. Specifically, in review of the *bona fide* status of a post-secondary educational institution, the Agency proposes to utilize the annual listing of accreditation authorities promulgated by the Secretary of Education pursuant to 20 U.S.C. 1141(a). As explained in 34 CFR 602.1, accreditation is both a prerequisite to eligibility for various types of Federal financial assistance and a reliable measure concerning the quality of education offered by an educational institution. Agency use of such annual listing is also appropriate given the Department of Education's expertise and responsibility for oversight and implementation of Federal education initiatives. Pursuant to the proposed definition, post-secondary academic study completed at a non-accredited educational institution will not be deemed to comply with the *bona fide* requirement set forth in 8 U.S.C. 1101(a)(15)(J).

The proposed regulations set forth the requirement that exchange visitor students possess sufficient proficiency in the English language to enable them to participate in their program or are provided English language training. In addition, exchange visitor students are required to take a full course of study at a post-secondary accredited educational institution as such terms are defined in this Part. Pursuant to exceptions to this requirement set forth at § 514.23(f), provision has been made to ensure that students may maintain their status in the event of sickness or academic difficulties.

Recognizing the importance of academic training, the Agency proposes liberal regulations governing the pursuit of such opportunities. Such training may include internships, practicums, and cooperative educational programs. It may occur before graduation, after graduation, or a combination of both when the requirements set forth in § 514.23(g) are satisfied. Academic training may be as long as the period of the classroom instruction at the accredited educational institution, but shall not exceed a total of 18 months for any exchange visitor student. The Agency strongly supports training for college and university students but will require that it be an integral or critical part of the exchange visitor's academic program.

The Agency proposes that academic training be allowed for exchange visitor students when the exchange visitor: (1) Has been a student in the exchange visitor program for the preceding nine months; (2) is participating in academic training that is directly related to his or her major field of study; (3) is in good academic standing with the post-secondary accredited educational institution; (4) will adhere to the period of time permitted for academic training; (5) receives approval in advance and in writing by the responsible officer for the duration and type of training; and (6) satisfies the other requirements set forth in these regulations.

When students do not receive compensation for services when they participate in academic training during their studies, the requirements set forth in § 514.23(g) are not applicable. In this situation, the student needs only to obtain approval for such training by the academic dean or advisor and the responsible officer.

The Agency recognizes the benefits of exchange visitor students working while studying. At the same time, the Agency recognizes the importance of students completing their studies in a timely manner. The proposed regulations allow exchange visitor students to engage in part-time employment when it is approved by the responsible officer and is (1) pursuant to a scholarship, fellowship, or assistantship, or (2) necessary because of serious, urgent, and unforeseen economic circumstances which have arisen since acquiring the exchange visitor status. The regulations require that the exchange visitor student is in good academic standing and continues to comply with the full course of study requirement. Exchange visitor students shall be permitted to be employed no more than 20 hours per week, except during official school breaks and summer vacations.

A number of sponsors and other interested parties have asked the Agency to increase the maximum duration of training for Ph.D. graduates for 18 to 36 months. The rationale for such requests has been that these students need the time to complete their post-doctoral research. The Agency views academic training for exchange students as an opportunity for exposure or introduction to their profession or field of study. Foreign students often spend four to eight years or longer in the United States to complete their studies. The Agency believes the advantage of foreign students returning home to share their experiences and to contribute to their country home overrides the benefit of academic training longer than 18 months. As discussed in § 514.41, below, post-doctoral students may, in unusual or exceptional circumstances, petition

the Agency for a change of category to research scholar.

Section 514.24 Teachers

Although teacher exchanges are a vital component of the Exchange Visitor Program, regulations governing such exchanges have never been promulgated. The Agency seeks to correct this programmatic inconsistency by herein proposing regulations designed specifically to provide guidance to sponsors of such teacher exchanges.

The proposed regulations define at teacher as an individual teaching full-time in a primary or secondary accredited educational institution. As for primary and secondary schools, accredited educational institution is defined as any publicly or privately operated primary or secondary institution of learning duly recognized and declared as such by the appropriate authority of the state in which the institution is located. Teachers at the post-secondary level are under the category of professors, rather than teachers.

In deciding whether to include a teacher as a participant in its program, the sponsor shall consider the purpose for which the foreign national is visiting the United States. It is appropriate for a teacher to come to the United States as an exchange visitor teacher if (a) the individual will teach full-time at a primary or secondary accredited educational institution, and (b) the objective of the program is to promote the purpose of the Exchange Visitor Program. The proposed regulations require that the appointment of teachers be temporary and not involve permanent or long-term employment. This requirement is consistent with the intent that the exchange visitors return home after their program to share their experience with those in their country. The teaching position shall be also in compliance with any applicable collective bargaining agreement, where one exists.

As stated previously, the teacher category is reserved for primary and secondary teachers who come to the United States to teach full-time. The Agency wants to encourage educational administrators, curriculum developers, and other educational specialists at the primary and secondary level to participate in exchange visitor programs. The Agency intends that the latter group participate in exchange visitor programs under the specialist or government category, depending on who is sponsoring and selecting the exchange visitors.

Section 514.25 Secondary Students

Secondary school student exchanges are designed to afford students an opportunity to study in the United States for up to one year while living with an American host family. Such exchanges provide secondary school students an in-depth and broad exposure to American ideas and institutions through immersion in the everyday aspects of living and attending school in the United States.

Secondary school student exchange programs have been a part of United States public diplomacy efforts since 1949. Expanding from a small base of non-profit organizations dedicated to student exchange, the Agency currently designates sixty-two organizations to conduct such exchanges. Secondary student programs vary in size from 50 to 4,000 participants. In 1990, Agency-designated sponsors facilitated the entry of 24,552 secondary school students, accounting for approximately fifteen percent of all exchanges conducted under the aegis of the Exchange Visitor Program. Although generally viewed as a highly successful category of exchange activity, some secondary school student exchanges encounter problems which are best addressed through regulation.

Over the years concerns have arisen regarding the administration and operation of secondary school exchange programs. In 1982, the Agency awarded a grant to the Council of Chief State School Officers to conduct a study of such exchange activity and to make recommendations concerning possible areas of improvement. From this study sprang the impetus for the formation of the Council for Standards in International Education Travel (CSIET). Devoted to the establishment of standards to govern organizations conducting educational international travel and exchanges, CSIET evaluates such organizations seeking CSIET endorsement on the basis of their compliance with none performance standards. The Agency considers these nine standards to be appropriate guideposts for organizations engaged in international educational travel in that such standards are a distillation of current Agency regulations governing secondary school student exchanges. The proposed regulations set forth below continue to incorporate these standards but also impose additional requirements that are unique to exchange programs.

Part of an all-encompassing regulatory reform effort, the revision of regulations governing secondary school exchanges comes at an opportune moment. Nationwide, states and local school districts are beginning to devote considerable attention to the enrollment of non-resident foreign students in their schools. Although not all foreign students enrolled in local schools are participating in an exchange program, the perception of the general public is that all such students are, in fact, exchange students. Given this perception, the Agency is determined to ensure the highest possible standards for those exchanges under its auspices.

In response to egregious experiences related to the enrollment of non-resident foreign students, state and local school authorities have begun to enact various rules and regulations governing such enrollments. This piecemeal legislation is creating a patchwork of administrative requirements which hamper the ability of Agency-designated sponsors to facilitate secondary student exchanges. The Agency is concerned about this development and is devoted to achieving an overall strengthening of regulations and monitoring of program administration in an effort to forestall any further piecemeal legislation.

Program Administration

Mindful of the unique program considerations inherent to secondary school student exchanges, the Agency seeks to delineate clearly the obligations and responsibilities program sponsors must meet in administering such exchanges. Student participants are placed in a vulnerable position, far from home at a tender age. Due to this position, students are dependent upon program sponsors whose integrity, expertise, and professionalism must be above reproach.

Apparent to all observers is the fiduciary duty a sponsor owes to a student exchange participant. Such duty necessarily requires the sponsor to undertake responsibility for all aspects of the student participant's stay in the United States from the selection of a suitable host family and enrollment in a secondary school through on-going monitoring of the exchange and the student's return to the home country. To meet this duty satisfactorily the Agency concludes that an adequately trained and supervised staff, including agents or volunteers acting on the sponsor's behalf, is of paramount importance to secondary school exchange programs. The Agency therefore proposes, pursuant to the provisions of § 514.25(d) that sponsors properly train and supervise all staff members and volunteers acting on their behalf.

Working with adequately trained and supervised staff and volunteers, the Agency proposes that all sponsors

maintain a monthly schedule of personal contact with the student, school, and host family. The Agency contemplates that this degree of contact will provide adequate assurance that the student is successfully adapting to his or her new home and school environment. This proposed monthly schedule of contact is a minimum. Sponsors will be expected to increase the level of contact with the student, school, and host family when adjustment problems so dictate.

To ensure that all students are properly supervised, the Agency proposes a new requirement that program sponsors arrange no host family placement outside a 150 mile radius of the home of an organizational representative authorized to act on the sponsor's behalf in both routine and emergency matters. A geographical limitation is proposed to enhance the sponsor's ability to maintain the proposed level of contact. This geographical limitation is a maximum. If staff members or volunteers are unavailable in a given geographic location, the sponsor must necessarily refrain from placing a student in such location.

Student Selection, Enrollment, and Orientation

Considerable debate surrounds the selection criteria for student participants. Currently, students must be between the ages of 15 and 19 years of age, be capable of functioning in an English speaking environment and must demonstrate maturity, good character, and scholastic aptitude. These criteria were developed to ensure that foreign exchange students entering United States schools could benefit from the exchange experience and provide a meaningful contribution to the educational experience of their American counterparts. Such criteria are by nature somewhat subjective but do provide general guidance to both sponsors and local school officials. The Agency has determined that modification of these selection criteria is needed.

8 U.S.C. 1101(a)(15)(J) provides, in part, that an exchange visitor may enter the United States under the aegis of a J visa if such visitor is a *bona fide* student actively engaged in *bona fide* academic study. Pursuant to this statute, Agency stewardship of the Exchange Visitor Program requires that the bona fides of an exchange visitor's academic studies be ascertained. The Agency concludes, in light of this statutory requirement, that a modification of the maximum age for participation in a secondary school student exchange program is required.

The Agency is obligated to utilize the United States standard of 12 years of primary and secondary school study in assessing *bona fide* student status. Students who have completed not more than eleven years of primary and secondary study will be deemed, automatically, *bona fide* secondary school students. Attendance in kindergarten should be excluded for the purpose of calculating years of study under this 12 year standard. This standard is of limited importance except to those students who continue their studies into A-level or international baccalaureate programs or their equivalent. Students who complete this additional level of study are, in academic terms, the equivalent of United States college and university students.

Students intending to continue their studies in an A-level or international baccalaureate program may participate in a secondary school student exchange program prior to their enrollment in A-level or international baccalaureate studies. Such students will not have completed 12 years of study as determined by United States standards and would therefore be appropriately placed with their United States peers at the senior year of high school level.

After consultation with Agency-designated sponsors, and in an effort to accommodate potential secondary school student exchange participants who have completed international baccalaureate or A-level studies, the Agency has determined that *bona fide* secondary school student status should also be extended to participants who are not more than 18 and a half years of age at the time of enrollment in a United States secondary school.

It has come to the Agency's attention that some students have returned to the United States in an exchange program for a second year of study. The Agency concludes that this is an inappropriate practice which must be curtailed. Current regulations limit secondary school exchanges to no more than one year. The proposed regulations continue this limitation. To this end, the Agency proposes at § 514.25(e), below, that sponsors specifically inquire whether a potential exchange student has previously participated in a secondary school exchange program and disqualify for further participation any student who has.

Provisions governing the enrollment in United States schools of selected student participants are set forth at § 514.25(f). The Agency proposes to safeguard this program's integrity and good reputation among school administrators by continuing to require the prior written acceptance of the student by an appropriate school official. Each September the Agency is contacted by local school principals who have been surprised to find an unannounced exchange student on the school's doorstep. Given the administrative burden and inconvenience which accompanies unanticipated arrivals, the Agency will henceforth strictly enforce the regulatory requirement that all students be authorized for school enrollment prior to their entry into the United States.

As a policy matter, the Agency seeks to ensure that all exchange participants are properly and timely informed of matters germane to their exchange experience. Pursuant to § 514.25(g) set forth below, the Agency proposes that secondary student exchange sponsors provide all participants with advance notice of travel, school, community, and host family arrangements. This information must be provided well enough in advance of the student's departure from the home country to be of use to the student. Additionally, the student must be apprised of all operating procedures, rules, and regulations governing participation in the exchange program.

Host Family Selection, Placement, and Orientation

The Agency has considered, at some length, the recurrent problems associated with host family placements. Aware that tensions will develop naturally from the obligations which arise from serving as a host, the Agency seeks to introduce some measure of uniformity to host family selections. Specific provisions governing host family selection are set forth at § 514.24(j), below.

First and foremost among such proposed selection criteria is the need to ascertain that potential host families fully understand both the rewards of hosting an international student as well as the duties and obligations attendant thereto. To this end, the Agency proposes that sponsors utilize a standard application form which solicits a detailed profile of the family and conduct an in-person interview with all family members residing in the home. In-person interviews will allow the sponsor to determine whether the potential host family is capable of providing a comfortable and nurturing home environment and that the decision to serve as a host family is one which is supported by all family members.

Due to the vulnerable position in which a student is placed by the nature of these exchanges, sponsors will be expected to undertake appropriate safeguards to ensure that the potential host family is of good reputation and character. Recognizing that one incident of abuse is beyond the pale of acceptability, the Agency must insist that sponsors exercise due diligence in the screening of all potential host families. A mere superficial compliance with this regulatory requirement will not be tolerated. Recommendations from members of the community as well as solicitation of the local school official's opinion of the potential host family may be considered a bare minimum in this regard. In similar fashion, sponsors must also satisfy themselves that the potential host family possess adequate financial resources to undertake hosting obligations.

Having adequately screened the potential host family, sponsors will in turn be expected to properly orient the family concerning the exchange activity. Host families must be fully informed of the sponsor's rules and regulations which govern the exchange program and be provided with a copy of Agency promulgated Exchange Visitor Program regulations. In addition to these requirements, the Agency proposes, pursuant to § 514.25(k) below, that sponsors conduct orientation workshops designed to familiarize the host family with cultural differences and practices as well as strategies for effective cross-cultural interaction.

Finally, the Agency has concluded that the quality and integrity of secondary school student exchanges are best safeguarded by requiring sponsors to secure a host family placement for a student participant prior to his or her departure from the home country. This requirement, set forth at § 514.25(l), below, when coupled with the requirement of advance written acceptance by local school officials will remove any uncertainly from the parameters of the student's exchange.

The Agency has been advised by sponsors that host family placements are always made before the student arrives in the United States. Without debating the veracity of this statement, the Agency concludes that a mechanism to ensure that such placements have been made in timely fashion is required.

To ensure that such host family placements, as well as school placements, have been made the Agency proposes that sponsors submit to the Agency, by August 1st of each school year a listing of student participants, their school and host family placement. This requirement is proposed in lieu of listing the name and address of the host family and school placement on the Form IAP–66 and embodies the suggestions of various exchange sponsors. The Agency concludes that such a listing will provide the desired certainty in respect to the parameters of each individual exchange but will also allow sponsors to continue their administrative process as long as possible.

Section 514.25 Specialists

Exchanges of American and foreign specialists exemplify the reciprocal exchanges of persons that the Fulbright-Hays Act seeks to promote. These exchanges have resulted in a flow of specialists between the United States and other countries, and have contributed to the growth of mutual understanding and dissemination of knowledge that is at the heart of the Exchange Visitor Program. Such exchanges are primarily nonacademic and provide opportunities to increase the interchange of knowledge and ideas between American and foreign specialists, and promote improved professional relationships and communications.

Although specialists have played an important role in the Exchange Visitor Program, regulations which specifically address this category of exchange visitor participation have never been promulgated. The Agency is herein proposing regulations which are designed specifically to provide this guidance to sponsors and to clarify the relationship between sponsors, the Agency, and exchange visitors.

Specialists may be appropriately sponsored as an exchange participant if the underlying purpose of such exchange is to stimulate international collaboration between individuals in the professions, businesses, and government. The proposed regulations require that the appointment of a specialist be temporary and not involve permanent or long-term employment.

Section 514.27 Alien Physicians

Federal law requires that foreign physicians seeking to pursue graduate medical education or training in the United States must do so on a J visa. This centralization of authority for the admission of such clients is due, in part, to past concerns regarding the academic and medical qualifications of foreign trained physicians. Since 1971, the Educational Commission for Foreign Medical Graduates ("ECFMG") has administered the issuance of Form IAP–66 for foreign medical graduates coming to the United States to pursue graduate medical education or training.

Foreign physicians must successfully complete examinations administered by ECFMG which measure their command of medical sciences. Such exam was, until 1983, the Visa Qualifying Examination. Currently, the required exam is Parts I and II of the National Board of Medical Examiners Examination. The National Board of Medical Examiners plan, however, to adopt as of January 1993 a new examination, the United States Medical Licensure Examination Steps I, II, and III. In light of this impending change the proposed regulations require an alien physician participant to successfully pass this examination.

The remaining proposed regulations reflect past practice regarding administration of these exchanges. A statement of need from the participant's home country and an annual statement executed by the participant reflecting intent to return to the home country remain in place.

Section 514.28 International Visitors

The Agency proposes that the category of international visitors be for its exclusive use. Sponsors other than the Agency will have comparable categories to use for short-term exchanges as discussed below. In the proposed regulations, international visitors programs are for foreign nationals who are recognized or potential leaders and are selected by the Agency to participate in observation tours, discussions, consultations, professional meetings, conferences, workshops, and travel.

The international visitors category is for people-to-people programs which seek to develop and strengthen professional and personal ties between key foreign nationals, Americans, and American institutions. The Agency proposes to continue the general limitation of participation for international visitors to one year. Such exchanges are intended specifically for short-term exchanges.

The Agency encourages the private sector and other government agencies to sponsor similar types of short-term exchange programs. The active participation of all parties is critical to the development and success of short-term exchange programs. In the proposed regulations, the Agency sets forth the categories of short-term scholar and specialist, especially for the private sector, and government visitors for exchangees selected by U.S. federal, state, and local government agencies.

Section 514.29 Government Visitors

The Agency is proposing to create the government visitors category to encourage U.S. federal, state, and local government agencies to expand their role in the Exchange Visitor Program. Currently, a number of government agencies are designated sponsors of the Exchange Visitor Program. The Agency intends that government sponsors continue to use a variety of categories for their exchange visitors, including the category of government visitors.

For the purpose of this section, government agencies include such entities as U.S. federal, state, and local government agencies (e.g., federal agency or commission, a state department of education, county government, incorporated city, and local school district). A government agency as used in this category does include an international organization of which the U.S. is a member by treaty or statute. However, a government agency as used in this section does not include state colleges or universities, unless such programs are sponsored by their state department of education.

The Agency is proposing that foreign nationals be eligible for a government visitors program when they meet the following three criteria. They shall be (a) selected by a U.S. federal, state, or local government agency, (b) engaged in consultation, observation, training, or demonstration of special skills, and (c) an influential or distinguished person. Under this category, exchange visitors would be eligible to participate in such activities as observation tours, discussions, consultations, professional meetings, conferences, workshops, and travel.

Government visitors programs are people-to-people programs designed to enable government visitors to better understand American culture and society, and to contribute to enhanced American knowledge of foreign cultures. The objective of government visitors programs is to develop and strengthen professional and personal ties between key foreign nationals and Americans and American institutions. These programs are for such persons as editors, business and professional persons, government officials, and labor leaders. This category is for programs of up to 18 months in duration.

Section 514.30 Camp Counselors

As discussed in Subpart A above, the Agency has determined that camp counselor programs are an appropriate addition to the matrix of exchange activities conducted under the Exchange Visitor Program. Such exchanges have a long history and have provided thousands of foreign nationals the opportunity to observe the United States and its people through their employment with domestic summer camp facilities.

Although the Agency has traditionally viewed these exchanges as a youth activity, upon review it appears appropriate to expand permissible participants to include *bona fide* youth workers and individuals demonstrating special skills. The Agency proposes that all participants be at least eighteen years of age and have not previously participated more than once in a camp counselor exchange. This latter requirement is proposed in an effort to ensure that as many persons as possible are recruited for these exchanges and that the participants are not utilized for staffing purposes inconsistent with exchange objectives.

Sponsors must conduct in-person interviews with all potential participants and secure references regarding the participant's suitability for a camp placement. Most importantly, sponsors must under no circumstance facilitate the entry of a participant for whom no camp placement has been arranged. The very nature of an exchange requires a prearranged placement. Recruitment of individuals and their "warehousing" in hotels awaiting placement arising from staff shortages is not viewed as an acceptable practice by the Agency. To ensure that placements are arranged in advance a placement report, reflecting the participant's name and placement, must be submitted to the Agency no later than July 1st of each program year.

Subpart C: Status of Exchange Visitors

Regulations proposed in this subpart govern various administrative chores relating to an exchange participant's visa status. At § 514.40, the Agency proposes criteria for termination of a program participant's exchange visitor status. This regulation directs the sponsor to terminate a participant for failure to maintain insurance coverage. Such provision is necessary to prompt compliance with the proposed insurance requirements. Sponsors may terminate an exchange participant for serious violation of sponsor program guidelines and directives. Sponsors shall terminate a participant due to his or her failure to pursue the activities for which sponsored.

At § 514.41 the Agency proposes regulations governing changes to a visitor's category of participation. Few participants request a change in their category of participation and the Agency has generally discouraged such action as a program matter. Recognizing that a change of category may often benefit both the participant and the Exchange Visitor Program, the Agency proposes that requests for such change be submitted to the Agency for approval. The Agency intends to approve only those requests which are due to unusual or exceptional circumstances. A change in category must be clearly consistent and closely related to the participant's original exchange objective. By way of illustration, a Ph.D. student participant may, upon a showing of unusual and exceptional circumstance, change to the research scholar category.

In an effort to simplify the visa status requirements for exchange participants, the Agency proposes that transfer of program transactions be facilitated by the sponsors involved without INS adjudication or Agency review. As set forth at § 514.42 sponsors seeking to facilitate a change of program for an exchange participant shall secure the participant's release from the original sponsor and notify the Agency by submitting a duly executed Form IAP–66 reflecting such transfer. In similar fashion, the mechanics of extending a participant's program have also been simplified.

The Agency proposes that sponsors extend a participant's program by executing a new Form IAP–66 which reflects the new program termination date. INS adjudication of this extension will not be required so long as the extension does not exceed the categorical duration of participation limitation. As illustration, a sponsor may extend a research participant's program, one year at a time, so long as the three year category limitation on research scholar programs is not exceeded. As set forth in § 514.43, the sponsor shall notify the Agency of this action by forwarding a duly executed Form IAP–66 reflecting such extension. In those circumstances in which an extension past the categorical duration of participation is sought, Agency approval in INS adjudication will be required.

Finally, the provisions governing application of the two-year home-country physical presence requirement are set forth at § 514.44. This long-standing program requirement is applicable to participants for whom government financing of the exchange was made or who have acquired skills for which there is a need in their home country. The Agency has developed, in cooperation with foreign governments, a listing of such skills. This "skills list" may be found at 49 FR 24194, *et seq.* (June 12, 1984). Revision of the skills list

will begin in the near future. Waiver of the two-year home country requirement is possible and provisions governing such waiver requests are also set forth in this regulation. Provisions addressing waiver procedures as well as the composition and functions of a Waiver Review Board are also set forth.

Subpart D: Sanctions

The Agency first promulgated regulations providing for sanctions for violations of the exchange Visitor Program regulations in 1978. The regulations were expanded in 1978 to provide additional procedural due process rights of those threatened with suspension or revocation for violations of the Exchange Visitor Program Designation Suspension and Revocation Board ("the Board").

That the Board has had to be convened only once since 1987 to hear a revocation case speaks highly of the thousands of institutions which have been designated over the years as exchange visitor program sponsors. Nevertheless, the Agency has long been hamstrung in its oversight of the Exchange Visitor Program by the absence of regulations providing for sanctions of less severity than suspension or revocation. As part of the overall regulatory reform of the Exchange Visitor Program, the Agency believes that the sanctions regulations need, on the one hand, to be strengthened so as to provide violations of the Exchange visitor Program regulations and, on the other hand, to provide the sponsors with clearly defined procedural due process rights. This will improve the Agency's managerial oversight and allow the Agency to move rapidly against a sponsor whose acts or omissions endanger the health, safety or welfare of a program participant.

As is true of all the Exchange Visitor Program regulations, the ultimate goals of the sanctions regulations are to further the foreign policy interest of the United States and to protect the health, safety and welfare of Exchange Visitor Program participants. A violation of the regulations may result in both of those goals being frustrated. For example, a secondary school student exchange program sponsor that willfully or negligently allows a teenage exchangee to come to the U.S. without first having placed the exchangee with a host family, or that fails to confirm transportation arrangements for the exchangee, may have endangered that teenager's health, safety and/or welfare. Should a teenager be injured in an accident or as a victim of a crime, it is not only a personal tragedy, but there well may be adverse foreign policy effects arising from the incident.

To hypothesize another situation, if a sponsor fails to ensure that a participant in an exchange visitor training program is covered by health and accident insurance, and the trainee is injured in the course of his or her training and requires extensive medical treatment for which the trainee is unable to pay, then not only does the health care provider suffer financially but the reputation of the Exchange Visitor Program suffers as well. Indeed, resulting claims made by the health care provider may well have adverse foreign policy effects.

Clearly, not all violations of the Exchange Visitor Program regulations are of equal gravity. The proposed regulations recognize that violations of the regulations range over a spectrum from, for example, an inadvertent, negligent failure to comply with a program reporting requirement, at one end of the spectrum, to a willful act endangering the health or safety of a program participant, at the other end of the spectrum. Recognition of this spectrum of violations is reflected in the various sanctions provided for in the proposed regulations. Like the spectrum of violations, the sanctions also cover a spectrum, ranging from "lesser sanctions" for less serious violations to revocation for the most serious violations. The proposed regulations provide procedural due process safeguards at each level of sanctioning. The sanctions fall into four categories.

1. Lesser Sanctions

For minor violations of the regulations, which interfere with the Agency's proper administration of the Exchange Visitor Program but do not rise to the level of endangering the health, safety or welfare of program participants or of bringing the Program or the Agency into notoriety or disrepute, the proposed regulations provide for the imposition of sanctions of less severity than suspension or revocation. Examples of such violations may include, but are not limited to, the following: Failure to timely provide the Agency with an annual report; failure to provide the Agency with specially requested information to which it is entitled under the regulations; failure to adequately safeguard Forms IAP–66; negligent misrepresentations made by a sponsor in its promotional literature. The proposed regulations provide that, with respect to such violations of the regulations, the Agency may, in its discretion, impose any or all of the following sanctions: A letter of reprimand, warning that repeated or persistent violations of the regulations may result in a suspension or revocation of the sponsor's designation, or a directive to the sponsors that it must reduce the scope of its exchange programs numerically, geographically, or in terms of the types of exchange programs it offers.

Upon being given notice that the agency is imposing such a sanction, the sponsor has the opportunity to submit to the Agency any arguments in explanation or mitigation of the alleged violation. The sponsor may request a conference to discuss its submission. However, the Agency is not required to grant such a conference. The Exchange Visitor Program Office, upon its review of such submission may, in its discretion, modify, withdraw, or continue the imposition of the sanctions.

2. Suspension

The proposed regulations provide that in all suspension actions, other than the summary suspension, the sponsor is given notice in writing that the Agency intends to suspend the sponsor's designation for a period not to exceed one hundred twenty (120) days, specifying the grounds for the suspension. Before the suspension takes effect, the sponsor has an opportunity to submit a response to the Agency, setting forth any reason as to why the Agency should not suspend, and may include any documentary evidence or affidavits in support thereof. After the Agency reviews the sponsor's submission, it notifies the sponsor of its decision on whether or not to effect the suspension. If the decision is to effect the suspension and of its right to a formal hearing before the Board.

The proposed regulations also set forth the sponsor's procedural rights before the Board. The key difference between the "summary suspension" and all other suspension proceedings is that in the former the suspension takes effect immediately upon notice being given to the sponsor, whereas in the latter the suspension does not take effect until the Board decides to effect the suspension after the completion of the appeal and hearing.

3. Summary Suspension

Current regulations provide for a form of summary suspension. 22 CFR 514.17(b). However, the current regulations require the Agency to give the sponsor at least ten days notice that it intends to suspend the designation. The suspension does not take effect until the Office of General Counsel considers and takes into account any response submitted by the sponsor. If the Office of General Counsel decides to

effect the suspension, then the sponsor may appeal to the Board, which must make a decision within ten working days from receipt of the appeal. Thus, the summary suspension is summary in name only; the process, even in the best of circumstances, is lengthy. The health, safety or welfare of a program participant might already have been endangered. Under current regulations the Agency is virtually powerless to act in a prompt and decisive manner.

In order to remedy this deficiency, the proposed regulations provide for a true summary suspension which empowers the Agency to send a sponsor a written notice of the Agency's intent to suspend the sponsor's designation for up to sixty (60) days. Prior to the suspension becoming effective, however, the sponsor has a right to submit a protest to the Agency setting forth any reason why its designation should not be suspended. The Agency will review the protest and decide whether or not to effect the suspension. If the decision is made to effect the suspension the sponsor may appeal the suspension to the Board. However, the suspension is not stayed during the pendency of the appeal.

The summary suspension, as is set forth in the proposed regulation, is to be used only in the most serious situations where the sponsor's acts of omission or commission could have the effect of endangering the health, safety or welfare of an exchange visitor program participant and the Agency deems that immediate action is necessary.

4. Revocation

For serious willful violations of the Exchange Visitor Program regulations or for the omission or commission or an act which has or could have the effect of endangering the health, safety or welfare of an exchange visitor, where the Agency concludes that a continuation of the sponsor's designation is detrimental to the Exchange Visitor Program a revocation of the sponsor's designation may be the most appropriate sanction. Revocation is also the only realistic sanction to impose on the sponsor who willfully or through gross negligence repeatedly violates the regulations and takes no meaningful steps to bring itself into compliance.

Whereas the current regulations require that revocation must be preceded by suspension, the proposed regulations eliminates that requirement. Revocation commences with the Agency giving the sponsor not less than thirty days notice in writing, specifying the grounds for such revocation and the effective date of the revocation. The grounds for the revocation shall be stated in the notice, and before the revocation may take effect the sponsor has an opportunity to submit a response to the Agency providing any information in explanation or mitigation of the violations charged.

Upon receipt of such submission, the Agency will review same and notify the sponsor, in writing, of its decision. The sponsor is also notified of its right to appeal the revocation and of its right to a formal hearing. Within ten days of its receipt of the notice effecting the revocation, the sponsor may file its appeal with the Board. The filing of the notice of appeal serves to stay the revocation pending the appeal. The proposed regulation set forth the procedural rights accorded the sponsor at the hearing before the board.

5. Denial of Application for Redesignation

Current regulations make no provision for an appeal by an applicant in those cases where the Agency denies approval of an application for designation of an exchange visitor program. The proposed regulation creates a right of appeal for the applicant whose application is denied by the Office of Exchange Visitor Program Services and gives to that applicant the same procedural due process protections as are granted to sponsors against whom sanctions are imposed.

The proposed regulations also set forth the composition of the Board, which remains the same as under current regulations and set forth in detail the powers of the Board in conducting hearings under this subpart.

Sponsors should also be aware that certain sanctions, other than those set forth in this section of the regulations, may be available. For example, 18 U.S.C. 10001 makes it a crime to knowingly and willingly make any false, fictitious or fraudulent statements or representations in any matter within the jurisdiction of any Agency of the United States.

Implementation Schedule

The Agency recognizes the impact of a major regulatory revision upon program sponsors. Accordingly, informed comment regarding implementation of these regulations is specifically requested.

The Agency anticipates that implementation upon promulgation of a final rule will not result in substantial disruption of sponsor operations. Provisions governing insurance requirements, however, may prove problematic. For this reason the Agency proposes that insurance requirements need not be met until the start of the 93–94 academic year.

Public Comment

The Agency is inviting comments from the public on the proposed regulations notwithstanding that it is under no legal requirement to do so. The designation of exchange visitor sponsors and administration of the Exchange Visitor Program are a foreign affairs function. The Administrative Procedure Act, 5 U.S.C. 553(a)(1) (1989), specifically exempts form application of the Act a "foreign affairs function of the United States."

In the interest of preserving its valuable working relationship with the exchange community, the Agency is providing a sixty-day period for written comments on the proposed regulations. In order to expedite review of the comments the Agency requests that interested parties submit five copies of their comments.

The Agency informally circulated a prior draft of the proposed regulations to some members of the exchange community and received informal comments in response. The Agency reviewed those comments and incorporated suggestions into these proposed regulations. If these parties wish further consideration of their position, or wish to influence the outcome of the final rule, they must submit written comments to the Agency in response to this proposal.

The information collection requirement contained in this regulation will be submitted to the Office of Management and Budget (OMB) for review and approval under the provision of the Paperwork Reduction Act.

In accordance with 5 U.S.C. 605(b), the Agency certifies that this rule does not have a significant adverse economic impact on a substantial number of small entities. This rule is not considered to be a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have Federalism implications warranting the preparation of a Federalism Assessment in accordance with Executive Order 12612.

The reporting and regulatory requirement associated with this rule is being submitted to the Office of Management and Budget for approval in accordance with 44 U.S.C. chapter 35. The Agency has previously sought, and OMB has cleared, a portion of the reporting requirements set forth in this proposed rule, specifically those related to Forms IAP–66 (15 minutes), IAP–37 (1 hour) and IAP–87 (20 minutes per respondent). It is estimated that an additional one-time reporting

requirement will be imposed upon the currently designated 1,200 sponsors regarding their proposed obligation to seek redesignation. This burden will be approximately one hour per sponsor. Further, an annual reporting requirement regarding program activity will result in an estimated 30 minutes burden per sponsor.

Comments on this matter should be submitted to both the Agency and OMB and addressed as follows:

Office of Management and Budget, New Executive Office Building, room 3228, Washington, DC 20503, Attn: USIA Desk Officer.

United States Information Agency, Office of the General Counsel, 301 4th St., SW., room 700, Washington, DC 20547, Attn: Stanley S. Colvin.

List of Subjects in 22 CFR Part 514

Cultural Exchange Programs.

Alberto J. Mora,

General Counsel.

Accordingly, 22 CFR part 514 is revised to read as follows:

PART 514—EXCHANGE VISITOR PROGRAM

Subpart A—General Provisions

Sec.

514.1 Purpose.
514.2 Definitions.
514.3 Sponsor Eligibility.
514.4 Categories of Participant Eligibility.
514.5 Application Procedure.
514.6 Designation.
514.7 Redesignation.
514.8 General Program Requirements.
514.9 General Obligations of Sponsors.
514.10 Program Administration.
514.11 Duties of Responsible Officers.
514.12 Control of Forms IAP–66.
514.13 Notification Requirements.
514.14 Insurance.
514.15 Annual Reports.
514.16 Employment.
514.17 Fees and Charges [Reserved].

Subpart B—Specific Program Provisions

514.20 Professors and Research Scholars.
514.21 Short-term Scholars.
514.22 Trainees.
514.23 College and University Students.
514.24 Teachers.
514.25 Secondary School Students.
514.26 Specialists.
514.27 Alien Physicians.
514.28 International Visitors.
514.29 Government Visitors.
514.30 Camp Counselors.

Subpart C—Status of Exchange Visitors

514.40 Termination of Exchange Visitor Status.
514.41 Change of Category.
514.42 Transfer of Program.
514.43 Extension of Program.
514.44 Two-Yr. Home-Country Physical Presence Requirement.

Subpart D—Sanctions

514.50 Sanctions.

Subpart E—Termination and Revocation of Programs

514.60 Termination of Designation.
514.61 Revocation.
514.62 Responsibilities of the Sponsor Upon Termination or Revocation.

Appendix A to Part 514—Certification of Responsible Officers and Sponsors.

Appendix B to Part 514—Exchange Visitor Program Services, Exchange Visitor Program Application.

Appendix C to Part 514—Update of Information on Exchange Visitor Program Sponsor.

Appendix D to Part 514—Annual Report.

Appendix E to Part 514—Unskilled Occupations.

Authority: 8 U.S.C. 1101(a)(15)(J), 1182, 1258; 22 U.S.C. 1431–1442, 2451–2460; Reorg. Plan No. 2 of 1977; E.O. 12048 of March 27, 1978; USIA Delegation Order No. 85–5 (50 FR 27393).

Subpart A—General Provisions

§ 514.1 Purpose.

(a) The regulations set forth in this part implement the Mutual Educational and Cultural Exchange Act of 1961 (the "Act"), 22 U.S.C. 2451 (1988). The purpose of the Act is to increase mutual understanding between the people of the United States and the people of other countries by means of educational and cultural exchanges. Educational and cultural exchanges assist the Agency in furthering the foreign policy objectives of the United States. These exchanges are defined by section 102 of the Act and are limited to the activities that are described therein and are in compliance with the Immigration and Nationality Act.

(b) The Director of the United States Information Agency facilitates activities specified in the Act, in part, by designating public and private entities to act as sponsors of the Exchange Visitor Program. The purpose of the Program is to provide foreign nationals with opportunities to participate in educational and cultural programs in the United States and return home to share their experiences, and to encourage Americans to participate in educational and cultural programs in other countries. Exchange visitors enter the United States on a J visa. The regulations set forth in this subpart are applicable to all sponsors.

§ 514.2 Definitions.

Accredited educational institution means any publicly or privately operated primary, secondary, or post-secondary institution of learning duly recognized and declared as such by the appropriate authority of the state in which such institution is located: *provided, however,* That in addition to any state recognition, all post-secondary institutions shall also be accredited by a nationally recognized accrediting agency or association as recognized by the United States Secretary of Education but shall not include any institution whose offered programs are primarily vocational in nature.

Act means the Mutual Educational and Cultural Exchange Act of 1961, as amended.

Agency means the United States Information Agency.

Citizen of the United States means:

(1) An individual who is a citizen or permanent resident of the United States or one of its territories or possessions; or,

(2) A general or limited partnership created or organized under the laws of the United States, or of any State, the District of Columbia, or a territory or possession of the United States, of which a majority of the partners are citizens of the United States; or,

(3) A for-profit corporation, association, or other legal entity created or organized under the laws of the United States, or of any state, the District of Columbia, or a territory or possession of the United States, which:

(i) Has its principal place of business in the United States, and

(ii) Has its shares or voting interests publicly traded on a U.S. stock exchange; or, if its shares or voting interests are not publicly traded on a U.S. stock exchange, it shall nevertheless be deemed to be a citizen of the United States if a majority of its officers, Board of Directors, and its shareholders are citizens of the United States; or,

(4) A non-profit corporation, association, or other legal entity created or organized under the laws of the United States, or any state, the District of Columbia, or territory or possession of the United States, and

(i) Which is qualified with the Internal Revenue Service as a tax-exempt organization pursuant to § 501(c) of the Internal Revenue Code; and

(ii) Which has its principal place of business in the United States; and,

(iii) In which a majority of its officers and a majority of its Board of Directors or other like body vested with its management are citizens of the United States; or,

(5) An accredited college, university, or other post-secondary educational institution created or organized under the laws of the United States, or of any

State, including a county, municipality, or other political subdivision thereof, the District of Columbia, or of a territory or possession of the United States; or,

(6) An agency of the United States, or of any state or local government, the District of Columbia, or a territory or possession of the United States.

Consortium means a not-for-profit corporation or association formed by two or more accredited educational institutions for the purpose of sharing educational resources, conducting research, and/or developing new programs to enrich or expand the opportunities offered by its members.

Country of nationality or last legal residence means either the country of which the exchange visitor was a national at the time status as an exchange visitor was acquired or the last foreign country in which the visitor had a legal permanent residence before acquiring status as an exchange visitor.

Cross-cultural activity is an activity designed to promote exposure and interchange between exchange visitors and Americans so as to increase their understanding of each other's society, culture, and institutions. Examples of such activities are intercultural workshops, receptions for American and foreign faculty, educational field trips, international festivals, international conferences, and local community events. A cross-cultural activity is in addition to the principal activity of the exchange visitor's program (e.g., teaching, lecturing, training, studying, or demonstrating special skills).

Designation means the written authorization given by the Agency to an exchange visitor program applicant to conduct an exchange visitor program as a sponsor.

Director means the Director of the United States Information Agency or an employee of the Agency acting under a delegation of authority from the Director.

Exchange visitor means a foreign national who has been selected by a sponsor to participate in an exchange visitor program and who is seeking to enter or has entered the United States temporarily on a J–1 visa. The term does not include the visitor's immediate family.

Exchange Visitor Program means the international exchange program administered by the Agency to implement the Act by means of educational and cultural programs. When "exchange visitor program" is set forth in lower case, it refers to the individual program of a sponsor which has been designated by the Agency.

Exchange Visitor Program Services means the Agency staff delegated authority by the Director to administer the Exchange Visitor Program in compliance with the regulations set forth in this part.

Exchange visitor's government means the government of the country of the exchange visitor's nationality or the country where the exchange visitor has a legal permanent residence.

Financed directly means financed in whole or in part by the United States Government or the exchange visitor's government with funds contributed directly to the exchange visitor in connection with his or her participation in an exchange visitor program.

Financed indirectly means:

(1) Financed by an international organization, with funds contributed by either the United States or the exchange visitor's government for use in financing international educational and cultural exchanges, or

(2) Financed by an organization or institution with funds made available by either the United States or the exchange visitor's government for the purpose of furthering international educational and cultural exchange.

Form IAP–66 means a Certificate of Eligibility, a controlled document of the Agency.

Full course of study means enrollment in an academic program of classroom participation and study at an accredited educational institution as follows:

(1) Secondary school students shall satisfy the attendance and course requirements of the State in which the school is located;

(2) College and university students shall register for and complete a full course of study, as defined by the accredited educational institution in which the student is registered, unless exempted in accordance with § 514.23(f).

Graduate medical education or training means participation in a program in which the alien physician will receive graduate medical education or training, which generally consists of a residency or fellowship program involving health care services to patients, but does not include participation in a program involving observation, consultation, teaching or research in which there is no element or only incidental elements of patient care. This program may consist of a medical specialty, a directly related medical subspecialty, or both.

Home-country physical presence requirement means the requirement that an exchange visitor who is within the purview of section 212(e) of the Immigration and Nationality Act (substantially quoted in § 514.44) must reside and be physically present in the country of nationality or last legal permanent residence for an aggregate of at least two years following departure from the United States before the exchange visitor is eligible to apply for an immigrant visa or permanent residence, a nonimmigrant H visa as a temporary worker or trainee, or a nonimmigrant L visa as an intracompany transferee, or a nonimmigrant H or L visa as the spouse or minor child of a person who is a temporary worker or trainee or an intracompany transferee.

Immediate family means the alien spouse and minor unmarried children of an exchange visitor who are accompanying or following to join the exchange visitor and who are seeking to enter or have entered the United States temporarily on a J–2 visa or are seeking to acquire or have acquired such status after admission. For the purpose of these regulations, a minor is a person under the age of 21 years old.

J. visa means a non-immigrant visa issued pursuant to 8 U.S.C. 1101(a)(15)(J). A J–1 visa is issued to the exchange visitor. J–2 visas are issued to the exchange visitor's immediate family.

Non-specialty occupation means any occupation that is not a specialty occupation (q.v.). Non-specialty occupations range from unskilled occupations up to and including skilled occupations requiring at least two years training or experience.

On-the-job training means an individual's observation of and participation in given tasks demonstrated by experienced workers for the purpose of acquiring competency in such tasks.

Prescribed course of study means a non-degree academic program with a specific educational objective. Such course of study may include intensive English language training, classroom instruction, research projects, and/or academic training to the extent permitted in § 514.23.

Reciprocity means the participation of a United States citizen in an educational and cultural program in a foreign country in exchange for the participation of a foreign national in the Exchange Visitor Program. Where used herein, "reciprocity" shall be interpreted broadly; unless otherwise specified, reciprocity does not require a one-for-one exchange or that exchange visitors be engaged in the same activity. For example, exchange visitors coming to the United States for training in American banking practices and Americans going abroad to teach foreign nationals public administration would be considered a reciprocal exchange.

when arranged or facilitated by the same sponsor.

Responsible officer means the employee or officer of a designated sponsor who has been listed with the Agency as assuming the responsibilities outlined in § 514.11. The designation of alternate responsible officers is permitted and encouraged. The responsible officer and alternate responsible officers must be United States citizens or permanent residents.

Specialty occupation means an occupation that requires theoretical and practical application of a body of highly specialized knowledge to perform fully in the stated field of endeavor. It requires completion of a specified course of education, where attainment of such knowledge or its equivalent is the minimum competency requirement recognized in the particular field of endeavor in the United States. Some examples of specialized fields of knowledge are public and business administration, agricultural research, architecture, engineering, computer and physical sciences, accounting, and print and broadcast journalism.

Sponsor means a legal entity designated by the Director of the United States Information Agency to conduct an exchange visitor program.

Third party means an individual or organization to whom the sponsor has delegated partial responsibilities to carry out its Exchange Visitor Program obligations and responsibilities.

§ 514.3 Sponsor eligibility.

(a) Entities eligible to apply for designation as a sponsor of an exchange visitor program are:

(1) United States Local, State and Federal government agencies;

(2) International agencies or organizations of which the United States is a member and which have an office in the United States; or

(3) Reputable organizations which are "citizens of the United States," as that term is defined in § 514.2.

(b) To be eligible for designation as a sponsor, an entity is required to:

(1) Demonstrate, to the Agency's satisfaction, its ability to comply and remain in continual compliance with all provisions of part 514; and

(2) Meet at all times its financial obligations and responsibilities attendant to successful sponsorship of its exchange visitor program.

§ 514.4 Categories of participant eligibility.

Sponsors may select foreign nationals to participate in their exchange visitor programs. Participation by foreign nationals in an exchange visitor program is limited to individuals who shall be engaged in the following activities in the United States:

(a) *Student.* An individual who is:

(1) Studying in the United States:

(i) pursuing a full course of study at a secondary accredited educational institution;

(ii) pursuing a full course of study leading to or culminating in the award of a U.S. degree from a post-secondary accredited educational institution; or

(iii) engaged full-time in a prescribed course of study of up to 24 months duration conducted by a post-secondary accredited educational institution;

(2) Engaged in academic training as permitted in § 514.23(g); or

(3) Engaged in English language training at:

(i) a post-secondary accredited educational institution, or

(ii) an institute approved by or acceptable to the post-secondary accredited educational institution where the college or university student is to be enrolled upon completion of the language training.

(b) *Short-term scholar.* A professor, research scholar, or person with similar education or accomplishments coming to the United States on a short-term visit for the purpose of lecturing, observing, consulting, training, or demonstrating special skills at research institutions, museums, libraries, post-secondary accredited educational institutions, or similar types of institutions.

(c) *Trainee.* An individual participating in a structured training program conducted by the selecting sponsor.

(d) *Teacher.* An individual teaching full-time in a primary or secondary accredited educational institution.

(e) *Professor.* An individual primarily teaching, lecturing, observing, or consulting at post-secondary accredited educational institutions, museums, libraries, or similar types of institutions. A professor may also conduct research, unless disallowed by the sponsor.

(f) *Research scholar.* An individual primarily conducting research, observing, or consulting in connection with a research project at research institutions, museums, libraries, post-secondary accredited educational institutions, or similar types of institutions. The research scholar may also teach or lecture, unless disallowed by the sponsor.

(g) *Specialist.* An individual who is an expert in a field of specialized knowledge or skill coming to the Untied States for observing, consulting, or demonstrating special skills.

(h) *Other person of similar description.* An individual of description similar to those set forth in paragraphs (a) through (g) coming to the United States, in a program designated by the Agency under this category, for the purpose of teaching, instructing or lecturing, studying, observing, conducting research, consulting, demonstrating special skills, or receiving training. The programs designated by the Agency in this category consist of:

(1) *International visitor.* An individual who is a recognized or potential leader, selected by the Agency for consultation, observation, research, training, or demonstration of special skills in the United States.

(2) *Government visitor.* An individual who is an influential or distinguished person, selected by a U.S. Federal, State, or local government agency for consultation, observation, training, or demonstration of special skills in the United States.

(3) *Camp counselor.* An individual selected to be a counselor in a summer camp in the United States who imparts skills to American campers and information about his or her country or culture.

§ 514.5 Application procedure.

(a) Any entity meeting the eligibility requirements set forth in § 514.3 may apply to the Agency for designation as a sponsor. Such application shall be made on Form IAP–37 ("Exchange Visitor Program Application") and filed with the Agency's Exchange Visitor Program Services.

(b) The application shall set forth, in detail, the applicant's proposed exchange program activity and shall demonstrate its prospective ability to comply with Exchange Visitor Program regulations.

(c) The applicant must provide:

(1) Evidence of legal status as a corporation, partnership, or other legal entity (e.g., charter, proof of incorporation, partnership agreement, as applicable) and current certificate of good standing;

(2) Evidence of financial responsibility as set forth at § 514.9(e);

(3) Evidence of accreditation if the applicant is a post-secondary educational institution;

(4) Evidence of licensure, if required by local, State, or Federal law, to carry out the activity for which it is to be designated;

(5) A resolution or directive by the applicant's governing body authorizing the application for sponsor designation; and

(6) Certification by the applicant that it and its responsible officer and alternate responsible officers are citizens of the United States as defined

at § 514.2 using the language set forth in appendix A.

(d) The Agency may request any additional information and documentation which its deems necessary to evaluate the application.

(e) An organization seeking designation should allow the Agency no less than six months to process its application for designation.

§ 514.6 Designation.

(a) Upon a favorable determination that the proposed exchange program meets all statutory and regulatory requirements, the Agency may, in its sole discretion, designate an entity meeting the eligibility requirements set forth in § 514.3 as an exchange visitor program sponsor.

(b) Designation shall confer upon the sponsor authority to engage in one or more activities specified in § 514.4. A sponsor shall not engage in activities not specifically authorized in its written designation.

(c) Designations are effective for a period of five years. In its discretion, the Agency may designate programs, including experimental programs, for less than five years.

(d) Designations are not transferable or assignable.

§ 514.7 Redesignation.

(a) Upon expiration of a given designation term, a sponsor may seek redesignation for another five-year term.

(b) To apply for redesignation, a sponsor shall submit to the Exchange Visitor Program Services a letter indicating its desire for redesignation.

(c) Request for redesignation shall be evaluated according to the criteria set forth at § 514.6(a) taking into account the sponsor's annual reports and other documents reflecting its record as an exchange visitor program sponsor.

(d) A sponsor seeking redesignation should apply to the Agency no less than four months prior to the expiration date of its designation.

§ 514.8 General program requirements.

(a) *Size of program.* Sponsors, other than Federal government agencies, shall have no less than five exchange visitors per calendar year.

(b) *Minimum duration of program.* Sponsors, other than federal government agencies, shall provide each exchange visitor, except short-term scholars, with a minimum period of participation in the United States of three weeks.

(c) *Reciprocity.* In the conduct of their exchange programs, sponsors shall make a good faith effort to achieve the fullest possible reciprocity in the exchange of persons.

(d) *Cross-cultural activities.* Sponsors shall offer or make available to exchange visitors cross-cultural activities both at and away from the site where the exchange activities are centered. The extent and types of the cross-cultural activities shall be determined by the needs and interests of the particular category of exchange visitors. Sponsors will be responsible to determine the appropriate type and number of cross-cultural programs for their exchange visitors. The Agency encourages sponsors to give their exchange visitors the broadest exposure to American society, culture and institutions.

§ 514.9 General Obligations of Sponsors.

(a) *Adherence to agency regulations.* Sponsors are required to adhere to all regulations set forth in part 514.

(b) *Legal status.* Sponsors shall maintain legal status. A change in ■ sponsor's legal status (e.g. partnership to corporation) shall require application for designation of the new legal entity.

(c) *Accrediation and licensure.* Sponsors shall remain in compliance with all local, state, federal, and professional requirements necessary to carry out the activity for which they are designated, including accreditation and licensure, if applicable.

(d) *Representations and disclosures.* Sponsors shall:

(1) Provide accurate and complete information, to the extent lawfully permitted, to the Agency regarding their exchange visitor programs and exchange visitors;

(2) Provide only accurate information to the public when advertising their exchange visitor programs or responding to public inquires;

(3) Provide literature to prospective exchange visitors which clearly explains the activities, costs, conditions, and restrictions of the program;

(4) Not use program numbers on any advertising materials or publications intended for general circulation; and

(5) Not represent that any program is endorsed, sponsored, or supported by the Agency or the United States Government, except for United States Government sponsors or exchange visitor programs financed directly by the United States Government to promote international educational exchanges. However, sponsors may represent that they are designated by the Agency as a sponsor of an exchange visitor program.

(e) *Financial responsibility.* (1) Sponsors shall maintain the financial capability to meet at all times their financial obligations and responsibilities attendant to successful sponsorship of their exchange visitor programs.

(2) The Agency may require non-government sponsors to provide evidence satisfactory to the Agency that funds necessary to fulfill all obligations and responsibilities attendant to sponsorship of exchange visitors are readily available and in the sponsor's control, including such supplementary or explanatory financial information as the Agency may deem appropriate such as, for example, audited financial statements.

(3) The Agency may require any non-government sponsor to secure a payment bond in favor of the Agency guaranteeing all financial obligations arising from the sponsorship of exchange visitors.

(f) *Staffing and support services.* Sponsors shall ensure:

(1) Adequate staffing and sufficient support services to administer their exchange visitor programs; and

(2) That their employees, officers, agents, and third parties involved in the administration of their exchange visitor programs are adequately qualified, appropriately trained, and comply with the Exchange Visitor Program regulations.

(g) *Appointment of responsible officer.* (1) The sponsor shall appoint a responsible officer and such alternate responsible officers as may be necessary to perform the duties set forth at § 514.11.

(2) The responsible officer and alternate responsible officers shall be employees or officers of the sponsor. The Agency may, however, in its discretion, authorize the appointment of an individual who is not an employee or officer to serve as an alternate responsible officer.

(3) The Agency may recommend or direct the replacement of the responsible officer or any alternate responsible officer as provided for in § 514.50.

(4) The Agency may limit the number of alternate responsible officers appointed by the sponsor.

§ 514.10 Program administration.

Sponsors are responsible for the effective administration of their exchange visitor programs. These responsibilities include:

(a) *Selection of exchange visitors.* Sponsors shall provide a system to screen and select prospective exchange visitors to ensure that they are eligible for program participation, and that:

(1) The program is suitable to the exchange visitor's background, needs, and experience; and

(2) The exchange visitor possesses sufficient proficiency in the English

language to participate in his or her program.

(b) *Pre-arrival information.* Sponsors shall provide exchange visitors with pre-arrival materials including, but not limited to, information on:

(1) The purpose of the Exchange Visitor Program;

(2) Home-country physical presence requirement;

(3) Travel and entry into the United States;

(4) Housing;

(5) Fees payable to the sponsor;

(6) Other costs that the exchange visitor will likely incur (e.g., living expenses) while in the United States;

(7) Health care and insurance; and

(8) Other information which will assist exchange visitors to prepare for their stay in the United States.

(c) *Orientation.* Sponsors shall offer orientation for all exchange visitors. Sponsors are encouraged to provide orientation for the exchange visitor's immediate family, especially those who are expected to be in the United States for more than one year. Orientation shall include, but not be limited to, information concerning:

(1) Life and customs in the United States;

(2) Local community resources (e.g., public transportation, medical centers, schools, libraries, recreation centers, and banks), to the extent possible;

(3) Available health care, emergency assistance, and insurance coverage;

(4) A description of the program in which the exchange visitor is participating;

(5) Rules that the exchange visitors are required to follow under the sponsor's program;

(6) Address of the sponsor and the name and telephone number of the responsible officer; and

(7) Address and telephone number of the Exchange Visitor Program Services of the Agency and a copy of the Exchange Visitor Program brochure outlining the regulations relevant to the exchange visitors.

(d) *Form IAP–66.* Sponsors shall ensure that only the responsible officer or alternate responsible officers issue Forms IAP–66.

(e) *Monitoring of exchange visitors.* Sponsors shall monitor, through employees, officers, agents, or third parties, the exchange visitors participating in their programs. Sponsors shall:

(1) Ensure that the activity in which the exchange visitor is engaged is consistent with the category and activity listed on the exchange visitor's Form IAP–66;

(2) Monitor the progress and welfare of the exchange visitor to the extent appropriate for the category; and

(3) Require the exchange visitor to keep the sponsor apprised of his or her address and telephone number, and maintain such information.

(f) *Requests by the agency.* Sponsors shall, to the extent lawfully permitted, furnish to the Agency within a reasonable time all information, reports, documents, books, files, and other records requested by the Agency on all matters related to their exchange visitor programs.

(g) *Inquiries and investigations.* Sponsors shall cooperate with any inquiry or investigation that may be undertaken by the Agency.

(h) *Retention of records.* Sponsors shall retain all records related to their exchange visitor program and exchange visitors for a minimum of three years.

§ 514.11 Duties of Responsible Officers.

Responsible officers shall train and supervise alternate responsible officers. Responsible officers and alternate responsible officers shall:

(a) *Knowledge of regulations and codebook.* Be thoroughly familiar with the Exchange Visitor Program regulations and the Agency's current *Codebook and Instructions for Responsible Officers.*

(b) *Advisement and assistance.* Ensure that the exchange visitor obtains sufficient advice and assistance to facilitate the successful completion of the exchange visitor's program.

(c) *Communications.* Conduct the official communications relating to the exchange visitor program with the Agency, the United States Immigration and Naturalization Service, or United States Department of State. Reference to the sponsor's program number shall be made on any correspondence with the Agency.

(d) *Custody of the Form IAP–66.* Act as custodian for the control, issuance, and distribution of Form IAP–66 as set forth in § 514.12.

§ 514.12 Control of Forms IAP–66.

Forms IAP–66 shall be used only for authorized purposes. To maintain adequate control of Forms IAP–66, responsible officers or alternate responsible officers shall:

(a) *Requests.* Submit written requests to the Agency for a one-year supply of Forms IAP–66, and allow four to six weeks for the distribution of these forms. The Agency has the discretion to determine the number of Forms IAP–66 to be sent to a sponsor. The Agency will take into consideration the current size of the program and the projected expansion of the program in the coming 12 months. If requested, the Agency will consult with the responsible officer prior to determining the number of Forms IAP–66 to be sent to the sponsor. Additional forms may be requested later in the year if needed by the sponsor.

(b) *Verification.* Prior to issuing Form IAP–66, verify that the exchange visitor:

(1) Is eligible, qualified, and accepted for the program in which he or she will be participating;

(2) Possesses adequate financial resources to complete his or her program; and

(3) Possesses adequate financial resources to support any accompanying dependents.

(c) *Issuance of Form IAP–66.* Issue the Form IAP–66 only so as to:

(1) Facilitate the entry of a new participant of the exchange visitor program;

(2) Extend the stay of an exchange visitor;

(3) Facilitate program transfer;

(4) Replace a lost or stolen Form IAP–66;

(5) Facilitate entry of an exchange visitor's alien spouse or minor unmarried children into the United States separately;

(6) Facilitate re-entry of an exchange visitor who has traveled outside the United States during the program; or

(7) Facilitate a change of category when permitted by the Agency.

(d) *Safeguards.* (1) Store Forms IAP–66 securely to prevent unauthorized use;

(2) Prohibit transfer of any blank Form IAP–66 to another sponsor or other person unless authorized in writing (by letter or facsimile) by the Agency to do so;

(3) Notify the Agency promptly by telephone (confirmed promptly in writing) or facsimile of the document number of any completed Form IAP–66 that is presumed stolen or any blank Form IAP–66 lost or stolen; and,

(4) Forward the completed Form IAP–66 only to an exchange visitor, either directly or via an employee, officer, or agent of the sponsor, or to an individual designated by the exchange visitor.

(e) *Accounting.* (1) Maintain a record of all Forms IAP–66 received and/or issued by the sponsor;

(2) Destroy damaged and unusable Forms IAP–66 on the sponsor's premises after making a record of such forms (e.g. forms with errors or forms damaged by a printer); and

(3) Request exchange visitors and prospective exchange visitors to return any unused Form IAP–66 sent to them and make a record of Forms IAP–66

which are returned to the sponsor and destroy them on the sponsor's premises.

§ 514.13 Notification requirements.

(a) *Change of circumstances.* Sponsors shall notify the Agency promptly in writing of any of the following circumstances:

(1) Change of its address, telephone, or facsimile number;

(2) Change in the composition of the sponsoring organization which affects its citizenship as defined by § 514.2;

(3) Change of the responsible officer or alternate responsible officers;

(4) A major change of ownership or control of the sponsor's organization;

(5) Change in financial circumstances which may render the sponsor unable to comply with its obligations as set forth in 512.9(e);

(6) Loss of licensure or accreditation;

(7) Loss or theft of Forms IAP–66 as specified at § 514.12(d)(3);

(8) Litigation related to the sponsor's exchange visitor program, when the sponsor is a party; and

(9) Termination of its exchange visitor program.

(b) *Serious problem or controversy.* Sponsors shall inform the Agency promptly by telephone (confirmed promptly in writing) or facsimile of any serious problem or controversy which could be expected to bring the Agency or the sponsor's exchange visitor program into notoriety or disrepute.

(c) *Status of exchange visitor.* Sponsors shall notify the Agency and the United States Immigration and Naturalization Service in writing when:

(1) The exchange visitor has completed or withdrawn from a program prior to the ending date on his or her Form IAP–66;

(2) The exchange visitor ceases to maintain exchange visitor status; or

(3) An exchange visitor's participation in the Exchange Visitor Program is terminated in accordance with § 514.40.

§ 514.14 Insurance.

(a) Sponsors shall require each exchange visitor to have insurance in effect which covers the exchange visitor for sickness or accident during the period of time that an exchange visitor participates in the sponsor's exchange visitor program. Minimum coverage shall provide:

(1) Medical benefits of at least $50,000 per accident or illness;

(2) Repatriation of remains in the amount of $7,500;

(3) Expenses associated with the medical evacuation of the exchange visitor to his or her home country in the amount of $10,000; and,

(4) A deductible not to exceed $500 per accident or illness.

(b) An insurance policy secured to fulfill the requirements of this section:

(1) May require a waiting period for pre-exisitng conditions which is reasonable as determined by current industry standards;

(2) May include provision for co-insurance under the terms of which the exchange visitor may be required to pay up to 25% of the covered benefits per accident or illness; and,

(3) Shall not unreasonably exclude coverage for perils inherent to the activities of the exchange program in which the exchange visitor participates.

(c) Any insurance policy secured to fulfill the above requirements must be underwritten by an insurance corporation having an A.M. Best rating of "A" or above, an Insurance Solvency International, Ltd. (ISI) rating of "A" or above, a Standard & Poor's Claims-paying Ability rating of "AA" or above, a Weiss Research, Inc. rating of B+ or above, or such other rating service as the Agency may from time to time specify. Insurance coverage backed by the full faith and credit of the government of the exchange visitor's home country shall be deemed to meet this requirement.

(d) Federal, state or local government agencies, state colleges and universities, and public community colleges may, if permitted by law, self-insure any or all of the above-required insurance coverage.

(e) At the request of a non-governmental sponsor of an exchange visitor program, and upon a showing that such sponsor has funds readily available and under its control sufficient to meet the requirements of this section, the Agency may permit the sponsor to self-insure or to accept full financial responsibility for such requirements.

(f) The Agency, in its sole discretion, may condition its approval of self-insurance or the acceptance of full financial responsibility by the non-governmental sponsor by requiring such sponsor to secure a payment bond in favor of the Agency guaranteeing the sponsor's obligations hereunder.

(g) An accompanying spouse or dependent of an exchange visitor is required to be covered by insurance in the amounts set forth in § 514.14(a) above. Sponsors shall inform exchange visitors of this requirement, in writing, in advance of the exchange visitor's arrival in the United States.

(h) An exchange visitor who fails to maintain the insurance coverage set forth above while a participant in an exchange visitor program or who makes a material misrepresentation to the sponsor concerning such coverage shall be deemed to be in violation of these regulations and shall be subject to termination as a participant.

(i) A sponsor shall terminate an exchange visitor's participation in its program if the sponsor determines that the exchange visitor or any accompanying spouse or dependent fails to remain in compliance with this section.

§ 514.15 Annual reports.

Sponsors shall submit an annual report to the Agency. Such report shall be filed on an academic or calendar year basis, as directed by the Agency, and shall contain the following:

(a) *Program report and evaluation.* A brief summary of the activities in which exchange visitors were engaged, including an evaluation of program effectiveness;

(b) *Reciprocity.* A description of the nature and extent of reciprocity occurring in the sponsor's exchange visitor program during the reporting year;

(c) *Cross-cultural activities.* A summary of the cross-cultural activities provided for its exchange visitors during the reporting year;

(d) *Proof of insurance.* Certification of compliance with insurance coverage requirements set forth in § 514.14.

(e) *Form IAP–66 usage.* A report of Form IAP–66 usage during the reporting year setting forth the following information:

(1) The total number of blank Forms IAP–66 received from the Agency during the reporting year;

(2) The total number of Forms IAP–66 voided or destroyed by the sponsor during the reporting year and the document numbers of such forms;

(3) The total number of Forms IAP–66 issued to potential exchange visitors that were returned to the sponsor or not used for entry into the United States; and

(4) The total number and document identification number sequence of all blank Forms IAP–66 in the possession of the sponsor on December 31 of the reporting year.

§ 514.16 Employment.

(a) Except as provided in § 514.23 and § 514.25, *infra*, the exchange visitor shall not engage in gainful employment that both produces income from U.S. sources and is unrelated to the exchange visitor's program.

(b) An exchange visitor who engages in unauthorized employment shall be deemed to be in violation of his or her lawful status and be subject to

termination as participant in an exchange visitor program.

(c) The acceptance of employment by an accompanying spouse or minor child of an exchange visitor is governed by Immigration and Naturalization Service regulations.

§ 514.17 Fees and charges. [Reserved]

Subpart B—Specific Program Provisions

§ 514.20 Professors and research scholars.

(a) *Introduction.* These regulations govern professors and research scholars, except:

(1) Alien physicians in graduate medical education or training, who are governed by regulations set forth at § 514.27; and

(2) Short-term scholars, who are governed by regulations set forth at § 514.21.

(b) *Purpose.* A primary purpose of the Exchange Visitor Program is to foster the exchange of ideas between Americans and foreign nationals and stimulate international collaborative teaching and research efforts. The exchange of professors and research scholars promotes interchange, mutual enrichment, and linkages between research and educational institutions in the United States and foreign countries. It does so by providing foreign professors and research scholars the opportunity to engage in research, teaching, and lecturing with their American colleagues, to participate actively in cross-cultural activities with Americans, and to ultimately to share their experiences and increased knowledge about the United States and their substantive fields.

(c) *Designation.* The Agency may, in its sole discretion, designate bona fide programs which offer foreign nationals the opportunity to engage in research, teaching, lecturing, observing, or consulting at research institutions, museums, libraries, post-secondary accredited educational institutions, or similar types of institutions in the United States.

(d) *Visitor eligibility.* An individual participating in a program which furthers the objectives under § 514.20(b) and whose activities are compatible with said objectives shall be eligible to participate in an exchange visitor program as a professor or research scholar. The exchange visitor's appointment to a position shall be temporary, even if the position itself is permanent. The individual shall not be on a tenure track.

(e) *Issuance of Form IAP–66.* The Form IAP–66 shall be issued only after the professor or research scholar has been accepted by the institution(s) where he or she will participate in an exchange visitor program.

(f) *Location of the exchange.* Professors or research scholars shall conduct their exchange activity at the location(s) listed on the Form IAP–66, which could be either at the location of the exchange visitor sponsor or the site of a third party facilitating the exchange. An exchange visitor may also engage in activities at locations not listed on the Form IAP–66 if such activities constitute occasional lectures or consultations as permitted by § 514.20(g).

(g) *Occasional lectures or consultations.* Professors and research scholars may participate in occasional lectures and short-term consultations without compensation for services, unless disallowed by the sponsor. Such lectures and consultations must be incidental to the exchange visitor's primary program activities. For the purpose of this section, reimbursement for travel, lodging and other out-of-pocket expenses for participating in conferences, seminars, meetings, and similar types of short-term activities shall not be considered compensation for services. If the occasional lectures and short-term consultations involve compensation for services, then the following criteria and procedures shall be satisfied:

(1) *Criteria.* The occasional lectures or short-term consultations shall:

(i) Be directly related to the objectives of the exchange visitor's program;

(ii) Be incidental to the exchange visitor's primary program activities; and

(iii) Not delay the completion date of the visitor's program.

(2) *Procedures.* (i) To obtain authorization to engage in occasional lectures or short-term consultations involving compensation for services, the exchange visitor shall present to the responsible officer:

(A) A letter from the offeror setting forth the terms and conditions of the offer to lecture or consult, including the duration, number of hours, field or subject, amount of compensation, and description of such activity; and

(B) A letter from his or her department head or supervisor recommending such activity and explaining how it would enhance international exchange.

(ii) The responsible officer shall review the letters required in § 514.20(g)(2)(i) above and make a written determination whether such activity is warranted and satisfies the criteria set forth in § 514.20(g)(1).

(h) *Category.* At the discretion of the responsible officer, professors may freely engage in research and research scholars may freely engage in teaching and lecturing, unless disallowed by the sponsor. Because these activities are so intertwined, such a change of activity will not be considered a change of category necessitating a formal approval by the responsible officer or reporting to the Agency. Any Form IAP–66 issued to the exchange visitor should reflect the current category of the exchange visitor, either professor or research scholar.

(i) *Duration of participation.* The exchange professor and research scholar shall be authorized to participate in the Exchange Visitor Program for the length of time necessary to complete the program, which time shall not exceed three years. A change of category shall not extend the exchange visitor's period of participation beyond the permitted three-year maximum duration.

(j) *Extension of program.* Professors and research scholars may be considered for program extensions for up to 36 months as follows:

(1) *Six-month extension.* The responsible officer has the discretion to approve an extension of up to six months for professors or research scholars beyond the three year duration of participation permitted under § 514.20(i), when exceptional or unusual circumstances so warrant. The purpose of such an extension is to provide the professor or research scholar the necessary time to complete his or her teaching and research responsibilities. The responsible officer shall notify the Agency as required in § 514.43(c) when authorizing such an extension.

(2) *Additional extension.* The Agency, in its discretion, may approve an extension for a professor or research scholar for exceptional or unusual circumstances. Applications to the Agency for such extension should be filed no later than 45 days before the expiration of the exchange visitor's authorized stay. The application shall be in writing and shall:

(i) State the period of time the sponsor is requesting the extension for the exchange visitor; and

(ii) Include a letter from the department head or supervisor of the exchange visitor;

(A) Indicating the expected date of completion of the exchange program; and

(B) Providing a description of the exceptional or unusual circumstances which warrant such an extension.

§ 514.21 Short-term scholars.

(a) *Introduction.* These regulations govern scholars coming to the United States for a period of up to four months

to lecture, observe, consult, and to participate in seminars, workshops, conferences, study tours, professional meetings, or similar types of educational and professional activities.

(b) *Purpose.* The Exchange Visitor Program promotes the interchange of knowledge and skills among foreign American scholars. It does so by providing foreign scholars the opportunity to exchange ideas with their American colleagues, participate in educational and professional programs, confer on common problems and projects, and promote professional relationships and communications.

(c) *Designation.* The Agency may, in its sole discretion, designate bona fide programs which offer foreign nationals the opportunity to engage in short-term visits for the purpose of lecturing, observing, consulting, training, or demonstrating special skills at research institutions, museums, libraries, post-secondary accredited educational institutions, or similar types of institutions.

(d) *Visitor eligibility.* A person participating in the Exchange Visitor Program under this section shall satisfy the definition of a short-term scholar as set forth in § 514.4.

(e) *Cross-cultural activities and orientation.* Due to the nature of such exchanges, sponsors of programs for short-term scholars shall be exempted from the requirements of providing cross-cultural activities and orientation as set forth in § 514.8(d) and § 514.10(c). However, sponsors are encouraged to provide such programs for short-term scholars whenever possible.

(f) *Location of the exchange.* The short-term scholar shall participate in the Exchange Visitor Program at the conferences, workshops, seminars, or other events or activities stated on his or her Form IAP–66.

(g) *Duration of participation.* The short-term scholar shall be authorized to participate in the Exchange Visitor Program for the length of time necessary to complete the program, which time shall not exceed four months. Programs under this section are exempted from § 514.8(b) governing the minimum duration of program. Extensions beyond the duration of participation are not permitted under this category.

§ 514.22 Trainees.

(a) *Introduction.* These regulations govern all exchange visitor programs under which foreign nationals are provided with opportunities for receiving training in the United States. Regulations dealing with training opportunities which may, under certain conditions, be authorized for foreign students who are studying at post-secondary accredited educational institutions in the United States are found at § 514.23. Regulations governing medical trainees are found at § 514.27.

(b) *Purpose of Training.* The primary objectives of training are to enhance the exchange visitor's skills in his or her specialty or non-specialty occupation through participation in a structured training program and to improve the participant's knowledge of American techniques, methodologies, or expertise within the individual's field of endeavor. Such training programs are also designed to enable the exchange visitor trainee to understand better American culture and society and to enhance American knowledge of foreign cultures and skills by providing the opportunity for an open interchange of ideas between the exchange visitor trainees and their American counterparts. Use of the Exchange Visitor Program for employment or work purposes is strictly prohibited. For this reason the regulations in this section are designed to distinguish between receiving training, which is permitted, and gaining experience, which is not permitted unless as a component of a *bona fide* training program.

(c) *Designation of training programs.* (1) The Agency groups are occupations into specialty, non-specialty, or unskilled occupational categories. The Agency will designate training programs in specialty and non-specialty occupations. Training programs in unskilled occupations or occupations in other categories which the Agency may from time to time identify by publication in the **Federal Register** will not be designated. For purposes of these regulations, the Agency considers those occupations listed in the United States Department of Labor's "Schedule B" to be unskilled occupations, and the Agency will not designate training programs in those occupations. See appendix to part 514.

(2) For purposes of designation, the Agency will designate specialty and skilled non-specialty occupational training programs in any of the following occupational categories:

(i) Arts and Culture;
(ii) Information Media and Communications;
(iii) Education;
(iv) Business and Commercial;
(v) Banking and Financial;
(vi) Aviation;
(vii) Science, Mechanical and Industrial;
(viii) Construction and Building Trades;
(ix) Agricultural;
(x) Public Administration;
(xi) Training, Other (Specify).

(3) Once designated, the sponsor may provide training in any occupation falling within the designated category, if not otherwise prohibited from doing so. Sponsors shall provide training to exchange visitors only in the category or categories for which they have obtained Agency designation.

(d) *Obligations of training program sponsors.* (1) Sponsors designated by the Agency to provide training to foreign exchange visitors shall:

(ii) Possess and maintain the demonstrable competence to provide training in the subjects offered to exchange visitors.

(ii) Impart skill, knowledge, and competencies to the trainee through a structured program of activities supportive of the training experience. These may include, for example, classroom training, seminars, rotation through several departments, on-the-job training, and attendance at conferences, as appropriate.

(iii) Develop, prior to the start of training, a detailed training plan geared to defined objectives for each trainee or group of similarly-situated trainees.

(iv) Provide for continuous supervision and periodic evaluation of each trainee.

(v) Have available sufficient plant, equipment, and trained personnel to provide the training specified.

(2) Sponsors designated by the Agency to provide training to foreign exchange visitors shall not:

(i) Provide training in unskilled occupations; or

(ii) Place trainees in positions which are filled or would be filled by full-time or part-time employees.

(e) *Use of third parties.* (1) The sponsor may utilize the services of third parties in the conduct of the designated training program. If a third party is utilized, the sponsor and the third party shall execute a written agreement which delineates the respective obligations and duties of the parties, and specifically recites the third party's obligation to act in accordance with these regulations. The sponsor shall maintain a copy of such agreement in its files.

(2) The sponsor's use of a third party in the conduct of a designated training program does not relieve the sponsor of its obligation to comply, and to ensure the third party's compliance, with all applicable regulations. Any failure on the part of the third party to comply with all applicable regulations will be imputed to the sponsor.

(f) *Application for designation of training programs.* (1) An applicant for

designation as an exchange visitor training program shall demonstrate to the Agency its ability to comply with both the General Provisions set forth in subpart A, and the obligations of training sponsors set forth in § 514.22(d).

(2) (i) An applicant shall provide the Agency with documentary evidence of its competence to provide the training for which designation is sought.

(ii) If a third party will be used to conduct the training, documentary evidence of the third party's competence to conduct the training shall be included.

(iii) If the applicant intends to utilize the services of third parties to conduct the training, a copy of an executed third-party agreement or, if one has not yet been executed, an illustrative copy of the type of agreement the applicant intends to execute with third parties shall be submitted with the application.

(3) If the training program is accredited in accordance with § 514.22(n), the applicant shall include a copy of the accreditation in its application.

(4) The application shall include a certification that:

(i) The applicant will dedicate sufficient physical plant, equipment, and trained personnel to provide the training specified;

(ii) The training program is not designed to recruit and train aliens for employment in the United States;

(iii) The applicant will not place trainees in positions which displace full-time or part-time employees.

(5) As to each occupational division for which the applicant seeks designation, the applicant shall indicate whether it intends to provide training in specialty or non-specialty occupations, or both.

(6) In order to meet the requirements of this subsection and to evidence the applicant's competence to provide training, the applicant for designation may submit any one of the following types of training plans for each division for which designation is sought:

(i) If the applicant has already designed a structured training plan to use in the proposed exchange visitor program, a copy of such training plan may be submitted with the application;

(ii) If the applicant has not yet prepared a new training plan, but has been engaged previously in the type of training for which designation is being sought, the applicant may demonstrate its capability to conduct such training by submitting a copy of a previously used training plan;

(iii) If the applicant proposes to create individualized training plans for as yet unidentified trainees, then the applicant may submit a hypothetical training plan which illustrates the training the applicant proposes to provide.

(g) *The training plan.* Each training plan required to be prepared by a sponsor for each trainee pursuant to § 514.22(d)(1)(iii) above, shall include, at a minimum,

(1) a statement of the objectives of the training;

(2) the skills to be imparted to the trainee;

(3) a copy of the training syllabus or chronology;

(4) a justification for the utilization of on-the-job training to achieve stated course competencies; and,

(5) a description of how the trainee will be supervised and evaluated.

(h) *Agency consultation with experts.* The Agency may consult experts whenever its examination of a training plan or its evaluation of application for designation indicates the need for such expertise in making an evaluation.

(i) *Records.* Sponsors shall retain for three years all records pertaining to individual trainees, including training plans, trainee evaluations, and agreements with third parties. Such records shall be made available to the Agency upon the Agency's request.

(j) *Selection of trainees.* In addition to meeting the requirements of § 514.10(a), trainees shall be fully qualified to participate successfully in a structured training program at a level appropriate for the individual trainee's career development. However, such training shall not be duplicative of the trainee's prior training and experience.

(k) *Duration of participation.* The duration of participation shall correspond to the length of the program set forth in the sponsor's designation. The maximum period of participation in the Exchange Visitor Program for a trainee shall not exceed 18 months total.

(l) *Financial and program disclosure.* Sponsors shall provide trainees, prior to their arrival in the United States, with:

(1) A written statement which clearly states the stipend, if any, to be paid to the trainee;

(2) The costs and fees for which the trainee will be obligated;

(3) An estimate of living expenses during the duration of the trainee's stay, and;

(4) A summary of the training program which recites the training objectives and all significant components of the program.

(m) *Evaluation.* In order to ensure the quality of the training program, the sponsor shall develop procedures for the on-going evaluation of each training segment. Such evaluation shall include, as a minimum, semi-annual and concluding evaluation reports from the trainee and his or her immediate supervisor, signed by both parties. For training courses of less than nine months duration, evaluation reports are required, at a minimum, at mid-point and upon conclusion of the training course. Evaluation reports shall be kept in the custody of the sponsor for a period of three years and shall be made available to the Agency upon request.

(n) *Flight training.* (1) The Agency will consider the application for designation of a flight training program if such program complies with the above regulations, and, additionally,

(i) is, at the time of making said application, a Federal Aviation Administration certificated pilot school pursuant to title 14, Code of Federal Regulations, part 141; and

(ii) at the time of making said application is accredited as a flight training program by an accrediting agency which is listed in the current edition of the United States Department of Education's "Nationally Recognized Accrediting Agencies and Associations," or is accredited as a flight training program by a member of the Council on Postsecondary Accreditation; or,

(iii) at the time of making said application has formally commenced the accreditation process with an accrediting agency which is listed in the current edition of the United States Department of Education's "Nationally Recognized Accrediting Agencies and Associations," or with a member of the Council on Postsecondary Accreditation. If the application for designation is approved, such designation shall be for up to twelve months duration, with continued designation thereafter conditioned upon completion of the accreditation process.

(2) Notwithstanding the provisions of § 514.22 (k), *supra*, the maximum period of participation for exchange visitors in designated flight training programs shall not exceed 24 months total. Any request for extension of time in excess of that authorized under this subsection shall be made in accordance with § 514.43, *infra*.

§ 514.23 College and University students.

(a) *Purpose.* Programs under § 514.23 provide foreign students the opportunity to participate in a designated exchange program while studying at a degree-granting post-secondary accredited educational institution. Such exchanges are intended to promote mutual understanding by fostering the exchange of ideas between foreign students and their American counterparts.

(b) *Designation.* The Agency may, in its sole discretion, designate bona fide programs which offer foreign nationals the opportunity to study in the United States at post-secondary accredited educational institutions.

(c) *Selection criteria.* Sponsors select the college and university students who participate in their exchange visitor programs. Sponsors shall secure sufficient background information on the students to ensure that they have the academic credentials required for their program. Students are eligible for the Exchange Visitor Program, if at any time during their college studies in the United States:

(1) They or their program are financed directly or indirectly by:

(i) The United States Government;

(ii) The government of the student's home country; or

(iii) An international organization of which the United States is a member by treaty or statute;

(2) The programs are carried out pursuant to:

(i) An agreement between the United States Government and a foreign government; or

(ii) A written agreement between American and foreign educational institutions; or

(3) The exchange visitors are supported substantially by one or more scholarships from public or private organizations, rather than personal or family funds, for the purpose of promoting international educational exchanges.

(d) *Admissions requirement.* In addition to satisfying the requirements of § 514.10(a), sponsors shall ensure that the exchange visitor student has been admitted to the post-secondary accredited educational institution(s) listed on the Form IAP–66 before issuing the form.

(e) *Full course of study requirement.* Exchange visitor students shall pursue a full course of study at a post-secondary accredited educational institution in the United States as defined in § 514.2, except under the following circumstances:

(1) *Vacation.* During official school breaks and summer vacations if the student is eligible and intends to register for the next term.

(2) *Medical problem.* If the student is compelled to reduce or interrupt a full course of study due to an illness or medical condition and the student presents to the responsible officer:

(i) A written statement from a physician requiring or recommending an interruption or reduction in studies; and

(ii) Written approval by the academic dean or advisor to reduce the number of credits for the school term.

(3) *Academic difficulties.* If the student is compelled to pursue less that a full course of study for a term and:

(i) Receives a statement from the academic dean or advisor recommending that the student reduce his or her academic load to less than a full course of study due to academic difficulties; and

(ii) Obtains written approval from the responsible officer to pursue less than a full course of study for the term.

(4) *Non-degree program.* If the student is engaged full-time in a prescribed course of study in a non-degree program of up to 24 months duration conducted by a post-secondary accredited educational institution.

(5) *Academic training.* If the student is participating in authorized academic training in accordance with § 514.23(g).

(6) *Graduation.* If the student needs less than a full course of study to complete all degree requirements in the final term.

(f) *Academic training.* (1) A student may participate in academic training programs during his or her studies, without compensation for services, with the approval of the academic dean or advisor and the responsible officer.

(2) A student may participate in academic training programs during his or her studies, with compensation for services, and/or immediately after completion of the formal course work or graduation, with or without compensation, when the following criteria, procedures, and evaluation requirements are satisfied.

(i) *Criteria.* The exchange visitor:

(A) Has been a student in the exchange visitor program for the preceding nine months;

(B) Is participating in academic training that is directly related to his or her major field of study at the post-secondary accredited educational institution listed on his or her Form IAP–66;

(C) Is in good academic standing with the post-secondary accredited educational institution;

(D) Will participate in academic training programs for the period necessary to complete the goals and objectives of the training, provided that the total amount of time for an exchange visitor to participate in academic training programs shall not exceed any of the following:

(*1*) The time recommended by the academic dean or advisor and approved by the responsible officer;

(*2*) The period of the classroom instruction at the post-secondary accredited educational institution; and

(*3*) A total of 18 months for all academic training programs of the exchange visitor; and

(E) Receives approval in advance and in writing by the responsible officer for the duration and type of academic training.

(ii) *Procedures.* To obtain authorization to engage in academic training:

(A) The exchange visitor shall present to the responsible officer a letter of recommendation from the student's academic dean or advisor setting forth:

(*1*) The goals and objectives of the specific training program;

(*2*) A description of the training program, including its location, the name and address of the training supervisor, number of hours per week, and dates of the training;

(*3*) Hope the training relates to the student's major field of study; and

(*4*) Why it is an integral or critical part of the academic program of the exchange visitor student.

(B) The responsible officer shall:

(*1*) Determine if and to what extent the student has previously participated in academic training as an exchange visitor student, in order to ensure the student does not exceed the period permitted in § 514.23(g);

(*2*) Review the letter required in section (A) above; and

(*3*) Make a written determination whether the academic training currently being requested is warranted, and the criteria set forth in § 514.23(g)(2)(i) are satisfied.

(iii) *Evaluation requirements.* To ensure the quality of the academic training program, the sponsor shall develop procedures to evaluate its effectiveness and appropriateness in achieving the stated goals and objectives.

(A) Evaluations shall include, at a minimum, mid-point and concluding evaluation reports from the exchange visitor and his or her immediate supervisor, signed by both parties.

(B) The responsible officer shall maintain copies of evaluation reports or have reasonable access to such reports.

(G) *Student employment.* Exchange visitor students may engage in part-time employment when the following criteria and conditions are satisfied.

(1) The student employment:

(i) Is pursuant to the terms of a scholarship, fellowship, or assistantship; or

(ii) Is necessary because of serious, urgent, and unforeseen economic

circumstances which have arisen since acquiring exchange visitor status.

(2) Exchange visitor students may engage in employment as provided in paragraph (g)(1) of this section if the:

(i) Student is in good academic standing at the post-secondary accredited educational institution;

(ii) Student continues to engaged in a full course of study, except for official school breaks and summer vacations;

(iii) Employment totals no more than 20 hours per week, except during official school breaks and summer vacations; and

(iv) The responsible officer has approved the specific employment in advance and in writing. Such approval may be valid up to twelve months, but is automatically withdrawn if the student's program is terminated.

(h) *Duration of participation.* (1) *Degree of students.* Exchange visitor students who are in degree program shall be authorized to participate in the Exchange Visitor Program as long as they are either:

(i) Studying at the post-secondary accredited educational institution listed on their Form IAP–66 and are:

(A) Pursuing a full course of study as set forth in § 514.23(f), and

(B) Maintaining satisfactory advancement towards the completion of their academic program; or

(ii) Participating in an authorized academic training program as permitted in § 514.23(g).

(2) *Non-degree students.* Exchange visitors who are non-degree students shall be authorized to participate in the Exchange Visitor Program for up to 24 months, if they are:

(i) Participating full-time in a prescribed course of study conducted by a post-secondary accredited educational institution; and

(ii) Maintaining satisfactory advancement towards the completion of their academic program.

§ 514.24 Teachers.

(a) *Purpose.* These regulations govern exchange visitors who teach full-time in primary and secondary accredited educational institutions. Programs under § 514.24 promote the interchange of American and foreign teachers in public and private schools and the enhancement of mutual understanding between people of the United States and other countries. They do so by providing foreign teachers opportunities to teach in primary and secondary accredited educational institutions in the United States, to participate actively in cross-cultural activities with Americans in schools and communities, and to return home ultimately to share their experiences and their increased knowledge of the United States. Such exchanges enable visitors to understand better American culture, society, and teaching practices at the primary and secondary levels, and enhance American knowledge of foreign cultures, customs, and teaching approaches.

(b) *Designation.* The Agency may, in its discretion, designate bona fide programs satisfying the objectives in section (a) above as exchange visitor programs in the teacher category.

(c) *Visitor eligibility.* A foreign national shall be eligible to participate in an exchange visitor program as a full-time teacher if the individual:

(1) Meets the qualifications for teaching in primary or secondary schools in his or her country of nationality or last legal residence;

(2) Satisfies the standards of the U.S. state in which he or she will teach;

(3) Is of good reputation and character;

(4) Seeks to come to the United States for the purpose of full-time teaching at a primary or secondary accredited educational institution in the United States; and

(5) Has a minimum of three years of teaching or related professional experience.

(d) *Visitor Selection.* Sponsors shall adequately screen teachers prior to accepting them for the program. Such screening, in addition to the requirements of § 514.10(a), shall include:

(1) Evaluating the qualifications of the foreign applicants to determine whether the criteria set forth in § 514.24(c) are satisfied; and

(2) Securing references from colleagues and current or former employers, attesting to the teachers' good reputation, character and teaching skills.

(e) *Teaching position.* Prior to the issuance of the Form IAP–66, the exchange visitor shall receive a written offer and accept in writing a teaching position from the primary or secondary accredited educational institution in which he or she is to teach. Such position shall be in compliance with any applicable collective bargaining agreement, where one exists. The exchange visitor's appointment to a position at a primary or secondary accredited educational institution shall be temporary, even if the teaching position is permanent.

(f) *Program disclosure.* Before the program begins, the sponsor shall provide the teacher, in addition to what is required in § 514.10(b), with:

(1) Information on the length and location(s) of his or her exchange visitor program;

(1) Information on the length and location(s) of his or her exchange visitor program;

(2) A summary of the significant components of the program, including a written statement of the teaching requirements and related professional obligations; and

(3) A written statement which clearly states the compensation, if any, to be paid to the teacher and any other financial arrangements in regards to the exchange visitor program.

(g) *Location of the exchange.* The teacher shall participate in an exchange visitor program at the primary or secondary accredited educational institution(s) listed on his or her Form IAP–66 and at locations where the institution(s) are involved in official school activities (e.g., school field trips and teacher training programs).

(h) *Duration of participation.* The teacher shall be authorized to participate in the Exchange Visitor Program for the length of time necessary to complete the program, which shall not exceed three years.

§ 514.25 Secondary School Students.

(a) *Introduction.* These regulations govern Agency designated exchange visitor programs under which foreign national secondary students are afforded the opportunity for up to one year of study in a United States public or private secondary school, while living with an American host family. As used herein, the term "sponsor" shall mean an Agency designated non-profit organization and its officers, employees, and agents; the term "student" shall mean a foreign national whose entry into the United States is for the purpose of study and attendance at a United States secondary school.

(b) *Program Sponsor Eligibility.* Eligibility for designation as a secondary school student exchange program sponsor shall be limited to:

(1) Organizations with tax-exempt status as conferred by the Internal Revenue Service pursuant to section 501(c)(3); and

(2) Organizations which are United States citizens as such terms is defined § 514.2.

(c) *Program Eligibility.* Secondary school students exchange programs designated by the Agency shall:

(1) Require all participants to pursue a full course of study at an accredited educational institution as such terms are defined in this Part of not less than one academic semester (or quarter

equivalency) nor more than two academic semesters (or quarter equivalency) duration; and

(2) Be conducted on an academic calendar year basis provided, however, participants may begin in the second semester of an academic year if specifically permitted to do so, in writing, by the school in which the exchange visitor is enrolled.

(d) *Program administration.* Sponsors shall ensure that all officers, employees, agents, and volunteers action on their behalf:

(1) Are adequately trained and supervised;

(2) Make no student placement outside a 150 mile radius of the home of an organizational representative authorized to act on the sponsors behalf in both routine and emergency matters arising from a student's participation in their exchange program;

(3) Ensure that no organizational representative act as both host family and area supervisor for any student participant whom that organizational representative may host;

(4) Maintain a monthly schedule of personal contact with the student, school, and host family; and

(5) Adhere to all regulatory provisions set forth in this Part and all additional terms and conditions governing program administration that the Agency may from time to time impose.

(e) *Student selection.* In addition to satisfying the requirements of § 514.10(a), sponsors shall ensure that all participants in a designated secondary school student exchange program:

(1) Are *bona fide* students who:

(i) Are secondary school students in their home country who have not completed more than eleven years of primary and secondary study, exclusive of kindergarten; or

(ii) Are at least 15 years of age but not more than 18 and six months years of age at the time of initial school enrollment;

(2) Demonstrate maturity, good character, and scholastic aptitude; and

(3) Have not previously participated in an academic year or semester secondary school student exchange program in the United States.

(f) *Student enrollment.* (1) Sponsors shall secure prior written acceptance for the enrollment of any student participant in a United States public or private secondary school. Such prior acceptance shall:

(i) Be secured from the school principal or other authorized school administrator of the school or school system that the student participant will attend; and

(ii) Include written arrangements concerning the payment of tuition or waiver thereof if applicable.

(2) Sponsors shall maintain copies of all written acceptances and make such documents available for Agency inspection upon request.

(3) Sponsors shall submit to the school placement a written English language summary of the student's complete academic course work prior to commencement of school.

(4) Under no circumstance shall a sponsor facilitate the entry into the United States of a student for whom a school placement has not been secured.

(5) Sponsors shall not facilitate the enrollment of more than five students in one school unless the school itself has requested, in writing, the placement of more than five students.

(g) *Student orientation.* In addition to the orientation requirements set forth herein at § 514.10, all sponsors shall provide students, prior to their departure from the home country, with the following information:

(1) A summary of all operating procedures, rules, and regulations governing student participation in the exchange program;

(2) A detailed profile of the school, family, and community in which the student is placed;

(3) A detailed summary of travel arrangements;

(4) An identification card which lists the student's name, United States home placement address and telephone number, and a telephone number which affords immediate contact with both the Agency and sponsor in case of emergency. Such cards may be provided in advance of home country departure or immediately upon entry into the United States.

(h) *Student extra-curricular activities.* Students may participate in school sanctioned and sponsored extra-curricular activities, including athletics, if such participation is:

(1) authorized by the local school district in which the student is enrolled; and

(2) authorized by the state authority responsible for determination of athletic eligibility, if applicable.

(i) *Student employment.* Students may not be employed on either a full or part-time basis but may accept sporadic or intermittent employment such as babysitting or yard work.

(j) *Host family selection.* Sponsors shall adequately screen all potential host families and at a minimum shall:

(1) provide potential host families with a detailed summary of the exchange program and the parameters of their participation, duties, and obligations;

(2) utilize a standard application form for all host family applicants which provides a detailed summary and profile of the host family, the physical home environment, family composition, and community environment;

(3) conduct an in-person interview with all family members residing in the home;

(4) ensure that the host family is capable of providing a comfortable and nurturing home environment;

(5) ensure that the host family is of good reputation and character by securing two personal references for each host family from the school or community, attesting to the host family's good reputation and character;

(6) ensure that the host family has adequate financial resources to undertake hosting obligations; and

(7) maintain a permanent record of application forms, evaluations, and interviews for all selected host families for a period of three years.

(k) *Host family orientation.* In addition to the orientation requirements set forth in § 514.10, sponsors shall:

(1) inform all host families of the philosophy, rules, and regulations governing the sponsor's exchange program; and

(2) provide all selected host families with a copy of Agency promulgated Exchange Visitor Program regulations; and

(3) advise all selected host families of strategies governing cross cultural interaction and conduct workshops which will familiarize the host family with cultural differences and practices.

(l) *Host family placement.* (1) Sponsors shall secure, prior to the student's departure from the home country, a host family placement for each student participant. Sponsors shall not:

(i) Facilitate the entry into the United States for a student for whom a host family placement has not been secured; and

(ii) Place more than one student with a host family without the express prior written consent of the Agency.

(2) Sponsors shall advise both the student and host family, in writing, of the respective family compositions and backgrounds of each and shall facilitate and encourage the exchange of correspondence between the two prior to the student's departure from the home country.

(3) In the event of unforeseen circumstances which necessitate a change of host family placement, the sponsor shall document the reasons

necessitating such change and provide the Agency with an annual statistical summary reflecting the number and the reason for such change in host family placement.

(m) *Placement report.* In lieu of listing the name and address of the host family and school placement on a participant's Form IAP-66, sponsors must, no later then August 1st of each academic year, submit to the Agency a report of all academic year program participants. Such report shall set forth the participant's name, school, and host family placements. A report of semester participants entering United States schools during the January to June term shall be submitted to the Agency by December 15th of the preceding year.

§ 514.26 Specialists.

(a) *Introduction.* These regulations govern experts in a field of specialized knowledge or skill coming to the United States for observing, consulting, or demonstrating special skills, except:

(1) Research scholars and professors, who are governed by regulations set forth at § 514.20;

(2) Short-term scholars, who are governed by regulations set forth at § 514.21; and

(3) Alien physicians in graduate medical education or training, who are governed by regulations set forth at § 514.27.

(b) *Purpose.* The Exchange Visitor Program promotes the interchange of knowledge and skills among foreign and American specialists, who are defined as experts in a field of specialized knowledge or skills, and who visit the United States for the purpose of observing, consulting, or demonstrating their special skills. It does so by providing foreign specialists the opportunity to observe American institutions and methods of practice in their professional fields, and to share their specialized knowledge with their American colleagues. The exchange of specialists promotes mutual enrichment, and furthers linkages among scientific institutions, government agencies, museums, corporations, libraries, and similar types of institutions. Such exchanges also enable visitors to better understand American culture and society and enhance American knowledge of foreign cultures and skills. This category is intended for exchanges with experts in areas, for example, as mass media communication, environmental science, youth leadership, international educational exchange, museum exhibitions, labor law, public administration, and library science. This category is not intended for experts covered by the exchange visitor categories listed in § 514.26(a)(1)–(3) above.

(c) *Designation.* The Agency may, in its discretion, designate bona fide programs satisfying the objectives in section (b) above as an exchange visitor program in the specialist category.

(d) *Visitor eligibility.* A foreign national shall be eligible to participate in an exchange visitor program as a specialist if the individual:

(1) Is an expert in a field of specialized knowledge or skill;

(2) Seeks to travel to the United States for the purpose of observing, consulting, or demonstrating his or her special knowledge or skills; and

(3) Does not fill a permanent or long-term position of employment while in the United States.

(e) *Visitor selection.* Sponsors shall adequately screen and select specialists prior to accepting them for the program, providing a formal selection process, including at a minimum:

(1) Evaluation of the qualifications of foreign nationals to determine whether they meet the definition of specialist as set forth in § 514.4(g); and

(2) Screening foreign nationals to ensure that the requirements of § 514.10(a) are satisfied.

(f) *Program disclosure.* Before the program begins, the sponsor shall provide the specialist, in addition to what is required in § 514.10(b), with:

(1) Information on the length and location(s) of his or her exchange visitor program;

(2) A summary of the significant components of the program; and

(3) A written statement which clearly states the stipend, if any, to be paid to the specialist.

(g) *Issuance of Form IAP–66.* The Form IAP–66 shall be issued only after the specialist has been accepted by the organization(s) with which he or she will participate in an exchange visitor program.

(h) *Location of the exchange.* The specialist shall participate in an exchange visitor program at the location(s) listed on his or her Form IAP–66.

(i) *Duration of participation.* The specialist shall be authorized to participate in the Exchange Visitors Program for the length of time necessary to complete the program, which shall not exceed one year.

§ 514.27 Alien physicians.

(a) *Purpose.* Pursuant to the Mutual Educational and Cultural Exchange Act, as amended by the Health Care Professions Act, Public Law 94–484, the Agency facilitates exchanges for foreign medical graduates seeking to pursue graduate medical education or training at accredited schools of medicine or scientific institutions. The Agency also facilitates exchanges of foreign medical graduates seeking to pursue programs involving observation, consultation, teaching, or research activities.

(b) *Clinical exchange programs.* The Educational Commission for Foreign Medical Graduates must sponsor alien physicians who wish to pursue programs of graduate medical education or training conducted by accredited U.S. schools of medicine or scientific institutions if they:

(1) Have adequate prior education and training to participate satisfactorily in the program for which they are coming to the United States;

(2) Will be able to adapt to the educational and cultural environment in which they will be receiving their education or training;

(3) Have the background, needs, and experiences suitable to the program as required in § 514.10(a)(1);

(4) Have competency in oral and written English;

(5) Have passed either Parts I and II of the National Board of Medical Examiners Examination, the Foreign Medical Graduate Examination in the Medical Sciences, the United States Medical Licensing Examination, Step I and Step II, or the Visa Qualifying Examination (VQE) prepared by the National Board of Medical Examiners, administered by the Educational Commission for Foreign Medical Graduates. N.B. Graduates of a school of medicine accredited by the Liaison Committee on Medical Education is exempted by law from the requirement of passing either Parts I and II of the National Board of Medical Examiners Examination or the Visa Qualifying Examination (VQE); and,

(6) Provide a statement of need from the government of the country of their nationality or last legal permanent residence. Such statement must provide written assurance, satisfactory to the Secretary of Health and Human Services, that there is a need in that country for persons with the skills the alien physician seeks to acquire and shall be submitted to the Educational Commission for Foreign Medical Graduates by the participant's government. The statement of need must bear the seal of the concerned government and be signed by a duly designated official of the government. The text of such statement of need shall read as follows:

Name of applicant for Visa: _____. There currently exists in (Country) a need for qualified medical

practitioners in the specialty of _____. (Name of applicant for Visa) has filed a written assurance with the government of this country that he/she will return to this country upon completion of training in the United States and intends to enter the practice of medicine in the specialty for which training is being sought.

Stamp (or Seal and signature) of issuing official of named country.

Dated:_____

_____

Official of named Country.

(c) *Non-clinical exchange programs.* (1) A United States university or academic medical center which has been designated an exchange visitor program by the Director of the United States Information Agency is authorized to issue From IAP–66 to alien physicians to enable them to come to the United States for the purposes of observation, consultation, teaching, or research if:

(i) The responsible officer or duly designated alternate of the exchange visitor program involved signs and appends to the Form IAP–66 a certification which states "this certifies that the program in which (name of physician) is to be engaged is solely for the purpose of observation, consultation, teaching, or research and that no element of patient care is involved" or,

(ii) The dean of the involved accredited United States medical school or his or her designee certifies to the following five points and such certification is appended to the Form IAP–66 issued to the prospective exchange visitor alien physician:

(A) The program in which (name of physician) will participate is predominantly involved with observation, consultation, teaching, or research.

(B) Any incidental patient contact involving the alien physician will be under the direct supervision of a physician who is a U.S. citizen or resident alien and who is licensed to practice medicine in the State of _____.

(C) The alien physician will not be given final responsibility for the diagnosis and treatment of patients.

(D) Any activities of the alien physician will conform fully with the State licensing requirements and regulations for medical and health care professionals in the State in which the alien physician is pursuing the program.

(E) Any experience gained in this program will not be creditable towards any clinical requirements for medical specialty board certification.

(2) The Educational Commission for Foreign Medical Graduates may also issue Form IAP–66 to alien physicians who are coming to the United States to participate in a program of observation, consultation, teaching, or research provided the required letter of certification as outlined in this paragraph is appended to the Form IAP–66.

(d) *Public health and preventive medicine programs.* A United States university, academic medical center, school of public health, or other public health institution which has been designated as an exchange visitor program by the Director of the United States Information Agency is authorized to issue Form IAP–66 to alien physicians to enable them to come to the United States for the purpose of entering into those programs which do not include any clinical activities involving direct patient care. Under these circumstances, the special eligibility requirements listed in paragraphs _____ and _____ of this section need not be met.

The responsible officer or alternate responsible officer of the exchange visitor program involved shall append a certification to the Form IAP–66 which states:

This certifies that the program in which (name of physician) is to be engaged does not include any clinical activities involving direct patient care.

(e) *Duration of participation.* (1) The duration of an alien physician's participation in a program of graduate medical education or training is limited to the time typically required to complete such program. Duration shall be determined by the Director of the United States Information Agency at the time of the alien physician's entry into the United States. Such determination shall be based on criteria established in coordination with the Secretary of Health and Human Services and which take into consideration the requirements of the various medical specialty boards as evidenced in the Directory of Medical Specialties published by Marquis Who's Who for the American Board of Medical Specialties.

(2) Duration of participation is limited to seven years unless the alien physician has demonstrated to the satisfaction of the Director that the country to which the alien physician will return at the end of such specialty education or training has an exceptional need for an individual with the additional qualifications.

(3) Subject to the limitations set forth above duration of participation may, for good cause shown, be extended beyond the period of actual training or education to include the time necessary to take an examination required for certification by a specialty board.

(4) The Director may include within the duration of participation a period of supervised medical practice in the United States if such practice is an eligibility requirement for certification by a specialty board.

(i) Alien physicians shall be permitted to undertake graduate medical education or training in a specialty or subspecialty program whose board requirements are not published in the Director of Medical Specialists if the Board requirements are certified to the Director and to the Educational Commission for Foreign Medical Graduates by the Executive Secretary of the cognizant component board of the American Board of Medical Specialties.

(ii) The Director may, for good cause shown, grant an extension of the program to permit an alien physician to repeat one year of clinical medical training.

(5) The alien physician must furnish the Attorney General each year with an affidavit (Form I–644) that attests the alien physician:

(i) Is in good standing in the program of graduate medical education or training in which the alien physician is participating, and

(ii) Will return to the country of his nationality or last legal permanent residence upon completion of the education or training for which he came to the United States.

(f) *Change of program.* The alien physician may, once and not later than two years after the date the alien physician enters the United States as an exchange visitor or acquires exchange visitor status, change his designated program of graduate medical education or training if the Director approves the change and if the requirements of paragraphs 514.27 (b) and 514.27 (e) of this section are met for the newly designated specialty.

(g) *Applicability of Section 212(e) of the Immigration and Nationality Act.* (1) Any exchange visitor physician coming to the United States on or after January 10, 1977 for the purpose of receiving graduate medical education or training is automatically subject to the two-year home-country physical presence requirement of section 212(e) of the Immigration and Nationality Act, as amended. Such physicians are not eligible to be considered for section 212(e) waivers on the basis of "No Objection" statements issued by their governments.

(2) Alien physicians coming to the United States for the purpose of observation, consultation, teaching, or research are not automatically subject to the two-year home-country physical presence requirement of section 212(e) of the Immigration and Nationality Act,

as amended, but may be subject to this requirement if they are governmentally financed or pursuing a field of study set forth on their countries' Exchange Visitor Skills List. Such alien physicians are eligible for consideration of waivers under section 212(e) of the Immigration and Nationality Act, as amended, on the basis of "No Objection" statements submitted by their governments in their behalf through diplomatic channels to the Director of the United States Information Agency.

§ 514.28 International Visitors.

(a) *Purpose.* The international visitor category is for the exclusive use of the Agency. Programs under § 514.28 are for foreign nationals who are recognized or potential leaders and are selected by the Agency to participate in observation tours, discussions, consultation, professional meetings, conferences, workshops, and travel. These programs are designed to enable the international visitors to better understand American culture and society and contribute to enhanced American knowledge of foreign cultures. The category is for people-to-people programs which seek to develop and strengthen professional and personal ties between key foreign nationals and Americans and American institutions.

(b) *Selection.* The Agency and third parties assisting the Agency shall adequately screen and select prospective international visitors to determine compliance with § 514.10(a) and the visitor eligibility requirements set forth below.

(c) *Visitor eligibility.* An individual participating in an exchange visitor program as an international visitor shall be:

(1) Selected by the Agency;

(2) Engaged in consultation, observation, research, training, or demonstration of special skills; and

(3) A recognized or potential leader in a field of specialized knowledge of skill.

(d) *Program disclosure.* At the beginning of the program, the sponsor shall provide the international visitor with:

(1) Information on the length and location(s) of his or her exchange visitor program; and

(2) A summary of the significant components of the program.

(e) *Issuance of Form IAP–66.* The Form IAP–66 shall be issued only after the international visitor has been selected by the Agency.

(f) *Location of the exchange.* The international visitor shall participate in an exchange visitor program at locations approved by the Agency.

(g) *Duration of participation.* The international visitor shall be authorized to participate in the Exchange Visitor Program for the length of time necessary to complete the program, which shall not exceed one year.

§ 514.29 Government visitors.

(a) *Purpose.* The government visitor category is for the exclusive use of the U.S. federal, state, or local government agencies. Programs under § 514.29 are for foreign nationals who are recognized as influential or distinguished persons, and are selected by U.S. federal, state, or local government agencies to participate in observation tours, discussions, consultation, professional meetings, conferences, workshops, and travel. These are people-to-people programs designed to enable government visitors to better understand American culture and society, and to contribute to enhanced American knowledge of foreign cultures. The objective is to develop and strengthen professional and personal ties between key foreign nationals and Americans and American institutions. The government visitor programs are for such persons as editors, business and professional persons, government officials, and labor leaders.

(b) *Designation.* The Agency may, in its sole discretion, designate as sponsors U.S. federal, state, and local government agencies which offer foreign nationals the opportunity to participate in people-to-people programs which promote the purpose as set forth in (a) above.

(c) *Selection.* Sponsors shall adequately screen and select prospective government visitors to determine compliance with § 514.10(a) and the visitor eligibility requirements set forth below.

(d) *Visitor eligibility.* An individual participating in an exchange visitor program as a government visitor shall be:

(1) Selected by a U.S. federal, state, and local government agency;

(2) Engaged in consultation, observation, training, or demonstration of special skills; and

(3) An influential or distinguished person.

(e) *Program disclosure.* Before the beginning of the program, the sponsor shall provide the government visitor with:

(1) Information on the length and location(s) of his or her exchange visitor program;

(2) A summary of the significant components of the program; and

(3) A written statement which clearly states the stipend, if any, to be paid to the government visitor.

(f) *Issuance of Form IAP–66.* The Form IAP–66 shall be issued only after the government visitor has been selected by a U.S. federal, state, or local government agency and accepted by the private and/or public organization(s) with whom he or she will participate in the exchange visitor program.

(g) *Location of the exchange.* The government visitor shall participate in an exchange visitor program at the locations listed on his or her Form IAP–66.

(h) *Duration of participation.* The government visitor shall be authorized to participate in the Exchange Visitor Program for the length of time necessary to complete the program, which shall not exceed eighteen months.

§ 514.30 Camp Counselors.

(a) *Introduction.* In order to promote diverse opportunities for participation in educational and cultural exchange programs, the Agency designates exchange sponsors to facilitate the entry of foreign nationals to serve as counselors in U.S. summer camps. These programs promote international understanding by improving American knowledge of foreign cultures while enabling foreign participants to increase their knowledge of American culture. The foreign participants are best able to carry out this objective by serving as counselors per se, that is, having direct responsibility for supervision of groups of American youth and of activities that bring them into interaction with their charges. While it is recognized that some chores are an essential part of camp life for all counselors, this program is not intended to assist American camps in bringing in foreign nationals to serve as administrative personnel, cooks, or menial laborers, such as dishwashers or janitors.

(b) *Participant eligibility.* Participation in camp counselor exchange programs is limited to foreign nationals who:

(1) Are at least 18 years of age;

(2) Are bona fide youth workers, students, teachers, or individuals with specialized skills; and

(3) Have not previously participated more than once in a camp counselor exchange.

(c) *Participant selection.* In addition to satisfying the requirements in § 514.10(a), sponsors shall adequately screen all international candidates for camp counselor programs and at a minimum:

(1) Conduct an in-person interview; and

(2) Secure references from a participant's employer or teacher

regarding his or her suitability for participation in a camp counselor exchange.

(d) *Participant orientation.* Sponsors shall provide participants, prior to their departure from the home country, detailed information regarding:

(1) Duties and responsibilities relating to their service as a camp counselor;

(2) Contractual obligations relating to their acceptance of a camp counselor position; and

(3) Financial compensation for their service as a camp counselor.

(e) *Participant placements.* Sponsors shall place eligible participants at camping facilities which are:

(1) Accredited;

(2) A member in good standing of the American Camping Association;

(3) Officially affiliated with a nationally recognized non-profit organization; or

(4) Have been inspected, evaluated, and approved by the sponsor.

(f) *Participant compensation.* Sponsors shall ensure that international participants receive pay and benefits commensurate with those offered to their American counterparts.

(g) *Participant supervision.* Sponsors shall provide all participants with a phone number which allows 24 hours immediate contact with the sponsor.

(h) *Program administration.* Sponsors shall:

(1) Comply with all provisions set forth in Subpart A of this part;

(2) Not facilitate the entry of any participant for a program of more than four months duration; and

(3) Under no circumstance facilitate the entry into the United States of a participant for whom a camp placement has not been pre-arranged.

(i) *Placement report.* In lieu of listing the name and address of the camp facility at which the participant is placed on Form IAP–66, sponsors shall submit to the Agency, no later than July 1st of each year, a report of all participant placements. Such report shall reflect the participant's name and camp placement.

Subpart C—Status of Exchange Visitors

§ 514.40 Termination of exchange visitor status.

A sponsor shall terminate an exchange visitor's participation in its program when the exchange visitor:

(a) Fails to pursue the activities for which he or she was admitted to the United States;

(b) Is unable to continue, unless otherwise exempted pursuant to these regulations;

(c) Violates the Exchange Visitor Program regulations and/or the sponsor's rules governing the program, if, in the sponsor's opinion, termination is warranted;

(d) Fails to maintain the insurance coverage required under § 514.14 of these regulations; or,

(e) Engages in unauthorized employment.

§ 514.41 Change of category.

(a) The Agency may, in its discretion, permit an exchange visitor to change his or her category of exchange participation. Any change in category must be clearly consistent with and closely related to the participant's original exchange objective and necessary due to unusual or exceptional circumstances.

(b) A request for change of category along with supporting justification must be submitted to the Agency by the participant's sponsor. Upon Agency approval the sponsor shall issue to the exchange visitor a duly executed Form IAP–66 reflecting such change of category and provided a notification copy of such form to the Agency.

§ 514.42 Transfer of program.

(a) Program sponsors may permit an exchange visitor to transfer from one designated program to another designated program. The responsible officer of the program to which the exchange visitor is transferring must:

(1) Verify the exchange visitor's visa status; and

(2) Obtain, prior to transfer, a release signed by the responsible officer of the exchange visitor's current sponsor.

(b) The responsible officer of the program to which the exchange visitor is transferring shall issue to the exchange visitor a duly executed Form IAP–66 reflecting such transfer and provide a notification copy of such form to the Agency.

§ 514.43 Extension of program.

(a) Responsible officers may, pursuant to the provisions set forth in this section, extend an exchange visitor's participation in the Exchange Visitor Program.

(b) Responsible officers shall, under no circumstance, authorize an extension which would permit an exchange visitor to exceed the permissible period of participation authorized for his or her specific category.

(c) A responsible officer extending the program of an exchange visitor shall issue to the exchange visitor a duly executed Form IAP–66 reflecting such extension and provide a notification copy of such form to the Agency.

(d) An exchange visitor seeking a program extension in excess of that authorized for his or her specific category of participation shall:

(1) Adequately illustrate why exceptional or unusual circumstances justify such extension;

(2) Secure the prior written approval of the Agency for such extension; and

(3) Apply to the United States Immigration and Naturalization Service for approval of such extension.

§ 514.44 Two-Year Home-country physical presence requirement.

(a) **Statutory Basis for Rule.** § 212(e) of the Immigration and Nationality Act, as amended, provides in substance as follows:

(1) No person admitted under § 101(a)(15)(J) or acquiring such status after admission

(i) whose participation in the program for which he came to the United States was financed in whole or in part, directly or indirectly, by an agency of the United States Government or by the government of the country of his nationality or of his last legal permanent residence;

(ii) who at the time of admission or acquisition of status under § 101(a)(15)(J) was a national or resident of a country which the Director of the United States Information Agency, pursuant to regulations prescribed by him, had designated as clearly requiring the services of persons engaged in the field of specialized knowledge or skill in which the alien was engaged [See "Exchange Visitor Skills List", 49 FR 24194, *et seq.* (June 12, 1984) as amended];

(iii) who came to the United States or acquired such status in order to receive graduate medical education or training shall be eligible to apply for an immigrant visa, or for permanent residence, or for a nonimmigrant visa under section 101(a)(15)(H) or section 101(a)(15)(L) until it is established that such person has resided and been physically present in the country of his nationality or his last legal permanent residence for an aggregate of at least two years following departure from the United States.

(2) Upon the favorable recommendation of the Director of the United States Information Agency, pursuant to the request of an interested United States Government agency, or of the Commissioner of Immigration and Naturalization after the latter has determined that departure from the United States would impose exceptional hardship upon the alien's spouse or child (if such spouse or child is a citizen

of the United States or a legal permanent alien), or that the alien cannot return to the country of his nationality or last legal permanent resident because he would be subject to persecution on account of race, religion, or political opinion, the Attorney General may waive the requirement of such two-year foreign residence abroad in the case of any alien whose admission to the United States is found by the Attorney General to be in the national interest.

(3) Except in the case of an alien who is a graduate of a medical school pursuing a program in graduate medical education or training, the Attorney General, upon the favorable recommendation of the Director of the United States Information Agency, may also waive such two-year foreign residency requirement in any case in which the foreign country of the alien's nationality or last legal permanent residence has furnished the Director of the United States Information Agency a statement in writing that it has no objection to such waiver in the case of such alien.

(b) *Request for waiver on the basis of exceptional hardship or probable persecution on account of race, religion, or political opinion.* (1) An exchange visitor who seeks a waiver of the two-year home-country physical presence requirement on the grounds that such requirement would impose exceptional hardship upon the exchange visitor's spouse or child (if such spouse of child is a citizen of the United States or a legal permanent resident alien), or on the grounds that such requirement would subject the exchange visitor to persecution on account of race, religion, or political opinion, shall submit the application for waiver (INS Form I–612) to the District Office of the Immigration and Naturalization Service having administrative jurisdiction over the exchange visitor's place of temporary residence in the United States, or, if the exchange visitor has already departed the United States, to the district Office having administrative jurisdiction over the exchange visitor's last legal place of residence in the United States.

(2)(i) If the Commissioner of Immigration and Naturalization Service ("Commissioner") determines that compliance with the two-year home-country physical presence requirement would impose exceptional hardship upon the spouse or child of the exchange visitor, or would subject the exchange visitor to persecution on account of race, religion, or political opinion, the Commissioner shall transmit a copy of his determination together with a summary of the details of the expected hardship or persecution, to the Waiver Review Branch, office of Exchange Visitor Program Services, in the Agency's Office of General Counsel.

(ii) With respect to those cases in which the Commissioner has determined that compliance with the two-year home-county physical presence requirement would impose exceptional hardship upon the spouse or child of the exchange visitor, the Waiver Review Branch shall review the Commissioner's determination, together with the supporting evidence accompanying it, make a recommendation, and forward it to the Commissioner. If deem appropriate the Agency may request the views of each of the exchange visitors sponsors concerning the waiver application. Except as set forth in § 514.44(e)(2), *infra*, the recommendation of the Waiver Review Branch shall constitute the final decision of the Agency and such recommendation shall be forwarded to the Commissioner.

(iii) With respect to those cases in which the Commissioner has determined that compliance with the two-year home-country physical presence requirement would subject the exchange visitor to persecution on account of race, religion, or political opinion, the Waiver Review Branch shall review the Commissioner's determination, together with the supporting evidence accompanying it, and after consulting thereon with the Bureau of Human Rights and Humanitarian Affairs of the United States Department of State, make a recommendation, and forward such recommendation to the Commissioner. Except as set forth in § 514.44(e)(2), *infra*, the recommendation of the Waiver Review Branch shall constitute the final decision of the Agency and such recommendation shall be forwarded to the Commissioner.

(c) *Requests for waiver made by an interested United States Government agency.* If an exchange visitor is a participant in an exchange visitor program sponsored by or of interest to an agency of the United States Government, said agency may apply to the Waiver Review Branch for a waiver of the two-year home-country physical presence requirement on the grounds that the granting of the waiver would be in the national interest and the exchange visitor's compliance with said requirement would be detrimental to a program or activity of interest to that agency. The application shall identify by name or location the organization which will utilize the exchange visitor's services and the name and address of the exchange visitor in the United States. The Waiver Review Branch shall review the application and forward its recommendation to the Commissioner. Except as set forth in § 514.44(e)(2), *infra*, the recommendation of the Waiver Review Branch shall constitute the final decision of the Agency and such recommendation shall be forwarded to the Commissioner.

(d) *Requests for waiver made on the basis of a statement from the exchange visitor's home country that it has no objection to the waiver.* (1) Applications for waiver of the two-year home-country physical requirement may be supported by a statement of no objection by the exchange visitor's country of nationality of last legal permanent residence. The statement of no objection shall be directed to the Director through diplomatic channels; i.e., from the country's Foreign Office to the Agency through the U.S. Mission in the foreign country concerned, or through the foreign country's head of mission or duly appointed designee in the United States to the Director in the form of a diplomatic note. This note shall include applicant's full name, date and place of birth, and present address. Upon receipt of the no objection statement, the Waiver Review Branch shall instruct the applicant to complete a data sheet and to provide all Forms IAP–66 and the data sheet to the Waiver Review Branch. If deemed appropriate, the Agency may request the views of each of the exchange visitor's sponsors concerning the waiver application.

(2) Except as set forth in § 514.44(e)(2), *infra*, the recommendation of the Waiver Review Branch shall constitute the final decision of the Agency and such recommendation shall be forwarded to the Commissioner.

(3) An exchange visitor who is a graduate of a foreign medical school and who is pursuing a program in graduate medical education or training in the United States is prohibited under section 212(e) of the Immigration and Nationality Act from applying for a waiver on the basis of no objection from his or her country of nationality or last legal permanent residence.

(e) *The Exchange Visitor Waiver Review Board.* (1) The Exchange Visitor Waiver Review Board ("Board") shall consist of the following Agency officers:

(i) The Deputy Associate Director of the Bureau of Educational and Cultural Affairs, or his or her designee, who shall serve as presiding officer of the Board;

(ii) An officer appointed by the Deputy Associate Director of the Bureau of Educational and Cultural Affairs from an appropriate office of the Bureau; and

(iii) The country desk officer for the geographic area office responsible for the geographical area of the waiver applicant, or his or her designee.

(2) The Director of the office of Exchange Visitor Program Services or his or her designee shall serve as the Executive Secretary of the Board and shall present the facts of the waiver case to the Board, but shall not take part in the Board's deliberations.

(3) A person who has had substantial prior involvement in the particular case pending before the Board shall not be appointed to serve on the Board.

(4) The following waiver cases shall be referred to the Board for review:

(i) Cases involving requests of interested United States Government agencies, in which the recommendation of the Waiver Review Branch was unfavorable;

(ii) Cases in which another federal agency has provided the Agency with a written opposition to a waiver in which the recommendation of the Waiver Review was favorable;

(iii) Cases in which a no objection letter has been submitted by the government of the exchange visitor's country of nationality or last legal residence, and in which the exchange visitor's participation in an exchange visitor program was financed by the United States Government in an amount not exceeding $2,000, and as to which the recommendation of the Waiver Review Branch was unfavorable;

(iv) Cases involving claims of probable persecution on the grounds of race, religion, or political opinion, in which the Department of State has provided the Agency with a written opinion that there is no genuine basis for a claim of probable persecution on the ground alleged by the applicant, and as to which the recommendation of the Waiver Review Board was favorable; and,

(v) Cases in which for any reason the Waiver Review Branch requests Board review of its decision.

(f) *Action on cases referred to the Board.* (1) In each case to be referred to the Board pursuant to § 514.44(e), *supra*, the Waiver Review Branch shall transmit its complete file on the case along with a request to convene the Board, to the General Counsel of the Agency.

(2) The General Counsel shall promptly convene the Board.

(3) The General Counsel shall appoint, on a case-by-case basis, from among the attorneys in the Office of the General Counsel, one attorney to serve as legal advisor to the Board.

(4) Upon being convened, the Board shall review the case file and the policy, program, and foreign relations implications of the case.

(5) The Board may consult with the attorney in the Office of the General Counsel who has been designated to serve as legal advisor to the Board.

(6) The Board may request that officers of the Waiver Review Branch appear before the Board and explain orally the basis for the recommendation of the Waiver Review Branch; however, no persons other than members of the Board and the Board's legal advisor may be present during the Board's deliberations.

(7) At the conclusion of its review of the case, the Board shall make a written recommendation either granting or denying the waiver application.

(8) Each member of the Board shall sign the recommendation and promptly transmit the recommendation to the Waiver Review Branch for forwarding to the Commissioner.

(9) The recommendation of the Board in any case reviewed by it shall constitute the final recommendation of the Agency and such recommendation shall be forwarded to the Commissioner.

Subpart D—Sanctions

§ 514.50 Sanctions.

(a) *Reason for sanctions.* The Agency may, upon a determination by the office of Exchange Visitor Program Services ("EVPS"), impose sanctions against a sponsor which has:

(1) Willfully or negligently violated one or more provisions of this part;

(2) Evidenced a pattern of willful or negligent failure to comply with one or more provisions of this part;

(3) Committed an act of omission or commission which has or could have the effect of endangering the health, safety, or welfare of an exchange visitor; or,

(4) Committed an act or acts which may have the effect of bringing the Agency or the Exchange Visitor Program into notoriety or disrepute.

(b) *Lesser sanctions.* (1) In order to ensure full compliance with the regulations in this part, the Agency, in its discretion and depending on the nature and seriousness of the violation, may impose any or all of the following sanctions ("lesser sanctions") on a sponsor for any of the reasons set forth in § 514.50(a):

(i) a written reprimand to the sponsor, with a warning that repeated or persistent violations of the regulations in this Part may result in suspension or revocation of the sponsor's exchange visitor program designation, or other sanctions as set forth herein;

(ii) A declaration placing the exchange visitor sponsor on probation, for a period of time determined by the Agency in its discretion, signifying a pattern of serious willful or negligent violation of regulations such that further violations could lead to suspension or revocation;

(iii) A corrective action plan designed to cure the sponsor's violations; or,

(iv) A limitation or reduction in the authorized number of exchange visitors in the sponsor's program or in the geographic area of the sponsor's recruitment or activity.

(2) Within ten days of service of the written notice to the sponsor imposing any of the sanctions set forth in this paragraph, the sponsor may submit to EVPS any statement or information, including, if appropriate, any documentary evidence or affidavits in opposition to or mitigation of the sanction, and may request a conference. Upon its review and consideration of such submission, the Agency may, in its discretion, modify, withdraw, or confirm such sanction. The decision of EVPS with regard to lesser sanctions (i) to (iii) and (iv), if the proposed limitation in the size of the sponsor's program is equivalent to 10 percent or less of the number of authorized visitors in the sponsor's program during the previous calendar year, is not appealable.

(c) *Suspension or significant program limitation.* (1) Upon a finding that a suspension, or a reduction in the sponsor's program equivalent to a number greater than 10 percent of the number of authorized visitors, is warranted for any of the reasons set forth at § 514.50(a), EVPS shall given written notice to the sponsor of the Agency's intent to impose the sanction, specifying therein the reasons for such sanction and the effective date thereof, which shall be not sooner than 30 days after the date of the letter of notification.

(2) Prior to the proposed effective date of such sanction, the sponsor may submit a protest to EVPS, setting forth therein any reasons why suspension should not be imposed, and presenting any documentary evidence in support thereof.

(3) EVPS shall review and consider the sponsor's submission and, within seven (7) days of receipt thereof, notify the sponsor in writing of its decision on whether the sanction is to be affected. In the event that the decision is to impose the sanction, such notice shall inform the sponsor of its right to appeal the sanction and of its right to a formal hearing thereon.

(4) The sponsor may within ten (10) days after receipt of the aforesaid notice effecting the sanction, appeal the sanction to the Exchange Visitor

Program Designation, Suspension and Revocation Board ("Board") by filing a notice of appeal with the Agency's General Counsel, room 700, 301 4th Street, SW., Washington, DC 20547. The filing of the notice of appeal shall serve to stay the effective date of the sanction pending appeal.

Upon receipt of the notice of appeal, the General Counsel or his or her designee shall forthworth convene the Board. Thereafter, proceedings before the Board shall follow the regulations set forth in § 514.50(i), *infra*.

(d) *Summary suspension.* (1) EVPS may, upon a finding that a sponsor has willfully or negligently committed a serious act of omission or commission which has or could have the effect of endangering the health, safety, or welfare of an exchange visitor, and upon written notice to the sponsor specifying the reason therefor and the effective date thereof, notify the sponsor of the Agency's intent to suspend the designation of the sponsor's program for a period not to exceed sixty (60) days.

(2) No later than three (3) days after receipt of such notification, the sponsor may submit a rebuttal to the EVPS, setting forth therein any reasons why a suspension should be imposed.

(3) The sponsor may present any statement or information in such protest, including, if appropriate, any documentary evidence or affidavits in opposition to or mitigation of the sanction. Within three (3) days of receipt of such submissions, EVPS shall notify the sponsor in writing of its decision whether to effect the suspension. In the event the decision is to effect the suspension, such notice shall advise the sponsor of its right to appeal the suspension and of its right to a formal hearing thereon.

(4) The sponsor may, within ten (10) days after receipt of the aforesaid notice continuing the suspension, appeal the suspension to the Board by filing a notice of appeal with the Agency's General Counsel, room 700, 301 4th Street, SW., Washington, DC 20547. The filing of the notice of appeal of a summary suspension shall not serve to stay the suspension pending appeal.

(5) Upon receipt of the notice of appeal, the General Counsel or his or her designee shall, within three (3) days, convene the Board. Thereafter, proceeding before the Board shall follow the regulations set forth in § 514.50(i), *infra*.

(e) *Revocation.* (1) EVPS may, for any reason set forth at § 514.50(a), give the sponsor not less than thirty (30) days notice in writing of its intent to revoke the sponsor's exchange visitor program designation, specifying therein the grounds for such revocation and the effective date of the revocation. Revocation need not be preceded by the imposition of a summary suspension, a suspension, or any lesser sanctions.

(2) Within ten (10) days of receipt of the aforesaid notice of intent to revoke, the sponsor shall have an opportunity to show cause as to why such revocation should not be imposed, and may submit to EVPS any statement of information, including, if appropriate, any documentary evidence or affidavits in opposition to or mitigation of the violations charged.

(3) EVPS shall review and consider the sponsor's submission and thereafter notify the sponsor in writing of its decision on whether the revocation is to be effected. In the event that the decision on whether the revocation is to effect the revocation, such notice shall advise the sponsor of its right to appeal the revocation and of its right to a formal hearing thereon.

(4) The sponsor may, within twenty (20) days after receipt of the aforesaid notice effecting the revocation, appeal the revocation to the Board by filing a notice of appeal with the Agency's General Counsel, room 700, 301 4th Street, SW., Washington, DC 20547. The filing of the notice of appeal shall serve to say the effective date of the revocation pending appeal.

(5) Upon receipt of the notice of appeal the General Counsel or his or her designee shall, within ten (10) days, convene the Board. Thereafter, proceedings before the Board shall follow the regulations set forth in § 514.50(i), *infra*.

(f) *Denial of application for redesignation.* (1) EVPS shall give an applicant for redesignation not less than thirty (30) days notice in writing of its intentions to deny the application for exchange visitor program redesignation, specifying therein the grounds for such denial.

(2) Within ten (10) days of receipt of the aforesaid notice of intent to deny the application, the applicant shall have an opportunity to demonstrate why the application should be approved, and may submit to EVPS any statement or information including, if appropriate, any documentary evidence or affidavits in support of its application.

(3) EVPS shall review and consider the applicant's submission and thereafter notify the applicant in writing of its decision on whether the application for redesignation will be approved. In the event that the decision is to deny the applicant, such notice shall advise the applicant of its right to appeal the denial and of its right to a formal hearing thereon.

(4) The applicant may, within twenty (20) days after receipt of the aforesaid notice of denial, appeal the denial to the Board by filing a notice of appeal with the Agency's General Counsel, room 700, 301 4th Street, SW., Washington, DC 20547.

(5) Upon receipt of the notice of appeal the General Counsel or his or her designee shall, within ten (10) days, convene the Board. Thereafter, proceedings before the Board shall follow the regulations set forth in § 514.50(i), *infra*.

(g) *The Exchange Visitor Program Designation, Suspension, and Revocation Board.* (1) The Exchange Visitor Program Designation, Suspension, and Revocation Board ("Board") shall consist of:

(i) The Deputy Associate Director of the Bureau of Educational and Cultural Affairs, or his or her designee, who shall serve as presiding officer of the Board;

(ii) The Deputy Director of the relevant geographic area office, or his or her designee; and

(iii) A member of the public appointed by the Deputy Associate Director of the Bureau of Educational and Cultural Affairs. A different public member shall be appointed for each sanction case brought before the Board.

(2) The General Counsel of the Agency shall appoint an attorney in the Office of the General Counsel to prosecute the case before the Board on behalf of the Agency. Such attorney shall not take part in the deliberations of the Board.

(3) The General Counsel of the Agency shall also appoint an attorney in the Office of the General Counsel to serve as a legal advisor to the Board. Such attorney shall not have had any substantial prior involvement with the particular case pending before the Board.

(h) *General powers of the Board.* At any hearing before the Board pursuant to this Part, the Board may:

(1) Administer oaths and affirmations;

(2) Rule on offers of proof and receive any oral or documentary evidence;

(3) Require the parties to submit lists of proposed witnesses and exhibits, and otherwise regulate the course of the hearing;

(4) Hold conferences for the settlement or simplification of the issues by consent of the parties;

(5) Dispose of motions, procedural requests, or similar matters; and

(6) Make decisions, which shall include findings of fact and conclusions of law on all the material issues of fact and conclusions of law on all the material issues of fact, law or discretion

presented on the record, and the appropriate sanction or denial thereof.

(i) *Proceedings before the Board.* The following procedures shall govern all designation, suspension, summary suspension, and revocation proceedings before the Board:

(1) Upon being convened, the Board shall schedule a hearing, within ten (10) days, at which hearing the parties may appear on their own behalf or by counsel, present oral or written evidence, and cross-examine witnesses. A substantially verbatim record of the hearing shall be made and shall become a part of the record of the proceeding;

(2) At the conclusion of the hearing, the Board shall promptly review the evidence and issue a written decision within ten (10) days, signed by a majority of the members, stating the basis for its decision. The decision of the majority shall be the decision of the Board. If a Board member disagrees with the majority, the member may write a dissenting opinion;

(3) If the Board decides to affirm the suspension, summary suspension, revocation, or denial of redesignation, a copy of its decision shall be delivered to EVPS, the sponsor, the Immigration and Naturalization Service, and the Bureau of Consular Affairs of the Department of State. EVPS, at its discretion, may distribute the Board's decision as it deems appropriate; and

(4) The suspension, revocation, or denial of designation shall be effective as of the date of the Board's decision.

(j) *Effect of suspension, summary suspension, revocation, or denial of redesignation.* A sponsor against which an order of suspension, summary suspension, revocation, or denial of redesignation has been entered shall not thereafter issue any Forms IAP–66, advertise, recruit, or otherwise promote its program, and under no circumstances shall the sponsor facilitate the entry of an exchange visitor. Suspension, summary suspension, revocation, or denial of redesignation shall not invalidate any Forms IAP–66 issued prior to the effective date of the suspension, summary suspension, revocation, or denial of redesignation, nor shall the suspension, summary suspension, revocation, or denial of redesignation in any way diminish or restrict the sponsor's legal or financial responsibilities to existing program participants.

(k) *Miscellaneous*—(1) *Computation of time.* In computing any period of time prescribed or allowed by these regulations, the day of the act or event from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included unless it is a Saturday, a Sunday, or a legal holiday, in which event the period runs until the end of the next day which is not one of the aforementioned days. When the period of time prescribed or allowed is less than eleven (11) days, intermediate Saturdays, Sundays, or legal holidays, shall be excluded in the computation.

(2) *Service of notice on sponsor.* When used in these regulations the terms "written notice to the sponsor" shall mean service of written notice upon either the president, managing director, responsible officer, or alternate responsible officer of the sponsor.

Subpart E—Termination and Revocation of Programs

§ 514.60 Termination of Designation.

Designation shall be terminated when any of the circumstances set forth in this section occur.

(a) *Voluntary termination.* A sponsor may voluntarily terminate its designation by notifying the Agency of such intent. The sponsor's designation shall terminate upon such notification. Such sponsor may reapply for designation.

(b) *Inactivity.* A sponsor's designation shall automatically terminate for inactivity if the sponsor fails to comply with the minimum size or duration requirements, as specified in §§ 514.8 (a) and (b), in any twelve month period. Such sponsor may reapply for program designation.

(c) *Failure to file annual reports.* A sponsor's designation shall automatically terminate if the sponsor fails to file annual reports for two consecutive years. Such sponsor is eligible to reapply for program designation upon the filing of the past due annual reports.

(d) *Change in ownership or control.* An exchange visitor program designation is not assignable or transferable. A major change in ownership or control automatically terminates the designation. However, the successor sponsor may apply to the Agency for redesignation and may continue its exchange visitor activities while approval of the application for redesignation is pending before the Agency.

(1) With respect to a for-profit corporation, a major change in ownership shall be deemed to have occurred when thirty-three and one-third percent (33⅓ percent) or more of its stock is sold or otherwise transferred within a 12 month period;

(2) With respect to a not-for-profit corporation, a major change of control shall be deemed to have occurred when fifty percent or more of the board of trustees, or other like body vested with its management, is replaced within a 12 month period.

(e) *Loss of licensure or accreditation.* A sponsor's designation shall automatically terminate in the event that the sponsor fails to remain in compliance with local, state, federal, or professional requirements necessary to carry out the activity for which it is designated, including loss of accreditation or licensure.

(f) *Failure to apply for redesignation.* Prior to the conclusion of its current designation period, the sponsor is required to apply for redesignation pursuant to the terms and conditions of § 514.7. Failure to apply for redesignation will result in the automatic termination of the sponsor's designation. If so terminated, the former sponsor may apply for a new designation, but the program activity will be suspended during the pendency of the application.

§ 514.61 Revocation.

A designation may be terminated by revocation for cause as specified in § 514.60. A sponsor whose designation has been revoked may not apply for a new designation within a five-year period.

§ 514.62 Responsibilities of the sponsor upon termination or revocation.

Upon termination or revocation of its designation, the sponsor shall:

(a) Fulfill its responsibilities to all exchange visitors who are in the United States at the time of the termination or revocation;

(b) Notify exchange visitors who have not entered the United States that the program has been terminated unless a transfer to another designated program can be obtained; and

(c) Return all Forms IAP–66 in the sponsor's possession to the Agency within 30 days of program termination or revocation.

Appendix A to Part 514—Certification of Responsible Officers and Sponsors

In accordance with the requirement at § 514.5(c)(6), the text of the certifications shall read as follows:

1. Responsible Officers and Alternate Responsible Officers

I hereby certify that I am the responsible officer (or alternate responsible officer, specify) for exchange visitor program number _____, and that I am a United States citizen or permanent resident. I understand that the United States Information Agency may request supporting documentation as to my citizenship or permanent residence at any

time and that I must supply such documentation when and as requested. (Name of organization) agrees that my inability to substantiate the representation of citizenship or permanent residence made in this certification will result in the immediate withdrawal of its designation and the immediate return of or accounting for all Forms IAP–66 transferred to it.

Department of Health and Human Services

Administration for Children and Families

45 CFR Part 1305
Head Start Program; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 1305

RIN 0970–AB02

Head Start Program

AGENCY: Administration on Children, Youth and Families (ACYF), Administration for Children and Families (ACF), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: The Administration on Children, Youth and Families is amending 45 CFR part 1305 which governs eligibility requirements for enrollment of children in Head Start.

Currently, most Head Start grantees have more children living in their service areas than they are able to serve. Each grantee must make decisions regarding recruitment, selection and enrollment of children.

The purpose of this rule is to specify procedures that will assure that these decisions are carefully planned and made at the local level; give all interested families an opportunity to be considered for enrollment; and help maintain full enrollment, allowing as many eligible children as possible to be served.

EFFECTIVE DATE: This rule is effective November 9, 1992.

FOR FURTHER INFORMATION CONTACT: Douglas Klafehn, Acting Associate Commissioner, Head Start Bureau. (202)205–8569.

SUPPLEMENTARY INFORMATION:

I. Program Purpose

Head Start, as authorized under the Head Start Act (the Act), section 635 of Public Law 97–35, the Omnibus Budget Reconciliation Act of 1981, (42 U.S.C. 9831 *et seq.*) is a national program providing comprehensive child development services. These services are provided primarily to low-income children, age three to five, and their families. To help enrolled children achieve their full potential, Head Start programs provide comprehensive health, nutritional, educational, social and other services. In addition, Head Start programs are required to provide for the direct participation of parents of enrolled children. Parents receive training and education that fosters their understanding of and involvement in the development of their children. They also become involved in the development, conduct, and direction of local programs.

In fiscal year 1991, Head Start served 582,325 children through a network of approximately 1,340 grantees and 620 delegate agencies. Delegate agencies have approved written agreements with grantees to operate Head Start programs.

While Head Start is intended to serve primarily low-income children and their families, Head Start's regulations permit up to 10 percent of the children in local programs to be from families who are not low-income. The Act requires that a minimum of 10 percent of enrollment opportunities in each State be made available to children with disabilities. Such children are expected to participate in the full range of Head Start activities with their non-disabled peers, and to receive needed special education and related services.

II. Purpose of the Final Rule

The purpose of this rule is to define a process to be used by local Head Start programs for the recruitment, enrollment and selection of Head Start children that is organized, focused, and more uniform among grantees and which provides opportunities for the greatest number of children to be considered for Head Start services.

Currently, Head Start grantees are funded to serve a geographic area. This area may be a city, county, multicity, multicounty, or other-area that possesses a commonality of interest needed to operate a Head Start program. In the past, we have assumed that a grantee is responsible for providing Head Start services to its entire service area, even though its operations may have long been concentrated in certain parts of the area because resources were limited. We are concerned that, as funding for Head Start programs increases, grantees may tend to expand services in the areas where they are already operating, rather than move into unserved parts of their service area. We are, therefore, requiring: (1) That grantees clearly identify a specific service area which is agreed to, in writing, by the responsible HHS official, and (2) that grantees consider the needs of and recruit children from the entire geographic area they have agreed to serve, to the extent their financial resources allow. This, combined with the establishment of new grantees in currently unserved communities or service areas, will enable the maximum number of children to have an opportunity to enroll in Head Start.

In order to help children carry the gains they have made in Head Start into school, we are also requiring that once a child is enrolled in Head Start as either a three or a four year old, he or she is to remain in the program until kindergarten or first grade is available to the child in the child's community, except when there are compelling reasons for the child not to remain in Head Start. This would, in most instances, prevent a child from being enrolled as a three year old but not served at age four, as is possible under current regulations. This rule would also draw attention to the importance of grantees carefully weighing the need for more than one year of Head Start services when making decisions to enroll younger children, since serving a child for more than one year means that another child will not have the opportunity for a Head Start experience.

Under current regulations, when there are more income-eligible children than can be served, programs must select those families with the lowest income. When programs adhere to this single criterion, it limits their ability to respond to a variety of special circumstances in their communities, such as the needs of families involved in substance abuse or of single parents who are working.

In addition, the current regulation may cause programs to enroll three year old children and serve them for two years, not because they believe they need an additional year of service, but simply because their family income is slightly lower than another child's.

We are expanding the criteria for selecting among income-eligible children by allowing each program to define other criteria, in addition to lowest income. Such criteria might include the age of children or the special needs that a family may have. We believe this will result in programs establishing criteria for selection that are more closely based on the needs in their communities and the capacity of their programs. However, as programs determine their own selection criteria based on local needs and circumstances, we want to urge programs to consider serving the maximum number of children during the year before they enter public school. Programs are expected to serve the children with the greatest need for and who can benefit the most from Head Start. When a program's resources are limited, such choices should involve considering whether the needs of three year olds justify providing them with two years of service at the expense of eligible four year olds who would thereby not be served at all.

In addition to these major elements, this rule requires that Head Start grantees:

- Make decisions about the design of their program based on a periodic community needs assessment that includes the collection and analysis of data about demographics, available resources and the needs of families and children.
- Implement a recruitment process that is designed to inform all income-eligible families within their recruitment area of the availability of services so families may have a fair opportunity to apply and be considered for enrollment when the number of children who can be served is limited.
- Maintain funded enrollment so that resources can be used efficiently.
- Implement appropriate family support procedures for those children with patterns of unexcused absences so these children have a greater opportunity to obtain the benefits of regular attendance.

III. Rulemaking History

This Rule was published in the Federal Register (55 FR 29970) on July 23, 1990 as a Notice of Proposed Rulemaking (NPRM). The NPRM proposed amendments to part 1305 based on changing conditions that have affected the Head Start program over the past several years. The most significant factors are the following:

- Some grantees are not maintaining funded enrollment levels throughout the program year. In some cases, grantees achieve full enrollment in the beginning of the year but are not able to fill vacancies that occur during the year. In other cases, grantees are not able to achieve full enrollment at any time during the program year.
- Some grantees are serving children for more than one year simply because they need to fill vacancies. In some instances, this occurs because the program's recruitment area is too small and children must be served for two years simply to meet agreed upon enrollment levels, while children receive no services in communities outside the recruitment area.
- Many grantees are experiencing high turnover rates among program enrollees. The national average for children who drop out of the program after they have been enrolled is 20 percent of an agency's funded enrollment. There is a need to make sure that all grantees have systems in place for filling vacancies as they occur.
- Many grantees are finding that the number and location of eligible children in their service area have changed considerably over time. In some cases, there are many more children eligible to be served than in the past. Other grantees have experienced significant population shifts from one part of their service area to another. There is a need to make sure that enrollment opportunities are available where the need for Head Start services is greatest.
- The number of State and locally funded preschool programs continues to increase. In some cases, this means a significant decrease in the number of children who are available to be served by Head Start. Grantees must take into account other preschool services for low-income children in their community when determining the need for Head Start services in specific areas.

This final rule reorganizes the content of part 1305 and sets forth additional actions to be taken by Head Start grantees and delegate agencies to recruit, select and enroll those children and families who are most in need of or who will benefit the most from Head Start services.

The final rule contains revisions to the NPRM which incorporate, as appropriate, the comments received from the general public, local Head Start staff and parents, national organizations and other interested agencies.

IV. Section by Section Discussion of the NPRM

We received 85 letters with over 250 separate comments on various sections of the proposed revisions to part 1305. Many of the comments were positive and supportive of the clarity and comprehensive nature of the revisions. A number of comments also expressed specific concerns regarding particular sections of the proposed regulation. We have reviewed all of the comments received and, after full consideration, have modified some sections of the NPRM. Discussed below are the revised sections and the rationale for making a change from the NPRM.

Section 1305.2 Definitions

The definition of children with disabilities in paragraph (a) was changed since the publication of the NPRM. It now reflects the amended definition in the Individuals with Disabilities Education Act (IDEA) as required by section 640(d) of the Head Start Act.

In response to comments received, the phrase "within the past 12 months" was added to the definition of migrant families in paragraph (1) to make it clear that children served by Migrant Head Start programs are to be from mobile migrant families that have moved within the past 12 months.

Section 1305.3 Determining Community Needs

With respect to paragraph (a), we have made a small clarifying change, requiring grantee service areas to be approved by the responsible HHS official.

Several respondents from programs serving migrant farmworker families expressed concern about their ability to identify their service area at the time they submit a refunding application unless the service area could be broadly defined. For example, if crops fail or if the weather is bad, migrants may not return to an area where they have been in the past. We believe that the language in the NPRM is adequate to allow for negotiation with the responsible HHS official to approve a geographic area that would be broad enough to meet the needs of Migrant Head Start programs. However, the final rule has been changed to require that the responsible HHS officials approve each grantee's service area in writing.

A number of comments were received concerning the requirement in paragraph (b) that each grantee must conduct a community needs assessment once every three years and that it contain specific data regarding the local community. Some of the respondents supported the community needs assessment information requirements and indicated that the data are reasonable and available. Some indicated that the data are typical of those currently being used in their agencies. Other respondents disagreed. Some indicated that Census data are the only reliable data available in their communities and that these data are only useful for a limited number of years. Some indicated that the racial and ethnic data are not reliable because of undercounting in some communities. Several indicated that data on the numbers of low-income children with disabilities are not available, since disabling conditions are not identified by income categories.

In response to these concerns, we modified some of the data requirements. We ordered the data requirements into a more logical sequence of information and we clarified some of the wording. We also acknowledge that some of the data, particularly Census data, may not remain accurate over the length of time that they are needed. We expect that grantees will estimate some of the information, particularly the numbers of eligible children, and may have to use proxy data or make adjustments as decennial Census data become less current. We have inserted the word

"estimated" regarding the number, geographic location and racial and ethnic composition of children in the grantee's service area.

Comments received on paragraph (c) of this section of § 1305.3 were favorable. A technical change was made for clarification.

Paragraph (d) of § 1305.3 proposed an annual update of the community needs assessment to assure that changes in the community are reflected in the Head Start program decision-making process. Several respondents suggested that we eliminate the updates in years two and three since communities do not change that much. We believe that there may be instances where there are significant changes in community circumstances over a one or two year period, and, therefore, we are keeping the language as it was proposed. We do not expect grantees to conduct an extensive review of community needs assessment information in the second and third years, but rather to limit analysis and information to those areas where there have been significant changes that require a program to adjust plans for Head Start services.

There were no comments regarding paragraphs (e) and (f) of § 1305.3 and no changes have been made.

Section 1305.4 Age of Children and Family Income Eligibility

Paragraph (a) of § 1305.4 proposed a change in the age eligibility requirement by stating that a child would be eligible for Head Start services when the child is at least three years of age by the date used in the community to determine eligibility for public school, unless the approved grant award specifies otherwise. All comments on this paragraph were positive and no changes have been made.

Several respondents were concerned that the discussion regarding giving four-year-old children priority over other age groups implied that programs were limited to serving four-year-old children. The purpose of the discussion in the preamble to the NPRM was to emphasize the principle that programs must make decisions regarding the needs of each child when selecting those to be served by Head Start. Some children may have needs that would warrant more than one year of Head Start services. Others may not have the same level of need. All children, once enrolled in Head Start, are to remain in the program until they are eligible for public school, unless there are compelling reasons for the child not to remain in Head Start.

Paragraph (b) reiterates the current requirement contained in § 1305.4 that at least 90 percent of the children who are enrolled in the program must be from low-income families. Several respondents, many of them parents of children enrolled in the same Head Start Program, requested that the income-eligibility guidelines be raised to allow programs the option of serving children from families that are barely over the income-eligibility guidelines. Others suggested that Head Start income eligibility should be the same as that of the USDA Child Care Feeding Program for free and reduced meals. We are not changing the requirement that at least 90 percent of families must be at or below the income-eligibility guidelines, since we are currently serving only a portion of the eligible children from families that are at or below the guidelines. In addition, changing this requirement would involve a change in the Head Start legislation regarding how the poverty line is determined.

There were no comments on paragraphs (c), (d), and (e) of § 1305.4 and no changes have been made.

Section 1305.5 Recruitment of Children

This section describes actions to be taken by Head Start grantees and delegate agencies when recruiting Head Start children.

Paragraph (a) requires that each Head Start Program employ a recruitment process that assures full enrollment in the Head Start Program. Several respondents wrote in support of this requirement, indicating that it reflects current practice in their Head Start Programs. Others, while supporting an intensive recruitment effort, were concerned that the NPRM implied door-to-door recruitment that is not always possible because of limited staff and safety factors. This paragraph is a restatement of the existing policy contained in the Enrollment and Attendance Policies in Head Start, S–30–317–1–40, A. 1.a., 1.b and 1.c. The intent of this requirement is to reach those children most in need of or who could benefit most from Head Start services in order to provide them with an opportunity to apply for admission to the program. In response to the concern stated above, we changed the word "must" to "may" in the last sentence of paragraph (a) concerning activities in the recruitment process.

Paragraph (b) of the NPRM added a new requirement that, during the recruitment process that occurs prior to the beginning of the enrollment year, a Head Start program must solicit applications from as many Head Start eligible families within the recruitment area as possible. If necessary, the program must assist families in filling out the application form in order to assure that all application requirements for the program are completed before the selection process begins. There was one comment supporting this section and no change has been made.

Paragraph (c) of the NPRM added a new requirement that, for each program, except migrant programs, the number of applications obtained during the recruitment process that occurs prior to the beginning of the enrollment year must be at least 20 percent greater than the enrollment opportunities that are anticipated to be available over the course of the next enrollment year. There were 21 comments on this section. Some respondents supported having a specific, measurable requirement regarding the number of applications each program must obtain during the major recruitment effort. Most, however, disagreed, indicating that the amount was not realistic, especially for large programs. Some indicated that it would not eliminate the need for ongoing recruitment to fill vacancies within 30 days of their occurrence, since families on the waiting list are often as transient as families enrolled in the program. Others indicated that, as programs begin to serve a higher percentage of the eligible population in certain communities, it will become more difficult to adhere to this requirement. We agree that current and future increases in the number of children served by each grantee may make it increasingly difficult for grantees to meet the requirement for a fixed percentage of applications. We are modifying paragraph (c) of this section by dropping a fixed percentage of applications that programs are required to obtain during recruitment and are requiring programs simply to obtain a number of applications that is greater than the enrollment opportunities that are available over the course of the year. This will allow each Head Start program to establish an individualized target.

We proposed a new requirement to address the drop-out pattern of migrant programs in paragraph (d) of the NPRM that, prior to beginning Head Start services in a new community, migrant programs must obtain a number of applications that is at least 20 percent greater than the enrollment opportunities that are available while they are providing services in that community. Respondents from programs serving children of migrant farmworkers did not believe that this requirement was realistic for their programs, since it is often difficult to anticipate the number of families that will require

Head Start services. Most families are enrolled as they arrive in a community and need Head Start services. Enrollment is often gradual in the first few weeks of services. We agree that this requirement would be difficult to implement for programs serving migrant children and we are eliminating this paragraph from the final regulation.

Paragraph (e) in the NPRM contained an exception to the requirements contained in paragraphs (c) and (d) for programs that do not obtain sufficient applications from Head Start eligible families to meet the requirement. Since we are eliminating the requirements of obtaining twenty percent more applications than the enrollment opportunities that are available that were contained in paragraphs (c) and (d), it is not necessary to retain paragraph (e) and it has been eliminated from the final regulation.

Section 1305.6 Selection Process

This section contains requirements for establishing and implementing a process for selecting children and families to be enrolled in the program. Using selection criteria that are based on the information obtained from the community needs assessment, each program must go through a process that selects those children and families that are most in need of and who could benefit most from Head Start services. This is intended to assure that each program considers all of the children and families applying for admission to the program in order to identify the children and families that are most in need of Head Start services, as defined by each program for the community it is serving.

Paragraph (a) incorporates the requirement found in the Enrollment and Attendance Policies, S–30–317–1–40, A.1.e., regarding the selection of children and families. It requires that each grantee and delegate agency must establish a written process for selecting children and families that is based on the program's specific selection criteria. A single comment on this paragraph came from a director of a program serving migrant farmworker families. The respondent indicated that it is difficult for migrant programs to have an extensive selection process since families are enrolled as they arrive in a community. While it may be difficult for programs serving migrant farmworker families to compare all children and families that could be served when selecting which families have the greatest need for Head Start services, we believe that it is important for migrant programs to have pre-established criteria for selecting each family as they apply for services. Families and children that meet the criteria would then be selected for services. We, therefore, are not changing this paragraph.

Paragraph (b) requires that, in selecting children and families to be served, the Head Start program shall consider income, age, and individual child and family needs. This would change the current requirement in § 1305.4 that children from the lowest income families shall be given preference. All comments related to this paragraph were positive, supporting the opportunity to consider child and family needs in addition to income when selecting children to be served by the Head Start program. We have, however, added new language previously contained in the NPRM in paragraph (d) of this section, that proposed to require programs to give priority to serving children for whom kindergarten or first grade is not available.

Based on comments received on paragraph (d) of the NPRM, we are eliminating the requirement to give priority and, instead, are making the availability of kindergarten or first grade to the child one of several criteria to consider when selecting children for enrollment in Head Start. If kindergarten or first grade is available to the child in the child's community, we encourage programs to give that child a lower priority for service. We recognize that for reasons that include those discussed in comments on paragraph (d), there will be situations when a child should remain in Head Start when kindergarten or first grade is available. For example, we recognize that, in some instances, children who are age-eligible for kindergarten do not have the option of going to kindergarten because of local circumstances that include readiness testing, and lack of transportation. Head Start programs, therefore, may provide services to the child who does not pass a kindergarten readiness test and would otherwise remain at home for the entire year. On the other hand, if a child can attend kindergarten or first grade, we believe the child should receive a lower priority for enrollment in Head Start than a child who cannot be enrolled in school. To do otherwise may deny another eligible child the opportunity to participate in Head Start.

Paragraph (c) of the NPRM added a new requirement that each grantee and delegate agency must make available at least 10 percent of the enrollment opportunities in its program to children with disabilities who meet the definition of children with disabilities in § 1305.2(a). Such children must also meet the Head Start eligibility requirements contained in § 1305.4. The Head Start Act requires that 10 percent of enrollment opportunities within each State be made available to children with disabilities. Paragraph (c) proposes to require each Head Start program to meet the 10 percent figure in order to assure that all programs are serving children with disabilities in all areas in the State.

There were several comments on this paragraph. Some supported requiring grantees and delegate agencies to provide at least 10 percent of their enrollment opportunities to children with disabilities, since that is already the practice with most programs. Others were concerned about the feasibility of achieving this requirement at the grantee level in light of the growth of early intervention programs for preschool children that are operated by public school systems. We agree that there is an increase in the number of programs serving preschool children with disabilities and that it may be more difficult to recruit children for Head Start services. In recent years, 13 percent of Head Start's enrollment has consisted of children with disabilities. Most programs have successfully achieved enrollment levels of at least 10 percent. We are retaining this requirement as it was written in the NPRM because we believe that there are many children with disabilities who would be best served in a Head Start program. In some instances, children are served by Head Start for some portion of each week and by another local agency for the remainder of the week. We continue to encourage this arrangement.

Paragraph (c) also states that an exception to the requirement can be granted by the responsible HHS official if a program made an attempt to comply but could not because income-eligible children with disabilities are being served by other agencies or when Head Start is not the most appropriate placement for them. There were several comments related to obtaining an exception. Most respondents were concerned about the growing competition for serving children with disabilities in early intervention programs. This could mean that many programs would be requesting an exception on a regular basis. In response to this, we are retaining the possibility of an exception to the requirement, but we are broadening the reason for an exception by eliminating the words "income eligible." This requires programs to make enrollment opportunities available to children with

REDESIGNATION TABLE—Continued

IV. Impact Analysis

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be prepared for major rules, which are defined in the Order as any rule that has an annual effect on the national economy of $100 million or more, or certain other specified effects. The Department has determined that these rules are not major rules within the Executive Order because they will not have an annual effect on the economy of $100 million or more; nor result in a major increase in costs or prices for consumers, any industries, and governmental agencies, or any geographic region; and, they will not have an adverse effect on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or import markets.

This final rule specifies procedures that will assure that decisions regarding Head Start recruitment, selection and enrollment of children are carefully planned and made at the local level; give all interested families an opportunity to be considered for enrollment; and help maintain full enrollment, allowing as many eligible children as possible to be served. Such procedures are necessary to address changing conditions that have affected the Head Start program over the past several years.

We expect any additional costs attributable to these provisions to be significantly less than $100 million. The main reason for this is that many grantees already meet most of the new requirements. For example, with respect to the community needs assessment requirement, Head Start grantees have always been required to complete a community needs assessment as part of the application for refunding. In the past, the grant application instructions have not included specific data requirements or explicit requirements for analyzing the data to determine key program decisions. The added specificity of this rule will assist grantees by focusing their community needs assessment efforts on specific data. Grantees will not be required to conduct demographic surveys or create new data bases, thereby minimizing costs.

The Department has always monitored grantee recruitment practices along with other program requirements. In addition, the Department has reviewed community needs assessment data during the grant review process. These efforts will not change as a result of this rule and the costs should remain stable for Federal government activities and for many of the grantees in complying with this rule as a whole, the intent of which is to assure that minimum and consistent standards in this important area are achieved nationally.

When grantees design their program and recruitment systems, they are currently required to consider community needs. Most grantees comply with this requirement. We do not have data that allows us to estimate the number that will need major changes in their recruitment practices. However, since carrying out recruitment and enrollment activities is an existing requirement for grantees, we do not believe the new requirements will result in significant added costs in this area nationally. Some of the specific rules some grantees follow in recruiting and enrolling children may change but not their overall level of effort.

Costs associated with implementing this rule will be mainly administrative and minimal given the fact that the changes required will not affect the entire grantee population and the fact that the changes required are "best practices" that many grantees have been successfully using in their programs. Thus, the Department concluded that these regulations are not major rules within the meaning of the Executive Order because they do not meet the threshold criteria.

We believe the benefits derived from this rule will far outweigh any costs incurred. The benefits include a more focused and uniform process for Head Start recruitment, enrollment and selection activities, thereby, resulting in the provision of services to as many eligible children as possible who are most in need of Head Start services.

Regulatory Flexibility Act of 1980

Consistent with the Regulatory Flexibility Act of 1980 (5 U.S.C. ch. 6), we try to anticipate and reduce the impact of rules and paperwork requirements on small businesses. For each rule with a "significant economic impact on a substantial number of small entities" we prepare an analysis describing the rule's impact on small entities. Small entities are defined by the Act to include small businesses, small non-profit organizations, and small governmental entities. While this regulation would affect small entities, it is not substantial. In many instances small entities already meet most of the requirements, since many are restatements of current policy and since they are considered best practice. For these reasons, the Secretary certifies that this rule will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1980 (the Act), Public Law 96–511, all Departments are required to submit to the Office of Management and Budget (OMB) for review and approval any reporting or recordkeeping requirements in a proposed or final rule. The final rule contains information collection requirements in section 1305.3 concerning community needs assessment. We estimate that this requirement will take each grantee 40 hours to complete annually. As one-third of the grantees (447) will be doing the needs assessment each year, the total number of hours annually will be 17,800. The requirement for the update reports in years two and three have minimal burden hours because we anticipate only a very small number of grantees will have any significant changes in their communities to report. In accordance with section 3504(h) of the Act, the Department has submitted § 1305.3 of the final rule to OMB for its review and approval.

Organizations and individuals desiring to submit comments on the information collection requirement should direct them to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building (room 308), Washington, DC 20503, Attention Desk Officer for the Administration for Children and Families.

List of Subjects in 45 CFR Part 1305

Head Start Enrollment, Education of Disadvantaged, Grant Programs/Social Programs, Disabilities, Preschool Education.

(Catalog of Federal Domestic Assistance Program Number 93.600, Project Head Start)

Dated: May 21, 1992.
Anne B. Bamhart,
Assistant Secretary for Children and Families.

Approved: June 29, 1992.
Louis W. Sullivan,
Secretary.

For the reasons set forth in the preamble, title 45, chapter XIII, subchapter B, part 1305 of the Code of Federal Regulations is amended as follows:

Part 1305 is revised to read as follows:

PART 1305—ELIGIBILITY, RECRUITMENT, SELECTION, ENROLLMENT AND ATTENDANCE IN HEAD START

Sec.
1305.1 Purpose and scope.
1305.2 Definitions.
1305.3 Determining community needs.
1305.4 Age of children and family income eligibility.
1305.5 Recruitment of children.
1305.6 Selection process.
1305.7 Enrollment and re-enrollment.
1305.8 Attendance.
1305.9 Policy on fees.
1305.10 Compliance.

Authority: 42 U.S.C. 9831 et seq.

§ 1305.1 Purpose and scope.

This part prescribes requirements for determining community needs and recruitment areas. It contains requirements and procedures for the eligibility determination, recruitment, selection, enrollment and attendance of children in Head Start programs and explains the policy concerning the charging of fees by Head Start programs.

§ 1305.2 Definitions.

(a) *Children with disabilities* means children with mental retardation, hearing impairments including deafness, speech or language impairments, visual impairments including blindness, serious emotional disturbance, orthopedic impairments, autism, traumatic brain injury, other health impairments or specific learning disabilities, and who, by reason thereof, need special education and related services. The term children with disabilities for children aged 3 to 5, inclusive, may, at a State's discretion, include children experiencing developmental delays, as defined by the State and measures by appropriate diagnostic instruments and procedures, in one or more of the following areas: physical development, cognitive development, communication development, social or emotional development, and who, by reason thereof, need special education and related services.

(b) *Enrollment* means the official acceptance of a family by a Head Start program and the completion of all procedures necessary for a child and family to begin receiving services.

(c) *Enrollment opportunities* mean vacancies that exist at the beginning of the enrollment year, or during the year because of children who leave the program, that must be filled for a program to achieve and maintain its funded enrollment.

(d) *Enrollment year* means the period of time, not to exceed twelve months, during which a Head Start program provides center or home-based services to a group of children and their families.

(e) *Family* means all persons living in the same household who are:

(1) Supported by the income of the parent(s) or guardian(s) of the child enrolling or participating in the program, and (2) related to the parent(s) or guardian(s) by blood, marriage, or adoption.

(f) *Funded enrollment* means the number of children which the Head Start grantee is to serve, as indicated on the grant award.

(g) *Head Start eligible* means a child that meets the requirements for age and family income as established in this regulation or, if applicable, as established by grantees that meet the requirements of section 645(a) (2) of the Head Start Act. Up to ten percent of the children enrolled may be from families that exceed the low-income guidelines.

(h) *Head Start program* means a Head Start grantee or its delegate agency(ies).

(i) *Income* means gross cash income and includes earned income, military income (including pay and allowances), veterans benefits, social security benefits, unemployment compensation, and public assistance benefits.

(j) *Income guidelines* means the official poverty line specified in section 652 of the Head Start Act.

(k) *Low-income family* means a family whose total annual income before taxes is equal to, or less than, the income guidelines. For the purpose of eligibility, a child from a family that is receiving public assistance or a child in foster care is eligible even if the family income exceeds the income guidelines.

(l) *Migrant family* means, for purposes of Head Start eligibility, a family with children under the age of compulsory school attendance who change their residence by moving from one geographic location to another, either intrastate or interstate, within the past twelve months, for the purpose of engaging in agricultural work that involves the production and harvesting of tree and field crops and whose family income comes primarily from this activity.

(m) *Recruitment* means the systematic ways in which a Head Start program identifies families whose children are eligible for Head Start services, informs them of the services available, and encourages them to apply for enrollment in the program.

(n) *Recruitment area* means that geographic locality within which a Head Start program seeks to enroll Head Start children and families. The recruitment area can be the same as the service area or it can be a smaller area or areas within the service area.

(o) *Responsible HHS official* means the official of the U.S. Department of Health and Human Services having authority to make Head Start grant awards, or his or her designee.

(p) *Selection* means the systematic process used to review all applications for Head Start services and to identify those children and families that are to be enrolled in the program.

(q) *Service area* means the geographic area identified in an approved grant application within which a grantee may provide Head Start services.

(r) *Vacancy* means an unfilled enrollment opportunity for a child and family in the Head Start program.

§ 1305.3 Determining community needs.

(a) Each grantee must identify its proposed service area in its Head Start grant application and define it by county or sub-county area, such as a municipality, town or census tract or a federally recognized Indian reservation. A grantee's service area must be approved, in writing, by the responsible HHS official in order to assure that the service area is of reasonable size and does not overlap with that of other Head Start grantees.

(b) Each Head Start grantee must conduct a community needs assessment within its service area once every three years. The community needs assessment must include the collection and analysis of the following information about the grantee's Head Start service area:

(1) The demographic make-up of Head Start eligible children and families, including their estimated number, geographic location, and racial and ethnic composition;

(2) Other child development and child care programs that are serving Head Start eligible children, including publicly funded State and local preschool programs, and the approximate number of Head Start eligible children served by each;

(3) The estimated number of children with disabilities four years old or

younger, including types of disabilities and relevant services and resources provided to these children by community agencies;

(4) Data regarding the education, health, nutrition and social service needs of Head Start eligible children and their families;

(5) The education, health, nutrition and social service needs of Head Start eligible children and their families as defined by families of Head Start eligible children and by institutions in the community that serve young children;

(6) Resources in the community that could be used to address the needs of Head Start eligible children and their families, including assessments of their availability and accessibility.

(c) The Head Start grantee must use information from the community needs assessment to:

(1) Help determine the grantee's philosophy, and its long-range and short-range program objectives;

(2) Determine the type of component services that are most needed and the program option or options that will be implemented;

(3) Determine the recruitment area that will be served by the grantee, if limitations in the amount of resources make it impossible to serve the entire service area.

(4) If there are delegate agencies, determine the recruitment area that will be served by the grantee and the recruitment area that will be served by each delegate agency.

(5) Determine appropriate locations for centers and the areas to be served by home-based programs; and

(6) Set criteria that define the types of children and families who will be given priority for recruitment and selection.

(d) In each of the two years following completion of the community needs assessment, the grantee must conduct a review to determine whether there have been significant changes in the information described in paragraph (b) of this section. If so, the community needs assessment must be updated and the decisions described in paragraph (c) of this section must be reconsidered.

(e) The recruitment area must include the entire service area, unless the resources available to the Head Start grantee are inadequate to serve the entire service area.

(f) In determining the recruitment area when it does not include the entire service area, the grantee must:

(1) Select an area or areas that are among those having the greatest need for Head Start services as determined by the community needs assessment; and

(2) Include as many Head Start eligible children as possible within the recruitment area, so that:

(i) The greatest number of Head Start eligible children can be recruited and have an opportunity to be considered for selection and enrollment in the Head Start program, and

(ii), the Head Start program can enroll the children and families with the greatest need for its services.

§ 1305.4 Age of children and family income eligibility.

(a) To be eligible for Head Start services, a child must be at least three years old by the date used to determine eligibility for public school in the community in which the Head Start program is located, except in cases where the Head Start program's approved grant provides specific authority to serve younger children. Examples of such exceptions are programs serving children of migrant families and Parent and Child Center programs.

(b) At least 90 percent of the children who are enrolled in each Head Start program must be from low-income families. Up to ten percent of the children who are enrolled may be children from families that exceed the low-income guidelines but who meet criteria the program has established for selecting such children and who would benefit from Head Start services.

(c) The family income must be verified by the Head Start program before determining that a child is eligible to participate in the program.

(d) Verification must include examination of any of the following: Individual Income Tax Form 1040, W–2 forms, pay stubs, pay envelopes, written statements from employers, or documentation showing current status as recipients of public assistance.

(e) A signed statement by an employee of the Head Start program, identifying which of these documents was examined and stating that the child is eligible to participate in the program, must be maintained to indicate that income verification has been made.

§ 1305.5 Recruitment of children.

(a) In order to reach those most in need of Head Start services, each Head Start grantee and delegate agency must develop and implement a recruitment process that is designed to actively inform all families with Head Start eligible children within the recruitment area of the availability of services and encourage them to apply for admission to the program. This process may include canvassing the local community, use of news releases and advertising, and use of family referrals and referrals from other public and private agencies.

(b) During the recruitment process that occurs prior to the beginning of the enrollment year, a Head Start program must solicit applications from as many Head Start eligible families within the recruitment area as possible. If necessary, the program must assist families in filling out the application form in order to assure that all information needed for selection is completed.

(c) Each program, except migrant programs, must obtain a number of applications during the recruitment process that occurs prior to the beginning of the enrollment year that is greater than the enrollment opportunities that are anticipated to be available over the course of the next enrollment year in order to select those with the greatest need for Head Start services.

§ 1305.6 Selection process.

(a) Each Head Start program must have a formal process for establishing selection criteria and for selecting children and families that considers all eligible applicants for Head Start services. The selection criteria must be based on those contained in paragraphs (b) and (c) of this section.

(b) In selecting the children and families to be served, the Head Start program must consider the income of eligible families, the age of the child, the availability of kindergarten or first grade to the child, and the extent to which a child or family meets the criteria that each program is required to establish in § 1305.3(c)(6).

(c) At least 10 percent of the total number of enrollment opportunities in each grantee and each delegate agency during an enrollment year must be made available to children with disabilities who meet the definition for children with disabilities in § 1305.2(a). An exception to this requirement will be granted only if the responsible HHS official determines, based on such supporting evidence as he or she may require, that the grantee made a reasonable effort to comply with this requirement but was unable to do so because there was an insufficient number of children with disabilities in the recruitment area who wished to attend the program and for whom the program was an appropriate placement based on their Individual Education Plans (IEP), with services provided directly by Head Start or in conjunction with other providers.

(d) Each Head Start program must develop at the beginning of each

enrollment year and maintain during the year a waiting list that ranks children according to the program's selection criteria to assure that eligible children enter the program as vacancies occur.

§ 1305.7 Enrollment and re-enrollment.

(a) Each child enrolled in a Head Start program, except those enrolled in a migrant program, must be allowed to remain in Head Start until kindergarten or first grade is available for the child in the child's community, except that the Head Start program may choose not to enroll a child when there are compelling reasons for the child not to remain in Head Start, such as when there is a change in the child's family income and there is a child with a greater need for Head Start services.

(b) A Head Start grantee must maintain its funded enrollment level. When a program determines that a vacancy exists, no more than 30 calendar days may elapse before the vacancy is filled. A program may elect not to fill a vacancy when 60 calendar days or less remain in the program's enrollment year.

(c) If a child has been found income eligible and is participating in a Head Start program, he or she remains income eligible through that enrollment year and the immediately succeeding enrollment year.

§ 1305.8 Attendance.

(a) When the monthly average daily attendance rate in a center-based program falls below 85 percent, a Head Start program must analyze the causes of absenteeism. The analysis must include a study of the pattern of absences for each child, including the reasons for absences as well as the number of absences that occur on consecutive days.

(b) If the absences are a result of illness or if they are well documented absences for other reasons, no special action is required. If, however, the absences result from other factors, including temporary family problems that affect a child's regular attendance, the program must initiate appropriate family support procedures for all children with four or more consecutive unexcused absences. These procedures must include home visits or other direct contact with the child's parents. Contacts with the family must emphasize the benefits of regular attendance, while at the same time remaining sensitive to any special family circumstances influencing attendance patterns. All contacts with the child's family as well as special family support service activities provided by program staff must be documented.

(c) In circumstances where chronic absenteeism persists and it does not seem feasible to include the child in either the same or a different program option, the child's slot must be considered an enrollment vacancy.

§ 1305.9 Policy on fees.

A Head Start program must not prescribe any fee schedule or otherwise provide for the charging of any fees for participation in the program. If the family of a child determined to be eligible for participation by a Head Start program volunteers to pay part or all of the costs of the child's participation, the Head Start program may accept the voluntary payments and record the payments as program income.

Under no circumstances shall a Head Start program solicit, encourage, or in any other way condition a child's enrollment or participation in the program upon the payment of a fee.

§ 1305.10 Compliance.

A grantee's failure to comply with the requirements of this Part may result in a denial of refunding or termination in accordance with 45 CFR part 1303.

Office of Management and Budget

Budget Rescissions and Deferrals; Notice

OFFICE OF MANAGEMENT AND BUDGET

Budget Rescissions and Deferrals

To the Congress of the United States:

In accordance with the Congressional Budget and Impoundment Control Act of 1974, I herewith report seven deferrals of budget authority, totaling $930.9 million.

These deferrals affect International Security Assistance programs as well as programs of the Agency for International Development and the Departments of Agriculture, Defense, Health and Human Services, and State. The details of these deferrals are contained in the attached report.

George Bush.

The White House, October 1, 1992.

[ ] Multi–year: (expiration date)	[ ] Contract authority
[X] No–Year	[ ] Other

JUSTIFICATION: This account was established to facilitate cease–fire monitoring, demobilization, and transition to peace in El Salvador. Funds were transferred into this account pursuant to P.L. 101–513, Section 531(f) (2). These funds are available solely to support costs of demobilization, retraining, relocation, and reemployment in civilian pursuits of former combatants in the conflict in El Salvador. Funds are available for obligation and expenditure only upon notification by the President to the Congress that the Government of El Salvador and representatives of the Farabundo Marti National Liberation Front (FMLN) have reached a permanent settlement of the conflict, including a final agreement on a cease– fire. This action is taken pursuant to the Antideficiency Act (31 U.S. C. 1512).

Deferral No. 93–3

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93–344

AGENCY: Department of Agriculture	New budget authority..... $ 242,572,000 (16 U.S.C. 576b)
BUREAU: Forest Service	Other budgetary resources..... $ 483,617,206
Appropriation title and symbol: Cooperative Work 1/ 12X8028	Total budgetary resources..... $ 726,189,206
	Amount to be deferred: Part of year..... $ _____ Entire year..... $ 364,582,206
OMB identification code: 12–8028–0–7–999	**Legal authority (in addition to sec. 1013):** [X] Antideficiency Act [ ] Other _____
Grant program: [ ] Yes [X] No	
Type of account or fund: [ ] Annual [ ] Multi–year: _____ (expiration date) [X] No–Year	**Type of budget authority:** [X] Appropriation [ ] Contract authority [ ] Other

JUSTIFICATION: Under the Cooperative work account, funds are received from States, counties, timber sale operators, individuals, associations, and others. These funds are expended by the Forest Service as authorized by law and the terms of the applicable trust agreements. The work benefits the national forest users, research investigations, reforestation, and administration of private forest lands. Much of the work for which deposits have been made cannot be done, or is not planned to be done, during the same year that the collections are being realized. Examples include areas where timber operators have not completed all of the contract obligations during the year funds are deposited. As a result, restoration efforts cannot begin, and the funds cannot be obligated this year. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Deferral No. 93–4

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93–344

AGENCY: Department of Agriculture	New budget authority..... $ 27,278,000 (16 U.S.C. 490)
BUREAU: Forest Service	Other budgetary resources..... $ 81,975,029
Appropriation title and symbol: Expenses, brush disposal 1/ 12X5206	Total budgetary resources..... $ 109,253,029
	Amount to be deferred: Part of year..... $ _____ Entire year..... $ 40,241,029
OMB identification code: 12–9922–0–2–302	**Legal authority (in addition to sec. 1013):** [X] Antideficiency Act [ ] Other _____
Grant program: [ ] Yes [X] No	
Type of account or fund: [ ] Annual [ ] Multi–year: _____ (expiration date) [X] No–Year	**Type of budget authority:** [X] Appropriation [ ] Contract authority [ ] Other

JUSTIFICATION: Purchasers of National Forest timber are required to deposit to the Forest Service the established cost for disposing of brush and other debris resulting from timber cutting operations authorized by 16 U.S.C. 490. The deposits becoming available in the current year are estimated, and the related disposal operations are planned for the following year. Efficient program planning and accomplishment is facilitated by operating a stable program well within the funds available in any one year for this purpose. Much of the brush disposal work for which fees are collected cannot be done in the same year because of weather conditions or because harvesting is not completed. The Forest Service is planning for a stable year–to–year program, which will require $69 million in 1993. The current fiscal year reserve of $40 million is established pursuant to the provisions of the Antideficiency Act (31 U.S.C. 1512) as a reserve for contingencies.

Type of account or fund: [ ] Annual	**Type of budget authority:** [X] Appropriation
[ ] Multi–year: _____ (expiration date)	[ ] Contract authority
[X] No–Year	[ ] Other _____

JUSTIFICATION: Section 501(a) of the Foreign Relations Authorization Act of 1976 (Public Law 94–141) and Section 414(b) (1) of the Refugee Act of 1980 (Public Law 96–212) amended Section 2(c) of the Migration and Refugee Assistance Act of 1962 (22 U.S.C. 2601) by authorizing a fund to enable the President to provide emergency assistance for unexpected urgent refugee and migration needs.

Executive Order No. 11922 of June 16, 1976, allocated all funds appropriated to the President for the Emergency Fund to the Secretary of State but reserved for the President the determination of assistance to be furnished and the designation of refugees to be assisted by the Fund.

These funds have been deferred pending Presidential decisions required by Executive Order No. 11922. Funds will be released as the President determines assistance to be furnished and designates refugees to be assisted by the Fund. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

DEPARTMENT OF LABOR

Employment Standards Administration

Wage and Hour Division

29 CFR Part 541

RIN 1215-AA65

Defining and Delimiting the Terms "Any Employee Employed in a Bona Fide Executive, Administrative, or Professional Capacity (Including any Employee Employed in the Capacity of Academic Administrative Personnel or Teacher in Elementary or Secondary Schools), or in the Capacity of Outside Salesman"

AGENCY: Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: This document provides the final regulations for certain workers employed in computer-related occupations under 29 CFR part 541. These rules implement the provisions of Public Law 101–583, enacted November 15, 1990, which requires the issuance of regulations to permit computer systems analysts, computer programmers, software engineers, and other similarly skilled professional workers to qualify for exemption under section 13(a)(1) of the Fair Labor Standards Act (FLSA). Regulations in 29 CFR part 541, contain the criteria for exemption under section 13(a)(1) of the Act from the minimum wage and overtime compensation requirements of the Act for executive, administrative, professional and outside sales personnel.

DATES: These rules are effective November 9, 1992.

FOR FURTHER INFORMATION CONTACT: Karen R. Keesling, Acting Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, room S–3502, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 219–8305. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

There are no reporting or recordkeeping requirements contained in these regulations.

II. Background

Section 13(a)(1) of the FLSA exempts any employee employed in a bona fide executive, administrative, or professional capacity (including any employee employed in the capacity of academic administrative personnel or teacher in elementary or secondary schools), or in the capacity of outside salesman (as such terms are defined and delimited from time to time by regulations of the Secretary). The existing regulations, 29 CFR part 541, provide that, in order to be exempt as a bona fide executive, administrative or professional employee, an individual must meet certain tests with respect to job duties and responsibilities and must be compensated on a salary basis at no less than a specified amount.

Section 2 of Public Law 101–583, enacted November 15, 1990, provides that not later than 90 days after the date of enactment of the Act, the Secretary of Labor shall promulgate regulations that permit computer systems analysts, computer programmers, software engineers, and other similarly skilled professional workers as defined in such regulations to qualify as exempt executive, administrative, or professional employees under section 13(a)(1) of the Fair Labor Standards Act of 1938 (29 U.S.C. 213(a)(1)). Such regulations shall provide that if such employees are paid on an hourly basis they shall be exempt only if their hourly rate of pay is at least 6½ times greater than the applicable minimum wage rate under section 6 of the Act (29 U.S.C. 206).

Pursuant to Public Law 101–583, an interim final rule was published in the **Federal Register** on February 27, 1991 (56 FR 8250), with a comment period that closed April 29, 1991. This rule added a new § 541.5c to 29 CFR part 541 to exempt workers in the computer field who met the new duties tests specified in the regulations and whose regular rate of pay, regardless of whether paid on a salary basis or on an hourly basis, was in excess of 6½ times the FLSA minimum wage. The interim final rule did not alter the exemption criteria for salaried workers in computer-related occupations who earn an amount equal to or less than 6½ times the minimum wage. Such workers continued to be eligible for exemption if the existing requirements in 29 CFR part 541 (i.e., duties and responsibilities) were met, typically in either an executive or administrative capacity. However, such salaried workers were not exempt by virtue of their employment in the specified computer-related occupations. Likewise, such workers paid on an hourly basis at rates of pay equal to or less than 6½ times the minimum wage continued to be ineligible for exemption for failure to meet the "salary basis" requirement generally applicable to all other exempt categories in the private sector.

Sixty-eight comments were received during the comment period on the interim final rule from employers, trade associations, law firms, and individuals. The major commenters and the issues they raised are discussed below, as are the significant changes that have been made in the final regulatory text in response to the comments received.

III. Discussion of Major Comments Received

National Association of Computer Consultant Businesses, the law firm of Epstein, Becker & Green, the law firm of Blackwell, Sanders, Matheny, Weary & Lombardi, Total System Services, Association of Data Processing Service Organizations (ADAPSO), Professional Services Council, CDI Corporation, and the Texas Employment Commission all commented that the interim final rule was inconsistent with the intent of Public Law 101–583. These commenters, for the most part, argue that the statutory language specifically requires the Secretary of Labor to permit salaried workers employed in the specified computer-related occupations to qualify as exempt executive, administrative, or professional employees, regardless of whether their pay exceeds 6½ times the minimum wage, and that the exemption must also be made available to such workers who are compensated on an hourly basis provided that they receive more than 6½ times the minimum wage.

L.J. Gonzer Associates, Additional Technical Support, Inc., and the law firm of Devin & Drohan generally viewed the interim final rule as too narrow and suggested that the term "other similarly skilled professional workers" should not be limited to computer-related occupations, as provided by the statute, but expanded to additional areas not within the scope of Public Law 101–583 such as to hardware engineers, other engineers, or all other categories of "professional" employees whether or not in the computer field. Similarly, the National Technical Services Association, without endorsing or objecting to the interim final rule, posed several questions about other highly-skilled workers not included in the statute who perform tasks that are facilitated by the use of computers, e.g., an engineer conducting flight systems analysis, and requested that the status of these and similar workers be clarified.

The American Engineering Association commented that Public Law 101–583 was prejudicial, repressive, and targets a very small percentage of the nation's technical workforce, and urged the Department, through hearings, to seek repeal by those who initiated the legislation.

The Department of Personnel of Washington County Courthouse (WI) and the Dalkon Shield Claimants Trust objected to the requirement of 6½ times the minimum wage as being too high.

In addition, another 53 comments were received from individuals working as computer systems analyst/programmers or engineers who ordinarily obtain employment in their fields through service firms, some of whom referred to themselves as "job shoppers".[1] For the most part, these individuals are accustomed to compensation on an hourly basis with premium pay for overtime, and they expressed general opposition to the enactment of Public Law 101–583.

The Department also has included in the record correspondence from members of the House Committee on Education and Labor who were the principal House sponsors of the amendment, Representatives Austin Murphy (Chairman, Labor Standards Subcommittee) and William Goodling (Ranking Minority Member), who contended that the interim final rule was inconsistent with the language of the statutory amendment, as well as to the underlying Congressional intent. They stated that the two sentences of the amendment should be read separately. The first, which states that certain highly-skilled computer professionals should qualify for exemption, contains no reference to any particular wage or salary requirement. The second sentence, they contend, then adds an additional requirement for those computer professionals who are compensated on an hourly basis. Similar views were also expressed by Senator John F. Kerry, a sponsor of the amendment in the Senate, in recent correspondence.

In issuing the interim final rule, the Department concluded that Congress intended that the exemption was applicable to highly-skilled computer workers paid more than the equivalent of 6½ times the minimum wage, regardless of how paid. The Department has carefully considered the comments received and made a further review of the statutory provision and its legislative history. In light of the fact that the legislative history is not free from doubt,[2] and that the language of the provision itself is more conducive to the reading suggested by the commenters, the Department has concluded that the new exemption for certain highly-skilled computer professionals is not limited to employees whose pay exceeds 6½ times the minimum wage. Rather, that limitation is imposed only upon those computer professional employees who are paid on an hourly basis.

Thus, this final regulation provides that the statutory exemption for highly-skilled computer-related occupations is not limited to those employees whose pay exceeds 6½ times the minimum wage, regardless of whether paid on a salary or on an hourly basis, as was provided by the interim final rule. In addition, consistent with the statutory characterization of these employees as professionals, the Department has deleted § 541.5c in the interim final rule and is adopting new exemption criteria in § 541.3 to permit the specified computer-related occupations to qualify for exemption as professional employees. The exemption in § 541.3 for these occupations is defined more fully in subpart B—Interpretations, under a new § 541.303. Section 541.302(h) of existing subpart B (renumbered herein as § 541.301), which discussed why computer programmers and systems analysts were not included in the learned professions prior to Public Law 101–583, is deleted, and § 541.312 is revised to permit an exception from the "paid on a salary basis" requirements of § 541.118 for those computer professional employees who are paid on an hourly basis at a rate in excess of 6½ times the minimum wage.

In addition to the substantive comments on the scope of Public Law 101–583 discussed above, commenters also submitted technical suggestions, some of which have been adopted. While the basic requirements for exemption as contained in § 541.5c of the interim final rule are retained in the new § 541.303, the final rule makes the following clarifying changes:

—The exemption is expressly limited to employees in computer systems analysis, programming, software engineering, or related work in software functions;
—A list of the more common job titles in use in the industry is added for illustration purposes;
—Editorial changes are made in the primary duties test for exemption;
—The exemption is not dependent on any particular academic requirements, but rather on proficiency in the theoretical and practical application of a body of highly-specialized knowledge in computer systems analysis, programming, and software engineering;
—The exemption excludes employees who operate computers or who are engaged in the manufacture, repair, or maintenance of computer hardware; and
—Employees within the scope of the exemption may also qualify for exemption under § 541.1 or § 541.2, if applicable.

Executive Order 12291

This final rule in not a "major rule" within the meaning of Executive Order 12291, in that it is not likely to result in (1) an annual effect on the economy of $100 million or more, (2) a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, no regulatory impact analysis is required.

Regulatory Flexibility Analysis

The Department has determined that the final regulation will not have a significant economic impact on a substantial number of small entities. This conclusion is based on the fact that the proposal merely incorporates a narrow, technical modification imposed by statute. Therefore, no regulatory flexibility analysis is required. The Secretary of Labor has certified to this effect to the Chief Counsel for Advocacy of the Small Business Administration.

Document Preparation

This document was prepared under the direction and control of Karen R. Keesling, Acting Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor.

List of Subjects in 29 CFR Part 541

Labor, Minimum wages, Overtime pay, Salaries, Wages.

Accordingly, part 541 of title 29 of the Code of Federal Regulations is amended as set forth below.

---

[1] Of these comments, one was co-signed by 55 individuals.

[2] Sponsors of the legislation and others making floor statements during the debate suggested that the exception was narrowly crafted and intended to apply only to those employees who are paid in excess of 6½ times the minimum wage. On the other hand, Senator Kerry, one of the Senate sponsors, was of the view that the legislation called for a revamping of outdated regulations that failed to recognize certain computer industry employees as professionals.

Signed at Washington, DC on this 2d day of October 1992.

Lynn Martin,

Secretary of Labor.

Judith A. Sotherlund,

Deputy Assistant Secretary for Employment Standards.

Karen R. Keesling,

Acting Administrator, Wage and Hour Division.

PART 541—DEFINING AND DELIMITING THE TERMS "ANY EMPLOYEE EMPLOYED IN A BONA FIDE EXECUTIVE, ADMINISTRATIVE, OR PROFESSIONAL CAPACITY (INCLUDING ANY EMPLOYEE EMPLOYED IN THE CAPACITY OF ACADEMIC ADMINISTRATIVE PERSONNEL OR TEACHER IN ELEMENTARY OR SECONDARY SCHOOLS), OR IN THE CAPACITY OF OUTSIDE SALESMAN"

The authority citation for part 541 continues to read as follows:

Authority: 29 U.S.C. 213; Public Law 101–583, 104 Stat. 2871; Reorganization Plan No. 6 of 1950 (3 CFR 1945–53 Comp., p. 1004); Secretary's Order No. 13–71 (36 **Federal Register** 8755).

2. Section 541.3 of subpart A is amended by deleting the semicolon and the word "and" and substituting a comma and the word "or" at the end of paragraph (a)(3); by adding a new paragraph (a)(4); and by revising paragraph (e) to read as follows:

§ 541.3 Professional.

(a) * * *

(4) Work that requires theoretical and practical application of highly-specialized knowledge in computer systems analysis, programming, and software engineering, and who is employed and engaged in these activities as a computer systems analyst, computer programmer, software engineer, or other similarly skilled worker in the computer software field, as provided in § 541.303; and

* * * * *

(e) Who is compensated for services on a salary or fee basis at a rate of not less than $170 per week ($150 per week, if employed by other than the Federal Government in Puerto Rico, the Virgin Islands, or American Samoa), exclusive of board, lodging, or other facilities: *Provided*, That this paragraph shall not apply in the case of an employee who is the holder of a valid license or certificate permitting the practice of law or medicine or any of their branches and who is actually engaged in the practice thereof, nor in the case of an employee who is the holder of the requisite academic degree for the general practice of medicine and is engaged in an internship or resident program pursuant to the practice of medicine or any of its branches, nor in the case of an employee employed and engaged as a teacher as provided in paragraph (a)(3) of this section: *Provided further*, That an employee who is compensated on a salary or fee basis at a rate of not less than $250 per week (or $200 per week, if employed by other than the Federal Government in Puerto Rico, the Virgin Islands, or American Samoa), exclusive of board, lodging, or other facilities, and whose primary duty consists of the performance either of work described in paragraph (a) (1), (3), or (4) of this section, which includes work requiring the consistent exercise of discretion and judgment, or of work requiring invention, imagination, or talent in a recognized field of artistic endeavor, shall be deemed to meet all of the requirements of this section: *Provided further*, That the salary or fee requirements of this paragraph shall not apply to an employee engaged in computer-related work within the scope of paragraph (a)(4) of this section and who is compensated on an hourly basis at a rate in excess of 6½ times the minimum wage provided by section 6 of the Act.

§ 541.5C [Removed]

3. Section 541.5c is removed.

§ 541.302 [Amended]

4. In subpart B of part 541, § 541.302 is amended by removing paragraph (h).

§§ 541.301, 541.302, and 541.303 [Redesignated as 541.300, 541.301 and 541.302]

5. In subpart B of part 541, existing §§ 541.301, 541.302, and 541.303 are redesignated as 541.300, 541.301, and 541.302, respectively, and a new § 541.303 is added to read as follows:

§ 541.303 Computer Related Occupations Under Public Law 101–583.

(a) Pursuant to Public Law 101–583, enacted November 15, 1990, § 541.3(a)(4) provides that computer systems analysts, computer programmers, software engineers, or other similarly skilled workers in the computer software field are eligible for exemption as professionals under section 13(a)(1) of the Act. Employees who qualify for this exemption are highly-skilled in computer systems analysis, programming, or related work in software functions. Employees who perform these types of work have varied job titles. Included among the more common job titles are computer programmer, systems analyst, computer systems analyst, computer programmer analyst, applications programmer, applications systems analyst, applications systems analyst/programmer, software engineer, software specialist, systems engineer, and systems specialist. These job titles are illustrative only and the list is not intended to be all-inclusive. Further, because of the wide variety of job titles applied to computer systems analysis and programming work, job titles alone are not determinative of the applicability of this exemption.

(b) To be considered for exemption under § 541.3(a)(4), an employee's primary duty must consist of one or more of the following:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software, or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing, or modification of computer systems or programs, including prototypes, based on a related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) a combination of the aforementioned duties, the performance of which requires the same level of skills..

(c) The exemption provided by § 541.3(a)(4) applies only to highly-skilled employees who have achieved a level of proficiency in the theoretical and practical application of a body of highly-specialized knowledge in computer systems analysis, programming, and software engineering, and does not include trainees or employees in entry level positions learning to become proficient in such areas or to employees in these computer-related occupations who have not attained a level of skill and expertise which allows them to work independently and generally without close supervision. The level of expertise and skill required to qualify for this exemption is generally attained through combinations of education and experience in the field. While such employees commonly have a bachelor's or higher degree, no particular academic degree is required for this exemption, nor are there any requirements for licensure or certification, as is required for the exemption for the learned profession.

(d) The exemption does not include employees engaged in the operation of computers or in the manufacture, repair, or maintenance of computer hardware

and related equipment. Employees whose work is highly dependent upon, or facilitated by, the use of computers and computer software programs, e.g., engineers, drafters, and others skilled in computer-aided design software like CAD/CAM, but who are not in computer systems analysis and programming occupations, are also excluded from this exemption.

(e) Employees in computer software occupations within the scope of this exemption, as well as those employees not within its scope, may also have managerial and administrative duties which may qualify the employees not within its scope, may also have managerial and administrative duties which may qualify the employees for exemption under § 541.1 or § 541.2 (see §§ 541.205(c)(7) and 541.207(c)(7) of this subpart).

6. In subpart B of part 541, § 541.312 is revised to read as follows:

§ 541.312 Salary basis.

The salary basis of payment is explained in § 541.118 in connection with the definition of "executive." Pursuant to Public Law 101–583, enacted November 15, 1990, payment "on a salary basis" is not a requirement for exemption in the case of those employees in computer-related occupations, as defined in § 541.3(a)(4) and § 541.303, who otherwise meet the requirements of § 541.3 and who are paid on an hourly basis if their hourly rate of pay exceeds 6½ times the minimum wage provided by section 6 of the Act.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

Passed over the President's veto

S. 12/P.L. 102–385
Cable Television Consumer Protection and Competition Act of 1992. (Oct. 5, 1992; 106 Stat. 1460; 45 pages) Price: $1.50

H.R. 2194/P.L. 102–386
To amend the Solid Waste Disposal Act to clarify provisions concerning the application of certain requirements and sanctions to Federal facilities. (Oct. 6, 1992; 106 Stat. 1505; 14 pages) Price: $1.00

H.J. Res. 560/P.L. 102–387
Waiving certain enrollment requirements with respect to any appropriations bill for the remainder of the One Hundred Second Congress. (Oct. 6, 1992; 106 Stat. 1519; 1 page) Price: $1.00

H.R. 5518/P.L. 102–388
Department of Transportation and Related Agencies Appropriations Act, 1993. (Oct. 6, 1992; 106 Stat. 1520; 51 pages) Price: $1.50

H.R. 5679/P.L. 102–389
Departments of Veterans Affairs and Housing and

Urban Development, and Independent Agencies Appropriations Act, 1993. (Oct. 6, 1992; 106 Stat. 1571; 49 pages) Price: $1.50

H.R. 3654/P.L. 102-390

To provide for the minting of commemorative coins to support the 1996 Atlanta Centennial Olympic Games and the programs of the United States Olympic Committee, to reauthorize and reform the United States Mint, and for other purposes. (Oct. 6, 1992; 106 Stat. 1620; 13 pages) Price: $1.00

H.R. 5368/P.L. 102-391

Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1993. (Oct. 6, 1992; 106 Stat. 1633; 70 pages) Price: $2.25

H.R. 5427/P.L. 102-392

Legislative Branch Appropriations Act, 1993. (Oct. 6, 1992; 106 Stat. 1703; 26 pages) Price: $1.00

H.R. 5488/P.L. 102-393

Treasury, Postal Service, and General Government Appropriations Act, 1993. (Oct. 6, 1992; 106 Stat. 1729; 63 pages) Price: $2.00

H.R. 5677/P.L. 102-394

Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1993. (Oct. 6, 1992; 106 Stat. 1792; 36 pages) Price: $1.25

H.R. 5678/P.L. 102-395

Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1993. (Oct. 6, 1992; 106 Stat. 1828; 48 pages) Price: $1.50

H.R. 5504/P.L. 102-396

Department of Defense Appropriations Act, 1993. (Oct. 6, 1992; 106 Stat. 1876; 73 pages) Price: $2.25

S. 1766/P.L. 102-397

To add to the area in which the Capitol Police have law enforcement authority, and for other purposes. (Oct. 6, 1992; 106 Stat. 1949; 4 pages) Price: $1.00

S.J. Res. 23/P.L. 102-398

To consent to certain amendments enacted by the legislature of the State of Hawaii to the Hawaiian Homes Commission Act, 1920. (Oct. 6, 1992; 106 Stat. 1953; 1 page) Price: $1.00

H.R. 5058/P.L. 102-399

To authorize appropriations for the American Folklife Center for fiscal year 1993. (Oct. 7, 1992; 106 Stat. 1954; 1 page) Price: $1.00

H.R. 5389/P.L. 102-400

United States Commission on Civil Rights Authorization Act of 1992. (Oct. 7, 1992; 106 Stat. 1955; 1 page) Price: $1.00

H.R. 5630/P.L. 102-401

Head Start Improvement Act of 1992. (Oct. 7, 1992; 106 Stat. 1956; 5 pages) Price: $1.00

Last List October 8, 1992

ELECTRONIC BULLETIN BOARD

Free **Electronic Bulletin Board** Service for Public Law Numbers and the **Federal Register** Table of Contents is available on 202-275-1538 or 275-0920.

Public Laws

102d Congress, 2nd Session, 1992

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 102d Congress, 2nd Session, 1992.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers

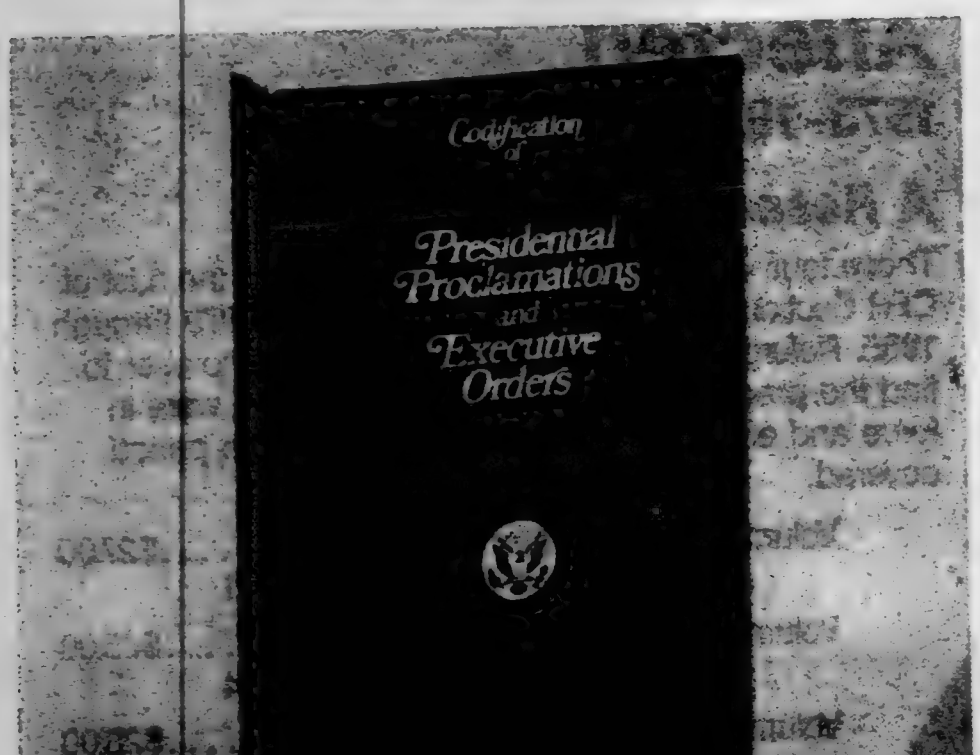
.... Order now ! . . . .



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

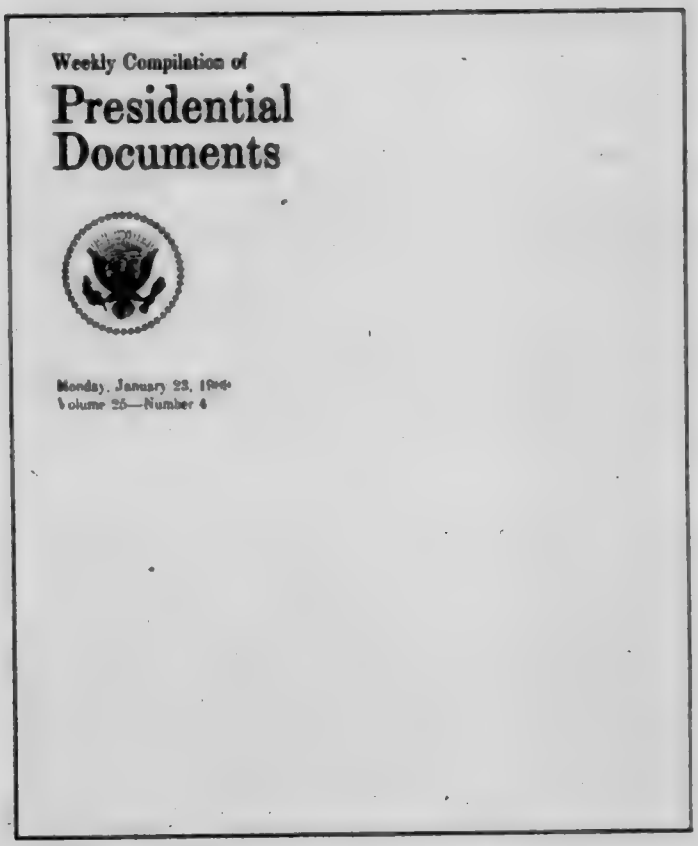
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1992

The GUIDE to record retention is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

The President

Presidential Determination No. 92–48 of September 30, 1992

Presidential Determination To Drawdown DOD Stocks for Counternarcotics Assistance for Colombia

Memorandum for the Secretary of State [and] the Secretary of Defense

Pursuant to the authority vested in me by Section 506(a)(2) of the Foreign Assistance Act of 1961, as amended, 22 U.S.C. 2318(a)(2) (the "Act"), I hereby determine that it is in the national interest of the United States to drawdown defense articles from the stocks of the Department of Defense, defense services of the Department of Defense, and military education and training for the purpose of providing counternarcotics assistance to Colombia.

Therefore, I hereby direct the drawdown of up to $7 million of such defense articles from the stocks of the Department of Defense, defense services of the Department of Defense, and military education and training for the purposes and under the authorities of Chapter 8 of Part I of the Act.

The Acting Secretary of State is authorized and directed to report this determination to the Congress, and to arrange for its publication in the **Federal Register**.

Presidential Determination No. 92–49 of September 30, 1992

Presidential Determination To Drawdown DOD Stocks for Disaster Assistance for Pakistan

Memorandum for the Secretary of State [and] the Secretary of Defense

Pursuant to the authority vested in me by Section 506(a)(2) of the Foreign Assistance Act of 1961, as amended, 22 U.S.C. 2318(a)(2) (the "Act"), I hereby determine that it is in the national interest of the United States to drawdown defense articles from the stocks of the Department of Defense, defense services of the Department of Defense, and military education and training, for the purpose of providing disaster assistance in Pakistan.

Therefore, I hereby authorize the furnishing of up to $5 million of such defense articles from the stocks of the Department of Defense, defense services of the Department of Defense, and military education and training, for the purposes and under the authorities of Chapter 9 of Part I of the Act.

The Acting Secretary of State is authorized and directed to report this determination to the Congress and to arrange for its publication in the **Federal Register**.

Proclamation 6485 of October 8, 1992

National Customer Service Week, 1992

By the President of the United States of America

A Proclamation

In a thriving free enterprise system such as ours, which provides consumers with a wide range of goods and services from which to choose, the most successful businesses are those that display a strong commitment to customer satisfaction. Today foreign competition as well as consumer demands are requiring greater corporate efficiency and productivity. If the United States is to remain a leader in the changing global economy, highest quality customer service must be a personal goal of every employee in business and industry.

A business built on customer service understands and anticipates the customer's needs. It designs goods and services to meet those needs and builds products that perform to customer expectations. It then packages them carefully, labels them correctly, sells them at a fair price, delivers them as scheduled, and follows up, as necessary, to satisfy the customer. This kind of commitment to service leads to customer loyalty and to genuine improvements at the bottom line.

A business will do a better job of providing high quality goods and services by listening to its employees and by empowering them with opportunities to make a difference. Customer service professionals work in the front lines where a firm meets its customers; where supply meets demand. With responsive policies and procedures and with simple courtesy, customer service professionals can go a long way toward ensuring customer satisfaction and eliciting the next round of orders and purchases.

The Congress, by Senate Joint Resolution 166, has designated the week of October 4 through October 10, 1992, as "National Customer Service Week" and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week of October 4 through October 10, 1992, as National Customer Service Week. I invite all Americans to observe this week with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of October, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

Proclamation 6486 of October 8, 1992

General Pulaski Memorial Day, 1992

By the President of the United States of America

A Proclamation

Each October 11, when our Nation honors the memory of General Casimir Pulaski, the great Revolutionary War hero who died on this date in 1779, we also celebrate the deep and abiding friendship that exists between the Polish and American peoples. That friendship has been rooted in a shared love of liberty and democratic government, and as we proudly reflect on the past, we also look forward to continuing cooperation between our two countries in this new, post-Cold War era.

Before he came to the United States more than 200 years ago, Casimir Pulaski had fought in the struggle to free his native Poland from foreign domination and repressive rule. By the time the young Count was forced into exile, he was, as Benjamin Franklin noted, "famous throughout Europe for his bravery and conduct in the defense of the liberties of his country." Although Count Pulaski would not live to see the liberation of his beloved homeland, no amount of adversity could deter him from a cause as universally important as that of freedom. This skilled horseman and fighter thus adopted our ancestors' struggle as his own, volunteering for service in the Continental Army, where he was named a General and eventually granted command of his own cavalry unit.

General Pulaski and his troops fought with great tenacity in a number of major campaigns, including at Brandywine and Trenton. Impressed by Pulaski's fearlessness and persistence, General George Washington later wrote to the Congress that "the Count's valor and active zeal on all occasions have done him great honor."

It was such zeal for the cause of liberty that inspired General Pulaski to lead a bold yet dangerous charge during the seige of Savannah on October 9, 1779. He was mortally wounded in the attempt and died 2 days later.

General Pulaski and other martyrs in America's War for Independence did not die in vain, however, and today we know that their hard-won victory helped to ignite the continuing expansion of freedom around the globe. On this occasion we remember, especially, the generations of courageous Poles who have shared in the epic struggle for liberty and self-determination. From our own Savannah, Georgia, to places such as Westerplatte, the Katyn Forest, and the Gdansk shipyards, brave Poles have made heroic, and sometimes costly, stands for freedom. Their courage and resolve should remain an inspiration to us all.

Having triumphed over decades of communist rule, not with musket and bayonet, but with voices and votes, petitions and prayers, the people of a free and independent Poland are now working to complete the challenging transition to democracy and to a thriving, market-oriented economy. The United States is proud to cooperate in this effort through a wide range of trade, investment, and technical assistance programs, including the Polish-American Enterprise Fund.

Americans of Polish ancestry continue to play an important role in promoting stronger political, cultural, and economic ties between the United States and Poland, and as we join these citizens in remembering General Casimir Pulaski, we also give thanks for the contributions that they are making to our common future.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim October 11, 1992, as General Pulaski Memorial Day. I direct the appropriate government officials to display the flag of the United States on all government buildings on that day, and I invite all Americans to observe the occasion with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of October, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

George Bush

Rules and Regulations

Federal Register
Vol. 57, No. 198
Tuesday, October 13, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FARM CREDIT ADMINISTRATION

12 CFR Parts 614 and 619

RIN 3052-AB13

Loan Policies and Operations; Definitions; Lending Authorities and Purchase and Sale of Interests in Loans; Effective Date

AGENCY: Farm Credit Administration.

ACTION: Notice of effective date.

SUMMARY: The Farm Credit Administration (FCA) published final regulations under parts 614 and 619 on August 24, 1992 (57 FR 38237). The final regulations amend 12 CFR parts 614 and 619 governing the lending, loan sale and purchase, and loan participation authorities of Farm Credit System institutions. In accordance with 12 U.S.C. 2252, the effective date of the final rule is 30 days from the date of publication in the Federal Register during which either or both Houses of Congress are in session. Based on the records of the sessions of Congress, the effective date of the regulations is October 7, 1992.

EFFECTIVE DATE: October 7, 1992.

FOR FURTHER INFORMATION CONTACT:

Dennis K. Carpenter, Senior Policy Analyst, Regulation Development Division, Office of Examination, Farm Credit Administration, McLean, Virginia 22102-5090, (703) 883-4498, or;

Richard A. Katz, Senior Attorney, Regulatory and Legislative Law Division, Office of General Counsel, Farm Credit Administration, McLean, Virginia 22102-5090, (703) 883-4020, TDD (703) 883-4444.

(12 U.S.C. 2252(a) (9) and (10))

Dated: October 7, 1992.

Curtis M. Anderson,

Secretary, Farm Credit Administration Board.

[FR Doc. 92-24799 Filed 10-9-92; 8:45 am]

BILLING CODE 6705-01-M

12 CFR Part 615

RIN 3052-AB18

Funding and Fiscal Affairs, Loan Policies and Operations, and Funding Operations; Effective Date

AGENCY: Farm Credit Administration.

ACTION: Notice of effective date.

SUMMARY: The Farm Credit Administration (FCA) published a suspension of rule under part 615 on August 24, 1992 (57 FR 38250). The rule suspends certain provisions of the Farm Credit regulations, through December 31, 1994, governing the computation of permanent capital ratios of Farm Credit System institutions to allow Farm Credit Banks and direct lender associations through the end of 1994 to determine by agreement whether, and to what extent, an association's investment in a Farm Credit Bank is considered as part of the association's permanent capital for the purpose of computing the permanent capital ratio. In accordance with 12 U.S.C. 2252, the effective date of the final rule is 30 days from the date of publication in the Federal Register during which either or both Houses of Congress are in session. Based on the records of the sessions of Congress, the effective date of the regulations is October 7, 1992.

EFFECTIVE DATE: October 7, 1992.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-NM-84-AD; Amendment 39-8372; AD 92-19-14]

Airworthiness Directives; McDonnell Douglas Model MD-11 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model MD-11 series airplanes, that requires inspections to detect fatigue cracks of the side skin and doubler surrounding the pressure relief door assembly of the tail pylon, and structural modification of the tail pylon pressure relief door opening. This amendment is prompted by a full-scale fatigue test that detected the development of fatigue cracks. The actions specified by this AD are intended to prevent skin and doubler fatigue cracking, which could cause loss of fail-safe capability of the tail pylon structure.

DATES: Effective November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-8001, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1-L5B. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office (ACO), 3229 E. Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Mr. Wahib Mina, Aerospace Engineer, Los Angeles Aircraft Certification Office, ANM-121L, FAA, Transport

Airplane Directorate, 3229 East Spring Street, Long Beach, California 90806–2425; telephone (310) 988–5324; fax (310) 988–5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model MD–11 series airplanes was published in the **Federal Register** on June 5, 1992 (57 FR 23976). That action proposed to require inspections to detect fatigue cracks of the side skin and doubler surrounding the pressure relief door assembly of the tail pylon, and structural modification of the tail pylon pressure relief door opening.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

Since issuance of the notice, the FAA has reviewed and approved McDonnell Douglas Service Bulletin 54–17, Revision 1, dated July 16, 1992. This revision is similar in technical content to the original version, but contains only minor editorial and format changes; there is no change in the effectivity listing. The final rule has been revised to include this revision to the service bulletin as an acceptable source of service information.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change described previously. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the rule.

There are approximately 28 McDonnell Douglas Model MD–11 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 18 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 work hour per airplane to accomplish the required inspection requirements, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the inspection requirements of the AD on U.S. operators is estimated to be $990.

Installation of the interim modification will take approximately 35 hours to accomplish, at an average labor rate of $55 per work hour. Parts will be provided at no cost to the operators. Based on these figures, the total cost impact to U.S. operators who install the interim modification is estimated to be $1,925 per airplane.

Installation of the permanent modification (without removal of the interim modification) will take approximately 308 work hours to accomplish, at an average labor rate of $55 per work hour. Parts will be provided at no cost to operators. Based on these figures, the total cost impact to U.S. operators who install the permanent modification (without removing the interim modification) is estimated to be $16,940 per airplane.

Installation of the permanent modification (with removal of the interim modification) will take approximately 316 work hours to accomplish, at an average labor rate of $55 per work hour. Parts will be provided at no cost to operators. Based on these figures, the total cost impact to U.S. operators who install the permanent modification (with removing the interim modification) is estimated to be $17,380 per airplane.

Based on the figures discussed above, the total cost impact of the AD on U.S. operators is estimated to be between $305,910 and $348,480. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES**."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92–19–14. McDonnell Douglas: Amendment 39–8372. Docket 92–NM–84–AD.

Applicability: Model MD–11 series airplanes, as listed in McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, and Revision 1, dated July 16, 1992; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent skin and doubler fatigue cracking, which could cause loss of fail safe capability of the tail pylon structure, accomplish the following:

(a) For Group I airplanes, as listed in McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, prior to the accumulation of 2,100 landings or within 60 days after the effective date of this AD, whichever occurs later, visually inspect to detect cracks on the tail pylon skin and interior doubler around the pressure relief door, and install either the interim or permanent modification, as specified in paragraphs (a)(1) and (a)(2) of this AD, in accordance with McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, or Revision 1, dated July 16, 1992.

(1) If no cracks are detected, prior to further flight, install either the interim modification, which consists of interim external doublers; or the permanent modification, which consists of internal doubler, frame, and stiffener. If the interim modification is installed, prior to the accumulation of 6,000 landings or within 60 days after the effective date of this AD, whichever occurs later, install the permanent modification (internal doubler, frame, and stiffener), in accordance with McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, or Revision 1, dated July 16, 1992.

(2) If cracks are detected, prior to further flight, install the permanent modification, which consists of external doublers, internal doubler, frame, and stiffener, in accordance with McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, or Revision 1, dated July 16, 1992.

(b) For Group II airplanes, as listed in McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, prior to the accumulation of 6,000 landings or within 60 days after the effective date of this AD,

whichever occurs later, conduct a dye penetrant inspection for cracks of the tail pylon skin around the pressure relief door, in accordance with McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, or Revision 1, dated July 16, 1992.

(1) If no cracks are found, prior to further flight, install the permanent modification, which consists of an internal doubler, frame, and stiffener, in accordance with McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, or Revision 1, dated July 16, 1992.

(2) If cracks are detected, prior to further flight, install the permanent modification which consists of external doublers, internal doubler, frame, and stiffener, in accordance with McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992, or Revision 1, dated July 16, 1992.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note.—Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The inspections and installation shall be done in accordance with McDonnell Douglas Service Bulletin 54–17, dated February 24, 1992; or McDonnell Douglas Service Bulletin 54–17, Revision 1, dated July 16, 1992. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846–0001, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1–L5B. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on August 26, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service

[FR Doc. 92–24715 Filed 10–9–92; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 92–NM–69–AD; Amendment 39–8379; AD 92–20–05]

Airworthiness Directives; Fokker Model F28 Mark 0100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Fokker Model F28 Mark 0100 series airplanes, that requires the replacement of currently installed aluminum alloy rivets in the rib-to-auxiliary-spar attachment at wing station 10110 with nickel copper alloy rivets and Hilok bolts. This amendment is prompted by a full-scale fatigue test of the wings that detected numerous broken rivets. The actions specified by this AD are intended to prevent reduced structural integrity of the wings.

DATES: Effective on November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Quam, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2145; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Fokker Model F28 Mark 0100 series airplanes was published in the Federal Register on June 16, 1992 (57 FR 27192). That action proposed to require the replacement of currently installed aluminum alloy rivets in the rib-to-auxiliary-spar attachment at wing station 10110 with nickel copper alloy rivets and Hilok bolts.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

The commenters support the proposed rule.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 25 airplanes of U.S. registry will be affected by this AD, that it will take approximately 8 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. The cost of required parts will be negligible. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $11,000 or $440 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-20-05. Fokker: Amendment 39-8379. Docket 92-NM-68-AD.

Applicability: Model F28 Mark 0100 series airplanes; serial numbers 11244 through 11256, inclusive; 11259; 11260; and 11268 through 11278, inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the wings, accomplish the following:

(a) Prior to the accumulation of 18,000 landings or within 60 days after the effective date of this AD, whichever occurs later, replace the currently installed aluminum alloy rivets at the rib-to-auxiliary-spar attachment at wing station 10110 with nickel copper alloy rivets and Hilok bolts, in accordance with Fokker Service Bulletin SBF100-57-017, dated September 12, 1991.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The replacement shall be done in accordance with Fokker Service Bulletin SBF100-57-017, dated September 12, 1991. This incorporation by reference was approved by the Director of the **Federal Register** in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the **Federal Register**, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on September 4, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-24711 Filed 10-09-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 92-NM-43-AD; Amendment 39-8364; AD 92-19-06]

Airworthiness Directives; McDonnell Douglas Model DC-9-80 Series Airplanes and Model MD-88 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC-9-80 series airplanes and Model MD-88 airplanes, that requires initial inspection and subsequent modification of galley power feeder wire assemblies. This amendment is prompted by a report of smoke in the cabin coming from the ceiling panels during flight due to chafing of the wire assembly on ceiling panel attachments. The actions specified by this AD are intended to prevent chafing damage to the wire assemblies that can lead to arcing and smoke in the cabin.

DATES: Effective on November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-0001, Attention: Business Unit Manager, Technical Publications, C1-HDR (54-60). This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office (ACO), 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Elvin K. Wheeler, Los Angeles Aircraft Certification Office, ANM-130L, FAA, Transport Airplane Directorate, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (310) 988-5344; fax (310) 988-5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC-9-80 series airplanes and Model MD-88 airplanes was published in the **Federal Register** on April 8, 1992 (57 FR 11927). That action proposed to require initial inspection and subsequent modification of galley power feeder wire assemblies.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the rule as proposed.

One commenter is concerned that paragraph (a) of the notice will penalize operators who previously took immediate action to correct the unsafe condition. The commenter specifically is concerned about the "unless previously accomplished within the last 60 days" portion of the compliance time. Based on this wording of paragraph (a) of the notice, the commenter feels that these operators will be required to reinspect all airplanes that have not been inspected within the last 60 days once the effective date of this AD has been established. For example, this commenter first began inspecting its airplanes on November 4, 1991. If the wording of paragraph (a) of the proposal remains as proposed, the commenter would be required to reinspect those airplanes, which would entail considerable cost. Therefore, the commenter requests that "unless previously accomplished within the last 60 days" be removed from paragraph (a) and be replaced with "unless previously accomplished after November 1, 1991." Upon further consideration, the FAA concurs that the compliance time can be adjusted somewhat. The FAA recognizes that the proposed requirement to perform the inspection "unless previously accomplished within the last 60 days" could cause some operators to inspect airplanes when there is no need to do so; however, the commenter's suggested threshold of November 1, 1991, could also cause some operators to re-inspect airplanes. The AD specifically states that compliance is required as indicated, "unless accomplished previously;" this statement provides credit for operators who have previously accomplished the requirements of the final rule. Therefore, paragraph (a) has been revised to eliminate the phrase that would have credited operators only if they had performed the inspection within the last 60 days. The FAA has determined that safety will not be compromised by eliminating this phrase.

One commenter requests that the compliance time for inspection of the galley power feeder wire assemblies be extended from the proposed 4,500 flight hours to 6,000 flight hours. Such extension of this compliance time would

allow the inspection to be accomplished during regularly scheduled maintenance. The commenter notes that it has operated Model DC–9–80 airplanes for nine years and 27,000 flight hours, and has not experienced any difficulties with the wire bundles. The FAA concurs with the commenter's request to extend the compliance time for the inspection required by paragraph (c)(2) of this AD. Extending the compliance time by an additional 1,500 flight hours will not adversely affect safety. Paragraph (c)(2) of the final rule has been revised to specify a compliance time of 6,000 flight hours.

Two commenters request an extension for accomplishing the modifications that would be required by proposed paragraphs (b) and (c)(2) of this AD. One commenter requests an extension of 4,500 flight hours. Such extension of this compliance time would allow the repair to be accomplished during regularly scheduled maintenance. The other commenter requests and extension of the compliance time for modification of the galley power wire assemblies by an additional 1,500 flight hours. This commenter also requests that the compliance terms for modification of the galley power feeder wire assemblies be revised to, "within 6,000 flight hours of the initial inspection or within 15,000 total flight hours, whichever occurs later." This compliance period would allow those operators whose inspection programs are based on the DC–9–80 Maintenance Review Board (MRB) document to schedule the modification during regularly scheduled maintenance. The FAA concurs that the compliance time for modifying the galley power wire assemblies can be extended somewhat. Extending the compliance time by 1,500 additional flight hours and adding a compliance threshold of 15,000 total flight hours will not adversely affect safety, and will allow the modification to be performed at a base during regularly scheduled maintenance where special equipment and trained maintenance personnel will be available if necessary. Paragraph (b) of the final rule have been revised to reflect a compliance time of within 6,000 flight hours of the initial inspection or within 15,000 total flight hours, whichever occurs later.

Paragraph (d) of the final rule has been revised to clarify the procedures for requesting alternative methods of compliance with this AD.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 656 McDonnell Douglas Model DC–9–80 series and Model D–88 airplanes of the affected design in the worldwide fleet. The FAA estimates that 330 airplanes of U.S. registry will be affected by this AD, that it will take approximately 4 work hours per airplane to accomplish the proposed inspection; that it will take approximately 43 work hours per airplane to accomplish the proposed modification; and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $853,050 or $2,585 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92–19–06. McDonnell Douglas: Amendment 39–8364. Docket 92–NM–43–AD.

Applicability: Model DC–9–81, –82, –83, and –87 (MD–81, –82, –83, and –87) series airplanes, and Model MD–88 airplanes; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent chafing damage to the wire assemblies that could lead to arcing and smoke in the passenger cabin, accomplish the following:

(a) Prior to or upon the accumulation of 9,000 total flight hours or within 6 months after the effective date of this AD, whichever occurs later: Inspect the galley power feeder wire assemblies, in accordance with McDonnell Douglas Alert Service Bulletin A24–132, Revision 1, dated March 2, 1992.

(b) If no damage is detected as a result of the inspection required by paragraph (a) of this AD, within 6,000 flight hours of the initial inspection or within 15,000 total flight hours, whichever occurs later, modify the galley power feeder wire assemblies, in accordance with McDonnell Douglas Alert Service Bulletin A24–132, Revision 1, dated March 2, 1992.

(c) If damage is detected as a result of the inspection required by paragraph (a) of this AD, accomplish subparagraph (c)(1) and (c)(2) of this AD:

(1) Prior to further flight, repair the damaged wire insulator (install protective sleeving), in accordance with McDonnell Douglas Alert Service Bulletin A24–132, Revision 1, dated March 2, 1992;

(2) Within 6,000 flight hours after accomplishing the inspection required by paragraph (a) of this AD, modify the galley power feeder wire assemblies, in accordance with McDonnell Douglas Alert Service Bulletin A24–132, Revision 1, dated March 2, 1992.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the

requirements of this AD can be accomplished.

(f) The inspection and modification shall be done in accordance with McDonnell Douglas Alert Service Bulletin A24-132, Revision 1, dated March 2, 1982. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-0001, Attention: Business Unit Manager, Technical Publications, C1-HDR (54-60). Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Transport Airplane Directorate, Los Angeles ACO, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on August 20, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92-NM-111-AD; Amendment 39-8376; AD 92-19-12]

Airworthiness Directives; Learjet Model 23, 24, 25, 28, 29, 31, 35, and 36 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Learjet Model 23, 24, 25, 28, 29, 31, 35, and 36 series airplanes, that requires modification of the crew oxygen plumbing and map light wires. This amendment is prompted by a report of a malfunction on a Learjet Model 24 series airplane involving chafing of the copilot map light wires, which caused electrical arcing against the oxygen mask tubing and subsequent burn-through and fire. The actions specified by this AD are intended to prevent an in-flight fire.

DATES: Effective on November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Learjet Corporation, Customer Services, P.O. Box 7707, Wichita, Kansas 67277-7707. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Wichita Aircraft Certification Office, 1801 Airport Road, room 100, Mid-Continent Airport, Wichita, Kansas 67209; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. C. Dale Bleakney, Aerospace Engineer, Systems and Equipment Branch, ACE-130W, FAA, Wichita Aircraft Certification Office, 1801 Airport Road, room 100, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946-4135; fax (316) 946-4407.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to Learjet Model 23, 24, 25, 28, 29, 31, 35, and 36 series airplanes was published in the Federal Register on July 2, 1992 (57 FR 29453). That action proposed to require modification of the crew oxygen plumbing and map light wires.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were submitted in response to the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 1,482 Learjet Model 23, 24, 25, 28, 29, 31, 35, and 36 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 1,063 airplanes of U.S. registry will be affected by this AD, that it will take approximately 25 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Required parts will cost approximately $113 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $1,581,744. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13—[Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-19-12. Learjet (Formerly Gates Learjet): Amendment 39-8376. Docket 92-NM-111-AD.

Applicability: Model 23, 24, 25, 28, 29, 31, 35, and 36 series airplanes, as listed in Learjet Airplane Modification Kit No. AMK 90-5, dated October 11, 1991; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent electrical arcing and an in-flight fire, accomplish the following:

(a) Within 30 days after the effective date of this AD, modify the crew oxygen plumbing and map light wires, in accordance with Learjet Airplane Modification Kit AMK No. 90-5, dated October 11, 1991.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Wichita Aircraft Certification Office (ACO), ACE-115W, FAA, Small Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Wichita ACO.

Note: Information concerning the existence of approved alternative methods of

compliance with this AD, if any, may be obtained from the Wichita ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with Learjet Airplane Modification Kit AMK No. 90-5, dated October 11, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Learjet Corporation, Customer Services, P.O. Box 7707, Wichita, Kansas 67277-7707. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on August 28, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-24714 Filed 10-9-92; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 92-NM-55-AD; Amendment 39-8375; AD 92-20-01]

Airworthiness Directives; de Havilland, Inc., Model DHC-7 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain de Havilland Model DHC-7 series airplanes, that requires a detailed inspection to detect corrosion of the main landing gear (MLG) emergency down release cables, and replacement, if necessary; and eventual installation of stainless steel cable assemblies. This amendment is prompted by a report of corrosion found underneath the anti-friction sleeve of the two MLG emergency down release cables. The actions specified by this AD are intended to prevent failure of the cables to extend the landing gear, resulting in a gear-up landing.

DATES: Effective on November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from de Havilland, Inc., Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket 92-NM-55-AD, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Danko Kramar, Aerospace Engineer, Systems and Equipment Branch, ANE-173, Engine and Propeller Directorate, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; telephone (516) 791-6427; fax (516) 791-9024.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain de Havilland Model DHC-7 series airplanes was published in the **Federal Register** on June 15, 1992 (57 FR 26629). That action proposed to require a detailed inspection to detect corrosion of the main landing gear (MLG) emergency down release cables, and replacement, if necessary; and eventual installation of stainless steel cable assemblies.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Two commenters concur with the proposal.

One commenter requests that the AD be revised to reference the original issue of de Havilland Alert Service Bulletin A7-32-94, dated September 3, 1991. The commenter replaced the carbon steel cables with stainless steel cables, Post-Modification Number 7/2609, using the accomplishment instructions in the original issue of the service bulletin. However, the NPRM specifies that modifications must be performed in accordance with Revision A. The commenter maintains that Revision A does not add any substantive changes to the original issue of the service bulletin. The FAA concurs. Accordingly, the FAA has revised the final rule to cite the original issue of the service bulletin as an additional source for service information.

Paragraph (d) of the final rule has been revised to clarify the procedure for requesting alternative methods of compliance with this AD.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

The FAA estimates that 46 airplanes of U.S. registry will be affected by this AD, that it will take approximately 6 work hours per airplane to accomplish the inspection, and 15 works per airplane to accomplish the modification, at an average labor rate of $55 per work hour. Required parts will cost approximately $825 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $91,080. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-20-04. De Havilland, Inc.: Amendment 39-8375. Docket 92-NM-55-AD.

Applicability: Model DHC-7 airplanes; on which stainless steel cables, Post-Modification Number 7/2809, have not been installed; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent a gear-up landing, accomplish the following:

(a) Within 30 days after the effective date of this AD, perform a detailed inspection of the left- and right-hand main landing gear (MLG) emergency down release cables to detect corrosion, in accordance with de Havilland Alert Service Bulletin A7-32-04, dated September 3, 1991; or Revision A, dated November 15, 1991.

(b) If any corrosion is detected as a result of the inspection required by paragraph (a) of this AD, prior to further flight, replace both cable assemblies with either stainless steel cables (Post-Modification Number 7/2809) or carbon steel cables (Pre-Modification 7/2809), in accordance with de Havilland Alert Service Bulletin A7-32-04, dated September 3, 1991; or Revision A, dated November 15, 1991.

(c) Within 6 months after the effective date of this AD, or within 12 months after installing carbon steel cables, if installed in accordance with paragraph (b) of this AD: Install Post-Modification 7/2809 cables, in accordance with de Havilland Alert Service Bulletin A7-32-04, dated September 3, 1991; or Revision A, dated November 15, 1991.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA, Engine and Propeller Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspection, replacement, and installation shall be done in accordance with de Havilland Alert Service Bulletin A7-32-04, dated September 3, 1991; or Revision A, dated November 15, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from de Havilland, Inc., Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on September 2, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-24710 Filed 10-9-92; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 91-NM-248-AD; Amendment 39-8378; AD 92-20-04]

Airworthiness Directives; Canadair, Ltd., Model CL-600-2A12 (CL-601) and CL-600-2B16 (CL-601-3A) Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Canadair Model CL-600-2A12 and CL-600-2B16 series airplanes, that currently requires repetitive visual inspections of the sensing line in the aft equipment bay to detect damage or deformations, and replacement of the sensing line or drainage of the tail cone fuel tank, if necessary. This amendment requires modification of the sensing line, installation of a bonding jumper assembly on the fuel sensing line, and performance on an electrical bonding test. This amendment is prompted by the development of a modification which, if installed, eliminates the need for the repetitive visual inspections prior to and after each refueling of the tail cone fuel tank. The actions specified by this AD are intended to prevent the presence of fuel vapors in the aft equipment bay, which could result in an in-flight fire in the event of a lightning strike or other ignition source in the area.

DATES: Effective November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

The incorporation by reference of Canadair Alert Wire TA601-0361-003, dated June 11, 1991, was approved previously by the Director of the Federal Register as of August 28, 1991 (56 FR 38337, August 13, 1991).

ADDRESSES: The service information referenced in this AD may be obtained from Bombardier, Inc., Canadair, Aerospace Group, P.O. Box 6087, Station A, Montreal, Quebec, Canada H3C 3G9. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Fiesel, Aerospace Engineer, Propulsion Branch, ANE-174, FAA, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; telephone (516) 791-7421; fax (516) 791-9024.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 91-17-02, Amendment 39-8000 (56 FR 38337, August 13, 1991), which is applicable to certain Canadair Model CL-600-2A12 and CL-600-2B16 Series airplanes, was published in the Federal Register on July 7, 1992 (57 FR 29847). The action proposed to require modification of the sensing line, installation of a bonding jumper assembly on the fuel sensing line, and performance of an electrical bonding test.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were submitted in response to the proposal or the FAA's determination of the cost to the Public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 28 airplanes of U.S. registry will be affected by this AD, that it will take approximately 34 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Required parts will be supplied by the manufacturer at no cost to the operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $52,360. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-8000 (56 FR 38337, August 13, 1991), and by adding a new airworthiness directive (AD), Amendment 39-8378, to read as follows:

92-20-04. Canadair, LTD.: Amendment 39-8378. Docket 91-NM-248-AD. Supersedes AD 91-17-02, Amendment 39-8000.

Applicability: Model CL-600-2A12 (CL-601) and CL-600-2B16 (CL-601-3A) series airplanes equipped with a tail cone fuel tank, installed in accordance with the Original Issue, Revision 1, or Revision 2 of Canadair Service Bulletin 601-0282, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent the presence of fuel vapors in the aft equipment bay, which could result in an in-flight fire in the event of a lightning strike or other ignition source in the area, accomplish the following:

(a) Within 5 days after August 28, 1991 (the effective date of AD 91-17-02, Amendment 39-8000), or prior to refuelling of the tail cone fuel tank, whichever occurs later, perform a visual inspection of the unshrouded portion of the sensing line in the aft equipment bay to detect any damage or deformation, in accordance with Canadair Alert Wire TA601-0381-003, dated June 11, 1991. Thereafter, repeat the inspection prior to each refuelling. If damage or deformation of the sensing line is found as a result of the visual inspection, accomplish either subparagraph (a)(1) or (a)(2) of this AD, in accordance with the alert wire:

(1) Prior to further flight, drain the tail cone fuel tank, and continue flight operations with no fuel in the tail cone fuel tank; or

(2) Prior to further flight, drain the tail cone fuel tank, replace the level control valve sensing line, and continue flight operations with fuel in the tail cone fuel tank.

(b) After each refuelling of the tail cone fuel tank, inspect for any signs of leakage from the fuel sensing line in the aft equipment bay and at the fuel shroud drain, in accordance with Canadair Alert Wire TA601-0381-033, dated June 11, 1991. If leakage is found, prior to further flight, either drain the tail cone fuel tank, or replace with tail cone fuel tank level control valve sensing line, in accordance with the alert wire.

(c) Within 6 months after the effective date of this AD, modify the sensing line; perform functional tests of the refuel/defuel line, tail tank fuel shroud, and tail tank sensing line; and perform an electrical bonding and resistance test on all fuel lines installed during this modification; in accordance with Canadair Alert Service Bulletin A601-0381, Revision 2, dated January 27, 1992.

(d) Modification of the sensing line, as required by paragraph (c) of this AD, constitutes terminating action for the repetitive inspections required by paragraphs (a) and (b) of this AD.

(e) An alternative method of compliance of adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA, Engine and Propeller Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(g) The modification and test shall be done in accordance with Canadair Alert Service Bulletin A601-0381, Revision 2, dated January 27, 1992. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. The inspection shall be done in accordance with Canadair Alert Wire TA601-0381-003, dated June 11, 1991. This incorporation by reference was approved previously by the Director of the Federal Register as of August 28, 1991 (56 FR 38337, August 13, 1991). Copies may be obtained from Bombardier, Inc., Canadair, Aerospace Group, P.O. Box 6087, Station A, Montreal, Quebec H3C 3C9, Canada. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(h) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on September 3, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-24718 Filed 10-9-92; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 92-NM-97-AD; Amendment 39-8353; AD 92-18-09]

Airworthiness Directives; British Aerospace Model BAe 125-800A Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model BAe 125-800A series airplanes, that requires modification of the auxiliary power unit (APU) wiring. This amendment is prompted by a report that in the event of an uncontained engine failure, debris from the engine may damage the power supply wiring between certain electrical panels. The actions specified by this AD are intended to prevent a short circuit, arcing, and an electrical fire.

DATES: Effective on November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the

Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Hank Jenkins, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplance Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2141; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain British Aerospace Model BAe 125–800A series airplanes was published in the **Federal Register** on June 5, 1992 (57 FR 425876). That action proposed to require modification of the auxiliary power unit (APU) wiring.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 108 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to the $11,880, or $110 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of the Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rule Docket. A copy of it may be obtained from the Rule Docket at the location provided the "**ADDRESSES**."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92–18–09 British Aerospace: Amendment 39–8353. Docket 92–NM–97–AD.

Applicability: Model BAe 125–800A series airplanes; post-mod 259404B (Turbomach auxiliary power unit) and post-mod 258706 (Garrett auxiliary power unit); certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent a short circuit, arcing, and an electrical fire, accomplish the following:

(a) Within 120 days after the effective date of this AD, modify the auxiliary power unit wiring, in accordance with British Aerospace Service Bulletin 49–37–25A253A&B, dated October 28, 1991.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manger, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch.

(c) Special flight permits may be issued in accordance with Far 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with British Aerospace Service Bulletin 49–37–25A253A&B, dated October 28, 1991.

Note: The issue date of that service bulletin is indicated only on "page 1 of 10"; no other page of the document is dated.) This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041–0414. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on August 12, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–24716 Filed 10–9–92; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 92–NM–98–AD; Amendment 39–8377; AD 92–20–03]

Airworthiness Directives; British Aerospace Model DH/HS 125 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model DH/HS 125 series airplanes, that requires a one-time visual inspection to detect corrosion on the main landing gear (MLG) support brackets, rear spar sections, inboard flap hinge arms, and associated attachment hardware; and repair or replacement, if necessary. This amendment is prompted by a report of severe corrosion found on the wing rear spar at the interface with the outboard MLG support bracket. The actions specified by this AD are intended to prevent loss of structural integrity and possible collapse of the MLG on landing or take-off.

DATES: Effective on November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041–0414. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the

Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Hank Jenkins, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2141; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain British Aerospace Model DH/HS 125 series airplanes was published in the Federal Register on June 23, 1992 (57 FR 27955). That action proposed to require a one-time visual inspection to detect corrosion on the main landing gear (MLG) support brackets, rear spar sections, inboard flap hinge arms, and associated attachment hardware; and repair or replacement, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were submitted in response to the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 49 airplanes of U.S. registry will be affected by this AD, that it will take approximately 300 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $808,500. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-20-03. British Aerospace: Amendment 39-8377. Docket 92-NM-98-AD.

Applicability: Model DH/HS 125 series airplanes; as listed in British Aerospace Service Bulletin SB 57-76, dated December 31, 1991; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent loss of structural integrity and possible collapse of the main landing gear (MLG) on landing or take-off, accomplish the following:

(a) Within 12 months after the effective date of this AD, perform a one-time visual inspection to detect corrosion on the MLG support brackets, rear spar sections, inboard flap hinge arms, and associated attachment hardware, in accordance with British Aerospace Service Bulletin SB 57-76, dated December 31, 1991.

(b) If no corrosion is found on the MLG support brackets, rear spar sections, inboard flap hinge arms, and associated attachment hardware, no further action is necessary.

(c) If any corrosion is found on the MLG support brackets, rear spar sections, and inboard flap hinge arms, prior to further flight, replace any corroded parts found, or repair in a manner approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate.

(d) If corrosion is found on any associated attachment hardware that is within the limitations specified in the Structural Repair Manual (SRM) Chapter 51-10, prior to further flight, replace or repair in accordance with the SRM.

(e) If corrosion is found on any associated attachment hardware that is beyond the limitations specified in the Structural Repair Manual (SRM) Chapter 51-10, prior to further flight, replace or repair in a manner approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate.

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM-113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM-113.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(h) The inspection shall be done in accordance with British Aerospace Service Bulletin SB 57-76, dated December 31, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC. 20041-0414. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(i) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on September 3, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 91-NM-252-AD; Amdt. 39-8362; AD 92-19-04]

Airworthiness Directives; Airbus Industrie Model A300-600 and A310 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Airbus Industrie Model A300-600 and A310 series airplanes, that requires inspection of the forward engine mount link and the aft engine mount beam assembly to detect cracks and replacement of the link or beam assembly, if necessary. This amendment is prompted by reports

indicating that the forward engine mount links may have been overheated during the machining process and the aft engine mount beam assemblies may not have been dip etched prior to fluorescent penetrant inspections. The actions specified by this AD are intended to prevent reduced structural integrity of the airplane.

DATES: Effective November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Balgnac, France. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2140; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Airbus Industrie Model A300-600 and A310 series airplanes was published in the **Federal Register** on February 12, 1992 (57 FR 5091). That action proposed to require inspection of the forward engine mount link and the aft engine mount beam assembly to detect cracks and replacement of the link or beam assembly, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the rule as proposed.

A second commenter requests that paragraphs (b)(1) and (b)(2) of the AD be revised to allow "in-situ" (on aircraft) visual inspection/sign-off of beam and links by serial number, provided that the serial number can be read and is not found on the list of affected units specified in the service bulletin. The FAA does not concur that paragraphs (b)(1) and (b)(2) of the AD should be revised. The FAA clarifies that the NPRM does not require (nor do the service bulletins cited in the NPRM indicate) that parts must be removed from the airplane if those parts are not identified by serial number as affected parts. If an operator can determine by inspection of the beam and links on the airplane that a serial number is not identified on the list of affected parts, no further action is required.

One commenter remark that linkages manufactured after July 31, 1989, were machined correctly and, therefore, should not be included in the applicability statement of the AD. The FAA concurs. The revised Pratt and Whitney service bulletins discussed below, which are cited in the final rule, contain this information.

Since issuance of the Notice, Pratt and Whitney has issued Revision 1, dated July 25, 1991, to Service Bulletins PW7R4 71-100 and PW4NAC 71-105. These revisions change the service bulletin effectively, revise certain illustrations, and provide additional information with regard to procedures for accomplishing the termination action. Pratt and Whitney has also issued Revision 2 to Service Bulletin PW4NAC 71-86, dated February 28, 1992, which adds clarification concerning the status of spare thrust links. In addition, Pratt and Whitney has issued Revision 2 to Service Bulletin PW7R4 71-90, dated May 14, 1992, which specifies the location on the engine mount link on which the service bulletin compliance note should be etched. The FAA has reviewed and approved these revised service bulletins, and has revised the final rule to reflect the latest revisions to these service bulletins as the appropriate service information sources.

Paragraph (c) of the final rule has been revised to clarify the procedure for requesting alternative methods of compliance with this AD.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

The FAA estimates that 21 airplanes of U.S. registry will be affected by this AD, that it will take approximately 4 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $4,620. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-19-04. Airbus Industrie: Amendment 39-8362. Docket 91-NM-252-AD.

Applicability: Model A300-B4-620, A310-221, A310-222, and A310-322 series airplanes, equipped with Pratt and Whitney JT9D-7R4D1, JT9D-7R4E1, or JT9D-7R4H1 series engines; and Model A300-B4-622, A300-B4-622R, and A310-324 series airplanes, equipped with Pratt and Whitney PW 4152 or PW 4158 series engines, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the airplane, accomplish the following:

(a) Accomplish the requirements of paragraphs (a)(1), (a)(2), and (a)(3) of this AD

as follows: For airplanes equipped with Pratt and Whitney JT9D–7R4D1, JT9D–7R4E1, and JT9D–7R4H1 series engines, accomplish the actions in accordance with Pratt and Whitney Service Bulletin PW7R4 71–90, Revision 2, dated May 14, 1992, unless previously accomplished in accordance with Pratt and Whitney All Operator Letter JT9/71–00/SS:JDS:0–12–3–1. For airplanes equipped with Pratt and Whitney PW 4152 and PW 4158 series engines, accomplish the actions in accordance with Pratt and Whitney Service Bulletin PW4NAC 71–86, Revision 2, dated February 28, 1992, unless previously accomplished in accordance with Pratt and Whitney All Operator Letter 4000/71.00/SS:TJF:0–12–03–1.

(1) Prior to the accumulation of 500 hours time-in-service after the effective date of this AD, perform a visual inspection to detect cracks or a broken link in the forward engine mount thrust link, in accordance with part 1 of the applicable service bulletin.

(i) If no crack or broken link is found, repeat the visual inspection thereafter at intervals not to exceed 1,000 landings until the requirements of paragraph (a)(2) of this AD are accomplished.

(ii) If any crack or a broken link is found as a result of the visual inspection, prior to further flight, replace the link with a serviceable part that has been inspected in accordance with the applicable service bulletin. Such replacement constitutes terminating action for the requirements of paragraph (a) of this AD.

(2) At the next engine removal or within 4,000 hours time-in-service after the effective date of this AD, whichever occurs first, perform a nital etch inspection to detect cracks or a broken link in the forward engine mount thrust link, in accordance with the applicable service bulletin.

(i) If no crack is found as a result of the nital etch inspection, reinstall the link assembly in accordance with the applicable service bulletin. No further action is required.

(ii) If any crack or broken link is found as a result of the nital etch inspection, prior to further flight, replace the link with a serviceable part, in accordance with the applicable service bulletin. Such replacement constitutes terminating action for the requirements of paragraph (a) of this AD.

(3) Replacement of the forward engine mount thrust link in accordance with the applicable service bulletin constitutes terminating action for the requirements of this AD.

(b) Accomplish the requirements in paragraphs (b)(1), (b)(2), (b)(3), and (b)(4) of this AD as follows: For airplanes equipped with Pratt and Whitney JT9D–7R4D1, JT9D–7R4E1, and JT9D–7R4H1 series engines, accomplish the actions in accordance with Pratt and Whitney Service Bulletin PW7R4 71–100, Revision 1, dated July 25, 1991, unless previously accomplished in accordance with Pratt and Whitney All Operator Letter JT9/71–00/SS:0–12–3–1. For airplanes equipped with Pratt and Whitney PW 4152 and PW 4158 series engines, accomplish the actions in accordance with Pratt and Whitney Service Bulletin PW4NAC 71–105, Revision 1, dated July 25, 1991, unless previously accomplished in accordance with Pratt and Whitney All Operator Letter 4000/71–00/SS:TJF:0–12–03–1.

(1) Prior to the accumulation of 500 hours time-in-service after the effective date of this AD, perform a visual inspection to detect cracks or forging laps in the aft engine mount beam assembly, in accordance with Part 1 of the applicable service bulletin.

(i) If no crack or forging lap is found as a result of the visual inspection, repeat the visual inspection thereafter at intervals not to exceed 1,000 landings until the requirements of paragraph (b)(2) of this AD are accomplished.

(ii) If any crack is found as a result of the visual inspection, prior to further flight, perform a dip etch and a spot fluorescent penetrant inspection to confirm the findings of cracks or forging laps, in accordance with part 2 of the applicable service bulletin. If any finding of cracks or forging laps is confirmed, prior to further flight, replace the defective beam assembly with a serviceable part, in accordance with the applicable service bulletin. Such replacement constitutes terminating action for the requirements of paragraph (b) of this AD. As of the effective date of this AD, none of the aft beam assemblies listed in the applicable service bulletin shall be installed on any airplane.

(2) Except as provided by paragraph (b)(3) of this AD, at the next engine removal or within 4,000 hours time-in-service after the effective date of this AD, whichever occurs first, perform a dip etch and a fluorescent penetrant inspection to detect cracks or forging laps in the aft engine mount beam assembly, in accordance with part 2 of the applicable service bulletin.

(i) If no crack or forging lap is found as a result of the dip etch and fluorescent penetrant inspection, reinstall the beam assembly in accordance with the applicable service bulletin. No further action is required.

(ii) If any crack or forging lap is found as a result of the dip etch and fluorescent penetrant inspection, prior to further flight, replace the beam assembly with a serviceable part, in accordance with the applicable service bulletin. Such replacement constitutes terminating action for the requirements of paragraph (b) of this AD.

(3) If the requirements of paragraph (b)(2) of this AD result in a dual engine removal, the dip etch and fluorescent penetrant inspection of one of the two aft engine mounts may be deferred to the next 4,000 hours time-in-service or engine removal, whichever occurs first, provided no crack or forging lap is found while accomplishing the visual inspections required by paragraph (b)(1) of this AD. If those inspections are deferred, repeat the visual inspection of the deferred aft engine mount, as required by paragraph (b)(1) of this AD, at intervals not to exceed 1,000 landings.

(4) Replacement of the aft engine mount beam assembly, in accordance with the applicable service bulletin, constitutes terminating action for the requirements of paragraph (b) of this AD.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirement of this AD can be accomplished.

(e) The inspection and replacement shall be done in accordance with the following Pratt and Whitney service bulletins, as applicable, which contain the specified effective pages:

Service bulletin referenced and date	Page No.	Revision level shown on page	Date shown on page
PW4NAC 71–105, Revision 1, July 25, 1991	1–19	1	July 25, 1991.
PW4NAC 71–86, Revision 2, February 28, 1992	1–2	2	February 28, 1992

14 CFR Part 39

[Docket No. 91-NM-234-AD; Amdt. 39-8357; AD 92-18-12]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, which currently requires that maximum wear limits for landing gear brakes be incorporated into the FAA-approved maintenance inspection program. This amendment requires the inspection for wear of certain additional landing gear brakes if the maximum brake wear limits prescribed in this AD are not met; replacement or rework of certain brakes; and changes of Airplane Flight Manual Brake Energy Categories. This amendment is prompted by the determination of the maximum allowable brake wear limits for additional brakes. The actions specified by this AD are intended to prevent the loss of braking effectiveness of the landing gear brakes.

DATES: Effective November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124; and Allied-Signal Aerospace Company, Bendix Wheels and Brakes Division, South Bend, Indiana 46628. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. David M. Herron, Seattle Aircraft Certification Office, Systems and Equipment Branch, ANM-130S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2672; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 91-18-08, amendment 39-8011 (56 FR 51232, October 11, 1991), which is applicable to Boeing Model 747 series airplanes, was published in the **Federal Register** on May 20, 1992 (57 FR 15260). The action proposed to require the inspection for wear of certain additional landing gear brakes that were not listed in the existing rule, and replacement of the brakes if the maximum brake wear limits prescribed in the proposal are not met; replacement or rework of certain brakes; and changes of Airplane Flight Manual Brake Energy Categories.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposal.

Several commenters request that the proposed compliance time of 180 days be extended so that the proposed inspections of the brakes can be accomplished during a regularly scheduled maintenance visit. One commenter states that adoption of the proposed compliance time would require operators to schedule special brake removals or retrofit at considerable expense. Another commenter states that the proposed compliance time of 180 days would require the premature removal of brakes that are not yet completely worn out. The commenters suggest that a compliance time of 360 days or 12 months would coincide with normal brake removal schedules and would alleviate the economic burden on affected operators.

The FAA disagrees that an extension of the compliance time is warranted. Brakes are not removed at regularly scheduled intervals now, but are continually inspected and removed when at or near the allowable wear limit. Over the 180-day compliance period, operators could replace brakes with brakes from spares that are configured to the new allowable wear limit; this would limit the large number of brakes needing to be replaced at the end of the 180-day compliance period. The FAA considers that the compliance time for this AD action, as proposed, represents the maximum interval of time allowable wherein the inspection/modification can be accomplished, parts could be obtained, and an acceptable level of safety could be maintained. The FAA has determined that the increase in costs associated with a 180-day compliance time is mitigated by the increase in safety to the flying public.

One commenter requests that the rule be revised to allow the intermixing of brakes having part number 2601902-6 with brakes having part number 2601902-60 for 360 days, if a 1.73-inch maximum allowable brake wear limit is used. Providing the extension of this time would minimize the economic burden on affected operators whose airplanes are equipped with those brakes. The FAA concurs with the commenter's request. The FAA has reconsidered the period of time for the use of combinations of all of the intermixed brakes specified in the proposal, and has determined that the interval of use of this intermixibility may be extended to 360 days without compromising safety.

One commenter requests that the proposed rule be revised to include additional procedures that would allow modification of the brakes to be performed without the removal of the brakes from the airplane, and that would not require changing the AFM Brake Energy Category. The commenter states that the proposed requirements to modify the brakes within 180 days would necessitate removing brakes prematurely on airplanes that are currently in storage or that have low utilization rates. The commenter also states that, for its particular operations, the requirement to change the AFM Brake Energy Category would require operating the airplane at reduced performance limited takeoff weights of 500 kilograms, and this would result in an economic penalty. In light of this, the commenter suggests that a procedure be included in the final rule, such as trimming the wear pin on the airplane so that the "Category C" classification remains applicable.

The FAA does not concur that a revision to the final rule is necessary. The rule has been written to provide flexibility of the operators in complying with it. The required change in the AFM Brake Energy Category provides the operator an option of using the existing brake part number and operating the

airplane at lower gross takeoff weights. The allowable wear limit depends upon the brake energy category that an operator chooses for its particular operations. The rule provides for the intermix of the brakes for a period of time, as long as certain wear limits are adhered to. A change in part number was required due to the nature of most of the affected Model 747 operations. Trimming of the wear pins and change in part numbers could feasibly be done while brakes are installed on the airplane. The FAA did not include such specific procedures in the rule because it is not aware of all operators' capabilities of doing this work. The FAA considers it more appropriate that the individual affected operators be free to develop procedures that are appropriate for their operations and request FAA concurrence with those procedures.

One commenter requests that proposed paragraph (b)(1)(i) be revised to include an initial inspection of each part number 2602012–2, –3, –4, and –5, brake to ensure that it is not worn beyond 1.75 inches, and, subsequently, to require the replacement of the brake if that limit is not met. This would make the requirements parallel to those for the other brakes affected by the rule. It would also allow the intermix of these brakes, as specified in proposed paragraph (b)(1)(iii), during the compliance period, as is allowed for the other brakes affected by the rule. The FAA concurs. The FAA had intended that the AD contain, where appropriate, parallel requirements for all of the affected brakes. The FAA has determined that, rather than to require merely the removal and replacement of the subject brakes within 180 days, it is more practicable to allow operators first to perform an initial inspection of the brakes to detect brake wear and then to replace those brakes when they are worn beyond the specified limit. Permitting the accomplishment of the inspection action will alleviate the economic burden on affected operators that would have been imposed by the proposed removal and replacement requirements. Additionally, allowing the inspection to be accomplished first will relieve the concern of some commenters, as discussed previously, that the proposed replacement requirement would mean the premature removal of brakes that are not yet completely worn out. Accordingly, paragraph (b)(1) of the final rule has been revised to include this change, and reformatted to make it parallel with other similar paragraphs in the AD.

One commenter requests that proposed paragraph (b)(1)(iv) be revised to delete the sentence that states that changing the references of Bendix part number 2602012–2, –3, –4, and –5 brakes to Category "B" on the Maximum Brake Energy Chart in Section 4 of the AFM, should be delayed until intermixing is ended. The commenter states that, since the performance information on that chart in the AFM remains unchanged, it is not affected by the intermixing of brakes. The FAA concurs. Paragraph (b)(1)(iv) of the final rule has been revised to delete the sentence that referred to this delay.

One commenter requests that proposed paragraphs (b)(3)(v), (b)(4)(v), and (b)(5)(v) be revised to state that changes of all references of the cited part numbered brakes should be to Category "C" rather than to Category "B;" and to delete the sentence in each paragraph stating that this change should be delayed until after intermixing is ended. The commenter states that the cited part numbered brakes were rated as AFM Category "C" prior to this AD activity and, under the proposed requirements, would be derated to Category "B." The relative Maximum Brake Energy Chart in Section 4 of the AFM refer to these brakes as Category "C," so that changing the references to Category "B" would be in error. Additionally, the performance information on that chart is not affected by the intermixing of brakes. The FAA concurs and has revised the final rule accordingly.

One commenter noted an error in the Boeing brake part number of the brake cited in proposed paragraph (b)(4)(i). The proposal referred to Boeing part number "60B10014–20," but the correct part number is "60B10014–30." The FAA notes this inadvertent error and has corrected the final rule accordingly.

This same commenter noted an error in the Bendix brake part number cited in proposed paragraph (b)(4)(iv). The proposal referred to Bendix part number "260566–2," but the correct part number is "2605662–2." The FAA notes this error that occurred in the publication of the notice and has corrected the final rule accordingly.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 966 Model 747 series airplanes of the affected design in the worldwide fleet. The FAA estimates that a total of 247 airplanes of U.S. registry and 14 operators will be affected by this AD; of these numbers, 199 airplanes and 3 operators will be directly affected by this new proposed action.

With regard to the 199 newly-affected airplanes, it will take approximately 59 work hours per airplane to accomplish the required actions, at an average labor cost of $55 per work hour. The cost of parts necessary to accomplish the change in wear limits (that is, the cost resulting from the requirement to change brakes before they are worn to their previously-approved limits for a one-time change) average $10,520 per airplane for 153 of these airplanes, and $14,170 per airplane for the remaining 46 airplanes. Based on these figures, the cost impact of the AD is $2,907,135 for the 199 newly-affected airplanes.

Further, the FAA estimates that for the 3 operators directly affected by this AD action, it will require 40 work hours per operator to incorporate the requirements into an operator's FAA-approved maintenance inspection program. The average labor cost is estimated to be $55 per work hour. Based on these figures, the cost impact of the AD totals $6,600 for the 3 newly-affected operators.

Based on the figures discussed above the total cost impact of the AD on U.S. operators is estimated to be $2,913,735. This total cost figure assumes that no operator has yet accomplished the requirements of this rule.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rule Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-8011 (56 FR 51232, October 11, 1991), and by adding a new airworthiness directive (AD), amendment 39-8357, to read as follows:

92-18-12 Boeing: Amendment 39-8357. Docket No. 91-NM-234-AD. Supersedes AD 91-18-08, Amendment 39-8011.

Applicability: Model 747 series airplanes, equipped with brake part numbers (P/N) identified in paragraphs (a) and (b) of this AD, certificated in any category.

Compliance required as indicated, unless previously accomplished.

To prevent loss of main landing gear braking effectiveness, accomplish the following:

(a) Within 180 days after November 12, 1991 (the effective date of Amendment 39-8011, AD 91-18-08), incorporate the maximum brake wear limits, shown below, into the FAA-approved maintenance inspection program:

Brake mfr.	Brake P/N	Boeing P/N	Maximum wear limit (inches)
Bendix	2603703-13	60B10014-9	1.55
Bendix	2603703-14	60B10014-11	1.55
Bendix	2605662-1	60B10014-15	2.50
Bendix	2605662-3	60B10014-23	2.70
BFGoodrich	2-1515-1	60B10062-11	2.00
BFGoodrich	2-1515-2	60B10062-12	2.00

(b) Within 180 days after the effective date of this AD, accomplish the requirements specified in paragraph (b)(1), (b)(2), (b)(3), (b)(4), (b)(5), or (b)(6) of this AD, as applicable:

(1) For airplanes equipped with Bendix Part Numbers (P/N) 2602012-2, -3, -4, and -5, (Boeing P/N 60B00150-5, -6, -8, and -12):

(i) Inspect each brake to ensure it is not worn more than 1.75 inches. Any brake worn more than this limit must be replaced, prior to further flight, with a brake within this limit; or with a Bendix Brake P/N 2602012-30, -40, or -50, (Boeing P/N 60B00150-21, -22, and -23), as applicable, built in accordance with Bendix Service Bulletin 2602012-32-001, Revision 2, dated October 10, 1991.

(ii) Add Bendix Brake P/N's 2602012-30, -40, and -50 to the FAA-approved Airplane Flight Manual (AFM), Section 4, "Maximum Brake Energy Limit Speed," Category "B," and remove Bendix brake P/N's 2602012-2, -3, -4, and -5 from the AFM.

(iii) Intermix of the P/N 2602012-2, -3, -4, and -5 brakes with the P/N 2602012-30, -40 and -50 brakes is allowed for 360 days after the effective date of this AD. Delay removal of the P/N 2602012-2, -3, -4, and -5 brakes from the AFM, as required by paragraph (b)(1)(ii) of this AD, until intermix is ended.

(iv) Change all references of Bendix Brake P/N's 2602012-2, -3, -4, and -5 to Category "B" on the Maximum Brake Energy Chart in Section 4 of the AFM.

(v) Incorporate a 1.75-inch maximum allowable brake wear limit for Bendix brake P/N's 2602012-30, -40 and -50 into the FAA-approved maintenance inspection program.

(2) For airplanes equipped with Bendix Brake P/N's 2602012-2, -3, -4, and -5, (Boeing P/N's 60B00150-4, -9, and -13): Incorporate a 2.38-inch maximum allowable brake wear limit into the FAA-approved maintenance inspection program.

(3) For airplanes equipped with Bendix Brake P/N's 2601902-3 -4, and -6, (Boeing P/N's 60B00150-10, -11, and -14):

(i) Inspect each brake to ensure it is not worn more than 1.73 inches. Any brake worn more than this limit must be replaced, prior to further flight, with a brake within this limit; or with a Bendix Brake P/N 2601902-30, -40, or -60, (Boeing P/N's 60B00150-24, -25, and -26), as applicable, built in accordance with Bendix Service Bulletin 2601902-32-001, Revision 2, dated October 10, 1991.

(ii) Add Bendix Brake P/N's 2601902-30, -40, and -60 to the AFM, Section 4, "Maximum Brake Energy Limit Speed, " Category "C."

(iii) Intermix of the P/N 2601902-2, -3, -4, and -6 brakes with the P/N 2601902-30, -40 and -60 brakes is allowed for 360 days after the effective date of this AD when a 1.73-inch maximum allowable brake wear limit removal criteria is used for these brakes.

(iv) Move Bendix Brake P/N's 2601902-2, -3, -4, and -6 from Category "C" to Category "B" in the AFM, Section 4, "Maximum Brake Energy Limit Speed." if intermixing is used, delay movement of these brakes to Category "B" until intermixing is ended.

(v) Change all references of Bendix P/N's 2601902-3, -4, -6 to Category "C" on the Maximum Brake Energy Chart in section 4 of the AFM.

(vi) Incorporate a 2.38-inch maximum allowable brake wear limit for Bendix Brake P/N's 2601902-3, -4, and -6, and a 1.73-inch maximum allowable brake wear limit for P/N's 2601902-30, -40, and -60, into the FAA-approved maintenance inspection program.

(4) For airplanes equipped with Bendix Brake P/N 2605662-2, (Boeing P/N 60B10014-14):

(i) Inspect each brake to ensure that it is not worn more than 1.73 inches. Any brake worn more than this limit must be replaced, prior to further flight, with a brake within this limit; or with Bendix Brake P/N 2605662-20, (Boeing P/N 60B10014-30), built in accordance with Bendix Service Bulletin 2605662-32-028, Revision 2, dated October 10, 1991.

(ii) Add Bendix Brake P/N 2605662-20 to the AFM, Section 4, "Maximum Brake Energy Limit Speed," Category "C."

(iii) Intermix of the P/N 2605662-2 brakes with the P/N 2605662-20 brakes is allowed for 360 days after the effective date of this AD when a 1.73-inch maximum allowable ware limit removal criteria is used for these brakes.

(iv) Move Bendix Brake P/N 2605662-2 from Category "C" to Category "B" in the AFM, Section 4, "Maximum Brake Energy Limit Speed." If intermixing is used, delay movement of these brakes to Category "B" until intermix is ended.

(v) Change all references of Bendix P/N 2605662-5 to Category "C" on the Maximum Brake Energy Chart in Section 4 of the AFM.

(vi) Incorporate a 2.38-inch maximum allowable brake wear limit for Bendix Brake P/N 2605662-2, and a 1.73-inch maximum allowable brake wear limit for P/N 2605662-20, into the FAA-approved maintenance inspection program.

(5) For airplanes equipped with Bendix Brake P/N 2605155-1, (Boeing P/N 60B10014-10):

(i) Inspect each brake to ensure that it is not worn more than 2.50 inches. Any brake worn more than this limit must be replaced, prior to further flight, with a brake within this limit; or with Bendix Brake P/N 2605155-2, (Boeing P/N 60B10014-31), built in accordance with Bendix Service Bulletin 2605155-32-001, Revision 2, dated October 10, 1991.

(ii) Add Bendix Brake P/N 2605155-2 to the Airplane Flight Manual (AFM), Section 4, "Maximum Brake Energy Limit Speed," Category "C."

(iii) Intermix of the P/N 2605155-1 brakes with the P/N 2605155-2 brakes is allowed for 360 days after the effective date of this AD when a 2.50-inch maximum allowable wear limit removal criteria is used for these brakes.

(iv) Move Bendix Brake P/N 2605155-1 from Category "C" to Category "B" in the AFM, Section 4, "Maximum Brake Energy Limit Speed." If intermixing is used, delay movement of this brake to Category "B" until intermixing is ended.

(v) Change all references of Bendix P/N 2605155-1 to Category "C" on the Maximum Brake Energy Chart in Section 4 of the AFM.

(vi) Incorporate a 3.20-inch maximum allowable brake wear limit for Bendix Brake P/N 2605155-1, and a 2.50-inch maximum allowable brake wear limit for P/N 2605155-2, into the FAA-approved maintenance inspection program.

(6) For airplanes equipped with Bendix Brake P/N 2605392-1, (Boeing P/N 60B10035-2): Incorporate a 1.90-inch maximum allowable brake wear limit into the FAA-approved maintenance inspection program.

(c) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager,

Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(e) Brakes shall be built in accordance with Bendix Service Bulletin 2601902–32–001, Revision 2, dated October 10, 1991; Bendix Service Bulletin 2602012–32–001, Revision 2, dated October 10, 1991; Bendix Service Bulletin 2605155–32–001, Revision 2, dated October 10, 1991; or Bendix Service Bulletin 2605662–32–028, Revision 2, dated October 10, 1991; as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Allied-Signal Aerospace Company, Bendix Wheels and Brakes Division, South Bend, Indiana 46620. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on August 13, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92–NM–78–AD; Amdt. 39–8363; AD 92–19–05]

Airworthiness Directives: Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 757 series airplanes equipped with Pratt and Whitney PW2000 series engines, that requires rework of the flow control tee assembly in the deploy lines on both engine struts, by removal of the poppet valves; installation of a restrictor check valve in the stow and deploy lines on each thrust reverser sleeve; and a functional test of the thrust reverser system. This amendment is prompted by a determination that damage to a thrust reverser actuator piston seal in combination with activation of the thrust reverser auto restow system could result in uncommanded thrust reverser deployment. The actions specified by this AD are intended to prevent in-flight deployment of one thrust reverser sleeve on one engine, which could result in reduced controllability of the airplane.

DATES: Effective November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket 92–NM–78–AD, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC 20001.

FOR FURTHER INFORMATION CONTACT: Jeffrey Duven, Aerospace Engineer, Seattle Aircraft Certification Office, Propulsion Branch, ANM–140S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2688; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Boeing Model 757 series airplanes, equipped with Pratt and Whitney PW2000 series engines, was published in the Federal Register on May 5, 1992 (57 FR 19286). That action proposed to require rework of the flow control tee assembly in the deploy lines on both engine struts, by removal of the poppet valves; installation of a restrictor check valve in the stow and deploy lines on each thrust reverser sleeve; and a functional test of the thrust reverser system.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Two commenters support the proposed rule.

The Air Transport Association (ATA) of America, on behalf of one of its members, requests that the compliance time for the modification be increased from the proposed 180 days to 4,000 flight hours. The commenter suggests that such an extension would ensure that the modification could be accomplished during a regularly scheduled "C" check, when airplanes are brought to the main maintenance base for an extended hold, and sufficient time will be available for the installation of the modification. An extension of the proposed compliance period would preclude the need for special scheduling of maintenance at considerable expense, beyond what was projected by the cost impact analysis of the proposed rule. Finally, the commenter has operated the Model 757 series airplane with over 190,000 flight hours for the fleet, with no uncommanded thrust reverser deployment occurrences whatsoever. The FAA does not concur with the request for an extension of the compliance time. The possible consequences of an in-flight thrust reverser deployment on the Model 757 series airplane have led the FAA to require this modification be implemented as soon as it is practicable, as proposed by the 180-day compliance period. This safety issue overrides the commenter's operating experience and the convenience of completing the modification coincidental with scheduled heavy maintenance. Airplane downtime for the modification will require approximately 5 work hours, which can be performed during an overnight hold. The FAA has determined that the compliance requirements, as proposed, represent the maximum time interval in which the modification can be accomplished, and an acceptable safety level be maintained.

Paragraph (b) of the final rule has been revised to clarify the procedure for requesting alternative methods of compliance with this AD.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change previously described. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 207 Boeing Model 757 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 189 airplanes of U.S. registry will be affected by this AD, that it will take approximately 20 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Required parts will be provided by Boeing at no charge to operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $207,900. This total cost figure assumes that no operator has yet

accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92–19–50. Boeing: Amendment 39–8363. Docket 92–NM–78–AD.

Applicability: Model 757 airplanes equipped with Pratt and Whitney PW2000 series engines; as listed in Boeing Alert Service Bulletin 757–78A0029, dated February 28, 1992; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent in-flight deployment of one thrust reverser sleeve on one engine, which could result in reduced controllability of the airplane, accomplish the following:

(a) Within 180 days after the effective date of this AD, rework the flow control tee assembly in the deploy lines on both engine struts, by removal of the poppet valves; install a restrictor check valve in the stow and deploy lines on each thrust reverser sleeve; and perform a functional test of the thrust reverser system; in accordance with Boeing Alert Service Bulletin 757–78A0029, dated February 28, 1992.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with Boeing Alert Service Bulletin 757–78A0029, dated February 28, 1992. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC 20001.

(e) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on August 20, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92–NM–40–AD; Amdt. 39–8367; AD 92–19–09]

Airworthiness Directives; Short Brothers Model SD3–30 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Short Brothers Model SD3–30 series airplanes, that currently requires inspections of various structural and system components, and repair or modification, if necessary. This amendment adds specific requirements for repetitive inspections to detect cracks of the rib/skin attachment cleats at left Wing Station 160. This amendment is prompted by a report that the existing AD is unclear as to the required repetitive inspections of this area. The actions specified by this AD are intended to prevent failure of the cleat attachment, which could comprise the structural capability of the wing.

DATES: Effective November 17, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 17, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Short Brothers, PLC, 2011 Crystal Drive, suite 713, Arlington, Virginia 22202–3719. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Hank Jenkins, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2141; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 84–07–06 R1, Amendment 39–6036 (53 FR 38003, September 29, 1988), which is applicable to certain Short Brothers Model SD3–30 series airplanes, was published in the **Federal Register** on May 12, 1992 (57 FR 20213). The action proposed to require inspections of various structural and system components, and repair or modification, if necessary, and repetitive inspections to detect cracks of the rib/skin attachment cleats at left Wing Station 160.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the rule as proposed, but requests that the FAA determine if a similar AD should be issued against Short Brothers Model SD3–60 series airplanes. The FAA concurs. The FAA has taken action to ascertain whether or not Model SD3–60 series airplanes are also subject to the addressed unsafe condition, and will initiate appropriate rulemaking action, if

necessary, once that determination has been made.

A second commenter requests that paragraphs (e) and (e)(2) of the proposed rule be clarified by citing references to those specific parts of the service bulletin that apply to these paragraphs. The FAA concurs, and has revised the final rule accordingly.

In addition, the commenter suggests that a new paragraph, (e)(3), be added to the proposal to specify that after the repair has been accomplished, the repetitive inspection interval reverts to 4,800 hours time-in-service. The FAA does not concur, since paragraph (e)(2) of the proposal already specifies that the inspections of repaired bays must be repeated at intervals not to exceed 4,800 hours time-in-service.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

The FAA estimates that 50 airplanes of U.S. registry will be affected by this AD, that it will take approximately 180 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Required parts will cost approximately $3,000 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $748,200. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 11612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-6036 (53 FR 38003, September 29, 1988), and by adding a new airworthiness directive (AD), amendment 39-6367, to read as follows:

92-19-09. Short Brothers: Amendment 39-6367. Docket 92-NM-40-AD. Supersedes AD 84-07-06 R1, Amendment 39-6036.

Applicability: All Model SD3-30 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To preserve the structural integrity of the wing and horizontal stabilizer; to prevent fuel leaks into the cabin; to ensure adequate fire protection for the aft baggage compartment; and to prevent attempted operations with the control surfaces locked; accomplish the following:

(a) To ensure the availability of an adequate concentration of fire extinguishing agent in the event of a baggage compartment fire within 180 days after November 3, 1988 (the effective date of AD 84-07-06 R1, Amendment 39-6036), install a new closing panel in the aft baggage compartment in accordance with Short Brothers Ltd. Service Bulletin SD3-25-30, dated January 8, 1982.

(b) To prevent weather or fuel leakage into the passenger cabin, within 180 days after November 3, 1988, inspect and seal the fuselage crown in accordance with Short Brothers Ltd. Service Bulletins SD3-53-01, Revision 2, dated January 19, 1977; SD3-53-18, dated November 25, 1977; and SD3-53-41, dated May 21, 1980.

(c) To prevent fatigue failure of the wing drag links, within 600 hours time-in-service after November 3, 1988, or upon the accumulation of 4,800 total hours time-in-service, whichever occurs later, inspect and modify in accordance with Short Brothers Ltd. Service Bulletin SD3-53-48, Revision 1, dated January 5, 1983. Replaced damaged parts prior to further flight, in accordance with the service bulletin.

(d) To detect excessive corrosion or wear in the horizontal stabilizer (tailplane)-to-fuselage attachment fittings, pins, and bushings: Within 90 days after November 3, 1988, perform an inspection for corrosion or wear of the horizontal stabilizer (tailplane)-to-fuselage fittings, pins, and bushings in accordance with Short Brothers Ltd. Service Bulletin SD3-55-10, Revision 3, dated November 1987. For airplanes that have accumulated less than 4,800 hours time-in-service or 2 years of age, whichever occurs first. Any parts found to be worn or corroded must be replaced prior to further flight, in accordance with the service bulletin.

(1) If the pins are not replaced by new pins, and if there is no corrosion found on the attachment fittings, repeat this inspection at intervals not to exceed 1,200 flight hours or 6 months from the previous inspection, whichever occurs sooner.

(2) If all the pins on one side are replaced by new pins, repeat the inspection on that side within the next 4,800 flight hours or 2 years from the replacement, whichever occurs sooner. Thereafter, inspect at intervals not to exceed 2,400 flight hours or 1 year from the previous inspection, whichever occurs sooner.

(e) To detect cracked or broken rib/skin attachment cleats at left Wing Station 180, within 300 hours time-in-service after November 3, 1988, or upon the accumulation of 4,800 total hours time-in-service, whichever occurs later, inspect in accordance with Part A (Inspection) of paragraph 2.A. of the Accomplishment Instructions of Short Brothers Ltd. Service Bulletin SD3-57-10, Revision 1, dated October 11, 1982. Repeat this inspection within 2,400 hours time-in-service after the immediately preceding inspection, or within 300 hours time-in-service after the effective date of this AD, whichever occurs later, in accordance with the service bulletin.

(1) If no cracks are found, repeat the inspection of each bay at intervals not to exceed 2,400 hours time-in-service, in accordance with the service bulletin.

(2) If any cracks are found, prior to further flight, repair in accordance with Part B (Repair—Rear Bay) and/or Part C (Repair—Forward Bay) of paragraph 2.A. of the Accomplishment Instructions of the service bulletin; and repeat the inspection of the repaired bay at intervals not to exceed 4,800 hours time-in-service, in accordance with the service bulletin.

(f) To prevent takeoff with locked flight controls, within 180 days after November 3, 1988, modify the power control circuit in accordance with Short Brothers Ltd. Service bulletin SD3-76-01, dated September 8, 1981.

(g) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch.

Note: Information concerning the existence of approved alternative methods of

compliance with this AD, if any, may be obtained from the Standardization Branch.

(h) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(i) The installation, inspections, and modifications shall be done in accordance with the following Short Brothers, Ltd., service bulletins, as applicable, which contain the specified effective pages:

Service bulletin referenced and date	Page No.	Revision level shown on page	Date shown on page
SD3-25-30, January 8, 1992	1-7	Original	January 8, 1992.
SD3-53-01 Revision 2, January 19, 1977	1, 25	2	January 19, 1977.
	2-24, 26-60	1	November 27, 1976.
SD3-53-18, November 25, 1977	1-5	Original	November 25, 1977
SD3-53-41, May 21, 1980	1-8	Original	May 21, 1980.
SD3-53-48, Revision 1, January 5, 1983	1-7	1	January 5, 1983.
SD3-55-16, Revision 3, November 1987	1-8	3	November 1987.
SD3-57-10, Revision 1, October 11, 1982	1-12	1	October 11, 1982.
SD3-76-01, September 8, 1981	1-7	Original	September 8, 1981.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Short Brothers, PLC, 2011 Crystal Drive, Suite 713, Arlington, Virginia 22202-3719. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(j) This amendment becomes effective on November 17, 1992.

Issued in Renton, Washington, on August 21, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 97

[Docket No. 26984; Amdt. No 1511]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: Effective: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS-420), Technical Programs Division, Flight Standard Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight

safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (Air), Standard instrument approaches, Weather.

Issued in Washington, DC on September 25, 1992.

Thomas C. Accardi,

Director, Flight Standard Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. App. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

* * * *Effective December 10, 1992.*

BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 26895; Amdt. No. 1512]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: Effective: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS-420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description on each SIAP is contained in the appropriate FAA Form 8260 and the National Flight Data Center (FDC) /Permanent (P) Notices to Airmen (NOTAM) which are incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviations Regulations (FAR). Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction of charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The Provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes SIAPs. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained in the content of the following FDC/P NOTAM for each SIAP. The SIAP information in some previously designated FDC/Temporary (FDC/T) NOTAMs is of such duration as to be permanent. With conversion to FDC/P NOTAMs, the respective FDC/T NOTAMs have been cancelled.

The FDC/P NOTAMs for the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these chart changes to SIAPs by FDC/P NOTAMs, the TERPs criteria were applied to only these specific conditions existing at the affected airports.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. All SIAP amendments in this rule have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Further, the SIAPs contained in this amendment are based on the criteria contained in the US Standard for Terminal Instrument Approach Procedures (TERPs). Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore–(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (Air), Standard instrument approaches, Weather.

Issued in Washington, DC on September 25, 1992.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. App. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g) (revised Pub. L. 97–449, January 12, 1983), and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910-13-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Docket No. M08-1-5559; FRL-4510-2]

Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA approves revisions to the Air Pollution Control State Implementation Plan (SIP) submitted by the state of Missouri, which pertain to the St. Louis vehicle inspection and maintenance (I/M) program. As a result of two EPA audits of the program, EPA requested that the state of Missouri submit a corrective action plan (CAP). This CAP consists of regulatory specifications for computerized emission analyzers which should facilitate correction of the problems experienced in the program. Improvements in the I/M program will reduce vehicle emissions which will ensure progress toward

attaining the ozone standard in St. Louis.

EFFECTIVE DATE: November 12, 1992.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at: the Environmental Protection Agency, Air Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101; the Missouri Department of Natural Resources, Air Pollution Control Program, Jefferson State Office Building, 205 Jefferson Street, Jefferson City, Missouri 65101; and the Public Information Reference Unit, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Stanley A. Walker at (913) 551–7494.

SUPPLEMENTARY INFORMATION: On January 1, 1984, the state of Missouri began implementing a motor vehicle I/M program in the St. Louis metropolitan area. The St. Louis I/M program is jointly administered by the Missouri State Highway Patrol (MSHP) and the Missouri Department of Natural Resources (MDNR). The MSHP oversees the vehicle inspection process, while MDNR provides technical assistance and tracks progress. On August 12, 1985, EPA approved the St. Louis I/M program as a SIP revision (50 FR 32411).

At that time, I/M programs were required to meet the minimum emission reduction requirements (MERR), as defined in House Report Number 95–294, 95th Congress, 1st Session, 281–291 (1977). A March 1985 audit indicated that the St. Louis I/M program experienced a significant shortfall in achieving the minimum required volatile organic compound (VOC) and carbon monoxide (CO) emission reductions necessary for an acceptable I/M program.

As a follow-up to the March 1985 audit, EPA conducted a second audit of the St. Louis I/M program in May 1987. The follow-up audit showed that the state had not made sufficient progress toward improving the program and once again failed to achieve a level of emission reduction consistent with MERR.

Because the St. Louis I/M program did not meet the minimum requirements, EPA requested the state to submit a CAP to rectify the St. Louis I/M program deficiencies. As part of the CAP, Missouri implemented new computerized emission analyzers on December 1, 1990. On June 28, 1991, the state of Missouri submitted the computerized I/M analyzer specifications as a SIP revision.

On June 23, 1992, EPA published a Notice of Proposed Rulemaking (NPR) to approve the revised I/M analyzer specifications as a SIP revision (57 FR 27959); no comments were received on the NPR. For a complete discussion of the state's submittal and EPA's rationale for approval, the reader is referred to the above mentioned Federal Register notice.

Section 182(b)(4) of the Act requires moderate ozone nonattainment areas to implement an I/M program. The program must be consistent with the requirements of section 182(a)(2)(B), which is the savings clause for vehicle I/M programs. The I/M savings clause requires implementation of an I/M program which is no less stringent than that of either the 1977 House Report or the program already included in the Sip, whichever is more stringent. Therefore, for St. Louis, the effect of the 1990 CAA is to maintain the I/M program requirements of the preamended Act. In accord with section 182(a)(2)(B)(ii) of the Act, EPA is presently revising its guidance for I/M programs (see Federal Register, June 13, 1992, 57 FR 31068). Based on the final guidance, EPA may require appropriate changes, as necessary, to the St. Louis I/M program.

EPA Action: In today's notice, EPA takes final action to approve revisions to the I/M analyzer specifications as a revision to the Missouri SIP. The St. Louis I/M program is incorporated into an existing statewide safety inspection program; consequently, the state submittal contains rule revisions pursuant to the safety portion of the inspection program. The applicable requirements of the CAA pertain only to I/M programs, not to vehicle safety programs. Therefore, EPA approves the state submittal only insofar as it pertains to the emissions portion of the Missouri vehicle inspection program.

Nothing in this action should be constructed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors, and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table 3 action the Regional Administrator under the procedures published in Federal Register on January 19, 1989 (54 FR 2214–2225). EPA has submitted a request for a permanent waiver for Tables 2 and 3 SIP revisions from the requirements of section 3 of Executive Order 12291. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by December 14, 1992. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review, nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, carbon monoxide, Hydrocarbons, Incorporation by reference, Ozone, Volatile organic compounds.

Dated: September 8, 1992.

Morris Kay,

Regional Administrator.

40 CFR part 52, subpart AA, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for Part [redacted] continues to read as follows:

Authority: 42 U.S.C 7401–7642.

Subpart AA—Missouri

2. Section 52.1320 is amended by adding paragraph (c)(80) to read as follows:

§ 52.1320 Identification of plan.

* * * * *

(c) * * *

(80) On June 28, 1991, the Missouri Department of Natural Resources (MDNR) submitted revisions to the Missouri State Implementation Plan which pertain to the St. Louis vehicle inspection and maintenance program. The Missouri rules contain requirements which apply to both safety and emission testing; EPA takes action on these rules only insofar as they pertain to emissions testing.

(i) Incorporation by reference.

(A) New rules 11 CSR 50–2.401, General Specifications; 11 CSR 50–2.402, Missouri Analyzer System (MAS) Software Functions; 11 CSR 50–2.403, MAS Display and Program Requirements; 11 CSR 50–2.405, Vehicle Inspection Certificate, Vehicle Inspection Report and Printer Function Specifications; 11 CSR 50–2.406, Technical Specifications for the MAS; and 11 CSR 50–2.407 Documentation, Logistics and Warranty Requirements; (appendix A, B, C), effective June 28, 1990.

(B) New rule 11 CSR 50–2.404, Test Record Specifications, effective September 28, 1990.

(C) Amended rules 11 CSR 50–2.370 Inspection Station Licensing; 11 CSR 50–2.410, Vehicles Failing Reinspection; and 11 CSR 50–2.420 Procedures for Conducting Only Emission Tests; effective December 31, 1990.

(D) Rescinded rule 11 CSR 50–2.400, Emission Test Procedures; effective December 31, 1990.

Approval and Promulgation of Implementation Plans Georgia: Approval of Revisions to the Volatile Organic Compound (VOC) Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving the revisions submitted by Georgia to correct the deficiencies in Georgia's Volatile Organic Compound (VOC) regulations submitted to EPA in April 1987. These VOC regulations are being approved to satisfy the requirements of section 182(a)(2)(A) of the Clean Air Act (CAA) for states to correct deficiencies in VOC RACT regulations by May 21, 1991. The April 1987, submittal was in response to a February 1984 SIP call, and to the Agency's proposed disapproval of the 1985 SIP due to major deficiencies. The submittals were to revise the ozone attainment plan for the Atlanta metropolitan area, which is designated as an ozone nonattainment area. The revisions were to demonstrate attainment of the ozone National Ambient Air Quality Standards (NAAQS) by December 31, 1994. Modifications to the VOC regulations, Inspection and Maintenance program (I&M), control strategy, emission inventory, and modeling demonstration were included in the plan. The State of Georgia submitted additional information during 1988, and 1989, and on January 3, 1991, and September 30, 1991, Georgia submitted revisions incorporating changes to VOC regulations. However, it was not until April 3, 1991, and November 15, 1991, respectively, that all of the required elements were received for a complete submittal. The VOC regulations apply to all 25 tons per year or greater VOC emission sources in the ozone nonattainment counties of the Atlanta metropolitan area, and all 100 tons per year or greater VOC emission sources, statewide. These revisions correct all of Georgia's VOC deficiencies including capture efficiency.

EFFECTIVE DATES: This action will be effective December 14, 1992, unless notice is received by November 12, 1992, that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Copies of the State's submittal are available during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Region IV Air Programs Branch, Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia 30365.

Air Protection Branch, Georgia Environmental Protection Division, Georgia Department of Natural Resources, 205 Butler Street, Southeast, Room 1162, East Tower, Atlanta, Georgia 30334.

FOR FURTHER INFORMATION CONTACT: Diane Altsman of the EPA Region IV Air Programs Branch at (404) 347–2864 and at the above address.

SUPPLEMENTARY INFORMATION: On March 3, 1978, (43 FR 8962), EPA designated the Atlanta area as nonattainment for ozone. The State was subsequently required to revise its ozone State Implementation Plan (SIP) for the Atlanta area, pursuant to the Part D requirements of the Clean Air Act, as amended in 1977 (1977 Act). Georgia submitted information to satisfy the requirements for a Part D submittal as follows:

January 17, 1979, March 9, 1979, March 16, 1979, March 20, 1979, June 29, 1979, December 27, 1979, and April 8, 1980.

On November 24, 1981 (46 FR 57486), EPA announced final approval of the Georgia ozone SIP. The State had calculated that Georgia would achieve the ozone standard in the Atlanta metropolitan area by December 31, 1982.

However, the control strategy for ozone, referenced above, did not result in attainment of the NAAQS for ozone by December 31, 1982. Consequently on February 24, 1984, EPA notified the Governor of Georgia pursuant to Section 110(a)(2)(H) of the 1977 Act that the SIP was substantially inadequate to achieve the NAAQS for ozone in the Atlanta area and called upon the State to revise the SIP. The Environmental Protection Division (EPD) of the Georgia Department of Natural Resources submitted the final SIP revision to EPA on November 21, 1985, in response to the 1984 SIP call.

During EPA's review of the submittal, it was determined that the SIP contained deficiencies and was not approvable. A revised and modified SIP was submitted on October 1, 1987. This SIP demonstrated attainment by December 31, 1994, and resolved many of the problems noted in the earlier submittal, but major deficiencies remained. Submittals on January 3, 1991, and April 3, 1991, corrected the VOC Reasonably Available Control Technology (RACT) deficiencies, and a submittal on September 30, 1991, included an EPA-approved capture efficiency protocol. EPA is approving the revisions to the RACT regulations to satisfy the requirements of section 182(a)(2)(A) for correction of deficiencies in those regulations.

EPA is today approving the following revisions:

391–3–1–.01 Definitions

Revised definition of VOC, (jjj), to conform with the EPA definition as contained in the pre-amendment guidance entitled "Issues Relating to VOC Regulation Cutpoints, Deficiencies, Clarification to Appendix D of November 24, 1987, **Federal Register** Notice." Since that time, EPA has published **Federal Register** notices that added other non-reactive compounds. Revisions to the definition to include these additional compounds will be submitted by the State in their RACT revisions pursuant to section 182(b)(2)(B).

391–3–1–.02(2) Emission Standards

The following existing subsections have been revised to be consistent with the CAA as interpreted in EPA guidance:

(t) VOC Emissions from Automobile and Light-Duty Truck Manufacturing
(u) VOC Emissions from Can Coating
(v) VOC Emissions from Coil Coating
(w) VOC Emissions from Paper Coating
(x) VOC Emissions from Fabric and Vinyl Coating
(y) VOC Emissions from Metal Furniture Coating
(z) VOC Emissions from Large Appliance Surface Coating
(aa) VOC Emissions from Wire Coating
(bb) Petroleum Liquid Storage
(cc) VOC Emissions from Bulk Gasoline Terminal
(ee) Petroleum Refineries
(ff) Solvent Metal Cleaning

(ii) VOC Emissions from Surface Coating of Miscellaneous Metal Parts and Products
(jj) VOC Emissions from Surface Coating of Flat Wood Paneling
(mm) VOC Emissions from Graphic Arts Systems

The following subsections have been added to be consistent with the CAA as interpreted in EPA guidance:

(pp) Bulk Gasoline Plants
(qq) VOC Emissions from Large Petroleum Dry Cleaners
(rr) Gasoline Dispensing Facility—Stage I
(ss) Gasoline Transport Vehicles and Vapor Collection Systems
(ww) Perchloroethylene Dry Cleaners

391-3-1-.02(3) Sampling

Revise subparagraph (3)(a) to reference the methods specified in the Georgia Department of Natural Resources Manual of Procedures for Testing and Monitoring Sources of Air Pollutants dated August 1, 1991.

391-1-.02(6) Source Monitoring

Paragraph (6)(a) is amended by adding recordkeeping requirements to be consistent with the CAA is interpreted in EPA guidance.

Final Action

EPA is approving the Georgia VOC regulations listed in the SUPPLEMENTARY INFORMATION section of this notice and the incorporation of a revised test manual, which includes capture efficiency protocols.

On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Public Law 101-549, 104 Stat. 2399, codified at 42 U.S.C. SS 7401-7671q. In the amended act Congress codified the requirement that States with areas classified as marginal or above revise their SIPs for these classified ozone nonattainment areas so that the SIPs conform with EPA's pre-amendment guidance.[1] Section 182(a)(2)(A). Section 182(a)(2)(A) established a deadline of May 15, 1991, for submittal of these RACT "fix-ups."

This action is being taken without prior proposal because the changes are noncontroversial and EPA anticipates no significant comments on them. The public should be advised that this action will be effective 60 days from the date of this Federal Register notice. If, however, notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a comment period.

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the Federal Register on January 19, 1989, (54 FR 2214-2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by December 14, 1992. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2)).

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any State Implementation Plan. Each request for revision to the State Implementation Plan shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

Under 5 U.S.C. section 605(b), the Administrator certifies that SIP approvals under sections 107, 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities. SIP approvals (or redesignations) do not create any new requirements but simply approve requirements that are already State law. SIP approvals (or redesignations), therefore, do not add any additional requirements for small entities. Moreover, due to the nature of the Federal-State relationship under the Clean Air Act, preparation of a flexibility analysis for a SIP approval would constitute Federal inquiry into the economic reasonableness of the State actions. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds.

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements.

Dated: August 31, 1992.

Patrick M. Tobin,

Acting, Regional Administrator.

Part 52 chapter I, title 40 of the Code of Federal Regulation is amended as follows:

PART 52—[AMENDED]

1. The authority citation for Part 52 continues to read as follows;

Authority: 42 U.S.C. 7401-7671q

Subpart L—Georgia

2. Section 52.570 is amended by adding paragraph (c) (37) to read as follows:

§ 52.570 Identification of plan.

* * * * *

(c) * * *

(37) Revisions to the VOC regulations, to correct RACT deficiencies; Chapter 391-3-1-.01, and .02 of the Georgia Department of Natural Resources Rules for Air Quality Control, which was submitted on January 3, 1991, and April 3, 1991. Change to Chapter 391-3-1-.02(3) to reference a new version of the test manual which includes capture efficiency protocols, which was submitted on September 30, 1991, and November 15, 1991.

(i) Incorporation by reference.

(A) The following revised Rules of the Georgia Department of Natural Resources, Chapter 391-3-1, Air Quality Control, became State effective on January 9, 1991.

391-3-1-.01(jjj);
402-3-1-.02(2)(a)4.;
391-3-1-.02(2)(t);
391-3-1-.02(2)(u)2.(i) and (iii);
391-3-1-.02(2)(v)2.(i) and (iii);
391-3-1-.02(2)(w)2.(i) and (iii);
391-3-1-.02(2)(x)2.(i),(iii), and (x)3.(v);
391-3-1-.02(2)(y)2.(i) and (iii);
391-3-1-.02(2)(z)2.(i) and (iii)
391-3-1-.02(2)(aa)2.(i) and (iii);
391-3-1-.02(2)(bb)1.(ii);
391-3-1-.02(2)(cc);
391-3-1-.02(2)(ee)1.(iii);
391-3-1-.02(2)(ff)2.(ii)(V) and 3. (iii) (III);
391-3-1-.02(2)(ii)4.(i) and (iii);
391-3-1-.02(2)(jj)2.(i) and (iii);
391-3-1-.02(2)(mm)1.(i), (ii) and (iii);
391-3-1-.02(2)(pp);
391-3-1-.02(2)(qq);

[1] Among other things, the pre-amendment guidance consists of the Post-87 Policy, 52 FR 45044 (Nov. 24, 1987); the Blue Book, "Issues Relating to VOC Regulation Cutpoints, Deficiencies and Deviations, Clarification to Appendix D of November 24, 1987 Federal Register Notice"; and the existing CTGs.

391-3-1-.02(2)(rr);
391-3-1-.02(2)(ss);
391-3-1-.02(2)(ww);
391-3-1-.02(6)(a)3.

(b) A revised Rule 391-3-1-.02(3)(a) "Sampling" which became State effective October 17, 1991.

(ii) Other material—None.

BILLING CODE [illegible]

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 205

RIN 0970-AA82

Aid to Families With Dependent Children; Adult Public Assistance: Revised Quality Control System

AGENCY: Administration for Children and Families, HHS.

ACTION: Final rule.

SUMMARY: This final rule establishes a revised quality control (QC) system for the Aid to Families with Dependent Children (AFDC) and the Adult assistance programs beginning in fiscal year 1991. Under the new system, we will impose disallowances in AFDC matching funds (Federal financial participation) on the States whose assistance payment error rates are above the national average; take into account both overpayments and underpayments made to AFDC recipients; provide incentives to States to improve their overpayment recoveries and their child support collections; use a Departmental Quality Control Review Panel to review differences between State and Federal AFDC review findings; and use the Departmental Appeals Board to review all other QC disallowance issues in dispute between the States and Federal government.

EFFECTIVE DATE: October 1, 1990, with the following exceptions.

Sections 205.41(c)(2), 205.41(d)(2)(iii), 205.41(d)(3)(iii), 205.41(d)(4)(iii), 205.41(d)(5), 205.42(b)(1), 205.42(e), 205.42(f), 205.42(g)(4), 205.42(i)(2), 205.42(i)(4), and 205.42(i)(5) are effective as of October 1, 1992; prior to October 1, 1992, applicable Federal policies set forth in Departmental issuances (e.g., regulations, action transmittals, etc.) govern.

FOR FURTHER INFORMATION CONTACT: Mr. Sean Hurley, Office of Family Assistance, Division of Quality Control, room 558a, 370 L'Enfant Promenade, SW., Washington, DC 20447 telephone (202) 401-9296.

SUPPLEMENTARY INFORMATION:

Background

These final rules govern the revised QC system for the AFDC program established by section 408 of the Social Security Act (the Act), as added by section 8004 of the Omnibus Budget Reconciliation Act (OBRA) of 1989 (Pub. L. 101-239), as well as revised program rules governing quality control for the Adult assistance programs under titles I, X, XIV, and XVI (AABD) of the Act. The QC system is the major management tool for measuring the accuracy of payments and the level of Federal funding under the AFDC and Adult assistance programs, and for obtaining the data needed to analyze and improve performance in paying benefits. We accomplish these two objectives by a continuous review of statistically valid and reliable State samples of AFDC and Adult assistance cases and Federal samples of AFDC assistance cases. To the extent that Medicaid eligibility is based on AFDC eligibility, these regulations also affect the Medicaid program.

In accordance with the legislative mandate in section 408(h) of the Act, we have consulted with representatives of the National Governors' Association, the American Public Welfare Association and the States in developing the regulations in the following areas: sampling methodology; sample size and selection procedures; time frames for sample completion and reporting of QC data; resolution of differences between State and Federal review findings; notification of error rates; and disallowances.

While the QC operating Manuals do not constitute substantive rules subject to rulemaking in accordance with 5 U.S.C. 553, we have also included in the final regulations some of the major aspects contained in the various QC Manuals which we believe are fundamental and would not significantly change over time. For example, we include the policy of requiring minimum verification and documentation standards for each element of eligibility and payment amount in § 205.42(c)(2) of the regulations. However, we set forth implementing verification and documentation methods in the QC Manuals.

Further, we have also included in the final regulations the existing regulatory requirements for the review of: (1) AFDC negative case actions in the States and in Guam, Puerto Rico, and the Virgin Islands; and (2) active cases and negative case actions of the Adult assistance programs in Guam, Puerto Rico, and the Virgin Islands. While section 408 of the Act does not require a change in the policies governing negative case actions and the Adult assistance programs, we have changed these policies, where appropriate, to be consistent with the AFDC active case requirements. However, as required by section 408, the Department is currently conducting a study of the AFDC negative case action QC system and will make recommendations to Congress on the future design and use of the system.

The Adult assistance programs exist only in Guam, Puerto Rico, and the Virgin Islands. The Department's authority for requiring a QC system in these programs derives from the requirement that Federal matching funds be provided for proper assistance payments (sections 3, 1003, 1403, and 1603 of the Act) and from the authority in section 1102 of the Act to issue rules for proper and efficient administration. For the purpose of uniformity and consistency, we are applying, except as indicated, the same sampling and review requirements contained in §§ 205.40, 205.41, and 205.42 (a) through (f) to both the AFDC and the Adult assistance programs. Sections 205.42(g), (h) and (i) and 205.43 do not apply to the Adult assistance programs since we do not utilize the Federal re-review and the calculation of the regressed error rates for these programs.

We have revised §§ 205.40, 205.42 and 205.43, added § 205.41, and removed and reserved § 205.44.

Major Provisions of the Statute

OBRA of 1989, which became law on December 19, 1989, provides a revised QC system for AFDC beginning in fiscal year 1991. While Congress made changes in the error rate tolerance and method for calculating disallowances, the basic design and features of the system remain unchanged. The major provisions of the legislation include:

1. Waiver of all pending or potential QC disallowances for fiscal years 1981 through 1990, estimated at $2.4 billion;
2. Establishment of a new error rate tolerance set at the national average error rate each year, or at 4 percent, whichever is higher;
3. Exclusion of certain types of errors in computing a State's payment error rate;
4. Calculation of disallowances based on a sliding scale which reflects the degree to which a State's error rate exceeds the national average;
5. Adjustment of disallowances based on good performance in achieving other program goals (i.e., low underpayment

rate relative to the national underpayment rate, high or improved child support collections and overpayment recoveries); and

6. Establishment of a Departmental QC Review Panel to review differences between State and Federal QC findings.

We have carefully reviewed the 484 comments which we received from 56 States, interested organizations and individuals on various aspects of the proposed regulations.

Discussion of the Regulations

In the following discussion, we have identified each section of the regulation being addressed and generally followed the format of the notice of proposed rulemaking (NPRM) issued June 17, 1991 (56 FR 27709). Preamble language in the final regulations generally follows the same sequence as in the NPRM, and we have interspersed comments and responses as appropriate. The regulatory language from the NPRM was retained except where indicated.

This discussion is divided into five parts. The first addresses comments on the scope, definitions and the codification of certain sections of the QC Manuals; the second addresses sampling issues; the third discusses a number of issues involving the QC review; the fourth describes the error rate and disallowance calculations and notification procedures; and the fifth discusses data analysis and corrective action.

Section 205.40 Quality Control System

This section of the final regulations contains the scope, definitions and basic elements of the QC system for the AFDC program and the Adult assistance programs in Guam, Puerto Rico, and the Virgin Islands. It also contains definitions of terms used in the QC system.

References to and Codification of QC Manual Procedures

Comment: Several commenters pointed out that since there are separate QC Manuals for the active and negative case reviews, appropriate references and definitions should be added to the regulations regarding the negative case action QC system.

Response: We agree and have made the appropriate additions. We have also added definitions for "negative case action error" and "suspended case" and made appropriate references to the negative case action QC Manual in paragraphs (b) and (c) of § 205.40.

Comment: Several commenters stated that we proposed to codify sections of the QC Manuals without full disclosure of the contents of those sections in the regulations. They said that if procedural matters were to be codified, they should be subject to the same codification requirements as all other regulations.

Response: Provisions of the QC operating Manuals are not subject to rulemaking in accordance with 5 U.S.C. 553 because they do not constitute substantive rules. However, we have included in the regulations some of the major aspects contained in the QC Manuals on which we felt comments and guidance would be helpful. We view these aspects as fundamental and not subject to significant changes. It should be noted that since 1975, the regulations have required States to operate the QC system in accordance with the policies and procedures prescribed in the QC Manuals issued by the Department.

Dollar Tolerance for Overpayments (and Underpayments)

Section 205.40(b)(8) of the NPRM defined an overpayment as financial assistance received by or for an assistance unit for the review month which exceeds, by at least $5.00, the amount for which that unit was eligible under permissible State practice in effect on the first day of the review month.

Comment: Two commenters indicated that the $5.00 tolerance has been in effect a number of years and we should adjust it upward due to inflation. One commenter suggested that we raise the tolerance to at least $10.00 since States are prohibited from making payments when an assistance unit is due less than $10.00.

Response: We do not agree that the tolerance should be adjusted. Given the substantial liberalization of the error rate tolerance (i.e., the average error rate achieved by all States each fiscal year), as well as the exclusion of certain erroneous payments under section 408 of the Act, we believe the upward adjustment of the $5.00 tolerance is unwarranted.

Permissible State Practice

In § 205.40(b)(11) of the NPRM, we defined permissible State practice as written rules and policies relating to eligibility and payment that are in accordance with an approved State plan or a proposed State plan amendment that has been submitted to but not acted upon by the Department. If an approved State plan does not conform to Federal regulations or law, subject to exception, permissible State practice means the Federal regulations or law. We note that in the prior QC regulations, the definition of permissible State practice contained language to clarify the basis of the QC review when written rules and policies are inconsistent with the State plan. In such instances, the QC review was conducted against the State plan or proposed amendment. We have amended the language in the final regulations at § 205.40(b)(12) to address this situation.

Comment: Two commenters indicate that the proposed definition did not make a distinction between substantive policies relating to eligibility and procedural requirements. An example was given by one commenter of an instance where a recipient had a social security number as of the review date but had not furnished it to the local agency. The commenter believed that an error should not be cited in such situations because furnishing the number is a procedural requirement.

Response: Rules and policies relating to eligibility and payment mean the qualifying conditions that must exist to establish eligibility and payment. The tools and methods which the local agency uses to demonstrate that the qualifying conditions exist are considered procedural requirements. The QC process is not concerned with how eligibility is verified by the local agency but rather that eligibility in fact exists, and that the recipient is paid the appropriate amount of assistance due. The agency may devise any procedural methodology for its income maintenance worker to use in determining eligibility and payment which differ from that used by the QC worker. Any difference in the procedures would not constitute an error. However, an error would be cited based on the differences in the established factual conditions and how those conditions impact eligibility and payment. For the example mentioned above, the regulations at § 205.42(d)(2)(v) specify that a recipient must apply for a social security number and furnish it to the local agency upon receipt. These requirements are basic conditions of eligibility. Procedures established to verify these conditions must demonstrate that the applicant or recipient applied for a number and furnished it to the agency when it was received.

Comment: One commenter stated that the proposed definition of permissible State practice did not provide for a time period between implementation of a State policy and the submission of a State plan amendment.

Response: It is not necessary to include in the definition of permissible State practice a time period between implementation of a State policy and the submission of a State plan amendment. Longstanding Federal policy at § 201.3(g)

provides that a State plan amendment, in operation on a statewide basis, may not be in effect any earlier than the first day of the quarter in which it is submitted.

Comment: One commenter wanted to know if the sentence "Where the plan provision does not conform to Federal regulations or law, permissible State practice means the Federal regulations or law, except as noted in § 205.42(b)(1)" applies to approved plan provisions.

Response: The sentence does not apply to approved plan provisions. As indicated at § 205.42(b)(1)(i) of the final regulations, where Federal staff approves a State plan amendment that is later determined to be inconsistent with Federal law or regulations, QC staff will continue to review to the inconsistent plan until a new amendment is submitted or for six months from the date which the State receives notice in writing of the inconsistency, whichever is earlier. This time period represents a change from the 60 calendar days in the proposed regulations and is consistent with the six months provided in the statute for implementing a new law.

Comment: One commenter indicated that a State rule or policy issued in accordance with the proposed plan should not be subject to questions of conformity with Federal law by QC staff.

Response: A State's rule and policy statements are interpretations of the conditions and options specified in the State plan. The State plan is a streamlined statement of State policy under Federal law and regulations. As part of the plan, every State is required to sign an agreement indicating that it will operate its program in accordance with Federal statute and regulations. Since Federal staff approves a State's plan and not the detailed operating policies and procedures developed to implement a plan provision, there may be times when a State's interpretation, as specified in its policy statements, is inconsistent with the intent of Federal law and regulations. A basic role of QC is to measure the incidence of such occurrences.

Section 205.41 Sampling Plan and Procedures

This section of the final regulations provides the sampling plan and sample size requirements and procedures for the AFDC and Adult assistance programs.

Sampling Plan Requirements and Submittal Dates

The regulations at § 205.41 specify the content of the State QC sampling plan. However, except as noted below under "Sampling Methodology," the content does not represent a change in sample plan requirements from those set forth in the QC Manual, section 2, which is applicable to both the AFDC and Adult assistance programs.

A State may not implement a new sample design without prior approval. The State must submit its revised sampling plan to the Regional Administrator (RA) of the Administration for Children and Families (ACF), with specific documentation of any substantive modification of a previously approved sample design, at least 60 calendar days before the start of the annual sample period, i.e., no later than August 1. States should not submit changes in random start numbers, sample intervals, and caseload estimates as revisions to their sampling plan since they represent supporting documentation of plan implementation and do not require prior approval. This information should be submitted at the beginning of each annual sample period.

The plan must be in effect for the entire annual sample period and must include the population to be sampled, a description of the lists from which the sample is selected, the State's choice whether to drop or complete cases for which a review was completed within the last six months, and a procedure to correct for oversampling and undersampling.

The regulations at § 205.41(c)(3) require States to submit a reliability waiver statement (for active AFDC cases only) by the first day of the annual sample period.

We have also incorporated in these regulations submittal dates for universe estimates, sample intervals, monthly lists of selected sample cases, computer-generated random start numbers and seed numbers, and reserve pool cases (if applicable). States must submit universe estimates and sample intervals within 30 calendar days prior to the selection of the October sample, and the remaining information within 10 calendar days after the sample selection date specified in the State's approved sampling plan. Although these time frames do not represent a change to current procedure as set forth in the QC Manual, section 2, we have explicitly incorporated them in the regulations consistent with section 408(h) of the Act.

Comment: One commenter proposed that when there is reduction in staff because of budget cuts or unexpected increases in caseload, the State should be allowed to change its sampling plan on a six-month basis.

Response: Anticipated budget cuts and policy changes should be taken into consideration at the time the caseload estimate for the annual sample period is made. The QC Manual, section 2, provides both minimum and standard sample sizes and methods that can be used to reduce sample size for the annual sample period when unexpected increases in caseload or budget cuts occur. It is important to avoid introducing the possibility of bias in the error rate estimates as a result of changes in sample design or sampling procedure. QC staff reductions do not affect the QC sample design but can affect the State's ability to complete its required sample size.

Comment: One commenter suggested changing the current time frame for State submittal of universe estimates and sample intervals from 30 calendar days prior to the selection of the October sample to the first day of the annual sample period.

Response: The 30 days are necessary so that we can verify the State caseload estimates and sample interval computations and resolve discrepancies with the States before the States select their October samples.

Sample Selection

In order to ensure that (1) all cases, including cases added to the rolls during the review month, are subject to sampling, and (2) all payments, including adjustments to sample cases, are included in the QC review, we invited comments on whether we should change our current operating policy to require States to select their samples after the end of the review month. Under our current policy, States are required to select their review month samples from lists of active cases with payments authorized prior to sample selection and paid by the end of the review month. States could use regular first-of-the-month payroll listings as the frame for sample selection, extend that frame at the end of the review month, and continue sampling all the cases added to the payment rolls during the review month that were not on the regular payroll listing.

Comment: A number of commenters opposed sample selection after the end of the review month. Most commenters supported States having the option of when to select their samples. The reasons given for the opposition included the integration with other programs, limited resources, staffing requirements, sample completion deadlines, complexity of the reviews, administrative burden, data processing systems, and difficulty in locating clients and securing needed verifications. One commenter suggested

that the Department should take appropriate action when it believes that a State's sample integrity is compromised, rather than regulate all States to address isolated problems. Another suggested two alternative policy changes regarding supplemental payments. The first alternative would be to notify the local office that the case having a supplemental payment is included in the QC sample. This notification could provide an opportunity for detection of incorrectly issued supplemental payments. The second alternative would be to exclude all supplemental payments authorized on or after the review date, both from the review process and from the calculation of the national overpayment error rate and disallowance amount. The only exception might be for States that pay twice a month.

Response: We have decided not to change our current operating policy which provides flexibility to the States on when they select their samples. We agree, however, with the comment that the Department should take appropriate action when a State's sample integrity is compromised. To ensure that sample integrity is not compromised, we will continue to examine situations where States make supplemental payments for the review month after the sample is selected. Where it is demonstrated that sample integrity is compromised, the State may be required to select its samples after the end of each review month.

To ensure a more complete sample frame, we included in the final regulations at § 205.41(d)(2)(iii) and (d)(4)(i) the requirement that the frame shall include all active AFDC cases with payments authorized or made by the end of the review month for that review month.

A State may, in addition, include on its sample frame cases for which the review month payment was authorized after the end of the review month, but before sample selection. Such cases, if selected in the sample, shall be included in the QC review.

Sample Size

As requested by the State representatives, the proposed regulations at § 205.41(d)(3) specified the current active AFDC and Adult assistance sample sizes included in the QC Manual, sections 2 and 3, with an option for States to reduce their standard sample size. States may not reduce their standard sample size below the minimum sizes specified in these sections. The proposed regulations also included the requirement that a State provide the Department with a reliability waiver statement as an addendum to its sampling plan, if it elects the option to reduce its sample for completed AFDC active case reviews below the standard size. When a State opts for a reduced AFDC active sample, the reliability waiver statement ensures that the risk of reduced precision in the error rate estimate will be shared by the State and the Federal government.

Comment: A number of commenters pointed out that the proposed regulatory language at § 205.41(d)(3)(ii), requiring a State that elects to reduce its standard sample size to sign a statement "accepting the reliability of the payment error rate and waiving the right to challenge the resulting AFDC (and Medicaid) error rates based on the reduced sample size," was unreasonably and unfairly broad. They also felt that States should retain the right to challenge the reliability of the payment error rates on factors other than the State's reduced sample size, e.g., the Federal subsample size. They requested that the proposed regulation be modified to limit the waiver solely to the election of the reduced sample size.

Response: We have modified the language in the final regulations so that States waive the right to challenge the precision of the resulting AFDC (and Medicaid) error rates based only on their reduced sample sizes. With this revision, the regulatory language is consistent with the language in the waiver statement.

Comment: One commenter remarked that evidence appears to reflect "abnormalities" when sample sizes are reduced. The commenter recommended that a thorough study of the impact of such reductions on the error rates should be made and published in the **Federal Register**.

Response: No further study is warranted. Standard statistical theory indicates that for large samples the regression estimator used to estimate the payment error rates is essentially unbiased. Under contract with the Department, Westat, Inc. conducted a study (A Statistical Evaluation of AFDC Quality Control, October 1987) to validate the sampling procedures and regression methodology of the AFDC payment error rates based on sample sizes in use. It concluded that our procedures and methodology are consistent with statistical theory. It also found that (1) the regression methodology provides unbiased, or at most trivially biased, point estimates of the error rates for the sample in use, and (2) the sampling errors estimated from the samples also provide nearly unbiased estimates of the sampling errors of the estimated error rates. The abnormalities observed by the commenter may relate to the precision of the estimated payment error rates, which could be affected by the reduced sample sizes.

Comment: One commenter believed that the number of Federal subsample cases should be based on the precision of the payment error rate and the methodology involved should be published in the **Federal Register**.

Response: We addressed this issue in the Department's Congressionally-mandated study of the AFDC–QC system (Quality Control in AFDC and Medicaid, a Report to Congress, March 1988). Based on our analysis, we concluded that setting sample sizes to produce a specified magnitude of equal precision across States would be difficult to achieve because of the volatility of the standard error estimates and the fact that using past data to determine sample size for future periods does not ensure that equal precision would be achieved. Even if equal precision could be achieved, it would not be cost-effective because larger sample sizes would be required resulting in greater administrative costs to States with smaller assistance expenditures.

Negative Case Action Sample

The negative case action sample size requirements are the same for both the AFDC and the Adult assistance programs. Before October 1990, we required larger AFDC negative case action samples for Guam, Puerto Rico, and the Virgin Islands in order to have adequate data to make six-month incentive payment determinations under section 403(j) of the Act. Since section 408(b) of the Act repealed section 403(j), we have reduced the AFDC negative case action sample requirement for Guam, Puerto Rico, and the Virgin Islands, effective October 1, 1990. However, the regulations retain the current negative case action sample requirements in the Adult assistance programs for Guam, Puerto Rico, and the Virgin Islands.

We believe these sample sizes are sufficient to provide both valid and reliable estimates of State error rates and adequate information for States to identify problem areas for corrective action purposes. For purposes of uniformity and consistency, we include the sample sizes in the regulations for both the AFDC and the Adult assistance programs, although the statute requires the Department to regulate in this area only for the AFDC program.

Comment: One State said that the proposed procedure at § 205.41(d)(4) for sample selection of negative case

actions is inconsistent with current sampling procedure. The NPRM required that the sample be selected from a list of actions taken to deny or terminate assistance with effective dates in the review month, whereas under prior procedure the sample selection list could include many actions with effective dates in the month following the review month.

Response: The proposed regulations did not change our current procedure. The effective date can never follow the review month. The effective date for application is the date on which the application is officially withdrawn or the agency officially takes action to deny the application. The date, therefore, always coincides with the month of sample selection. For terminations, the effective date is the initial date for which the case fails to receive assistance. In most cases, the effective date will coincide with the month of selection. For example, a case receiving assistance through the month of January but not receiving assistance in February, will show a February 1 effective date as well as a February selection date.

The effective date will differ, however, from the month of selection in cases where the termination occurs during the month or the case is terminated with previously held checks. Although such actions are not subject to sample selection until the first month the case fails to appear on the regular payroll, the effective date, for QC purposes, is the first day for which the case failed to receive a payment by the expected payment date. For example, a State paying semi-monthly terminates a case in the middle of the month. Although the action would not be subject to sampling until the following month, i.e., the first month the case failed to appear on the first of the month regular payroll, the effective date would be in relation to the semi-monthly check that was not issued.

We have revised and clarified the negative case action sampling procedure in the final regulations at § 205.41(d)(4)(ii) to address these comments.

Comment: One commenter indicated that the option in the NPRM at § 205.41(d)(5) to drop or complete a sample case for which less than six months has elapsed since it was last selected and reviewed should apply only to active sample cases. This option could not apply to the negative case action sample since each sampled negative action must be reviewed so long as it was not in the active universe for the same month. The commenter also suggested that States that choose to drop such duplicate active cases should be required to specify in their sampling plan the exact method by which all these cases are identified and dropped.

Response: We agree with the commenter and have modified the language in the regulations at § 205.41(d)(5) accordingly.

Sampling Methodology

In the NPRM, we proposed that States would select their samples using the systematic random sampling method. This method has always been preferred for selection of State samples because it conforms to principles of probability sampling, is easily implemented, and can easily be duplicated to provide Federal oversight with an audit trail. Currently, 48 States are using this method. States may continue to stratify their samples in accordance with procedures specified in the QC Manual, section 2, and may continue to integrate their AFDC active case samples with Food Stamps and Medicaid QC samples.

Comment: Many commenters said that sample selection procedures should remain unchanged, i.e., that the use of systematic random sampling should be optional. They believe that change is unnecessary and cost-prohibitive and would cause the States hardship. Some commenters believe that Federal oversight with an audit trail is possible for simple random sampling. One commenter suggested that we should allow a State to use simple random sampling conditioned on the State's meeting additional requirements to address Federal oversight concerns.

Response: In light of the many comments in support of our current policy and the States' belief that Federal oversight is possible for simple random sampling, we, in the final regulations at § 205.41(d)(4)(iii), allow simple random sampling, provided the State develops an acceptable audit trail for "proof of sampling" and fully describes in its sampling plan how the trail was constructed and how it can be used to duplicate the sample.

Comment: Another commenter believes that systematic random sampling is inferior to simple random sampling because the estimated variances may be both "statistically inconsistent" and "objectively undefinable" and the arrangements of cases on the frame with respect to certain estimated characteristics may be "monotonic," and "periodic."

Response: States generally arrange AFDC cases on the sample frame by geographic code (i.e., county or local agency code) and/or case number order. This type of ordering is normally random for error cases and payment amounts and should not present a problem of monoticity or periodicity on a State's sample frame. When a population, such as the AFDC caseload, is randomly ordered, the precision of an estimate obtained from systematic random sampling will be approximately equivalent to the precision obtained from simple random sampling (Cochran, Sampling Techniques, 2nd edition, p. 214).

An estimate obtained from systematic sampling is statistically consistent because, as the sample size increases, the estimate approaches the population parameter being estimated. While several formulas for the variance of an estimate from a systematic random sample have been developed, the variance formula for simple random sampling is normally used when the items being measured are essentially randomly arranged on the frame. Cases arranged on the sample frame by county or local agency code could be spread out more evenly over the State and, thus, be more representative of the caseload when systematic sampling is used.

Comment: One commenter mentioned that since two States are currently using disproportionate stratified random sampling instead of systematic random sampling, he would like more information on the impact of disproportionate stratified samples on the national average to ensure that other States are not disadvantaged when a State uses disproportionate stratified sampling.

Response: We see no impact on the national average payment error rate resulting from a State's use of a disproportionate stratified sampling design, i.e., the national average remains unbiased. Stratified sampling may impact the precision of the State's estimated error rate, depending on the type of stratification that is used. (Statistically, major increases in efficiency in precision of a State's estimate are obtained only from disproportionate samples when the strata are sampled in direct proportion to each stratum size or to the square root of the variance, or are sampled in inverse proportion to strata per-unit costs). We see no particular advantage or disadvantage to the States as a result of some States using disproportionate sampling.

Section 205.42 Case Review and Management Requirements

This section of the final regulations establishes the rules and procedures for the conduct of QC reviews, completion of QC sample cases and determination of whether an error exists in a sample

case in the AFDC and Adult assistance programs.

Treatment of State Plan Provisions

The QC review is conducted against the substantive conditions of eligibility and amount of assistance payment provisions as reflected in State operating policies that are consistent with the State plan. To receive Federal matching funds, each State agrees to administer its AFDC program "in accordance with title IV–A of the Act" and "all other applicable laws and regulations . . ." (Streamlined State Plan for Title IV–A of the Social Security Act: Financial Assistance Aid to Families with Dependent Children, 1982).

Section 408(c)(2)(A) of the Act generally provides that, if an approved State plan provision is determined to be inconsistent with Federal law or regulation, and the State has been notified of the inconsistency, the QC review will be governed by the provision of Federal law or regulation. We recognize that a State will need some lead time after notification of a plan inconsistency to submit an amendment to the State plan and revise its operating procedures.

In the NPRM at § 205.42(b)(1)(i), we proposed a period of 60 calendar days, after receipt of notification of the inconsistency, for a State to submit an amendment to its plan removing the inconsistency. Unless an amendment was submitted, sample cases selected for the review month after the 60-day time period would be reviewed against applicable Federal law and regulations. If an amendment was submitted timely, we would review against the submitted amendment until final disapproval by the Department. If the amendment is disapproved by the Department, we would review against applicable provisions of Federal law and regulations with the sample cases selected for the review month immediately following the date of disapproval. The review would continue on this basis until the State has received approval of a plan amendment.

Section 408(c)(2)(A) of the Act is silent on the appropriate treatment of a pending plan amendment which is inconsistent with Federal law or regulations. The NPRM provided that if a State implemented a plan amendment which was submitted to, but not acted upon by the Department, the QC review would continue to be conducted against the pending plan amendment until final disapproval by the Department. If the pending plan amendment was disapproved, sample cases selected for the review month immediately following the date of final disapproval would be reviewed against the existing approved plan, provided the existing plan was consistent with Federal law and regulations. However, if the existing plan was inconsistent with Federal law and regulations, we would review against Federal law and regulations until the date of approval of a revised plan amendment.

Section 408(c)(2)(B)(i) of the Act requires the Secretary to grant a State a reasonable time period to make the State plan consistent with Federal law and regulations if it is necessary for the State to enact a new law. As indicated in the NPRM, if a new law needed to be enacted, the State, after receipt of notification of the inconsistency between the State plan and Federal law and regulations, was to advise the Department. The NPRM did not include a specific time period for a State to enact a law and amend its State plan.

Comment: Several commenters have noted that the proposed rules are silent regarding the manner and form of notification triggering the time limit to remove the inconsistency. Another commenter suggested we put the means for determining the date of notification in the regulations.

Response: The final regulations at § 205.42(b)(1)(i) clarify that the Assistant Secretary for Children and Families, the RA, or the designee of either, will notify the State in writing of the inconsistency in the approved State plan. The dated notice to the State will spell out each inconsistency, the policy basis for this conclusion (including but not limited to policy interpretations, positions and citations to applicable law or regulations), as well as the requisite time frame from receipt of the written dated notification for removing it.

Comment: Numerous commenters felt that the 60-day time period is too short and suggested that a six-month period would be more reasonable. Others suggested that we should establish, on a case-by-case basis, a reasonable time period not to exceed six months. Several other commenters suggested periods of a year or more.

Response: The notification requirement and time frame at § 205.42(b)(1)(i) apply only to situations where a State plan provision was incorrectly approved (i.e., the State plan is inconsistent with existing Federal law or regulations at time of approval). It does not pertain to a State plan provision which is inconsistent with Federal law or regulations solely because of a State's failure to implement new legislation or carry out changes in Federal law or regulation. This latter situation falls under section 408(c)(3)(A) of the Act and § 205.42(d)(2)(i) of the regulations.

We have changed the time frame in the final regulations at § 205.42(b)(1)(i) to provide that States will have six months to submit a State plan amendment to remove an inconsistency following receipt of written dated notification. During the sixth-month period, the QC review will be conducted against the existing State plan. If the plan amendment is submitted timely (i.e., within six months of receipt of notification), the review will be conducted against the submitted plan amendment provisions beginning with the date of submission.

Comment: Several commenters noted that the proposed regulation did not address the status of a QC review when a State challenges the Federal determination of an inconsistency They believe that States should be allowed the entire compliance process prior to reviewing against applicable Federal law and regulations.

Response: There is no statutory requirement for extending the administrative review procedures for disapproved plan amendments to situations where an approved plan is determined to be inconsistent with Federal law or regulations. Given the congressional desire for timely release of error rates, we see no reason to have an administrative process in the Department for this purpose.

Comment: Several commenters were opposed to the fact that when a plan amendment to remove an inconsistency is disapproved, QC will begin reviewing against applicable provisions of Federal law and regulations with sample cases selected for the review month immediately following the date the disapproval becomes final. They contend that this leaves States virtually no time to change its practices. One commenter suggested a minimum of 120 days lead time; another, a minimum of 60 days or up to six months, when necessary; while others felt that six months would be needed to submit a new plan amendment and to revise State practices.

Response: We believe that the time frame as proposed is reasonable. A State already will have had six months to correct the plan and its corresponding State practices. During that time, the State should have been working with the Regional Office to ensure that the State's submittal removing the inconsistency would be approvable.

Comment: Two commenters felt that further guidelines should be established as to what constitutes a reasonable period of time in cases where it is

necessary for the State to enact a new law to reconcile the inconsistency.

Response: We do not believe this level of detail is appropriate. Each State's legislative process has its own characteristics that must be taken into account once an inconsistency is identified. However, we have clarified the final regulations at § 205.42(b)(1)(iii) to provide that if the State needs to enact a new law to make the State plan consistent with Federal law and regulations, it must submit such a proposed law for enactment no later than the next scheduled legislative session immediately following receipt of written notification of the inconsistency. Where an inconsistency requires a change in the State law, the State must bring this requirement and all associated problems to the Region's attention, including the steps and timetable involved to remove the inconsistency. These actions are especially important if the process will take longer than the six months allowed under § 205.42(b)(1)(i). The Assistant Secretary for Children and Families, the RA, or the designee of either, will then decide how much longer the State will have to remove the inconsistency and will notify the State in writing of that decision. QC will continue to review to the existing plan provision during the additional time allowed.

Comment: Several commenters remarked that the regulations as proposed at § 205.42(b)(1)(i) did not address the QC review procedures when a plan amendment is submitted to remove an inconsistency. The commenters contend that there is a conflict between the requirements contained herein and the requirements for approval of State plans and amendments provided in §§ 201.3 and 205.5 of the regulations. Regulations at §§ 201.3(g) and 205.5 permit States to submit an approvable plan or amendment by the last day of a calendar quarter and have it retroactively effective to the first day in the quarter in which the change was actually in operation statewide. Since a State's operational policies are frequently implemented before a revised plan amendment is submitted, the commenters believe there will be inconsistencies between State manual materials and the State plan. Consequently, the commenters suggested that QC should be allowed to review to State directives during the calendar quarter in which the State submits a plan amendment.

Response: There is no conflict, in most instances, between the QC regulations at § 205.42(b)(1)(i) and §§ 201.3 and 205.5 of the regulations. We developed the concept of "permissible State practice", the basis of the QC review, to conform to those regulations. Since the regulations at § 205.42(b)(1)(i) have not changed the plan amendment approval process, there is no need to revise the QC review procedure. Under the regulations at §§ 201.3(g) and 205.5, Federal financial participation is available beginning as early as the first day of the calendar quarter in which an approvable plan is submitted and in operation on a statewide basis. Therefore, when a State implements revised operating instructions in response to a notification of an inconsistency in an approved State plan provision (or for any other reason implements revised operating instructions) and submits the corresponding plan amendment by the end of the calendar quarter in which the implemented provision became effective, QC will review against the revised operating instructions unless these instructions are inconsistent with the proposed plan amendment. If the operating instructions are inconsistent with the proposed plan amendment, then QC will review directly against the submitted proposed amendment. If, on the other hand, the State implements new operating instructions without submitting the plan amendment by the end of the calendar quarter of implementation, then assuming the six-month time period has not elapsed, QC would continue to review against the existing inconsistent plan provision until the first day of the calendar quarter in which the State submits a proposed plan amendment or the end of the six-month time period, whichever occurs earlier. If a State submits a plan amendment after the end of the six-month time period, QC would review against applicable Federal law and regulations until the State has an amendment approved.

Comment: One commenter suggested that the regulations at § 205.42(b)(1)(i) specify that only the item identified as inconsistent is subject to the review requirements stated herein. This clarification is important because States frequently submit State plan amendments composed of multiple preprint pages where all but one item may be consistent with Federal law and regulations.

Response: We clarified our language in the final regulations to address this commenter's concerns. The requirements stated in § 205.42(b)(1)(i) of the regulations pertain only to the approved plan provision which is found to be inconsistent with Federal law or regulations.

Comment: One commenter said that since most State plans involve State options, the proposed regulations were unclear about how State and Federal QC would know which option to review against.

Response: State and Federal QC will review according to the provisions at § 205.42(b). If a previously approved plan provision consists of an option(s) which, as expressed, is inconsistent with Federal law or regulations, QC will continue to review to it until a revised plan amendment removing the inconsistency has been submitted or, the six-month time period has expired, whichever is earlier. If a revised amendment removing the inconsistency is not submitted timely or is submitted but is disapproved, then QC will review in accordance with applicable Federal law and regulations.

Comment: One State commented that the regulations at § 205.42(b)(1)(i) should indicate that State policy and procedural changes are part of the State plan as defined in this section. In this State, State policy and procedural changes are submitted to Federal authorities at the same time they are issued to State staff. Thus, as part of the State plan amendment approval process pursuant to § 201.3, the Region should have caught any inconsistencies prior to approving a plan provision.

Response: State practices (i.e., written policy and manual material) are not part of the State plan and, as such, are not covered by the plan approval. While the Region may utilize the submitted policy material to assess the State's intentions or interpretation of a proposed plan amendment, the plan amendment approval process does not include a specific review or approval of this material. Should a Region identify an inconsistency between the plan and proposed practice in any informal review, it would normally advise the State. However, the responsibility for ensuring consistency between the plan and State practices resides with the State. Thus, under these final regulations at § 205.42(b), where a State's practices are inconsistent with the provision(s) of the State plan, QC will conduct the review against the State plan. This review policy is unchanged from the prior regulations.

Treatment of Court Orders

Section 408(c)(2)(B)(ii) of the Act provides that, for error rate determination purposes, the QC review will be conducted in accordance with applicable court orders. Therefore, we will consider a QC sample case paid in compliance with a court order issued by

a Federal, State or local court to be correctly paid if all other eligibility and payment conditions not affected by the court order are met. The final regulation at § 205.42(b)(2) reflects this policy. Regulations at § 205.10 provide that Federal matching is available for "Payments of assistance within the scope of the Federally aided public assistance programs made in accordance with the court order." Pursuant to section 408(c)(2)(B)(ii) for QC purposes, Federal matching is available for all payments to AFDC assistance units subject to QC sampling, made in accordance with a court order without regard to the "scope" of program limitation noted above.

We have not, however, amended § 205.10(b)(3). The regulations at § 205.10(b)(3) continue to be applicable since court order matching specifications still apply to families for whom assistance is provided under the Emergency Assistance program and families presumptively eligible under the AFDC program.

While QC will review to the conditions of all court orders under the final regulations, it continues to be important for States to defend against any legal challenge to Federal AFDC law, regulation or policy. In order to assist the States in meeting these legal challenges, it is essential that the Department be immediately advised when lawsuits that challenge substantive Federal AFDC eligibility and payment rules are filed against the State or its political subdivisions. Timely notice is especially important when the lawsuit affects payments of assistance units subject to QC sampling.

Case Review Requirements

As indicated earlier, we had included in the NPRM at § 205.42(c) certain basic verification requirements which we view as fundamental and not subject to significant change.

Comment: Several commenters stated that we should delete the proposed § 205.42(c) since OBRA of 1989 does not require inclusion of basic case review procedures in regulations. Others suggested deletion of the section because States, facing difficult economic times, need to make best use of their limited resources by having flexibility in completing case reviews.

Response: We have decided to retain this section of the regulations. Even though case review requirements at § 205.42(c) are not specified in section 408 of the Act (which requires the Secretary to establish and operate a new AFDC–QC system), we believe them necessary for implementing the new QC system.

We do not agree that the varying economic conditions among States should be the basis for determining which factors of eligibility QC reviews. QC cannot be selective in reviewing eligibility factors. It must verify each element of eligibility and payment for a sampled case to determine the accuracy of a State's eligibility and payment determinations. Furthermore, since the QC system is intended to be a uniform national system, verification standards of an element must be the same from State to State. This consistency ensures that our statistical results are unbiased and reliable.

Comment: Two States suggested that some verification requirements do not need to be used in every review. As an example, the commenters observed that no errors due to real property ownership have been cited in their States, even with the adherence to QC standards for verifying real property. The commenters asked that States be granted flexibility to determine which verification sources to use on a case-by-case basis. Other commenters stated that we should allow a State to negotiate with the Regional Office to establish a set of verification standards for each State within the region. One commenter suggested that if State practice requires an eligibility worker to accept certain evidence as verification of an element of eligibility, then the QC reviewer should also be required to use the same information as verification in the QC review. As an example, the State suggested that where the eligibility worker is limited by court order from making certain collateral contacts, the QC review should limit its use of information accordingly.

Response: We do not agree that States should be permitted to selectively apply QC case review requirements. Verification standards are established to provide a thorough and consistent method of substantiating a reviewer's decision regarding an element of eligibility and payment. They must be applied uniformly to each case to maintain the integrity of the QC system and to ensure the accuracy of our statistical results. Payment accuracy information generated through the QC review provides States with performance information and is a basis for assessing disallowance liabilities. The absence of recent errors in a particular element of eligibility for a given State is not sufficient reason for QC to abandon review of that element. Some States, for example, still identify errors due to real property ownership through the QC review process. The QC system would be undermined if our verification standards were based solely on the number of errors occurring in particular elements of eligibility for certain States.

We also believe that it would not be appropriate to permit a Regional Office to define review procedures based on its negotiations with its States. While local agencies have their own methods for establishing eligibility and payment, QC independently carries out its responsibility to measure the correctness of payments by establishing its own national verification standards. Since QC reviews a State's eligibility and payment determinations and not its case review procedures, the correctness of payment to a case does not depend on whether QC and State review requirements are identical. Furthermore, since we afford States wide latitude in establishing verification requirements for their AFDC programs, QC error data provides States essential information about the effectiveness of those verification procedures.

Comment: Several commenters asked that we avoid locking States into narrowly defined review procedures that are not cost-effective. One State remarked that it recently submitted evidence to the Department showing that certain case review procedures are not cost-effective in that State.

Response: We believe the basic case review requirements contained in the proposed regulations are cost-effective. One measure of the cost-effectiveness of that system is the large amount of costs avoided over the past decade because of reductions in payment error rates. We continually review and evaluate case review requirements and revise our procedures to maintain an efficient and effective system. In evaluating the appropriateness of a review procedure, we not only consider its cost-effectiveness, but also other factors such as the reliability and availability of alternative verification methods. As an example, we recently revised requirements in the QC Manual, section 3, for verifying relationships among members of a household. These revisions were geared to reducing a State's expenditure of resources and expediting the review process in certain cases.

Comment: A number of commenters asked that we revise the proposed regulations to indicate that exceptions to certain review requirements are permissible. Most expressly disagreed with our proposal to require a field investigation with a face-to-face interview in all active sample cases. One commenter remarked that the proposed regulations failed to provide alternative procedures for situations where a face-to-face interview cannot

be obtained. Several commenters asked that the requirement for a face-to-face interview be waived in situations where fulfilling the requirement risks the QC reviewer's safety or where it is not feasible or practical because of geographic or other reasons. Other commenters suggested that it should be permissible, in some cases, to conduct the field interview via telephone.

Response: We believe the face-to-face interview continues to be an effective procedure that aids in the verification of a family's eligibility for AFDC and its payment amount. Therefore, we have retained the requirement that a face-to-face interview with the recipient must be conducted as part of the field investigation (except as noted below). The intent of QC policy is that the face-to-face interview take place in the recipient's home. It provides the reviewer with a personal observation and assessment of the family's actual living arrangements in relation to the family's eligibility and payment amount for the review month. The QC Manual, section 3, already provides for face-to-face interviews to be conducted outside the recipient's home where the safety of the reviewer is at issue. We have added a provision in the final regulations at § 205.42(c)(3) to provide for an exception to face-to-face interviews in situations where a recipient (or applicant) lives in an extremely isolated area not reachable by regularly scheduled commercial air service, other public transportation, or automobile. For these exception cases, we require the State to provide supporting documentation.

Comment: Two commenters wanted to know if a reviewer can still make "special determinations" if he or she cannot secure primary or secondary evidence.

Response: Section 408 of the Act does not require QC to change its current policy regarding use of the "special determination" in the case review process. If a reviewer cannot document an element of eligibility or payment according to the verification standards, the reviewer must try to make a special determination. Guidelines for making such determinations will continue to be included in the QC Manual, section 3.

Comment: Two States objected to codifying QC review procedures because they interpret this codification as allowing the Department to declare a State's sample "invalid" if the State does not conduct its case reviews and verification activities in accordance with Federally prescribed procedures. Furthermore, the commenters observed, if the Department completes the sample, it passes the cost on to the States.

Response: Section 408(b)(1)(A) of the Act provides that States shall conduct the QC review in accordance with the time frames and methodology specified in the regulations by the Secretary. Where the State fails to do so, section 408(b)(1)(B) requires the Secretary to complete the State sample and charge the cost of this activity to the State. However, under § 205.43(h) a State will be provided an opportunity to take timely remedial action to comply with prescribed procedures. We believe this policy is reasonable and necessary to provide a means to continue operation of a reliable and unbiased QC system if a State refuses to operate its QC system in accordance with established Federal procedures.

Use of QC Forms and Schedules

Comment: Two commenters requested that the regulations allow States to tailor Federal forms to States' needs and circumstances.

Response: In the final regulations, we have included a reference to approved State forms at § 205.42(c)(4). States may substitute their own Worksheets and/or Review Schedule if they receive our approval. Once an approval is received, we will no longer supply the State with Federal forms.

Treatment of Changes in Circumstances

In the NPRM at § 205.42(d)(1), we defined a change in circumstances as a change occurring after the date of authorization of the initial payment which may affect the assistance unit's eligibility or payment amount. In § 205.42(d)(1)(i), we specified that a change in circumstances would not be considered in the payment error determination if the change occurred in the review month or in the month immediately preceding the review month, known as the payment adjustment lag (PAL) period.

Comment: One commenter indicated that the proposed regulation at § 205.42(d)(1)(i) conflicts with the operating procedures for error computation in on-going prospective budgeting cases. The operating procedures state that when the current best estimate of income is incorrect, and there is a subsequent change in circumstances in the PAL period, any error will be based on the actual circumstances that existed in the review month. The commenter feels that the estimate of income should be recalculated based on information that existed prior to the PAL period and the amount of error should not reflect the change in circumstances that occurred in the PAL period.

Response: We believe that the operating procedures of using the review month income to determine the amount of the payment error in prospectively budgeted cases is consistent with § 205.42(d)(1)(i). The PAL period, which is unchanged from prior regulations, was incorporated into the QC review process in recognition that changes in recipient circumstances, even if properly reported, cannot be immediately reflected in a corrected payment. However, where there are multiple changes in circumstances in the same eligibility or payment factors, some occurring before the PAL period and some occurring in the PAL period, the earlier changes are not eliminated by the later changes. The same concept applies to prospectively budgeted income. In prospective budgeting, current income and anticipated future income are used as predictors of income to be budgeted in a future payment month. The State estimating procedures attempt to approximate, as closely as possible, the actual income circumstances in a future payment month. Where the estimate is no longer valid because it was incorrectly calculated and a change in income circumstances subsequently occurs, it is appropriate to use actual review month income. Likewise, if the income estimate was incorrectly calculated and a subsequent change in income circumstances occurred in the PAL period, the payment error would be included in the State's error rate since the change in the PAL period does not negate the initial incorrect estimate. The best estimate of what income should have been budgeted, given both an incorrect estimate and a change in circumstances, is actual review month income.

Comment: One commenter indicated that the RPRM definition of change in circumstances did not specify a time period in which errors resulting from any policy change are held harmless. Only Federal policy changes are afforded a six-month hold harmless period. The commenter indicated that States do not have the ability to identify all active cases affected by every policy change and frequently have to apply a new policy at the next periodic review. The commenter felt that States should have at least six months to implement a new policy, regardless of the reason for the change.

Response: We have no authority to establish a "hold harmless" time period for State-initiated policy changes. The six-month "hold harmless" period in section 408(c)(3)(A) of the Act applies only to Federal law changes. A State

can determine the timing of its own initiated policy changes and take steps necessary to ensure effective implementation.

Treatment of Changes in Federal Law

Section 408(c)(3)(A) of the Act provides for excluding QC payment errors resulting solely from a State's failure to implement changes in Federal statute property within six months after the effective date of the changes or the issuance of final regulations, where such regulations are necessary to construe or apply the Federal statutory changes, whichever is later. This provision means, for example, that if statutory changes are effective as of October 1 of a given year and necessary final (or interim-final) regulations are issued on January 1 of the following year, a State will have until July 1 of that following year to implement such changes before any payment error resulting solely from such changes will be counted in the computation of the State's error rate. The QC review will be conducted in accordance with permissible State practice after the end of the latter six-month period, i.e., July 1 in our example. We will notify the States when the six-month procedures will apply. Regulations are set forth at § 205.42(d)(2)(i).

Comment: Several commenters objected to the language in the NPRM which indicated that the Department would determine which Federal law changes would be encompassed by the six-month rule. They stated that the statute protects the States from QC errors related to all Federal law changes for the six-month period.

Response: We agree that the six-month error exclusion provision includes all Federal law changes that affect the eligibility or payment status of AFDC applicants and recipients. The notification in the NPRM preamble referred to notification to the States as to when the six-month period would begin.

Detrimental Reliance

Sections 408(c)(3)(B) and (C) of the Act exclude from consideration as an erroneous payment, a payment that is in error solely by reason of the State's reliance upon and correct use of erroneous information provided by the Secretary about matters of fact or the State's reliance upon and correct use of written statements of Federal policy provided to the State by the Secretary. The proposed regulations specified that an assistance payment made by a State should not be considered an erroneous payment if the payment was in error solely because of the State's reliance upon and correct use of incorrect factual information or incorrect written policy statements provided by the Department.

We specified in the NPRM that "reliance upon and correct use of incorrect factual information" in the proposed rules means that the State depended on the written factual information to make payment decisions, had reasonable expectation that the information was timely and accurate, and followed procedures for access and use of the information. State exemption from a payment error as a result of incorrect factual information would be made on a case-by-case basis. For example, the Department supplies States with Social Security benefit information via the Beneficiary and Earnings Data Exchange (BENDEX) system. In order to get appropriate information from BENDEX, it is necessary for a State to provide specific information about potential beneficiaries. Failure to do so can result in incorrect information being supplied to the State. In this instance, the State would have failed to follow procedures for access to BENDEX data. The resulting error would not be excluded from the error rate.

We also specified in the NPRM that "incorrect written statements of Federal policy by Department officials" means written policy from a Federal official in the Department responsible for dissemination of such policy in the AFDC program—i.e., from the Assistant Secretary for Family Support (now the Assistant Secretary for Children and Families), an FSA Regional Administrator (now the ACF Regional Administrator), or the Director of the Office of Family Assistance. This provision would apply to situations where the State's eligibility and payment policy correctly reflects the policy directive by the Department official, but the directive is subsequently determined to be incorrect.

Comment: Several commenters did not understand the meaning of the phrase "incorrect written factual information provided by the Department."

Response: We have clarified the language in the final regulations at § 205.42(d)(2)(ii). For purposes of this regulation, information in a written form is defined to mean hard copy documentation such as a signed statement, a computer printout, a computer data tape, reports, etc. Factual information refers to specific data provided by the Department about a given individual. It includes, for example, data from the Social Security Administration on the amount of an individual's Social Security benefit or Supplemental Security Income benefit.

Comment: Several commenters suggested that the regulation be revised to provide that detrimental reliance may also be based on verbal statements received from the Department. They believed that by basing detrimental reliance only on written information from the Department, our interpretation of the statute is not in accord with the congressional intent.

Response: We believe our interpretation is in accord with the statute and its legislative intent. The statute expressly refers to policy statements provided in written form and information about matters of fact provided by the Secretary. It is appropriate to require a written statement in order to avoid disputes regarding what, in fact, was actually said or provided. For example, where there is no written record of information provided by the Department during a telephone conversation with a State, and a disagreement develops as to what was actually provided by the Department, the State would not have a clear and objective basis to support its position. A State must have complete documentation to support its request to exclude errors based on erroneous information provided by the Department.

Comment: One commenter objected to the explanation in the NPRM that a State's reliance upon and correct use of incorrect factual information means that the State had reasonable expectation that the information was timely and accurate. The commenter felt that a State should not be put in the position of having to determine if information received from the Department is timely and accurate. There is nothing in the legislative history of the statute that suggests that Congress intended such responsibility to be placed on the States.

Response: Both the statute and legislative history refer to the State's responsibility to make correct use of information received from the Department as a condition for excluding payment errors resulting from erroneous factual information from the Department. Specifically, the statute provides that a payment error is excluded based on "the State's reliance upon and correct use of erroneous information provided by the Secretary about matters of fact." For a State to make "correct use" of information provided by the Department in determining eligibility of and payment to a case, the State must evaluate the information to determine if it proves the eligibility and payment factors to be verified. This evaluation requires the State to determine if it is reasonable to

expect that the information is timely and accurate for determining an individual's eligibility or payment. It is reasonable to expect that the information would be examined to see that it pertains to the individual(s) to whom it is supposed to apply and that it is applicable to the time period (payment month) in question. We would agree that State assessment of "timely and accurate" beyond this is not consistent with the statute.

Comment: A number of commenters noted that in the NPRM we cited only BENDEX as a system which could provide incorrect information to a State and result in payment errors not being counted. They requested that specific references to reliance on IEVS and SAVE systems should also be included.

Response: The exemption of payment errors as a result of incorrect written factual information is applicable only to the extent that such information is maintained and provided by the Secretary. The Income and Eligibility Verification System (IEVS) is a system of computer data matching to determine an individual's initial and continuing eligibility for public welfare programs, including AFDC. Congress mandated it in the Deficit Reduction Act of 1984 (DEFRA, Pub. L. 98–369). Data are matched from various Federal and State sources, including the Department of Health and Human Services, against applicant and recipient information. Even though there is a Federal mandate for States to use IEVS, the Secretary does not have administrative oversight over each of the data files used in the IEVS matching.

The same is true of the Systematic Alien Verification for Entitlements System (SAVE). The SAVE data files used in computer matching with AFDC are not maintained by the Secretary. The system is administered by the Immigration and Naturalization Service (INS) to provide States with procedures for retrieving information from the INS data base about an individual's alien status. However, section 121 of the Immigration Reform and Control Act (IRCA) of 1986, which amended section 1137 of the Act, provides that if erroneous eligibility and payment determinations are made based on information provided through the SAVE system, a State agency will not be liable for QC errors related to the verification of alien status (provided that IV–A agency both accessed the INS data base and did so correctly).

Therefore, based on the above discussion, we decline to reference IEVS or SAVE in the final regulations as potential data sources from which incorrect information could have been provided.

Comment: One commenter thought that if a State uses the BENDEX system and transmits data on a specific SSN and the information is returned on the same SSN, the State would conclude that it followed correct procedure to access the data and that the data were correct. QC should not have to ascertain whether Federal source data were correct or not.

Response: Proof that a State accessed the BENDEX, or similar systems, correctly involves more than an evaluation to see if the SSNs are the same. As we stated previously in the preamble, exemption from a payment error as a result of incorrect factual information from the Department requires that we determine that the State followed procedures for access and use of the information. Such determination requires a thorough review of all factors that may have an impact on the correctness of the State's information request.

It is not necessary to determine whether the Department's source data are correct, only whether information provided to a State is correct. The statutory basis for error exclusions based on incorrect factual information is related to the correctness of information provided to the State rather than to the correctness of information maintained in the Department's source data files.

Comment: In the NPRM at § 205.42(d)(2)(ii), we defined "Departmental officials" to mean Federal officials in the Department responsible for dissemination of written policy, i.e., the Assistant Secretary for Family Support (now the Assistant Secretary for Children and Families), the ACF Regional Administrator, or the Director of the Office of Family Assistance. Twenty-six commenters felt that our definition as to who can be held responsible for providing written statements of Federal policy for the Department was too restrictive. Ten of the commenters suggested that we include the Regional Directors, branch specialists at the Regional Directors, branch specialists at the Regional level, ACF managers and program specialists and other ACF staff. The other 16 commenters recommended that we should define Departmental officials to mean any Departmental employee who States with policy information. The commenters stated that our definition is impractical and unduly restrictive because information is generally provided to a State by a lower-level ACF official. One commenter felt, for example, that it is the Regional staff with programmatic experience and a personal knowledge of a State's AFDC program that typically provides the information. Most of the commenters noted that neither the statute, nor its legislative history in the conference report, lists specific Federal officials who can be held responsible for providing incorrect statements of Federal policy.

Response: We believe that, in order to ensure the integrity of the QC system, we should specifically identify certain ACF officials as responsible for disseminating AFDC policy. The persons so designated are the senior staff of the agency. They are the managers responsible for seeing that the ACF staff administers the AFDC program in accord with Federal law and regulations. To have an operating procedures that allows any employee to issue policy statements would make it administratively difficult, if not impossible, to manage and coordinate the issuance of policy information on behalf of the Secretary. Moreover, such a procedure would more likely result in the issuance of inconsistent policy statements for a program that is mandated by the Congress to include certain national and uniform program requirements.

The statutory provision involves situations where the Department provides a State with information that is designated as reflecting an official Departmental position, i.e., a position of the Secretary. It is within the Secretary's administrative authority to designate certain officials as responsible for this activity.

In response to State concerns that limiting the number of persons with authority to issue Federal AFDC policy would delay the ability of ACF at the Regional level to respond to issues and questions raised by the States, we have added the ACF Assistant Regional Administrator for the AFDC program to the three officials mentioned in the NPRM preamble. The titles of the four Departmental officials who are responsible for dissemination of written policy are included in the final regulations at § 205.42(d)(2)(ii).

Comment: One commenter objected to our use of the qualifier "incorrect" in the proposed regulations when we state that errors are excluded as a result of a "State's reliance on, and correct use of, incorrect written statements of Federal policy by Departmental officials." The commenter felt use of the word "incorrect" significantly alters the meaning of the statute which ensures that no QC error can result from a State's reliance on written Federal policy, whether that policy is right or

wrong. The commenter cited instances where errors were cited by Federal QC even though the errors resulted solely because of the State's correct application of correct statements of written Federal policy.

Response: We disagree that our use of the word "incorrect" alters the meaning of the statute. The law provides that a payment error will be excluded if the payment is in error solely by reason of the State's reliance upon and correct use of written statements of Federal policy provided to the State by the Secretary. If an error occurs solely because of written statements where the State relied upon and correctly used this information, this means the "incorrect" guidance from the policy statements must cause the State to make the erroneous payment. Instances where it appears that the State correctly used correct written Federal statements of policy, and yet reliance on the information results in the citation of an error, may involve issues such as incorrect State interpretation and application of Federal policy.

Comment: One commenter asked that we specify that detrimental reliance applies to a State's dependence on Federal instructions which are promulgated via the Federal re-review process.

Response: We have not incorporated this suggestion in the final regulations. A State is not exempted from a payment error as a result of incorrect information obtained through the QC re-review process and used to determine eligibility and payment. The Federal re-review is conducted against the same laws, regulations, and policies the State should have used in making the eligibility and payment determination. It is not a system for introducing new policy guidance, but a system for applying existing policy. Furthermore, we are specifying in the final regulations that only certain officials may provide written program policy statements on behalf of the Department. If, during the re-review process, the State believes that application of policy conflicts with policy statements from Departmental officials, the appeal process affords States the opportunity to raise issues regarding consistency of agency policy and QC application of that policy.

Comment: Two commenters wanted to know if all AFDC policy statements must be cleared through ACF Central Office, or will the Regional Office still play a role in disseminating official policy guidance.

Response: The Regional Office has authority to issue AFDC policy statements through the ACF Regional and Assistant Regional Administrators without prior approval from Central Office depending upon the significance of the policy involved.

Comment: One commenter recommended that we establish a system to share policy statements from each Regional Office with all States when appropriate.

Response: We will explore the feasibility of such a system.

Declaration of State of Emergency or Disaster

Section 408(c)(3)(D) of the Act provides that an assistance payment issued by a State shall not be considered an erroneous payment if the payment is in error solely because of the occurrence of an event in the State that results in a declaration of a state of emergency or major disaster by the President or the Governor of the State. The proposed regulations at § 205.42(d)(2)(iii) included this as one of the types of payment errors which would not be counted in the determination of a State's error rate.

We specified in the NPRM that the state of emergency or major disaster must be declared pursuant to Federal or State statute and the event must directly affect the State's ability to make correct payments. We also specified that the State must provide adequate documentation of the event and its impact on the State's eligibility and payment determination process for consideration by the Department. Request for error exclusion under this provision must be submitted in writing to the Department as soon as possible after a state of emergency or disaster is declared. The request must include: a copy of the declaration; a detailed explanation of the circumstances; identification of the affected jurisdictions; the reason(s) why the State's ability to make correct payments has been or will be impaired; the length of time required to overcome the effects of the emergency or disaster; and the actions the State is taking to minimize the magnitude and duration of the negative effect. The Department would consider the appropriateness of each request and notify the State accordingly. The State would be required to continue to cite errors in accordance with permissible State practice until a decision on its request is made. If the request is appropriate, errors due solely to the effects of the emergency or disaster would be excluded in the determination of the State's error rate beginning with the date of the emergency or disaster.

Comment: A number of commenters indicated that the proposed rules on declaration of a state of emergency or major disaster were too restrictive. They pointed out that section 408(c)(3)(D)(i) of the Act neither ties the declaration of an emergency or disaster to a particular statute, nor prescribes the extensive documentation requirements set forth in the proposed regulations.

Response: We agree that section 408 of the Act does not specifically tie the required declaration to Federal or State laws governing emergency, emergency response, or relief. Accordingly, the final rule at § 205.42(d)(2)(iii) does not contain this limitation.

In order to establish that an erroneous payment was directly the result of an emergency or disaster, the proposed regulations specified required documentation to be submitted by a State. While section 408 does not identify specific documentation, we believe that an evaluation is appropriate in order for us to assess which, if any, erroneous payments were the direct result of the emergency or disaster. In response to the concerns raised, we reviewed the proposed documentation requirements and determined they could be streamlined. In the final rule, we removed the proposed requirements to determine the length of time required to overcome the emergency or disaster and to identify actions taken by the State to minimize the effects.

Monthly Reporting

Section 408(c)(3)(E) of the Act excludes, for QC purposes, errors which result from the failure of a family to submit monthly reports to the State pursuant to section 402(a)(14), if the failure did not affect the amount of the payment. Under section 402(a)(14) of the Act, as amended by section 5051 of OBRA of 1990, failure to submit a monthly report where required under a State plan option, results in an assistance unit becoming ineligible for assistance payments. We interpreted the language of the Act to exclude the ineligibility of the assistance unit which results from a failure to submit the monthly report where required by the State. Otherwise, the failure to submit a monthly report would always affect the amount of payment, since it is a condition of eligibility, and section 408(c)(3)(E) would have no effect. Based on this interpretation, we will no longer cite as an error failure to file a monthly report where required. However, information that should have been reported on the monthly report will continue to be evaluated for its effect on the accuracy of the payment and errors will be cited as appropriate.

Payments Considered Erroneous

Section 408(c)(4) of the Act identifies two types of payment errors which occur solely as a result of the failure of AFDC recipients to meet statutory conditions of eligibility and which count in the computation of a State's error rate. These conditions are the failure to assign child support rights without good cause and the failure to apply for or provide a Social Security number (SSN) for each person in the assistance unit. Since section 408 does not address other factors of eligibility, including such factors as income and resource limits, we believe Congress intended that adherence to all other statutory eligibility factors would continue under the revised QC system. We believe that these two requirements were included in section 408 to affirm the congressional view of their importance. Moreover, section 408 did not repeal basic statutory requirements of the AFDC program, but clarified how QC must review certain eligibility factors for the purpose of calculating the error rate.

All statutory conditions of eligibility are important, serve program objectives and must be met for an individual to be eligible for assistance. The continued QC review of assignment of child support rights and enumeration requirements emphasize payment accuracy, effective management objectives, and provide information to improve verification capability to reduce the need for assistance by identifying means for support other than AFDC assistance.

Since section 408(c)(4)(B) of the Act specifies that the enumeration requirement is met if an application for an SSN is made within 30 calendar days after the date of application for AFDC, we have included this requirement in the final regulations at § 205.42(d)(2)(v). Payments made during the 30-day period to recipients who have not met the enumeration requirement will be considered as correct payments provided all other factors of eligibility are met.

Comment: Many commenters disagreed with our interpretation of the section 408(c)(4) provisions. They indicated that since the statute expressly identified only two eligibility requirements (assignment and SSN) which could result in an erroneous payment, then other requirements, if not met, should not result in erroneous payments.

Response: We continue to believe our interpretation is correct. To accept the interpretation suggested by many commenters would frustrate the purpose of section 408(a) of the Act which is to improve the accuracy of payments of aid to families with dependent children "Erroneous payments" as defined in section 408(m)(6) is a far broader concept than "an erroneous payment" set forth in section 408(c)(4). Furthermore, if the only erroneous payments were those in section 408(c)(4), there would be no need to specify in section 408(c)(3) that certain payments are not erroneous. Therefore, section 408(c)(4) does not constitute all erroneous payments.

Comment: Several commenters said that the phrase in the NPRM—"failure to * * * provide a social security number"—is not contained within the language of the statute and, therefore, is beyond congressional intent.

Response: Section 408(c)(4)(B) must be read together with section 1137(a)(1) of the Act. Section 1137(a)(1) contains the enumeration requirement and provides that as a condition of eligibility for AFDC payments, a State shall require that each applicant for or recipient of benefits furnish to the State his social security account number. When these two sections are read together, it follows that, unless the State can secure the number through procedures established with the Social Security Administration, validation cannot be accomplished when an applicant or recipient to whom an SSN was issued does not provide the number to the agency. Thus, failure to furnish an SSN will constitute an erroneous payment for QC error rate determination purposes.

Comment: Several commenters were concerned that the regulation does not provide additional time in "Enumeration at Birth" (EAB) cases for the applicant or recipient to provide the SSN for the newborn. They believe that more time is needed because the EAB procedure does not provide for automated feedback of the number. Some commenters recommended that the time frame for such cases be keyed to the next redetermination.

Response: We have changed the proposed rule at § 205.42(d)(2)(v)(B) to provide that a payment error shall not be counted in the computation of a State's error rate if a recipient makes application for an SSN through the EAB project and furnishes the number to the State by the next redetermination period or within six months after the recipient of the SSN, whichever is earlier. We have decided not to extend the time period to 12 months for monthly reporting cases and error-prone profiling cases where the formal determination of eligibility is conducted on an annual basis. We believe to do so would constitute an unreasonable delay in ensuring compliance with a basic condition of eligibility. We have also decided to limit this time extension for furnishing the SSNs to EAB cases because procedures are available to secure issued numbers in other cases through data exchange agreements established with the Social Security Administration.

Comment: One commenter requested clarification of what effect the 30-day grace period, provided in section 408(c)(4)(B) of the Act, will have on the existing SSN eligibility requirements at § 205.52(a)(2).

Response: Section 408 specifies what constitutes a payment error for determining State error rates and potential disallowances under the QC system. Applicants and recipients of AFDC are still required to meet the eligibility requirements under program regulations. Thus, the SSN eligibility requirement § 205.52(a)(2) is unchanged by the 30-day QC grace period.

Comment: Two commenters requested clarification on how the 30-day grace period will apply to new-born children.

Response: We will retain the existing policy as provided in Action Transmittal FSA–AT–90–21, dated August 30, 1990. Under this policy, the change in circumstance provisions in the regulations at § 205.42(d)(1) apply. The birth of a child constitutes a change in circumstances and the parent(s) has until the second month after the birth of the child, or the discharge of the mother from the hospital, to apply for an SSN.

Comment: One commenter suggested that we revise the proposed § 205.42(d)(2)(v) regulation to include a "good cause" provision for failure to meet the enumeration requirement when an applicant does not have the required documentation needed by the Social Security Administration. The commenter suggested that this may be one area for compatibility with the Food Stamp Program in the Department of Agriculture.

Response: We have not included a "good cause" provision in the final regulations. Section 1778 of Public Law 101–624, enacted in November 1990, requires the Department of Agriculture to establish an "Advisory Committee on Welfare Simplification and Coordination." This Committee is to identify the significant differences among a variety of programs, including Food Stamps and AFDC, and to make recommendations for common or simplified programs. Changes, such as the commenter proposed, will be considered by that Committee.

Treatment of Fair Hearing Decisions

The NPRM incorporated current policy on treatment of fair hearing decisions in QC payment error cases. A change to a QC-identified payment error as a result of a fair hearing decision would be permitted provided the State had defended the adverse action during the hearing process, and the decision was based only on the facts of the case at the time of the QC review. In addition to the above criteria, we proposed to establish a time limit of 11 months after the end of the annual sample period to which the error rates would apply, for States to submit requests for such changes. These requests would not be considered after that time.

In the proposed regulations at § 205.43(d), we established one year after the end of the annual sample period, or within 60 calendar days of the last decision of the QC Review Panel, whichever is later, as the target date for the release of the error rates. Since the national average error rate achieved in a year constitutes the error rate tolerance level that will be used to measure State performance for the same year, it is essential that once the State error rates are released, no further error rate adjustment be considered. The 30-day period between the submittal deadline for requests for changes due to fair hearing decisions and the expected error rate release date is necessary in order for the Department to evaluate the circumstances of the request and make any necessary adjustment in the error rates. Since these would not be difference cases, we decided that we could give States this much time and still issue final error rates 12 months after the end of the fiscal year.

Comment: A number of commenters expressed belief that the proposed regulation unreasonably limits to 11 months the time States have to seek adjustments of their error rates as a result of fair hearing decisions. They believe the Department has arbitrarily imposed the 11-month deadline for fair hearing adjustments and that the decision is not supported by the Act.

Response: We continue to believe the proposed time limit is necessary and reasonable given congressional concern and required annual reporting by the Secretary about timely release of error rates and prompt notification to States of potential disallowances. Since the national error rate tolerance each year is the weighted average of all State error rates, it is essential that all adjustments to error findings be made prior to computing final error rates. As indicated at § 205.43(d), the target date for notifying each State of its final error rates is 12 months after the end of the annual sample period or within 30 calendar days of the resolution by the QC Review Panel of all differences, whichever is later. In recognition that issuance of appeal decisions by the QC Review Panel could result in issuance of error rates beyond the 12-month target, we have provided in the final regulations at § 205.42(d)(2)(vi)(C) an extension of the deadline for consideration of fair hearing adjustments if such delays should occur. Therefore, the deadline for receipt of requests for error rate adjustments as a result of fair hearing decisions shall be 11 months after the end of the annual sample period or the date of the last appeal decision by the QC Review Panel, whichever is later. Should a State be subject to a disallowance, the State is afforded the opportunity to challenge the disallowance before the Departmental Appeals Board (DAB) based on the lack of inclusion of fair hearing decisions issued after the deadline.

We have also changed proposed rules at § 205.42(d)(2)(vi)(A) to clarify that "facts" evaluated in relation to the fair hearing decision are the actual case circumstances that existed as of the review month.

Sample Disposition and Data Submission Time Frames

Prior regulations required States to dispose of and report findings on QC sample cases based on the following completion standards: 90 percent or all but five cases within 75 days after each sample month; 95 percent or all but five cases within 95 days after each sample month; and 100 percent within 120 days of the sample month. We proposed in the NPRM at § 205.42(e) somewhat more stringent standards to ensure more timely establishment and issuance of State error rates. States would be required to dispose of and report findings on sample cases as follows: 75 percent within 75 days after each sample month, and 100 percent within 95 days after the end of each sample month.

We also proposed in the NPRM at § 205.42(f)(1) to waive the "75 percent in 75 days" disposition standard where the Department has approved an alternate sample disposition plan based on permanent or recurring events in the State at certain times of the year. Unless the Department has approved a temporary alternate sample disposition plan for a particular annual sample period because of an unforeseen event in that year (as indicated in § 205.42(f)(2)), States would be required to submit a report immediately on cases that remain pending 95 days after the end of the sample month explaining why each case was not disposed of and the date by which it will be. The Department could grant an extension to the sample disposition time frame for individual cases that exceeded the 95-day deadline if sufficient justification for each overdue case was provided. However, in the proposed rules at § 205.42(h)(2), in the event of a significant failure on the part of the State to dispose of the required number of monthly AFDC sample cases within the proposed time frames, or time frames approved under a temporary alternate disposition plan, the Department could initiate action to establish the State's error rate.

The provision for an alternate sample disposition plan existed under prior regulations at § 205.40(b)(3). The extension to the time frame for individual cases where an alternate disposition has not been submitted or approved is new.

Comment: We received 47 comments on the sample completion time frames from State agencies and others. The commenters were universally opposed to shortening the disposition standard from 120 days to 95 days. Some commenters recommended a single 120-day standard; others opposed the required written justification for cases exceeding the 95-day standard, viewing it as an unnecessary burden. Commenters argued that the shortened time frames would force States to issue findings on sample cases before all information and verifications were secured. Some noted that the proposed completion standards would reduce State flexibility in managing its workload and that shrinking State resources would make it difficult to meet existing standards, let alone the proposed more rigorous ones. A number of commenters agreed with the percentage completion reduction for the 75-day standard.

Response: We are persuaded that shortened sample completion time frames would create a significant administrative burden, reduce State flexibility in managing shrinking staff resources, and not result in appreciable reduction in the time necessary to establish and issue State error rates. We have, therefore, provided in the final rule at § 205.42(e) for the retention of the prior standards with modification of the 75-day requirement (i.e., incorporating the proposed 75-percent completion requirement within the 75-day standard). However, we have not included the proposed requirement of a written justification for cases exceeding

the 100-percent completion standard. While a single 120-day deadline was recommended both in our consultation with States prior to development of the proposed regulations and in comments to the proposed regulations, we have included in the final regulations the proposed interim deadlines to ensure an even flow of work at both the State and Federal level. We believe the new interim disposition deadlines are reasonable and achievable as demonstrated by past performance.

Federal Re-review of State Sample Cases

We indicated in the preamble to the proposed regulations that we intended to use similar disposition time frames for completion of the Federal re-reviews as those imposed on the States.

Comment: Several commenters indicated that section 408(h)(1)(A) of the Social Security Act required the Department to include the Federal subsample disposition standards in the regulations. A few commenters suggested that State findings for subsample cases not disposed of within the Federal completion deadlines be automatically considered correct.

Response: We have no objection to including the Federal subsample disposition standards in the regulations. We have adopted the same disposition time frames applicable to the States and have added the specifications to the final regulations at § 205.42(g)(4). We reject the suggestion that should the Federal staff fail to dispose of the subsample cases by the disposition deadline, the State finding should be considered correct. The purpose of the Federal subsample is to validate the results in the State sample. The proposal would result in invalid State and national error rates. If we find in the Federal subsample that the State disposed of a case prior to receipt of all verification information in order to meet the disposition deadline, the missing information will be secured, evaluated and utilized in the computation of the regressed estimate of the State error rate. We have and will continue to monitor the Federal timely completion of the subsample closely and take remedial action where necessary.

Comment: Several commenters raised concerns about the nature of State records used in the Federal re-review and the time frame for submitting these records to the Federal agency. These commenters believe that States should be allowed to submit legible copies or original records within 10 working days of receipt of the Federal request for the records. The postmarked date on the record submitted should be considered the date of receipt.

Response: The prior regulations at § 205.40(b)(2)(iv) contained the requirement to furnish records to the Department for the conduct of the Federal subsample reviews. We inadvertently changed the wording when we incorporated this requirement into the proposed regulation. The final regulation at § 205.42(g)(1) allows for submittal of original or legible copies of case records within 10 calendar days beginning with the date the State receives the request for the records. We believe 10 calendar days is sufficient time to furnish the required records. This time frame reiterates the prior existing requirement, which States have consistently met.

Failure to Complete Sample

Pursuant to section 408(b)(1)(B) of the Act, if a State fails to provide the Department with information necessary to determine a State's AFDC error rate, the Department, directly or through contractual or other arrangements as determined appropriate, shall establish the error rate for the State on the basis of the best data reasonably available to the Department and in accordance with the statistical methods that would apply if the reviews were conducted by the State.

We interpreted this section of the Act in the NPRM at § 205.42(h) to mean that the State must complete a proper sample, that the results of this sample must be reported timely, and that payment and eligibility records must be provided promptly upon request for the Federal re-review. By "proper sample", we mean that the State has completed a sample in accordance with federally prescribed instructions as set forth in QC Manual, sections 2 and 3. Thus, if a State does not follow the federally prescribed instructions, or if the State does not select the sample in accordance with its approved sampling plan, the sample will be considered invalid, unreliable, or both. Similarly, if a State does not complete the federally prescribed minimum number of reviews and submit the review data in a timely manner, the available sample findings will be considered to be unreliable. State records must be supplied for the Federal re-review timely to enable the Department to meet the proposed time frames for establishing and issuing the State error rates.

We have interpreted that the statutory language that the department shall use the best data "reasonably" available as authorizing the Department to determine the method(s) to be used to establish the State's error rate. Thus, the actual method used would depend on the particular circumstances involved. Some of the circumstances we would consider include the timing and extent of a State's non-cooperation, and the time and resources available to the Department. For example, from the beginning of the annual sample period a State completed a valid but less reliable sample because the sample contained fewer than the prescribed number of AFDC active case reviews. We might combine this State sample with the Federal subsample of this State sample and add an additional federal sample (de novo review) to determine the State's error rate. However, if we have reason to question the State's findings, we might conduct an audit directly or through a contractual agreement with a third party.

Similarly, if we had reason to question the validity of the reviews being conducted by the State because the State did not conduct its reviews and verification in accordance with federally prescribed procedures or improperly excluded cases from its sample, and the State failed to timely take the remedial action that was indicated, it might become necessary for us to complete these reviews.

Comment: Several commenters objected to the necessity of our proposed provision and the broad discretionary authority it provided the Department in determining when a State "failed to complete the sample."

Response: Section 408(b)(1)(B) of the Act contains the authority for this regulatory provision. It indicates that if a State fails to conduct and complete a sample on a timely basis, the Secretary may complete the State's sample and charge the State the cost of this effort. The final regulations provide for notification to a State of failure to complete its sample and afford the State an opportunity to negotiate a solution before we take action to complete the State's sample. We, therefore, believe that the regulation is necessary, reasonable, and consistent with the intent of the statute.

Comment: One commenter suggested that we could strengthen the proposed regulation by requiring the State to develop a QC operational plan to be approved by the Department prior to the start of each review period. Both parties would have a clear understanding of what would be required, and deficiencies could be identified easily and detected earlier.

Response: We disagree that this suggestion would strengthen the regulation. We believe the current QC system—which makes use of the

approved State plan, the approved sampling plan, the QC Manuals, the statute and the regulations—clearly defines the requirements. QC reviews to permissible State practice (as specified in the approved State plan) and not to State operating procedures.

Differences in Review Findings

Section 408(b)(3), in describing the process for resolving differences between State and Federal AFDC review findings, indicates that a "difference case" is a case in which the Department finds the case erroneously paid, and the State review determined it correctly paid. We believe that a somewhat broader concept is appropriate in order to address other types of inconsistencies between State and Federal review findings, e.g., the State finds a case incorrectly paid and the Federal review finds the case correctly paid.

Accordingly, in the proposed regulations at § 205.42(i), we defined a difference case as a disagreement between State and Federal review findings that may affect the State's official payment error rate. This definition incorporated our current operational definition in the QC Manual, section 3. Specifically, a difference case would be a Federal re-review case where there is a disagreement between (1) a State review and Federal re-review finding of a correct payment, overpayment, or a payment to an ineligible case, or (2) a State finding of a correct payment, overpayment, underpayment, or a payment to an ineligible case and a Federal finding that the sample case should be dropped from the QC review.

Comment: One commenter pointed out that the proposed regulations neglected to include an underpayment case in the definition.

Response: We agree. Since the underpayment case was inadvertently omitted from the definition, we have added it to the final regulation at § 205.42(i).

Comment: One commenter proposed that the regulations also extend to the State the opportunity to seek administrative relief when the Federal review finding disagrees with a State finding that a sample case should be dropped from the QC review. The commenter believed that this situation should be subject to the same resolution process as any other difference that is cited by Federal re-review since it may affect the State's official payment error rate.

Response: Section 408(b)(3) defines a difference case as any case in the subsample in which the Secretary finds an erroneous payment and which the State's review determined the payment to be correct. Thus, the underlying concept of a "difference case" is a Federal-State disagreement regarding the amount of payment made to a case.

However, "dropped cases" are not "difference cases." We review all State-dropped sample cases to ensure that all reviewable sample cases are included in the determination of a State's payment error rate. When we find that a sample case dropped from the QC review by a State is reviewable, the case is returned to the State to complete the review and determine the correctness of the payment made. When we find that a State-dropped case is not reviewable, the case is dropped from the sample because neither the State nor the Federal review can be completed.

Comment: Another commenter proposed that the resolution process be expanded to include situations where a State finding of error, agreed to by the Federal review, is later discovered by the State to be incorrect.

Response: To ensure representativeness of the Federal subsample and unbiased error rate estimates, the original State finding must be fixed prior to Federal subsample selection and not changed thereafter. While we believe the situation presented would be extremely rare and, thus, regulating in this area is not warranted, we would consider new information provided by the State on a case-by-case basis if such information was provided prior to resolution of all differences by the QC Review Panel (Panel).

Comment: Several commenters requested that there be a provision that allows for informal resolution of differences between State and Federal sample case findings. The felt that such a provision would result in a more expedited resolution of many of the differences.

Response: We believe it would be inappropriate to include a provision for informal resolution of differences, either before they are formally cited by Federal regional staff or during the formal resolution process. Such a practice could result in inconsistent and inequitable treatment of differences among States. These resolution procedures, however, do not preclude informal discussions to clarify points during the resolution process.

Comment: Several commenters suggested that we modify the proposed regulations to require that State notification of a Federal difference be sent only by certified mail.

Response: We decline to include this restriction in the final regulations. There are other methods for ensuring uniform measurement of the date of receipt by the State of a difference notification. We will use the method that is appropriate to a particular situation.

Comment: A number of commenters suggested that a full 30 days should be allowed for both State responses to Federal disagreement notices and appeals of the RA's decisions to the Panel. The extra two days would ease logistical consideration without compromising the congressional intent for timely release of the error rates.

Response: We have revised the regulations at § 205.42(i) (2) and (4) to provide that the State shall respond to the difference notification agreeing or indicating the reason for disagreeing with the Federal finding within 30 days. Responses postmarked, otherwise officially dated, or delivered by the 30th calendar day after the date of receipt of the difference letter shall have met the time frame. If the deadline is a Saturday, Sunday, legal holiday, or an office closing, the deadline shall be extended to the next business day. If the State fails to respond within the 30-day time frame, the Federal finding shall be the final decision of the Department. If the State disagrees with the RA's decision, it may seek review with the Panel. The 30-day time frame would apply.

Comment: Several States suggested that the time frame for the RA's decision on a State's appeal of a difference be set at 30 calendar days, instead of the proposed 21 calendar days, for a decision or interim response pending review of law or policy. They thought the proposed standard was inequitable and would result in indefinite delays in processing appeals.

Response: We have not changed the 21-day time frame specified in the proposed regulations. We believe it is appropriate for the RA, on an exception basis, to provide interim responses to State appeals pending review of the law, regulations or policy. It is essential that the RA's decisions to sustain or reverse the initial Federal findings be consistent with national policy. Where consultation on that policy is necessary, it is provided for under the 21-day standard. Furthermore, our experience over a number of years indicates that the vast majority of difference cases are decided by the RA within the 21-day time frame.

Quality Control Review Panel

Under prior procedures, there was a two-step administrative appeal process for resolving differences between State and Federal active AFDC review findings within the ACR regional office.

Section 408(b)(4) of the Act requires that there be a QC Review Panel (Panel) to review State appeals of QC difference cases. After consultation with State representatives, we decided to retain one appeal level within ACF, the appeal to the ACF RA, to ensure the accuracy of the Federal difference decision before involving the Panel. We retained the prior 28-day time frame for States to request a review by the RA. In the proposed regulations at § 205.42(i)(2), we defined the 28 calendar days in terms of the receipt date of the difference notification and the postmarked date of the appeal letter. This definition was consistent with the State representatives' request for a change in how the time frame should be measured.

Given the congressional desire for timely release of error rates, we proposed that States have 28 calendar days from the receipt of the RA's decision to sustain a difference case to submit an appeal of the difference to the Panel. (We plan to send difference notifications and RAs' appeal decisions via telefax or certified mail to ensure uniform measurement of a State's receipt date.) The appeal request would include all supporting documentation. The proposed regulations did not limit the kinds of documentation a State may submit to substantiate its position. However, the appeal could only be based on issues that were raised in the initial appeal to the RA. In addition, the State would be required to send an informational copy of its appeal request to the RA concurrent with the submittal of the request to the Panel.

We proposed in the NPRM a target 60-day time period for the Panel to render a decision after receipt of a State's appeal request. Sixty days was viewed as a goal since a complex issue requiring supplemental information from the State, or the RA, could delay the decision. Sections 408(b)(5) (C) and (D) provide that decisions of the Panel in difference cases shall constitute those of the Secretary and that such decisions are not appealable. We interpreted this to mean that the Secretary may delegate these decisions to the Panel but retains authority to review individual differences cases. If a State appealed a disallowance for an error rate in excess of the national standard to the Departmental Appeals Board, the decision of the Panel, or the Secretary, in difference cases would not be reviewable by the Board.

The Panel was created to ensure an independent evaluation of difference cases since the findings in the Federal subsample are critical in determining the State's error rate. Consistent with a delegation of authority to the Chair of the Departmental Appeals Board (DAB), signed by the Secretary of February 19, 1992, the function of the Panel is being performed by staff attorneys of the Board. The regulations at § 205.42(i) (4) and (5) specify the time frames and general procedures to be followed when the State disagrees with the RA's decision and seeks review with the Panel.

Comment: Several commenters noted that there are no provisions in the proposed regulations regarding the size or the Panel or the composition of its members. Two commenters recommended a constituency of three members—a Federal representative, an independent party and a State agency representative, with the latter to be selected by the Department from a pool of State-recommended individuals. Two other commenters also suggested that at least one Panel member represent the States.

Response: We received these recommendations during our earlier discussions with State representatives. We believe that the current Panel composition and location address the commenters' concerns for an independent and impartial review body. In this connection, we note that there are no requirements in the statute regarding the size or composition of the Panel membership. The statute only requires that there be a Panel.

Comment: Many commenters objected to the proposed rule which required that States file an appeal and submit all supporting documentation with the Panel within 28 calendar days of receipt of the RA's decision to sustain a difference. Most suggested a 30-day deadline to file the appeal and with a minimum of 15 additional days after filing to provide all supporting documentation.

Response: We have revised the proposed regulations at § 205.42(i)(4) to provide 30 calendar days after the receipt of the RA's decision for the State to file an appeal and provide supporting documentation of the difference to the Panel. We believe 30 days is a reasonable time frame for a State to develop its arguments and submit supporting documentation for its appeal. However, in recognition of unusual circumstances that can arise, extensions may be granted by the Panel where good cause is shown.

Comment: One commenter suggested amending the proposed regulations at § 205.42(i), in general, and § 205.42(i)(4) in particular, to provide for situations where an appeal of a difference is delivered to its destination without benefit of a postmark. This situation can occur when overnight delivery or courier service is used.

Response: We agree that clarification in the regulations to address different forms of delivery is warranted. Therefore, the final regulations at § 205.42(i)(2) and (4) provide that a State's appeal request must be postmarked, otherwise officially dated, or delivered to the Panel by the stated deadline. Where no delivery service is used because the State has hand-delivered or telefaxed the appeal request, the Regional Office and the Panel will use a date-stamp or the date of transmission for purposes of the deadline.

Comment: Several commenters felt that the 60-day target for the Panel to render a decision is unnecessarily broad and lacks justification. They suggested that a decision on State appeals should be rendered in 30 days. If not, the State finding should be accepted by default. One commenter suggested that the case should be dropped from the subsample if a decision on the appeal request is not reached by the deadline.

Response: There is no legitimate basis for dropping or accepting by default a State finding simply because the State's appeal of the Federal finding goes beyond the anticipated time for a decision. Therefore, we decline to make such a change. However, we have changed the proposed regulations at § 205.42(i)(5) to indicate that the Panel shall notify the State of its decision within a target date of 45 calendar days following the completion of the record in the case as determined by the Panel. We have retained the reference to "a target date" for the decision to allow the Panel more time to render a sound decision where issues under appeal are complex.

Comment: Many commenters objected to the limitation proposed in the NPRM at § 205.42(i)(4) that the appeal to the Panel of a difference case can only be based on issues raised during the initial appeal to the RA. They contend that the statute provides no such limitation.

Response: This limitation is not included in the final regulations. However, States are to appeal difference cases initially to the RA. Any difference case appealed directly to the Panel will not be considered until the RA renders a review decision.

Section 205.43 Determination of Payment Error Rates and Disallowances of Federal Financial Participation for Erroneous Payments

This section sets forth the rules and procedures for calculating State AFDC

error rates and for disallowing Federal financial participation (FFP) to the States with erroneous payments in excess of the national standard for a fiscal year. This section also includes the disallowance notification and payment schedule and the administrative and judicial reviews of disallowances.

AFDC Expenditures for Disallowance Purposes

Comment: One commenter suggested excluding IV–D collections, recoveries and cancellations from the AFDC assistance expenditures before calculating the disallowance for a State. This change would preclude a State from paying disallowances on dollars which a State has returned to the Department.

Response: Section 408(f)(1)(A) of the Act, for purposes of determining the basic disallowance, defines AFDC expenditures as total payments of aid to families with dependent children. It is this amount that is reviewed in the QC sample and not the paid amount less child support collections and AFDC recoveries or cancellations. The error rate is computed using the total monthly payments to the sample cases.

Child Support Collection Rate

In the proposed regulations, we defined the child support collection rate as the ratio of the sum of the number AFDC cases reported by the State IV–D agency for which an assignment and a collection were made under section 402(a)(26) of the Social Security Act to the sum of the number of AFDC cases with such assignments reported by the State IV–D agency in the fiscal year.

Comment: One commenter was concerned that the definition of the child support collection rate in the NPRM at § 205.43(b)(1) would eventually be used for determining incentives under the child support enforcement program or for evaluating the child support enforcement program. The commenter also questioned the appropriateness of setting the child support collection rate by comparing the number of AFDC cases with a collection to the number of AFDC cases referred to the State child support agency by the State AFDC agency. The concern was based on the fact that many of the AFDC cases referred to the child support agency lack the basic information (e.g., the name of the alleged father) to allow the child support agency to have a reasonable chance of collecting support. The commenter suggested a definition that would compare the number of AFDC cases with a collection to the number of AFDC cases with an established order.

Response: The definition in the proposed rule is imposed by section 408(m)(4) of the Act and applies only to the AFDC program for QC purposes. We have no intention of extending this definition to other areas.

Using AFDC cases with an established order rather than AFDC cases referred to the child support agency would "improve" the child support collection rate of each State, but it would not create an incentive for States to obtain the missing information and support orders. Although this is not an easily solved problem, State agencies must begin to work more closely with one another and improve communications so that the needs of both programs are met and better results obtained.

Weighting for the National Payment Error Rates

To conform to standard statistical practice, we proposed to modify the weighting procedure used in determining the national overpayment and underpayment rates. Currently, the national overpayment (or underpayment) rate is defined as the sum, over all States, of the product of each State's regressed overpayment (or underpayment) rate and total amount of assistance payments divided by the sum of the total amount of assistance payments of all States in the fiscal year. In the proposed regulations, the national overpayment (or underpayment) rate was defined as the ratio of the sum, over all States, of the product of each State's average monthly caseload and regressed average monthly erroneous assistance payment (or average monthly assistance payment that should have been made but was erroneously not made) per case, to the sum, over all States, of the product of each State's average monthly caseload and average monthly payment per case for the fiscal year.

Comment: A number of commenters urged that we retain our current weighting procedures. They stated that the Department has not statistically proven that the proposed procedure represents a significantly more valid, reliable, and fairer method than the current method. Some commenters said that the proposed procedure was unclear and required interpretation and consultation to work. They also believed that the proposal increased the disallowance risk to all States by producing a lower national error rate than that produced by the current procedure.

Response: Both the current and proposed weighting procedures produce valid and reliable estimates of the national payment error rate. Based on five years of national average overpayment error rates, the difference in the estimates between the two procedures is extremely small. However, in light of the States' concerns, the fact that both methods produce valid and reliable estimates, and the relatively small difference in the national average error rate estimates, we decided to retain our prior weighting procedure. The final regulations at § 205.43(b) (3) and (6) reflect this decision. We also retain the prior weighting procedure for computing the payment error rate for States that use disproportionate stratified sampling.

Comment: One commenter suggested that the Department use the weighting procedure currently used by the Food and Nutrition Service (FNS).

Response: The FNS weighting procedure for calculating the national overissuance (or underissuance) rates is essentially the same as our prior procedures, and, thus, we see no reason to change. FNS weights each State error rate with the ratio of the State reported total issuances to total reported issuances of all States in calculating the national error rates.

National Standard

In § 205.43(b)(4) of the proposed regulations, we defined the national standard as the national overpayment rate for the fiscal year or four percent, whichever is larger. If a State's overpayment rate exceeded the national standard for a fiscal year, its FFP would be reduced. The authority for this standard is contained in section 408(f) of the Act.

Comment: One commenter believed that the proposed definition of the national standard was not clear because it did not indicate whether the phrase "national overpayment rate" refers to the national rate before, or after, any error rate reductions are taken into account.

Response: The definition of national overpayment is given in § 205.43(b)(3) of the regulation. It is the error rate before any reductions are taken.

Comment: One commenter noted that the source of the total assistance payment data used for the error rate computation differs from the source used for the disallowance computation. The commenter recommended that total payments derived from the QC sample cases should be used for both computations.

Response: The commenter's observation is correct. We use different data sources for total assistance payment expenditures in the two computations. For error rate

computations, we use the average monthly assistance payment per case derived from the review month's payments to the sample cases. For disallowance computations, however, we use the total assistance payments and the Federal share of such payments as reported by the States on their quarterly financial reports to the Department. Since we compute the regressed payment error rate from the sample cases for which QC reviews have been completed, the average payment derived from the sample cases is the better average to use for the error rate computation. In the 1987 study cited earlier, Westat, Inc. demonstrated that the statistical variance is small (i.e., the error rate estimate is better) when the average payment derived from the sample cases is used, instead of the average payment derived from the quarterly financial reported data. Westat not only proved that the average from the sample is appropriate, but recommended its use.

On the other hand, the quarterly financial reports submitted by the States provide more accurate dollar figures for computing the disallowance amounts. The expenditure figures reported on the quarterly reports represent the actual assistance expenditures for which Federal matching is claimed. All Federal dollars claimed for a fiscal year are used in the computation of disallowances. Therefore, we will continue to use the two different expenditure sources; they provide the most accurate data for the two respective computations.

Point Estimate of the Error Rate

Section 205.43(c) of the proposed rules defined the State error rate as the point estimate of the regression estimator as set forth in the QC Manual, section 2. We used this method to calculate error rates prior to the enactment of OBRA of 1989. Additionally, the conference report to this legislation, in describing the purpose and basis for the revised AFDC QC system, states "[t]he conferees assume that the Secretary will use the same statistical methods to estimate errors as have been used under the current system" (Congressional Record, H9591, November 21, 1989).

Comment: A number of commenters believes that the statute explicitly left only the question of the method to be used to make estimates of the error rate and that we should discuss the method with the States. Several commenters suggested we use alternative approaches. Other commenters recommended that we use the lower confidence bound instead of the point estimate as the official error rate.

Response: We have discussed the issue of using the point estimate or the lower bound as the estimate for the official State and national error rates over the years. In consultation with State representatives prior to issuance of the proposed regulations, we indicated our intention to use the point estimate as the official error rate, and State expressed no substantive concerns. The conference report makes it clear that Congress assumed that we would continue to use the existing statistical methods, which includes the use of the point estimate, for estimating error rates. Use of the point estimate for calculating disallowances is the best and fairest method to all parties over time. It is ordinarily and appropriately used in practice when a sample estimate is used to allocate a payment amount between two parties. Given some unavoidable level of sampling error in the estimated State error rate, some risk always exists that the disallowance will be different from what would be determined if the true error rate was known. Fairness dictates that the risk should not be solely borne by either the State or the Federal government; rather, the risk should be equally shared. Alternative approaches offer various advantages, disadvantages and results which may be preferred, as a matter of individual choice. However, given the current partnership responsibilities of the States and the Department to carry out the complex and critical AFDC program, we believe that the point estimate of the error rate is the appropriate rate to use in determining disallowances.

Error Rate Notification

Under the regulations at § 205.43(d), we proposed that the Department's target date for notifying each State of its overpayment and underpayment rates and the national overpayment and underpayment rates would be one year after the end of the annual period to which the error rates apply, or within 30 calendar days after the resolution by the Panel of all differences, whichever is later. While we would expect to release the error rates as close to the one-year target date as possible, we did not establish a fixed date in the proposed regulations for the following reasons: (1) final national error rates cannot be calculated until all sample cases are completed and all differences are resolved; (2) if a State failed to complete a valid and reliable sample, we would need to establish the error rate for the State on the basis of the best data reasonably available and the calculation and release of error rates would likely be delayed; (3) a delay could also occur if an unforeseen event occurred and we approved an alternate disposition plan which provided for the completion of the State sample beyond the prescribed time frames; (4) a delay in the timely adjudication of appeals by the Panel due to the complexity of appeal issues could also delay the release of the error rates.

Comment: Several commenters felt that the proposed target date for notifying each State of its error rates was inadequate for corrective action planning. They requested that the regulations incorporate interim feedback of both State and Federal error rates throughout the review period until we produce final error rates.

Response: We believe it is inappropriate to regulate or release interim error rates. Such information would be meaningless. Accurate national payment error rates cannot be computed until all State and Federal reviews are completed and all differences are resolved by the Panel. The best information for corrective action planning is the States' own findings in their QC samples. Since we advise States of differences in their findings as they occur in the Federal re-review, States can plan corrective actions based on the review and analysis of these findings.

Comment: Several commenters suggested that the error rate notification should include all information necessary to allow estimation of the disallowance. One commenter would like a 30-day rebuttal period for detection of possible computational errors and a final notification date no later than 30 days following the rebuttal period added to the regulation.

Response: The error rate notification letter will include all the necessary information to allow States to calculate their QC disallowances, i.e., the national and the State's overpayment rates, underpayment rates and child support collection rates, and the State's amount of overpayment recoveries. As for building a rebuttal period into the notification process, we do not believe this is necessary. If computational errors are identified in the information provided to the States, we will make appropriate corrections.

Adjusted Payment Error Rate

We make several adjustments before we determine the amount of State's disallowance. If a State's underpayment rate is less than the national underpayment rate for the fiscal year, the State may request that its overpayment rate be reduced by the amount by which the national underpayment rate exceeds the State s

underpayment rate. Section 408(d)(3) of the Act provides that, at the request of the State, we may apply the underpayment reduction to either of the two following fiscal years instead of to the year to which the reduction would otherwise apply. In the NPRM, we have interpreted this to mean that a State may use the underpayment reduction earned in a fiscal year one time only, either in the year in which it is earned or in one of the following two years. Only one underpayment reduction may be applied to any given year. States whose unadjusted overpayment rate exceeds the national average will have 30 calendar days from the receipt of notification of their error rates to advise us of their decision, where applicable, on how to apply the underpayment adjustment. If the State does not notify us in writing within this time period, we will use the underpayment adjustment that would apply for the fiscal year.

Comment: Most commenters believed that § 205.43(e)(1)(i) in the proposed regulations was inconsistent with the statute. They felt that since underpayment reductions could be used only over a three-year period, they should be allowed to combine these reductions as they wish for that period. They requested that the restriction on the combining of underpayment reductions be eliminated.

Response: We decline to make the requested change. We believe Congress provided flexibility to the States in the application of the underpayment adjustment in recognition that, in any one year, a significant number of States would be below the national standard. In order to encourage States to maintain low underpayment rates, even in a year when their payment error rates were below the national standard, the statute allows for the adjustment to applied in one of the three years. Our policy of a one-time and non-cumulative application of the underpayment adjustment, as specified at § 205.43(e)(1)(i), is consistent with the adjustments to the disallowance for overpayment recoveries and child support collections, as provided in sections 408(f) (2) and (3) of the Act.

Comment: One commenter believed that since Congress intended that all provisions take full effect in 1991, the underpayment rates for fiscal years 1989 and 1990 should be utilized in the reductions of the overpayment rates for 1991.

Response: The first fiscal year to which the error rate formula set forth in section 408(d)(2) of the Act can apply is 1991. Therefore, the application of the underpayment reduction specified in section 408(d)(3) of the Act can only apply beginning with fiscal year 1991, i.e., only the fiscal year 1991 underpayment reduction can be applied to the 1991 error rate or to either of the two following fiscal year error rates (1992–1993). Furthermore, if the Congress had intended to allow States to apply an underpayment reduction to a fiscal year error rate based on underpayment error rates achieved in years prior to fiscal year 1991, it would have written section 408(d)(3) to provide that such reduction can be based on the underpayment error rate achieved in the current fiscal year or on the underpayment error rate achieved in either of the two preceding fiscal years. Therefore, the application defined in section 408(d)(3) cannot be used for any fiscal year prior to 1991.

Calculation of Basic Disallowance

A State's basic disallowance for a fiscal year was defined in the NPRM at § 205.43(e)(2) as the product of (1) the Federal share of the total amount of assistance paid under the State plan, (2) the difference between the State's adjusted payment error and the national standard, and (3) the ratio of the difference between the State's adjusted error rate and the national standard to the national standard.

Comment: Several commenters pointed out that the proposed regulation omitted the part of the disallowance formula in the statute which ensures that a State's disallowance amount can never be greater than the Federal share of the State's overpayment above the national standard.

Response: We have corrected this oversight in the final regulations at § 205.43(e)(2)(iii).

Comment: One commenter would like the final regulation to specify the number of decimal places and the rounding procedures to be used in the calculations of the error rates and disallowances.

Response: Historically, we have not put this level of detail in the regulations and do not believe that it should be included. However, we plan to use the same number of decimal places and the same rounding procedures as have been used in the past. We will round all error rates and child support collection rates to the nearest six decimal places (i.e., four digits beyond the decimal point) and round all computed dollar values to the nearest dollar.

Comment: Another commenter suggested that the Department should pick a point in time to freeze the information used to calculate the basic disallowance amounts in order to avoid constant revisions of disallowance amounts. The commenter believed there should be a tie-in to the target date for the release of the error rates and to the forms used to calculate disallowances whereby no further adjustments would be allowed.

Response: With the exception of computational errors, the States' official error rates are frozen at the time States are officially notified of the error rates, i.e., prior to the calculation of the basic disallowances. Historically, the Department has been willing to revise the actual amount of the disallowance based on the latest fiscal data on AFDC assistance expenditures up to the time when the disallowance is collected.

Reduction in Disallowance for Overpayment Recoveries

Section 408(f)(2) of the Act requires that a State's basic disallowance for a fiscal year shall be reduced by its overpayment recoveries. The amount of reduction for overpayment recoveries is the product of the Federal share of payments recovered in the fiscal year and the proportion of the State's adjusted payment error rate in excess of the national standard.

Comment: One commenter stated that States with error rates that excessively exceed the national standard have a higher proportion of their overpayment recoveries deducted from their disallowance amount than States with lower error rates. The commenter believed this result is inconsistent with the intent of the legislation to levy penalties in relation to State performance compared to the national average.

Response: Although the commenter's understanding of the calculation is correct, the statute is very explicit as to how we are to calculate the overpayment recoveries.

Comment: Several commenters would like the actual sources of the overpayment recoveries specified in the regulations.

Response: We do not believe that this level of detail should be included in the regulations since reporting forms are subject to change. For fiscal year 1991 and the first calendar quarter of fiscal year 1992, we will use the quarterly expenditure reports on Form FSA–231 (10/89), Part 1, section A, item 9, column (a). Starting with the second quarter in fiscal 1992, we will use the quarterly reports on Form ACF–231 (10/91), Part 1, section A, item 10, column (a). These forms contain the Federal share of cash recovered by the State from overpayments made to current and former AFDC recipients under title IV–A.

Reduction in Disallowance for Child Support Collections

The proposed regulations followed the specifications set forth in the Act on how the child support collection rate would be used to reduce a State's basic disallowance. The procedure remains the same in the final regulations. If a State's child support collection rate is greater than the national child support collection rate for the fiscal year, or is greater than the average of the State's child support collection rate for the three preceding fiscal years, the State's basic disallowance is further reduced. The amount of reduction will be the larger of the proportions by which the State's collection rate exceeds the national collection rate or exceeds the State's average collection rate for the preceding three years. (The smaller collection rate will produce the larger proportion and, thus, a larger disallowance reduction.) See § 205.43(e)(5) of the final regulations for a detailed example of the disallowance calculation.

Comment: A number of commenters said they would like to know specifically how the child support collection rate will be calculated. The definition appears to be designed to use AFDC case information, but the child support reports combine AFDC and foster care data. The asked if "arrears-only" cases will be included in the calculation. One commenter questioned using the number of cases with collections only during the second month of each calendar quarter. This commenter believed that the number of cases with collections could vary significantly from month to month, especially when Federal tax refund setoff collections come in. Some commenters would like assurances that there would be no new reporting requirements as a result of this provision.

Response: We agree that it would not be advisable to revise the child support reporting requirements for the purpose of calculating the child support collection rate. Since the number of cases with collections is reported only for the second month of the calendar quarter (Form OCSE–156, line 17, column a), this number will be assumed to be the average of such cases for the calendar quarter. (The second month of the quarter is used in order to permit States an additional month in which to compile information from the local agencies.)

Since Form OCSE–156 does not break out AFDC cases from AFDC foster care cases, we will use the combined cases in the calculation. We do not expect that the inclusion of such cases will adversely impact on the States because the number of foster care cases is relatively small.

"Arrears-only" cases (Form OCSE–156, column c) will not be included in the calculation of the child support collection rate because of differences among the States in defining and reporting arrears.

Starting with fiscal year 1991, the child support collection rate will be computed entirely from data reported on lines 4, 5, and 17 of the current Form OCSE–156. Although the preamble to the proposed regulations stated that both Forms OCSE–156 and 158 would be used for the child support collection rates, no data from Form OCSE–158 will be used for this purpose.

To obtain the child support collection rate for a fiscal year, we will divide the sum of "Cases with collections in second month of quarter" (line 17, column a) on the four quarterly reports for the fiscal year by the sum of "Cases open at end of quarter," including both those with and without orders established, (lines 4 and 5, column a) on the same four quarterly reports.

The average child support collection rate for the preceding three fiscal years (i.e., 1988, 1989, 1990) will be computed entirely from data reported on lines 4 and 9 of an earlier version of Form OCSE–156 (i.e., Form OCSE–56) which we used. We will divide the sum of "Cases with collections in second month of quarter" (line 9, column A) on the 12 quarterly reports for the 1988, 1989 and 1990 fiscal years by the sum of "Cases open at last day of quarter" (line 4, column A) on the same 12 quarterly reports.

Comment: Some commenters were concerned that the child support data on the OCSE reports are imprecise and unreliable because States have not uniformly gathered and reported this information.

Response: We are aware of the inconsistencies in reported child support data and are making improved reporting a priority. Although the data are not perfect, they are the best we have, and we must use them. We are hopeful, however, that joint Federal/State efforts to improve data collection will be fruitful and inconsistencies in the data will be minimized. It is in the States' best interest to report program data fully and accurately. The reports are the only available information we have for this measure and for many other measures, including measuring program results for congressional review and funding purposes.

Comment: Several commenters stated that there are conceptual problems with using the statutory definition of child support collection rate. The following comments were made: (1) Some States run all orders through the child support program, allowing those States to get credit for the "good payer" segment of the population which is not seen in other jurisdictions; (2) the definition fails to take into consideration improvements in collections due to modifications of child support orders; (3) it also does not take into account the welfare cost avoidance due to improvements made to the non-welfare collections; (4) Form OCSE–158 data, particularly the accounts receivable data, are subject to manipulation and inaccuracy and pose consistency problems among the States; and (5) it is inconsistent to use cases instead of dollars as the measurement of collections.

Response: The fact that some States run all orders through the child support program should not affect the AFDC child support collection rate since only AFDC orders are counted. Section 408(m)(4) of the Act requires that the child support collection rate be based on cases and not dollars. While this methodology does not account for increases in the amount of collections or in welfare cost avoidance, it does provide credit for improvements in the number of cases in which collections are made. Greater improvement in child support collection rates may be obtained if the AFDC agencies could provide better case initiation information to the child support agencies. This change could increase the number of cases with collections.

As mentioned earlier, since we do not plan to use Form OCSE–158, the accounts receivable data it contains will not be used in the calculation of the child support collection rate.

Comment: Two commenters felt it was inappropriate to link improvements in one program with recovery of disallowances in another. Since child support and AFDC are two distinct and separately run programs, the AFDC agency does not control the activities of the child support agency.

Response: Section 408 requires this linkage. In this connection, we note that, although the AFDC and child support programs are separately administered, they are linked in their mission of providing financial help to families in need. These families must cooperate with the agencies of both programs to ensure receipt of AFDC payments. Both agencies must cooperate in sharing information and support collections as required by Federal law. The AFDC

agency can only win through this cooperation. As it provides more and better case initiation information to the child support agency, more AFDC cases can be processed by the child support agency, and the result would be larger collection rates and larger reductions in any disallowance.

Comment: One commenter stated that it is inevitable that some States will be penalized because their child support collection rate will be below the national average. In addition, inconsistencies among the States in the definition of "accounts receivable" will continue to impact the national average. The commenter believed that performance should be based only on the State's current collection rate compared with the average of the State's collection rate for the three preceding rates.

Response: No State will be penalized through the child support collection rate measure; rather, States are provided an opportunity to reduce their QC disallowance. Using both the national child support collection rate and the State's performance in the preceding three fiscal years improves a State's chance of reducing any QC disallowance. The State reduces its disallowance by meeting either standard, not both. The disallowance is reduced by the larger of the amounts calculated from these two rates.

Because the statute bases the child support collection rate on cases rather than dollars, "accounts receivable" will not be a component of the calculation and will not affect the national average.

Comment: One commenter believed that collection rates cannot continue to increase indefinitely, and it is inappropriate to base a performance appraisal on the assumption that they will continue to increase. There is a false assumption that States are identical in their ability to improve and increase collections over the long term, when, in reality, there are many factors outside the control of the child support programs that affect collections.

Response: While there are factors outside the control of child support programs that affect collections, there is also a great deal of room everywhere for improvement. In 1990, the collection rate was 11.9 percent. The rate has been going up slowly but steadily since 1986 when it was 10.1 percent. We recognize that economic conditions, for example, may make it more difficult for some States to improve at a given point in time. There could be such difficulties no matter what incentive is used to improve performance and no matter how those improvements are measured. We believe, however, that performance incentives are worthwhile and continue to support them as a means of encouraging States to strive for better programs.

Disallowance Notification and Payment Schedule

Under the proposed regulations at § 205.43(f), we had specified a time frame for notification to States that are disallowance-liable. The Department's target date for notifying States with overpayment rates above the national standard of their disallowance would be within 60 calendar days after the release of the error rates for the fiscal year. As indicated earlier, the 60 days included 30 days for States to decide on the application of any underpayment adjustment to their overpayment rate.

Section 408(i)(1) of the Act requires disallowance-liable States to pay the amount of the disallowance within 45 days after the date of notification or negotiate an agreement with the Department to repay the disallowance with interest in calendar quarterly installments over a period not to exceed 30 months, beginning no later than the first calendar quarter after the receipt of notification.

Comment: Two commenters suggested that the Department make the 60 calendar days an absolute date rather than a target date.

Response: We believe that requiring an absolute date is not appropriate. The Department must maintain some flexibility in releasing the imposed disallowances. We will, however, do everything possible to meet the target date of 60 days after the release of the error rates for the fiscal year.

Comment: One commenter suggested that the repayment time frames be extended to at least six months because of time required to secure funds for the disallowance through the legislative process.

Response: The repayment time frames at § 205.43(f)(1) are specifically stated in section 408(i)(1) of the Act.

Administrative Review of Disallowances

In the regulations at § 205.43(g), we state that a State may appeal the imposition of a disallowance to the Departmental Appeals Board (DAB) in writing within 60 calendar days after the receipt of the notification of the disallowance. The Board shall not review, but incorporate by reference in its disallowance determination, the decisions on difference cases made by the Panel or the Secretary.

Comment: One commenter suggested that the language at § 205.43(g) specify that the appeal with the DAB should need only to be "registered" within 60 calendar days because it takes at least six months to prepare an appeal.

Response: The final regulations at § 205.43(g) indicate that the DAB rules at 45 CFR part 16 will apply. Specifically, § 16.7 of part 16 provides for the procedures for filing a notice of appeal.

Comment: One commenter felt that the DAB should have the right to hear information regarding the disputed decisions by the Panel, such as on policy or philosophical issues. Another commenter expressed concern that the DAB would not consider a wide range of issues in reviewing the appropriateness of disallowances when a State makes an appeal.

Response: The congressional intent and the legislation are clear concerning appealability of the Panel's decisions to the DAB. The conference report as set forth in the Congressional Record, (H. 9591), November 21, 1989, includes the following statement: "Decisions by the Quality Control Review Panel will be on the record and will not be appealable to the Departmental Appeals Board." Section 408(j)(2) of the Act states that the Board shall conduct a thorough review of the issues and take into account all relevant evidence. In rendering its final decision, the board shall incorporate by reference any findings of the Quality Control Review Panel and such findings shall not be reviewable by the board.

Comment: One commenter suggested that § 205.43 (g) and (h) of the proposed regulations be revised to state that any lowering of a State's error rate by the DAB or the Federal courts shall not result in a recalculation of the national average or in the reassessment of disallowances against States whose error rates fell below the previously calculated national average.

Response: We concur. We have included in the final regulations at § 205.43(b)(3) that the national overpayment rate shall not be changed after disallowance notification to all States. For consistency, we have included a similar provision at § 205.43(b)(6) for the national underpayment rate.

Data Analysis and Corrective Action

Information collected on individual sample cases is used to identify the types, frequency, nature, and cost of payment errors occurring in the eligibility process. This information is also used to assess the effectiveness of actions that have already been taken to correct problems. However, corrective action to eliminate the cause of errors, which is the heart of the QC system, is

dependent on a thorough statistical and program analysis by competent staff. Basic statistical analysis on the sample case data (such as tests of significance on error elements and percentage change between two sample periods) should be performed to interpret the QC results. Since the QC findings are based on a sample, the interpretation of the findings must take sampling variability into account. Furthermore, States should conduct research by using statistical methodology, such as discriminant analysis and classification, in developing the appropriate corrective action to take to reduce their erroneous payments.

The proposed regulations at § 205.40(d)(4) provided for the elimination of the annual corrective action report which documented State efforts to reduce erroneous payments. On an exception basis, however, States would be required to provide data on their corrective action activities to the Department.

Comment: The majority of commenters were in favor of elimination of the reporting requirement, the completion of which they stated reduced resources available for corrective action planning and implementation. However, several commenters objected to the proposed deletion based on the fact that, without the requirement, States may have difficulty obtaining or justifying resources for corrective action activities. They also viewed the corrective action report as a valuable vehicle for obtaining Departmental involvement and assistance in their corrective action initiatives. Additionally, a number of commenters expressed concern about how information would be requested on an exception basis.

Response: The initiation of corrective actions to reduce the incidence of erroneous payments and incorrect negative case actions is an essential element in the effective management of the AFDC program and should be an ongoing process in all States. After careful review of the comments, we have concluded that States with high error rates should be required to report their corrective action activities. These reports will assist us in monitoring State performance and provide a vehicle for determining needed assistance. Therefore, we have changed the proposed regulations at § 205.40(d)(4) to require that (a) States that exceed the national AFDC overpayment rate by one percentage point or more in any annual sample period submit a corrective action plan for reducing the level of payment errors; (b) States with error rates that exceed the national overpayment rate for two consecutive annual sample periods beginning with fiscal year 1991 submit a corrective action report for that second sample period irrespective of the one percentage point threshold; (c) States with AFDC negative case action error rates above the national average rate in any annual sample period submit a corrective action plan for reducing incidence of incorrect denials and terminations. Each required report will be submitted within 30 calendar days after the official release of the State and national applicable error rates.

Corrective Action for the Adult Assistance Programs

Guam, the Virgin Islands, and Puerto Rico continue to be required to conduct QC reviews of the Adult assistance programs under titles I, X, XIV, and XVI (AABD) of the Act and to take necessary corrective measures to reduce the incidence of improperly authorized or denied assistance. However, we will no longer require an annual corrective action plan for excessive errors in these programs. We will continue to assess and monitor the error rate performance of the Adult assistance programs and request information on corrective action activities as necessary.

Regulatory Procedures

Executive Order 12291

These regulations do not meet any of the criteria for a major regulation. Further, although Federal matching may be reduced, the reduction results from legislation and not from the terms of these regulations. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act

We have determined that there are public paperwork burdens for the collections of information required under §§ 205.40(d)(4), 205.42(d)(2)(iii), and 205.42(f). However, we have been unable to estimate the burden hours because at this point we do not know how many States will be subject to corrective action plans, major disasters, or alternative disposition plans. Nevertheless, these information collection requirements are subject to review and approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980. Comments regarding burden estimates or any other aspect of these collections of information should be sent to the Administration for Children and Families, 370 L'Enfant Promenade SW., Washington, DC 20447 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Regulatory Flexibility Act

We certify that these final regulations will not, if promulgated, have significant economic impact on a substantial number of small entities because the rules involve minor changes in State agency procedures. These regulations revise the Federal quality control system as it applies to the States' use of Federal funds in administering the AFDC and Adult assistance programs. A regulatory flexibility analysis is not required because the Federal government will only be recouping monies that were incorrectly paid by the States.

PART 205—GENERAL ADMINISTRATION—PUBLIC ASSISTANCE PROGRAMS

1. The authority citation for part 205 is revised to read as follows:

Authority: 42 U.S.C. 602, 603, 606, 608, 1302, and 1306(a).

2. Sections 205.40, 205.42 and 205.43 are revised and § 205.41 is added to read as follows:

§ 205.40 Quality control system.

(a) *Scope.* Sections 205.40 through 205.43 of this part set forth requirements—

(1) For a quality control (QC) system for the Aid to Families With Dependent Children (AFDC) program (and for the Adult assistance programs in Guam, Puerto Rico, and the Virgin Islands) designed to reduce incorrect expenditures by identifying the nature, magnitude and causes of all errors and to improve the accuracy of payments to recipients of the AFDC and Adult assistance programs;

(2) For obtaining data on the correctness of negative case actions and reducing the incidence of incorrect

denials for and terminations of assistance; and

(3) For determining the amount of any disallowance required to be repaid to the Department due to excess erroneous assistance payments made by the State under the AFDC program.

(b) *Definitions.* For purposes of §§ 205.40 through 205.43 of this part:

(1) *Assistance unit,* or *case,* means all individuals whose needs, income, and resources are considered in determining eligibility for, and the amount of, a payment for which Federal financial participation is claimed under this chapter.

(2) *Department* means the U.S. Department of Health and Human Services.

(3) *Disallowance* means the amount of reduction in Federal financial participation.

(4) *Disposed of case* means that a decision was made on the eligibility and payment status of a case under review, or that the case was dropped or listed in error.

(5) *Erroneous payments* means the sum of overpayments made to eligible assistance units and payments to ineligible assistance units.

(6) *Fiscal year,* or *annual sample period,* means the 12-month period, October 1, through September 30.

(7) *Negative case action* means an action to deny an application for assistance or to otherwise dispose of that application without a determination of eligibility (for instance, because the application was withdrawn or abandoned), or to terminate or suspend assistance.

(8) *Negative case action error* means an action to deny, terminate or suspend a case when the agency's reason for the action was determined to be incorrect or the notice and hearing requirement for the action was not met.

(9) *Overpayment* means a financial assistance payment received by or for an assistance unit for the review month, which exceeds by at least $5.00 the amount for which that unit was eligible under permissible State practice in effect on the first day of the review month.

(10) *Payment* means a single payment or multiple payments received for a specific calendar or fiscal month.

(11) *Payment to ineligibles* means a financial assistance payment received by or for an assistance unit for the review month, when that assistance unit was not eligible for any part of the payment under permissible State practice in effect on the first day of the review month, even though the State agency had not made a finding of ineligibility under § 206.10(a)(5) of this chapter.

(12) *Permissible State practice* means written rules and policies relating to eligibility and payment that are in accordance with existing, approved State plan provisions or with proposed plan amendments submitted to, but not acted upon, by the Department. In situations where written rules and policies are not consistent with the existing, approved State plan or proposed plan amendments, permissible State practice means the provisions of the State plan or proposed plan amendments. Where the plan provisions or proposed amendments do not conform to Federal law and regulations, permissible State practice means the Federal law and regulations (see also § 205.42(b)).

(13) *Quality Control Manuals* means the active or negative AFDC/Adult Quality Control Manuals that are issued by the Administration for Children and Families of the Department.

(14) *Review month,* or *sample month,* means the specific calendar or fiscal month for which the assistance payment under review is authorized or received.

(15) *Secretary* means the Secretary of Health and Human Services.

(16) *State* means the several States, the District of Columbia, Guam, Puerto Rico, the Virgin Islands and American Samoa.

(17) *Suspended case* means a formalized agency action which results in no check generated for one or more months.

(18) *Underpayment* means a financial assistance payment received by or for an assistance unit for the review month which is at least $5.00 less than the amount for which that assistance unit was eligible under permissible State practice in effect on the first day of the review month.

(c) *State plan requirements.* A State plan under title IV–A, and in Guam, Puerto Rico, and the Virgin Islands under title I, X, XIV or XVI (AABD), shall provide a continuing QC system for assuring that assistance is furnished in accordance with permissible State practice as defined in paragraph (b)(12) of this section.

(d) *Basic elements of the quality control system—*

(1) *General requirements.* The State shall operate the QC system in accordance with §§ 205.40 through 205.43 of this part, other applicable regulations of this chapter, and the implementing procedures in the active and negative QC Manuals.

(2) *Sampling requirements.* The State shall carry out sampling in accordance with the requirements specified in § 205.41 of this part, and with the implementing procedures in the active QC Manual, section 2, and in the negative QC Manual.

(3) *Review requirements.* The State shall conduct QC reviews in accordance with the requirements specified in § 205.42 of this part, and with the implementing procedures in the active QC Manual, section 3, and in the negative QC Manual.

(4) *Data management requirements.* The State shall provide the resources and methods necessary to analyze the findings of the system and shall take appropriate corrective action on the causes of improperly authorized or denied assistance. The State shall submit the following corrective action material:

(i) A corrective action plan to reduce payment errors when the State's AFDC overpayment rate, as defined at § 205.43(b)(8) of this part, exceeds the national overpayment rate, as defined at § 205.43(b)(3) of this part, by one percentage point or more for any fiscal year, or when such State rate exceeds the national overpayment rate for two consecutive fiscal years;

(ii) A corrective action plan to reduce the number of incorrect denials, terminations and suspensions when the State's AFDC negative case action error rate, as defined at § 205.43(b)(7) of this part, exceeds the national negative case action error rate, as defined at § 205.43(b)(4) of this part, for any fiscal year;

(iii) The State shall submit to the Department corrective action plan material within 30 calendar days after the official release of the appropriate State and national AFDC error rates for the fiscal year; and

(iv) Corrective action information and statistical data on reducing the incidence of improperly authorized or denied assistance in the Adult assistance programs under titles I, X, XIV, and XVI shall be submitted to the Department upon request.

§ 205.41 Sampling plan and procedures.

(a) *Purpose.* This section provides the sampling plan, sample size requirements, and procedures for the AFDC and Adult assistance programs.

(b) *Definitions.* In addition to the definitions in § 205.40(b), the following definitions apply to this section.

(1) *Completed active case review* means a case has been subject to QC review and for which a finding of correctly paid, overpaid, underpaid or ineligible has been made.

(2) *Completed negative case action review* means a negative case action

that has been subject to QC review and for which a finding that the action to deny, terminate or suspend assistance is correct or incorrect has been made.

(c) *Plan approval and submittal dates.* (1) The State shall submit to the Department for approval a QC sampling plan (or revisions to a current plan) that meets the requirements of this section at least 60 calendar days before the beginning of the annual sample period in which it is to be implemented. The State is not required to resubmit a plan which is unchanged from a previous sample period.

(2) Universe estimates (i.e., average monthly caseload and total number of negative case actions) and sample intervals for the annual period are required 30 calendar days prior to the selection of the October sample.

(3) The reliability waiver statement for AFDC active cases, as described in paragraph (d)(3)(ii) of this section, is required by the first day of the annual sample period.

(4) The monthly list of selected sample cases, computer-generated random start and seed numbers, and reserve pool cases (if applicable) are to be submitted within 10 calendar days after the date of sample selection specified in the State sampling plan.

(d) *Plan requirements.* The State shall have an approved sampling plan in effect for the full annual sample period that includes the following:

(1) *Population to be sampled;*

(2) *List(s) from which the sample is selected,* describing the following characteristics:

(i) Sources;

(ii) Components;

(iii) Accuracy and completeness of the list(s) in relation to the population of interest. The list of active cases shall be an unduplicated list of all assistance units for which either a full or partial payment was made or authorized for the review month by the end of that month. The list of negative case actions shall be a list of all completed actions taken by the State to deny, terminate or suspend financial assistance for the review month, except for those assistance units that are on the active case list for the same review month;

(iv) Form and structure of the list (e.g., all or part is automated; supplemental lists are added; code definitions are used);

(v) Frequency of updating the list or its sources;

(vi) Estimated proportion of cases for which a review may not be completed; and

(vii) Methods of deleting listed-in-error cases from the list.

(3) *Sample size* (the number to be completed). The AFDC and the Adult assistance sample sizes for the annual sample period shall be determined in accordance with the requirements in this section. The active case samples shall be based on the estimated average monthly caseload for the annual sample period. The negative case action samples shall be based on the estimated total number of negative case actions for the annual sample period.

(i) *AFDC active cases—standard sample size.* The required standard sample sizes for AFDC completed active case reviews for specified estimated average monthly caseloads shall be as follows:

Average monthly caseload (N)	Completed annual sample size (n)
60,000 and over	2,400
10,000–59,999	(1)
Under 10,000	300

[1] $n = 300 + 0.042\ (N - 10{,}000)$

(ii) *AFDC active cases—minimum sample size.* A State may choose to reduce its sample size for AFDC completed active case reviews below the standard size only before the beginning of the annual sample period. For each annual period where the State chooses to reduce its standard sample size, the State shall provide the Department with a statement (see Appendix to this section) as an addendum to the sampling plan, accepting the precision of the payment error rate produced by the reduced sample size and waiving the right to challenge the precision of the resulting AFDC (and Medicaid) error rates based on this reduction. The required minimum sample sizes for AFDC completed active case reviews for specified estimated average monthly caseloads shall be as follows:

Average monthly caseload (N)	Completed annual sample size (n)
60,000 and over	1,200
10,000–59,999	(1)
Under 10,000	300

[1] $n = 300 + 0.018\ (N - 10{,}000)$

(iii) *AFDC negative case action sample size.* The required negative case action sample sizes for AFDC completed negative case action reviews for specified estimated total number of negative case actions shall be as follows:

Total number of negative case actions (N)	Completed annual sample size (n)
180,000 and over	800
14,000–179,999	(1)
700–13,999	175
Under 700	100 or ⅛ (N), whichever is less

[1] $n = 175 + 0.00376\ (N - 14{,}000)$

(iv) *Adult active cases—standard sample size.* The standard annual sample sizes required for completed active Adult assistance case reviews shall be as follows:

Guam and the Virgin Islands	150
Puerto Rico	(1)

[1] $300 + 0.02625\ (N - 10{,}000)$ where N is the estimated average monthly caseload.

(v) *Adult active cases—minimum sample size.* The minimum annual sample sizes required for completed active Adult assistance case reviews shall be as follows:

Guam and the Virgin Islands	75
Puerto Rico	(1)

[1] $300 + 0.01125\ (N - 10{,}000)$ where N is the estimated average monthly caseload.

(vi) *Adult negative case action sample size.* The required annual sample size for completed Adult assistance negative case action reviews shall be the same as specified for AFDC negative case action cases in paragraph (d)(3)(iii) of this section.

(4) *Sample selection procedure.* The procedure for sample selection shall conform to principles of probability sampling. Approximately one-twelfth of the annual sample shall be selected each month. A separate sample shall be selected for active cases and negative case actions.

(i) The active case sample shall be selected from a list of all active cases with payments made or authorized for the review month by the end of that month.

(ii) The negative case action sample shall be selected from a combined list of denied applications and terminated and suspended cases. The list of denied applications shall consist of all actions taken to deny, or otherwise dispose of, applications during the review month. The list of terminations and suspensions shall consist of all actions in which the case first failed to appear on the regular payroll listing for the review month. Multiple actions (by the same applicant) denied in the same month are separate actions, and each shall be subject to sample selection.

(iii) States shall select their samples using the systematic random sampling

method or an alternative sampling method with equivalent precision. The alternative sampling method shall be approved by the appropriate Federal regional office before implementation, contingent on a full description of the method and documentation of an acceptable audit trail and "proof of sampling".

(5) *Option to drop or compete certain active cases.* The State shall specify in its sampling plan whether it chooses to drop or complete an active sample case for which less than six months have elapsed since it was last selected and reviewed, regardless of annual sample period. If the State chooses to drop these duplicate cases, the sampling plan shall specify the exact method by which these cases are identified and dropped.

(6) *Procedure to correct for over- or undersampling.* States shall evaluate their caseload estimates during the annual sample period to ensure that the required number of case reviews is completed. A change in the caseload estimate may require an adjustment to the sample size. Undersampling shall be corrected during the annual sampling period. Oversampling may be corrected at the State's option and, if exercised, shall be coordinated with the Federal regional office. When correcting for over- or undersampling, the State shall follow the procedures described in QC Manual, section 2.

(e) *Review of State sampling procedures.* In order for the Department to carry out its responsibilities under § 201.10 of this chapter, the State shall fully document and make available for review by the Department all sampling procedures, including construction and content of the universe and sample lists.

Appendix to § 205.41—State Reliability Waiver Statement

State Reliability Waiver Statement

I (We), _____
State Official Name(s)
the _____
Position(s)

certify that I/we have the authority to enter into binding agreements on behalf of the _____ AFDC and
State

Medicaid programs. Pursuant to 45 CFR 205.41(d)(3)(ii), I/we, acting in my/our official capacity(ies), elect on behalf of the State to exercise the option to reduce the standard AFDC–QC active sample size of ____ completed case reviews to ____ completed case reviews based on an estimated average monthly case load of _____ for the annual sample period, October 1, 19____through September 30, 19____. If the reduced sample size specified herein does not meet the required minimum sample size as determined by the actual average monthly caseload for this annual sample period pursuant to the formula specified in QC Manual, section 2, the State agrees to increase this reduced sample size to the required minimum. In so doing, I/we recognize that by electing this option the AFDC and Medicaid payment error rates based on this reduced sample size may have less precision that the error rates produced by the standard sample size. Because of this possible effect, the State waives the right to challenge the precision of the resulting AFDC error rate based on the reduced sample size. The State also waives the right to challenge the precision of the Medicaid error rate based on this reduced AFDC sample size.

§ 205.42 Case review and management requirements.

(a) *Purpose.* Except for paragraphs (g),(h) and (i) of this section, which apply only to AFDC, this section establishes the rules and procedures for the conduct of QC case reviews, completion of QC sample cases and the determination of whether an error exists in a sample case in the AFDC and Adult assistance programs.

(b) *Review basis.* The review shall be conducted against permissible State practice, except as follows:

(1)(i) Where a State plan provision(s) is approved incorrectly and is inconsistent with Federal law or regulations, the review shall be conducted against the approved State plan until either an amendment to remove the inconsistency is submitted or six months have elapsed since receipt by the State of a dated written notification from the Assistant Secretary for Children and Families, the Regional Administrator, or either's designee, of the inconsistency(ies), whichever occurs earlier. If the plan amendment is submitted within six months, the review shall be conducted against the submitted plan amendment. If the plan amendment is not approved by the Department or is not submitted within six months, sample cases selected for the review month immediately following the date that disapproval becomes final or the six-month period, whichever occurs earlier, shall be reviewed against applicable Federal law and regulations until the State has an amendment approved.

(ii) Where a State implements a pending plan amendment which is subsequently disapproved by the Department, the review shall be conducted against the pending plan amendment until disapproval becomes a final. Sample cases selected for the review month immediately following the date that disapproval becomes final shall be reviewed against the prior approved plan if it is consistent with Federal law and regulations. If the prior approved plan is inconsistent with Federal law and regulations, the review shall be conducted against applicable Federal law and regulations until the State has submitted and had approved a plan amendment. A final disapproval here, and at paragraph (b)(1)(i) of this section, means the decision issued by the Assistant Secretary for Children and Families if the State requests a hearing pursuant to part 201; otherwise a final disapproval means the decision issued by the Regional Administrator.

(iii) If it is necessary for a State to enact a law in order to remove an inconsistency, the State must submit the proposed law change for enactment no later than the next scheduled legislative session immediately following written notification, pursuant to paragraph (b)(1)(i) of this section, and shall notify the Department. The Department shall establish in writing a reasonable period of time, on a case-by-case basis, for the State to enact the law and amend its State plan. The review shall continue to be conducted against the State's current plan during this time period.

(2) Where the State makes payment in compliance with a court order, the review shall be conducted against the provisions of the court order.

(c) *Case review requirements.* (1) The State shall review all cases selected in the active and negative case samples as prescribed in § 205.41 of this part and reach a review finding as required on each case.

(2) The review shall include: an examination and analysis of the case record; the conduct of a field investigation with a face-to-face interview in all cases in the active case sample (unless paragraph (c)(3) of this section applies) and, as necessary, in the negative case action sample; the verification and documentation of all required review elements through contacts with appropriate collateral sources of information; the securing of specified primary or secondary evidence; a determination of the correctness of the eligibility and payment decisions; and, where required, transmission of the coded findings to a designated host computer.

(3) A face-to-face interview with a recipient shall not be required if the recipient lives in an isolated area not

reachable by regularly scheduled commercial air service, other public transportation, or automobile. For these cases, the State shall document why the interview cannot be held in another location convenient to both parties. The State shall also make at least one attempt to contact the recipient to obtain statements regarding factors of eligibility and payment. If a case is exempted from a face-to-face interview under this section, the QC review shall be completed through the case file information and collateral contacts as provided by QC policy and procedures. Exceptions to the face-to-face interview requirements shall be determined on a case-by-case basis.

(4) The State shall use the forms and schedules set forth in the QC Manuals and otherwise prescribed by the department to document all review findings. The State may substitute their own forms and review schedules if approved by the Department in advance.

(d) *Special provisions applicable to error determination.* The following provisions modify what constitutes a payment error under permissible State practice.

(1) *Changes in circumstances.* For purposes of this paragraph (d), a change in circumstances means a change occurring after the date of authorization of the initial payment which may affect the assistance unit's eligibility or payment amount. Multiple changes in circumstances shall be evaluated individually to assess their impact on the final payment error determination. A change in policy or the issuance of a hearing decision shall be considered a change in circumstances.

(i) A change in circumstances shall not be counted as a payment error if the change occurred in the review month or the month immediately preceding the review month, or if the review month's payment continues unadjusted because a hearing was requested.

(ii) A change in circumstances shall be counted as a payment error if the change was incorrectly reflected in the review month's payment, or if the change occurred in or before the second prior month to the review month and was not reflected in the review month's payment.

(2) *Other types of payment error not to be counted. The following types of payment error shall not be counted as errors.*

(i) Payment errors which result solely from failure on the part of the State to properly implement changes in Federal law or regulation for a period of six months after the effective date of the Federal legislation or implementing regulations, whichever is later;

(ii) Payment errors which result solely from a State's reliance on, and correct use of, incorrect written factual information provided by the Department about matters of fact or from incorrect written statements of Federal policy by Department officials. "Written factual information" means hard copy documentation, such as a signed statement, a computer printout or data tape, and reports of specific data provided by the Department about a given individual (e.g., social security data). "Departmental officials" means the Assistant Secretary for Children and Families (ACF), the ACF Regional Administrator, the ACF Assistant Regional Administrator for AFDC programs, or the Director of the Office of Family Assistance.

(iii) Payment errors which result from a declaration by the President or the State Governor of a state of emergency or major disaster and which directly affects the State's ability to make correct payments, if adequate documentation of the event and its impact are provided. The information shall include: a copy of the declaration; a detailed explanation of the circumstances; identification of the affected jurisdictions; and the reason(s) why the State's ability to make correct payments has been or will be impaired;

(iv) Payment errors which result solely from failure of the assistance unit to submit a monthly report;

(v) Payment errors which result when a recipient—

(A) Does not have a social security number, but has filed an application (as defined by the Social Security Administration) for a number within 30 calendar days after the date of application for assistance, or

(B) Does not furnish a social security number upon receipt but has furnished a social security number through the Enumeration at Birth (EAB) project by the next redetermination of eligibility or with six months after the receipt of the social security number, whichever occurs earlier; and

(vi) Payment errors which are inconsistent with fair hearing decisions under § 205.10 of this part when the hearing decision meets the following criteria:

(A) The decision is based only on the case circumstances that existed as of the QC review month;

(B) The State defended the adverse action during the hearing process; and

(C) The request for adjustment is made within eleven months after the end of the annual sample period to which the adjustment would apply, or the date of the last appeal decision by the Quality Control Review Panel, whichever occurs later.

(e) *Sample disposition and data submission time frames.* (1) The State shall input review findings for disposed of active sample cases into the computer terminal provided by the Federal government and transmit the edited data to a designated host computer. For States that cannot transmit the data due to lack of equipment or a telecommunication linkage, the State shall submit the review findings in a format specified by the Department. The State shall submit the review findings for disposed of negative sample cases also in a format specified by the Department.

(i) Review findings of both active and negative case samples shall be disposed of and submitted in accordance with the following time frames:

(A) Seventy-five percent or all but 5 cases of the cases selected in both the active and negative case samples each month, within 75 calendar days after the end of each sample month;

(B) Ninety-five percent or all but five cases of the cases selected in both the active and negative case samples each month, within 95 calendar days after the end of each sample month; and

(C) One hundred percent of the cases selected in both the active and negative case samples each month, within 120 calendar days after the end of each sample month;

(ii) If the State does not submit 100 percent of the review findings of the case selected in the active case sample each month within 120 calendar days after the end of the sample month, and the Department finds there is insufficient justification for the delay, the Department may initiate action to establish the State's error rate under the procedures specified in paragraph (h) of this section.

(2) The State shall submit the review findings for disposed of sample cases promptly (i.e., at least on a monthly basis).

(f) *Alternate disposition plan.* (1) The State may submit an alternate disposition plans for the Department's approval if the State is unable to meet the requirements of paragraph (e)(1)(i) of this section, either as a result of circumstances of a permanent or recurring nature, or as a result of the occurrence of an unforeseen event during the annual sample period. Until the Department approves the alternate disposition plan, the State shall continue to comply with the requirements in paragraph (e)(1)(i) of this section. The alternate disposition plan may be approved when:

(i)(A) The State's sample population is dispersed over such great distances that conducting the number of field interviews needed to meet the requirements of paragraph (e)(1)(i) is cost prohibitive; or

(B) The State's usual weather conditions or geography make significant numbers of the sample population inaccessible or difficult to contact during certain times of the year, making it a hardship for the State to comply with the requirements of paragraph (e)(1)(i);

(ii) The State's request contains evidence and data to justify the need for an alternate disposition plan, including a description of the State's population dispersal or inaccessibility, and the reason(s) why the State cannot comply with the requirements in paragraph (e)(1)(i) of this section;

(iii) The request contains detail on the State's proposed disposition schedule for sample cases, including the annual sample period(s) to be covered, the revised disposition dates and percentages, and the revised schedule for the transmission of the edited review findings of the sample cases; and

(iv) The request is submitted at least 60 calendar days before the beginning of the first annual sample period covered by the alternate disposition plan.

(2) The Department may approve a temporary alternate disposition plan for a particular annual sample period based on unforeseen events and allow the State to submit the edited review findings of its sample cases at later dates than those specified in paragraph (e)(1) of this section, when:

(i) Unforeseen events (e.g., floods, earthquakes, computer breakdowns, snow-storms and labor disputes) occur which prevent the State temporarily from meeting the requirements in paragraph (e) of this section; and

(ii) The request contains a description of the circumstances of the unforeseen event, the period to be covered by the alternate disposition plan, the revised disposition dates and percentages, and the revised schedule for the transmission of the edited review findings of the sample cases.

(g) *Federal re-review of State sample cases.* As part of the Federal monitoring of State QC programs, the Department conducts a re-review of a subsample of each State's AFDC active case sample.

(1) The State shall provide the original or legible copies of the case record and State QC file for each subsample case, by mail or delivery service, within 10 calendar days after the State's receipt of a request for such information.

(2) The information provided shall include records relating to public assistance, recipients and third parties, including information available under § 205.55 of this part.

(3) The Department may grant exceptions to these requirements in unusual circumstances.

(4) The Department shall conduct reviews of a subsample of the State's completed active AFDC sample cases and, as necessary, of the State's negative case actions and shall dispose of and report subsample findings in accordance with the following time frames:

(i) Seventy-five percent of the subsampled cases selected each month within 75 calendar days after the end of the month in which they are selected;

(ii) Ninety-five percent of the subsampled cases selected each month within 95 calendar days after the end of the month in which they are selected; and

(iii) One hundred percent of the subsampled cases selected each month within 120 calendar days after the end of the month in which they are selected.

(h) *Effects of failure to complete the sample.* This paragraph provides the procedures that the Department shall follow if a State fails to complete a valid and reliable AFDC active case sample in accordance with prescribed QC procedures and deadlines which include obtaining and using information available under § 205.55 of this part.

(1) The Department shall notify the State of its failure to complete its sample and provide the State the opportunity to negotiate a solution for the completion of the sample.

(2) When a State is unable to negotiate a solution or fails to carry out a negotiated solution, the Department shall, directly or through contractual or other such arrangement as appropriate, conduct the review and establish the fiscal year error rate for the State on the basis of the best data reasonably available to the Department, in accordance with statistical methods that would apply if the reviews were completed by the State.

(3) Notwithstanding any other provision of this chapter, total payments to a State under section 403(a)(3)(D) of the Act for the proper and efficient administration of the State plan shall be reduced by the costs incurred by the Federal government to complete the State's sample.

(i) *Differnce resolution process.* A "difference" is a disagreement between State and Federal review findings that affect the State's official AFDC payment error rate (i.e., a difference between a State review and a Federal re-review finding of a correct payment, overpayment, underpayment, or a payment to an ineligible case, or a Federal finding that the sample case should be dropped from the QC review). The process for resolving the difference shall be as follows:

(1) The State shall be notified in writing of the disagreement and afforded an opportunity to request a review of the difference by the ACF Regional Administrator.

(2) The State shall respond to the difference notification within 30 calendar days after receipt of such notification agreeing, or indicating reasons for disagreeing, with the Federal finding. Responses postmarked, otherwise officially dated, or delivered by the 30th calendar day after the date of the receipt of the difference letter shall have met the deadline. If the deadline is a Saturday, Sunday, legal holiday, or an office closing, the deadline shall be extended to the next business day. If the State fails to respond within the 30-day deadline, the Federal finding shall be the final decision of the Department.

(3) The Regional Administrator shall respond to the State within 21 calendar days of receipt of the review request. The response shall either be a decision on the State's request, or an indication that the decision will be delayed pending further review of applicable laws, regulations, or policies.

(4) If the State disagrees with the Regional Administrator's decision, it may seek review with the Quality Control Review panel. The appeal request shall be postmarked, otherwise officially dated, or delivered to the Panel by the 30th calendar day after the receipt of the Regional Administrator's decision; otherwise the Regional Administrator's decision shall be the final decision of the Department. If the deadline is a Saturday, Sunday, legal holiday, or an office closing, the deadline shall be extended to the next business day. The State shall forward an informational copy of its appeal request to the Department's regional office concurrent with submittal of its request to the Review Panel. The State may submit to the Panel any documentation appropriate to substantiate its position as part of its appeal request. Extensions may be granted by Panel for a State to submit documentation in support of its appeal where good cause is shown.

(5) The Panel shall evaluate all of the pertinent evidence submitted and shall notify the State of its decision (within a target date of 45 calendar days following the completion of the record as determined by the Panel). Unless the Secretary chooses to review an

individual difference case, the decision of the Panel with respect to that case shall constitute the decision of the Secretary for establishing a State's payment error rate for the fiscal years.

§ 205.43 Determination of payment error rates and disallowances of Federal financial participation for erroneous payments.

(a) *Purpose.* This section sets forth the rules and procedures for calculating State AFDC error rates and for disallowing Federal financial participation (FFP) to the States with erroneous payments in excess of the national standard for a fiscal year.

(b) *Definitions.* In addition to the definitions in §§ 205.40(b) and 205.41(b) of this part, the following definitions apply to this section.

(1) *Child support collection rate* means the ratio of—

(i) The sum of the number of AFDC cases reported by the State IV–D agency for each quarter in the fiscal year for which an assignment under section 402(a)(26) of the Act and a collection were made, to

(ii) The sum of the number of AFDC cases with such assignments reported by the State IV–D agency for each quarter in the fiscal year.

(2) *National child support collection rate* for a fiscal year means the ratio of the sum of the number of cases (excluding AFDC "arrears-only" cases) described in paragraph (b)(1)(ii) of this section reported by all States for quarters in the fiscal year, to the sum of the number of cases described in paragraph (b)(1)(ii) of this section reported by all States for quarters in the fiscal year.

(3) *National overpayment rate* means the ratio of the total amount of erroneous assistance payments made by all States to the total amount of assistance paid by all States for the fiscal year. (This figure is equivalent to the ratio of the average monthly erroneous assistance payment per case for all States to the average monthly assistance payment per case for all States.) The rate shall be computed as the sum, over all States, of the product of each State's regressed overpayment rate and total amount of assistance payments divided by the sum of the total amount of assistance payments of all States for the fiscal year. The rate shall not be changed after disallowance notification to all States.

(4) *National negative case action error rate* means the ratio of the total number of incorrect negative case actions taken by all States for the fiscal year, to the total number of negative case actions taken by all States for the fiscal year, to the total number of negative case actions taken.

(5) *National standard* means the national overpayment rate for the fiscal year or four percent, whichever is larger.

(6) *National underpayment rate* means the ratio of the total amount of assistance that should have been but was erroneously not paid for the fiscal year, to the total amount of assistance paid by all States. (This figure is equivalent to the ratio of the average monthly amount of assistance payment per case for all states that should have been but erroneously was not made, to the average monthly assistance payment per case for all States.) The rate shall be computed as the sum, over all States, of the product of each State's regressed underpayment rate and total amount of assistance payments divided by the sum of the total amount of assistance payments of all States for the fiscal year. The rate shall not be changed after disallowance notification to all States.

(7) *Negative case action error rate* means the ratio of the total number of incorrect negative case actions taken by a State for the fiscal year, to the total number of negative case actions taken.

(8) *Overpayment rate* means the ratio of the total amount of erroneous assistance payments made by a State for the fiscal year, to the total amount of assistance payments made. (This figure is equivalent to the ratio of the average monthly erroneous assistance payment per case to the average monthly assistance payment per case in a State for the fiscal year.) The rate shall be computed as the ratio of the State's regressed average monthly erroneous assistance payment per case to the State's average monthly assistance payment per case for the fiscal year. (For States that use disproportionate stratified sampling, the procedure shall be the same as the procedure in paragraph (b)(3) of this section, except "stratum" shall be substituted for "State".)

(9) *Underpayment rate* means the ratio of the total amount of assistance payments that should have been but erroneously was not made by a State for the fiscal year, to the total amount of assistance payments made. (This figure is equivalent to the ratio of the average monthly assistance payment per case that should have been but erroneously was not made by a State to the State's average monthly assistance payment per case for the fiscal year.) The rate shall be computed as the ratio of the regressed average monthly assistance payment per case that should have been but erroneously was not made by a State to the State's average monthly assistance payment per case for the fiscal year. (For States that use disproportionate stratified sampling, the procedure shall be the same as the procedure in paragraph (b)(5) of this section, except "stratum" shall be substituted for "State".)

(c) *General.* All error rates for a State shall be based on a double sampling methodology which includes a statistically valid State sample of cases selected each month during the fiscal year, followed by a statistically valid Federal subsample of cases selected from the State completed samples. The State error rate shall be the point estimate of the regression estimator as set forth in the QC Manual, section 2.

(d) *Error rate notification.* The target date for the Department to notify each State of its overpayment and underpayment rates and the national overpayment and underpayment rates shall be one year after the end of the annual sample period or within 30 calendar days of the resolution by the Quality Control Review Panel of all differences, pursuant to § 205.42(i)(5) of this part, whichever is later.

(e) *Determination of disallowances in Federal matching funds.* If a State's overpayment rate for a fiscal year exceeds the national standard, Federal matching funds to the State shall be reduced. The procedure for determining the disallowance for a fiscal year shall be as follows:

(1) *State adjusted overpayment rate.* A State with an underpayment rate below the national underpayment rate in a fiscal year shall have its overpayment rate reduced by the amount by which the national underpayment rate exceeds the State's underpayment rate.

(i) A State shall use the underpayment reduction earned in a fiscal year one time only, either in the year in which it was earned, or in one of the following two years. Only one underpayment reduction shall be applied in any one year. A reduction earned in one year shall not be used to reduce an overpayment rate of a prior year.

Example: The State was disallowance-liable in 1992 and 1993 and had earned reductions for low underpayments in 1991, 1992 and 1993. The State can apply either the 1991 or 1992 reduction to the 1992 overpayment rate. If the 1991 reduction is applied to the 1992 error rate, the State can then apply either the 1992 or 1993 reduction to the 1993 error rate. If, in 1992, the State applied the 1992 reduction, then either the 1991 or the 1993 reduction can be applied to the 1993 error rate. If, in 1993, however, the State applied the 1993 reduction, then the 1991 reduction can no longer be used since it was not used in the year it was earned or one of the following two years.

(ii) At the request of a State, the Department shall apply the reduction,

described in paragraph (e)(1)(i), in determining the State's overpayment rate for either of the two following years instead of in determining the State's error rate for the fiscal year to which the reduction would otherwise apply. The request shall be made in writing within 30 calendar days from the date of receipt of the notification described in paragraph (d) of this section.

(2) *Basic disallowance amount.* If a State's overpayment rate for a fiscal year, adjusted as described in paragraph (e)(1) of this section, exceeds the national standard for the fiscal year, the amount of the basic disallowance shall be the product of—

(i) The Federal share of the State's total AFDC payments for the fiscal year;

(ii) The difference between the State's adjusted overpayment rate and the national standard for the fiscal year; and

(iii) The ratio of the amount obtained in paragraph (e)(2)(ii) of this section to the national standard, or "1", whichever is smaller.

(3) *Reduction of the basic disallowance amount for overpayment recoveries.* A State's basic disallowance amount for a fiscal year shall be reduced to reflect AFDC overpayment recoveries by the State. The amount of the reduction shall be the product of—

(i) The Federal share of payments recovered in the fiscal year; and

(ii) The ratio of the amount obtained in paragraph (e)(2)(ii) of this section, to the State's adjusted overpayment rate.

(4) *Reduction for improvement in child support collections.* If a State's child support collection rate is greater than the national child support collection rate for the fiscal year, or is greater than the average of the State's child support collection rates for the three preceding fiscal years, the State's disallowance amount shall be further reduced. The amount of the reduction shall be the product of—

(i) The amount of the basic disallowance calculated in paragraph (e)(2) minus the amount of the reduction calculated in paragraph (e)(3) of this section, and

(ii) The larger of—

(A) The ratio of the difference between the State and the national child support collection rate, to the national child support collection rate for the fiscal year; or

(B) The ratio of the difference between the State's child support collection rate for the fiscal year and the State's average child support collection rate for the preceding three fiscal years, to the State's average child support collection rat for the preceding three fiscal years.

(5) *Final disallowance amount.* The amount of disallowance imposed on the State by the Secretary shall be the amount of the disallowance calculated in paragraph (e)(2) of this selection minus the sum of the amounts of reductions calculated in paragraphs (e)(3) and (e)(4) of this section.

Example: All references are to paragraph (e) of this section.

Fiscal year	State	National
Overpayment rate	8.0%	6.0%.
Underpayment rate.	2.8%	3.0%.
Federal share of—.		
Total AFDC payments.	$5,000,000	Not applicable.
Total AFDC overpayment recoveries.	$5,000	Do.
AFDC child support collection rate.	16.0%	12.0%.
Average AFDC child support collection rate for preceding 3 years.	14.04%	Not applicable.

Calculation

1. State adjusted overpayment rate, paragraph—
   (e)(1)—8.0–(3.0–2.8)=7.8%
2. Basic disallowance amount, paragraph—
   (e)(2)(i)—$5,000,000
   (e)(2)(ii)—7.8–6.0=1.8%
   (e)(2)(iii)—1.8/6.0=0.30
   Amount=$5,000,000×1.8%×0.30=$27,000
3. Reduction for overpayment recoveries, paragraph—
   (e)(3)(i)—$5,000
   (e)(3)(ii)—1.8/7.8=0.231
   Amount=$5,000×0.231=$1,155
4. Reduction for improvement in child support collections, paragraph—
   (e)(4)(i)—$27,000–$1,155=$25,845
   (e)(4)(ii)(A)—(16.0–12.0)12.0=0.333
   (e)(4)(ii)(B)—(16.0–14.0)/14.0=0.143
   Since 0.333 is larger than 0.143, then the —
   Amount=$25,845×0.333=$8,606
5. Final disallowance, pragraph—
   (e)(5)=$27,000—($1,155+$8,606)=$17,239

(f) *Disallowance notification and payment schedule.* The Department shall notify the States with overpayment rates about the national standard of their imposed disallowances, with a target date of 60 calendar days after the release of the error rates for the fiscal year.

(1) A State subject to a disallowance shall pay the amount of its disallowance within 45 calendar days after the date of receipt of the notification, or negotiate an agreement with the Department to repay the disallowance with interest in calendar quarterly installments over a period not to exceed 30 months beginning not later than the first calendar quarter after the date of the receipt of the notification.

(2) If a State fails to pay the amount of the imposed disallowance as specified in paragraph (f)(1) of this section, the Department shall reduce the Federal matching funds otherwise payable to the State under the Social Security Act by amounts sufficient to recover the amount of disallowance with interest.

(3) Interest on the unpaid amount of the State's disallowance shall accrue at the overpayment rate pursuant to section 408(i)(3)(A) of the Act beginning 45 calendar days after the date the State receives notice of the disallowance. If a subsequent appeal by the State is decided in the State's favor, the Department shall repay to the State all payments made, with interest from the date payment is received at the same accrued rate applicable to unpaid disallowances.

(g) *Administrative review of disallowances.* A State may appeal the imposition of the disallowance to the Departmental Appeals Board in writing within 60 calendar days after the receipt of the notification described in paragraph (f) of this section. The Board shall consider the State's appeal in accordance with 45 CFR Part 16.

(1) The Board shall not review the decisions on difference cases made by the Panel or the Secretary but shall incorporate them by reference in its disallowance determination.

(2) If the Board does not decide an appeal within 90 calendar days after the date on the State's notice of appeal, interest on the unpaid disallowance amount shall be suspended beginning with the 90th calendar day and ending on the date of the Board's final decision, except to the extent that the Board finds that the State caused or requested the delay.

(h) *Judicial review of disallowances.* A State may appeal a decision by the Department Appeals Board, including a decision incorporated by the Board on a difference case, to the Federal district court within 90 calendar days after the date of the decision by the Board. Court review shall be on the record established in the Departmental Appeals Board review and shall be in accordance with the standards of review prescribed by title 5 U.S.C. 706(2), subparagraphs (A) through (E).

§ 205.44 [Removed and reserved]

3. Section 205.44 is removed and reserved.

BILLING CODE 4150–04–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 91-103; RM-7466, RM-7471, RM-7474, RM-7750]

Radio Broadcasting Services; Rochester, Minnesota, Clear Lake, Osage and St. Ansgar, IA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel *225A for Channel 203 at Rochester, Minnesota, reserves the channel for noncommercial educational use and modifies the construction permit for Station KFSI-FM accordingly, in response to a petition filed by Faith Sound, Inc. See 56 FR 18557, April 23, 1991. The coordinates for Channel *225A are 44-01-30 and 92-31-30. In response to a counterproposal filed by Mitchell County Broadcasting Company, we shall allot Channel 238A to St. Ansgar, Iowa, without a site restriction at coordinates 43-22-48 and 92-55-18. The petition filed by Jay Leilman (RM-7471) to allot Channel 225A to Rochester as the community's fifth FM broadcast service is denied. The petition filed by Mad Hatter Broadcasting, Inc., to substitute Channel 279C3 for Channel 276A at Clear Lake, Iowa, and to substitute Channel 225A for Channel 279A at Osage, Iowa, was withdrawn. With this action, this proceeding is terminated.

EFFECTIVE DATE: November 16, 1992. The window period for filing applications for Channel 238A at St. Ansgar, Iowa, will open on November 17, 1992, and close on December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 91-103, adopted September 11, 1992, and released October 5, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, 1990 M Street, NW., suite 640, Washington, DC 20036, (202) 452-1422.

[MM Docket No. 92-139; RM-8000]

Radio Broadcasting Services; Rogers City, MI

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The document allots Channel 260C2 to Rogers City, Michigan, as that community's second FM broadcast service in response to a petition filed by Ives Broadcasting Company. See 57 FR 29855, July 7, 1992. The coordinates for Channel 260C2 are 45-25-17 and 83-49-06. Canadian concurrence has been received for this allotment. With this action, this proceeding is terminated.

EFFECTIVE DATE: November 19, 1992. The window period for filing applications for channel 260C2 at Rogers City will open on November 20, 1992, and close on December 21, 1992.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

Radio Broadcasting Services; Atlantic, Atlantic Beach, Clinton, Englehard, Hatteras, and St. Pauls, NC

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Down East Radio, substitutes Channel 297C3 for Channel 297A at Atlantic and modifies Station WTKF's construction permit to specify operation on the higher class channel. At the request of Carolina Media Group, Inc. and WMXS, Inc., Channel 229A is substituted for Channel 297A at St. Pauls, North Carolina. At the request of WMXS, Inc., Channel 297C3 is substituted for Channel 297A at Clinton, North Carolina, and Station WMXS' license is modified to specify operation on the higher class channel. At the request of Robert L. Purcell, the Commission dismisses his request to allot Channel 297C1 to Atlantic Beach, North Carolina. *See* 56 Fed. Reg. 65875, December 19, 1991, and Supplementary Information, *infra*. With this action, this proceeding is terminated.

EFFECTIVE DATE: November 19, 1992.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 91-358, adopted September 11, 1992, and released October 5, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 23), 1919 M Street, NW., Washington, DC. The complete text of this decision may also

be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1990 M Street, NW., suite 640, Washington, DC 20036.

Channel 297C3 can be allotted to Atlantic in compliance with the Commission's minimum distance separation requirements with a site restriction of 15.2 kilometers (9.4 miles) west to accommodate Down East's desired transmitter site, at coordinates North Latitude 34–53–01 and West Longitude 76–30–21. Channel 297C3 can be allotted to Clinton with a site restriction of 13 kilometers (8.1 miles) west to accommodate WMXS' desired transmitter site, at coordinates 35–02–22; 78–27–32. Channel 299A can be allotted to St. Pauls with a site restriction of 9.3 kilometers (5.7 miles) west to avoid a short-spacing to Station WNCT–FM, Channel 300C, Greenville, North Carolina, at coordinates 34–48–20; 79–04–22.

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 665

[Docket No. 89–B]

RIN 2132–AA30

Bus Testing Program; Delay In Application For Small Vehicles

AGENCY: Federal Transit Administration, DOT.

ACTION: Interim final rule.

SUMMARY: On July 28, 1992, the Federal Transit Administration published an interim final rule on its bus testing program. Among other things, the rule added two new vehicle types (small vehicles with service lives of 4 and 5 years) to the vehicles subject to testing at the FTA sponsored testing facility. Today's document postpones the application of the July 28, 1992 interim final rule for these vehicle types, based on new information available to the agency. This additional time is need for the Federal Transit Administration to determine what, if any, changes need to be made to the rule to accommodate this information.

DATES: Effective Date: October 13, 1992.

Comment due date: Comments must be submitted by December 14, 1992.

FOR FURTHER INFORMATION CONTACT: For technical issues, Steven A. Barsony, Director, Office of Engineering Evaluations, Office of Technical Assistance and Safety, (202) 366–0090; for legal issues, Richard Wong, Office of the Chief Counsel, (202) 366–1936. The test faculty can be reached by contacting Bohdan Kulakowski, Director, Bus Research and Testing Program, Pennsylvania Transportation Institute, Penn State, (814) 863–1893.

SUPPLEMENTARY INFORMATION:

I. This Rule

The Surface Transportation and Uniform Relocation Assistance Act of 1987 required the Federal Transit Administration to establish a bus testing facility, for testing a model of any new bus model purchased with FTA financial participation. The agency issued its first interim final rule implementing this program in 1989, and announced that it would phase-in the program—applying the testing requirements to different size vehicles over a multi-year period.

On July 28, 1992, FTA issued its third interim final rule applying the testing requirements to two final two categories of vehicles (small vehicles, with service lives of 4–5 years). These vehicles are defined in the rule at § 665.11 as:

(a) Minimum service life of five years or 150,000 miles—typified by light duty mid-size buses, approximately 25–35 foot.

(b) Minimum service life of four years or 100,000 miles—typified by light duty small buses, cutaways, and modified vans, approximately 16–28 foot.

The July 28, 1992, interim final rule states that the effective date for these vehicle types was August 27, 1992, and keys the effective date to advertisements for bids or requests for proposal for new model buses that are issued on or after that date.

Since publishing this interim final rule, however, the agency has become aware that there has been a recent, major change in the configuration of the chassis of a standard vehicle, which increases significantly the number of vehicle models in these two categories to be tested. This new information changes the government's estimate of the vehicles affected by the phase-in of these categories.

Therefore, the agency is postponing the application of the July 28, 1992 interim final rule for these two categories for 120 days. During this time the agency will be able to gather and analyze the information needed to phase-in the testing of these vehicle models without causing undue economic hardship in the affected industry.

The agency emphasizes that this delay in application applies only to these two new categories and does not affect the other changes announced in the July 28, 1992, interim final rule or other rule provisions already in effect.

Finally, the FTA's July 28, 1992, interim final rule provided that comments on it would be accepted until September 28, 1992. Because of this postponement of the application of a portion of that rule, the agency is extending the due date for comments on the entire interim final rule until December 14, 1992.

II. Regulatory Matters

This rule is not a major rule under Executive Order 12291. However, it is a significant rule, because it is related to a significant rule under the Department's Regulatory Policies and Procedures. The extension of time to comply, the primary focus of today's document, imposes no costs on the affected public. In fact, the deferral will delay costs to vehicle manufacturers for the period of the extension. Since the economic impact is minimal, a regulatory evaluation has not been prepared. There are no Federalism effects sufficient to warrant the preparation of a Federalism assessment. The FTA certifies that this rule will not

have a significant economic impact on a substantial number of small entities.

List of Subjects in 49 CFR Part 665

Vehicle testing, Grant programs—transportation, Mass transportation.

Accordingly for the reasons described in the Preamble, part 665 is amended as set forth below:

PART 665—BUS TESTING

1. The authority citation for 49 CFR part 665 continues to read as follows:

Authority: 49 U.S.C. App. 1601 et seq., 1608(h); 49 CFR 1.51.

2. Paragraph (d) of § 665.3 is revised as set forth below.

§ 665.3 Scope.

* * * * *

(d) The provisions in §§ 665.11(e)(4) and (5) concerning the last two categories of buses which must be tested, apply to advertisements for bids or requests for proposals for buses issued on or after February 10, 1993.

Issued: October 5, 1992.

Roland J. Mross,

Deputy Administrator.

BILLING CODE 4910-57-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 217, 222 and 227

[Docket No. 921054-2254]

Sea Turtle Conservation; Restrictions Applicable to Fishery Activities

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Establishment of a temporary observer requirement in the shark gillnet fishery and request for comments.

SUMMARY: NMFS notifies owners and operators of vessels conducting shark gillnet fishing from North Carolina through Florida that, for the next 30 days, they, upon request, must carry a NMFS-approved observer aboard such vessel(s). This action is necessary to monitor the taking of threatened and endangered sea turtles. Unusually high strandings of turtles on Georgia beaches may be attributable to shark gillnet fishing off Georgia and justify the imposition of this requirement. NMFS may extend this requirement beyond 30 days and/or impose additional temporary sea turtles conservation measures on the shark gillnet fishery as necessary to adequately protect sea turtles.

DATES: This action is effective from October 7, 1992 through November 5, 1992. Comments on this action must be submitted by November 5, 1992.

ADDRESSES: Requests for a copy of the environmental assessment for this action and comments on this action should be addressed to Dr. Nancy Foster, Director, Office of Protected Resources, NMFS, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Phil Williams, NMFS National Sea Turtle Coordinator (301/713-2319) or Charles A. Oravetz, Chief, Protected Species Program, NMFS, Southeast Region (813/893-3366).

SUPPLEMENTARY INFORMATION:

Background

All sea turtles that occur in U.S. waters are listed as either endangered or threatened under the Endangered Species Act of 1973, U.S.C. 1531 *et seq.* (ESA). Incidental capture by shrimp trawlers has been documented for five species of sea turtles that occur in U.S. coastal waters. Sea turtle take by other types of fishing gear has also been documented, but the amount and extent of impact to turtles by such gear types is unknown. Gillnets of different sizes have been reported to take sea turtles; for example, gillnets have been reported to take loggerhead turtles in South Carolina sturgeon fisheries, and green turtles in southern Florida. In fact, gillnets were the preferred means of capturing turtles when turtle fisheries were allowed in U.S. waters. NMFS recently issued an advance notice of proposed rulemaking (FR 57 30709, July 10, 1992) that requested comments on the need to impose monitoring requirements and/or conservation measures on non-shrimp trawl fisheries that may adversely affect sea turtles.

Recent Events

In July 1992, the shark gillnet fishery came under suspicion of taking sea turtles when over 20 loggerhead turtles stranded on Cumberland Island, Georgia, during a 10-day period. Three shark gillnet vessels were reportedly fishing off Cumberland Island during this time period. In response to this stranding event, NMFS law enforcement efforts were increased and a number of shrimp trawlers were boarded to determine whether these strandings could be attributed to a lack of compliance by shrimp trawlers with the sea turtle conservation regulations. These boardings indicated that overall the shrimp trawlers were complying with the sea turtle conservation regulations. By August 1992, the number of strandings declined significantly. Coincidentally, the three shark gillnet vessels has moved north.

During the period of September 5-7, 1992, a total of seven turtles stranded on Cumberland Island. These strandings coincided with the return of shark gillnet vessels into waters off southern Georgia. A number of tarpon and other large fish stranded at the same time, suggesting that they may have been killed by the same gear as the turtles. Tarpon and large fish are seldom taken by shrimp trawlers, but are commonly taken as bycatch in gillnets.

NMFS has received a number of complaints from private individuals and the Georgia Department of Natural Resources (DNR) suggesting that shark gillnet vessels are responsible for the recent large number of turtle strandings off Georgia. On September 9, 1992, the Georgia DNR formally requested that NMFS take regulatory action to require that shark gillnet vessels fishing in Federal waters off Georgia's coast carry observers.

Vessels in the shark gillnet fishery use gillnets up to 1.5 miles (2.4 km) in length, usually consisting of 10-inch (25.4 cm) stretched mesh net, averaging about 40 meshes deep. Sets are generally made at night with vessels leaving port in the afternoon and returning the following morning. All fishing reporting occurs outside of state waters in the U.S. exclusive economic zone.

Sea Turtle Conservation Measures

Based on the information presented and evidence indicating that the shark gillnet fishery may be taking endangered and threatened sea turtles, the Assistant Administrator for Fisheries, NOAA, (Assistant Administrator) has determined that immediate action is necessary to conserve sea turtles pursuant to interim final regulations effective on September 1, 1992, (57 FR 40861, September 8, 1992), codified at 50 CFR 227.72(e)(6)(ii). The Assistant Administrator has determined that incidental takings of sea turtles during shark gillnet fishing are unauthorized unless these takings are consistent with the applicable biological opinions and associated incidental take statements. A biological opinion on the entire shark fishery, including a variety of gear types, was completed on September 23, 1991; that incidental take statement allows for the documented take by injury or mortality of two Kemp's ridley, or two hawksbill, or four green, or four leatherback, or ten loggerhead turtles. The reasonable and prudent measures

necessary to minimize the impacts of the shark fishery on sea turtles include implementation of observer programs to document incidental capture, injury, and mortality, with emphasis on monitoring of the gillnet fishery for sharks. A biological opinion on this action analyzed the impact of the shark gillnet fishery on threatened and endangered sea turtles. That opinion reemphasized the need for an observer program to determine the impact of the shark gillnet fishery on listed species; the incidental take statement issued with that opinion allows for the documented take by injury or mortality of: one Kemp's ridley, or one green, or one hawksbill, or one leatherback turtle, or two loggerhead turtles.

Requirements

The definitions in 50 CFR 217.12, as revised by the interim final regulations (57 FR 40881, September 8, 1992), are applicable to this action, as well as all relevant provisions in 50 CFR parts 217, 222, and 227. For example, under 50 CFR 227.71(b)(1) it is unlawful to own, operate, or be on board a vessel, except if that vessel is in compliance with all applicable provisions of § 227.72(e); more specifically, § 227.71(b)(3) states that it is unlawful to fish for or possess fish or wildlife contrary to a restriction specified or issued under § 227.72(e)(6).

The term "shark gillnet restricted area" means all inshore and offshore waters of the Atlantic area. This includes waters south of 36°33'00.8" N. latitude (North Carolina/Virginia border), but does not include waters of the Gulf area or Southwest Florida area. A "shark gillnet vessel" means any vessel fishing with gillnet gear that targets or is capable of taking shark, or any vessel possessing shark that has gillnet gear on board. "Fishing" or "to fish" has the meaning specified under 50 CFR 217.12 and includes operations in support of or in preparation for the catching of fish, including having gillnet gear on board a vessel (unless that gear is stowed below deck or covered so that it is in a condition that makes it unavailable for fishing). "Gillnet gear" includes any net designed to be suspended vertically in the water and to entangle the head or other body parts of fish passing through the net, including drifting nets and nets anchored or attached to the sea bottom, the fishing vessel or any other object.

NMFS hereby notifies owners and operators of shark gillnet vessels fishing in the shark gillnet restricted area that they must carry a NMFS-approved observer on board such vessel(s) if requested to do so by the Regional Director for the NMFS Southeast Region upon written notification sent to either the address specified for the vessel under the Marine Mammal Exemption Program or the address specified for vessel registration or documentation purposes or otherwise served on the owner or operator of the vessel. A shark gillnet vessel fishing in the shark gillnet restricted area must comply with the terms and conditions specified in such written notification.

The requirements and provisions of 50 CFR 216.24(f)(1), (f)(2), and (f) (5) through (7) applicable to vessel certificate holders under the marine mammal observer program apply to shark gillnet vessels as if the observers required under this action were marine mammal observers. For example, no person may forcibly assault, impede, intimidate, interfere with, influence, attempt to influence, or harass an observer.

Any person who does not comply with any requirement in this document, including any term or condition in any written notification issued hereunder, is in violation of the interim final regulations (57 FR 40861, September 8, 1992), codified at 50 CFR 227.71(b)(3).

Additional Sea Turtle Conservation Measures

The Assistant Administrator, at any time, may modify the requirements of this action through notification in the **Federal Register**, if necessary, to ensure adequate protection of endangered and threatened sea turtles. Under this procedure, the Assistant Administrator will impose any necessary additional or more stringent measures, if he determines that shark gillnet vessels are having a significant adverse effect on sea turtles. Likewise, conservation measures may be modified if monitoring to assess turtle mortality indicates that the incidental take level for the program is approaching the incidental take level established by the biological opinion for this action issued as a result of consultation under section 7 of the ESA. That level is one documented take by injury or mortality of a Kemp's ridley, or green, or hawksbill, or leatherback turtle; or two lethal takes of longgerhead turtles.

The Assistant Administrator will impose additional conservation measures on this fishery if the incidental take level is exceeded, or if significant or unanticipated levels of lethal or nonlethal takings or strandings of sea turtles associated with fishing activities in the restricted area occur. Such additional restriction may include requirements to reduce the soak time of nets or reduce the length of nets. Notification will be published in the **Federal Register** announcing any additional sea turtle conservation measures including any extension of the 30-day requirement to carry an observer upon request on shark gillnet fishing vessels.

Classification

The Assistant Administrator has determined that this restriction is necessary to respond to an emergency situation to provide adequate protection for listed sea turtles, and is consistent with the ESA and other applicable law. This restriction does not require a regulatory impact analysis under E.O. 12291 because it is not a "major rule."

The Assistant Administrator, pursuant to section 553(b)(B) of the Administrative Procedure Act (APA), finds there is good cause to take this action on an emergency basis and that it is impracticable and contrary to the public interest to provide prior notice and opportunity for comment. Emergency action is needed to insure the conservation of endangered and threatened sea turtles.

Because neither section 553 of the APA nor any other law requires that general notice of proposed rulemaking be published for this action, under section 603(b) of the Regulatory Flexibility Act, an initial Regulatory Flexibility Analysis is not required.

The Assistant Administrator prepared an environmental assessment (EA) for the interim final rule (57 FR 40861, September 8, 1992). A supplemental EA prepared specifically for this action concludes that, with specified mitigation measures, this action will have no significant impact on the human environment.

Dated: October 6, 1992.

William W. Fox, Jr.,

Assistant Administrator for Fisheries.

BILLING CODE 3510-22-M

---

50 CFR Part 672

[Docket No. 911176-2018]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Prohibition of retention.

SUMMARY: NMFS is prohibiting retention of the shortraker/rougheye rockfish species group (SRRE) in the Central Regulatory Area of the Gulf of Alaska (GOA) and is requiring that catches of SRRE be treated in the same manner as prohibited specie and discarded. This

action is necessary because the total allowable catch (TAC) for SRRE in the Central Regulatory Area has been reached.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), October 7, 1992, through 12 midnight, A.l.t., December 31, 1992.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, Resource Management Specialist, Fisheries Management Division, NMFS, (907) 586–7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the GOA exclusive economic zone is managed by the Secretary of Commerce according to the Fishery Management Plan for the Groundfish Fisher of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

The SRRE TAC is the Central Regulatory Area was established by the final notice of specifications (57 FR 2844, January 24, 1992) as 1,290 metric tons.

The Director of the Alaska Region, NMFS, has determined, in accordance with § 672.20(c)(3), that the TAC for SRRE in the Central Regulatory Area has been reached. Therefore, NMFS is prohibiting retention of SRRE in that area effective from 12 noon, Alaska local time (A.l.t.), October 7, 1992, through 12 midnight, A.l.t., December 31, 1992.

Classification

This action is taken under 50 CFR 672.20 and is in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 57, No. 198
Tuesday, October 13, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 170 and 171

[Docket No. PRM–170–3]

American College of Nuclear Physicians and Society of Nuclear Medicine; Request for Comment on a Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Petition for rulemaking; request for comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) requests public comment on a petition for rulemaking filed by the American College of Nuclear Physicians and the Society of Nuclear Medicine. The petition has been docketed by the Commission and has been assigned Docket No. PRM–170–3. The petitioners request that the NRC amend its regulations governing the licensing, inspection, and annual fees charged to its licensees because of the recent increase in these fees.

DATES: Submit comments by December 14, 1992. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Submit comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Attention: Docketing and Service Branch.

For a copy of the petition, write: Rules Review Section, Rules and Directives Review Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: 301–492–7758 or Toll Free: 800–368–5642.

FOR FURTHER INFORMATION CONTACT: C. James Holloway, Office of the Controller, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301–492–4301.

SUPPLEMENTARY INFORMATION:

Background

On February 18, 1992, the Nuclear Regulatory Commission (NRC) received a petition for rulemaking submitted by the American College of Nuclear Physicians and the Society of Nuclear Medicine. The petition was docketed as PRM–170–3 on February 28, 1992. The petitioners requested that the NRC amend 10 CFR Parts 170 and 171 concerning fees for facilities, materials licenses, and other regulatory service under the Atomic Energy Act of 1954, as amended. The petitioners requested this amendment to mitigate the substantial adverse impacts experienced by its members because of the recent increase in the NRC's license and annual fees.

In the **Federal Register** of May 12, 1992 (57 FR 20211), the NRC published a notice of receipt of this petition. In that document, the NRC announced that it would consider the issues raised by the petitioners after the rulemaking action necessary to establish the license and annual fees for FY 1992 was completed. The NRC indicated that it would consider the petitioners' concerns within the context of the review and evaluation of the fee program for FY 1993 which will be conducted as part of the NRC's continued implementation of Public Law 101–508. As part of the review concerning the fee program for FY 1993 and succeeding years, the NRC now requests public comment on the issues raised in PRM–170–3.

Fee Schedule Rulemaking

On April 12, 1991 (56 FR 14870), the NRC published proposed amendments to its regulations governing the licensing, inspection, and annual fees charged to its licensees. The proposed revisions were necessary to implement Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101–508), passed by the Congress on November 5, 1990, which mandates that the NRC recover approximately 100 percent of its budget authority in Fiscal Year 1991, and the four succeeding fiscal years, through the assessment of license, inspection, and annual fees. The proposed rule affected all applicants, licensees, and holders of certificates of compliance, registrants of sealed sources and devices and approvals of quality assurance programs. The proposed revisions, when adopted, would increase fees substantially for those entities currently subject to fees. Other entities previously exempt from fees would become subject to the fees in these proposed schedules.

In response to this rule, the American College of Nuclear Physicians and the Society of Nuclear Medicine submitted comments on May 13, 1991. The petitioners' comments discussed the issue of assessing user fees to medical licensees and what the petitioners believed would be the potential damage that could occur as a result.

On July 10, 1991 (56 FR 31472), the NRC published the final rule implementing the requirements of Public Law 101–508. This final rule, which became effective on August 9, 1991, revised the fees charged to NRC licensees for FY 1991. With regard to the impact on NRC licensees, the Commission concluded that "to eliminate the adverse effects, the annual fees would have to be eliminated or reduced. Because Public Law 101–508 requires the NRC to assess and collect approximately 100 percent of its budget authority, a reduction in the fees assessed for one class of licensee would require a corresponding increase in the fees assessed for another class. Therefore, the impact noted cannot be eliminated without creating adverse effects for other licensees. For this reason, consideration has been given only to the effects that NRC is required to consider by law (i.e., the Atomic Energy Act, the Energy Reorganization Act, and the Regulatory Flexibility Act)."

The NRC reconciled the mandate of Public Law 101–508 with the requirements of the Regulatory Flexibility Act to consider the impacts of its regulations on small entities by establishing a maximum small-entity fee for a licensee who qualifies as a small entity. In an effort to further mitigate the impact of the annual fee on a small entity, the NRC published a proposed rule (57 FR 847; January 9, 1992) to establish a lower-tier, annual fee for a small-entity licensee that has relatively low annual gross receipts or supporting populations. The final rule adopting this proposed amendment was published on April 17, 1992 (57 FR 13625), and became effective on May 18, 1992.

The proposed rule necessary to establish the license and annual fees for FY 1992 was published on April 29, 1992 (57 FR 18095). The comment period for this action closed on May 29, 1992. The

NRC published the final rule establishing the FY 1992 licensing and annual fees on July 23, 1992 (57 FR 32691). The provisions of the final rule became effective August 24, 1992. Now that the fee cycle for FY 1992 is complete, the NRC is beginning its evaluation of the fee program for FY 1993. As part of that action, the NRC is soliciting public comment on the petition submitted by the American College of Nuclear Physicians and the Society of Nuclear Medicine (PRM–170–3).

The Petitioners

The American College of Nuclear Physicians (ACNP) is an organization of 1,450 members, including 1,100 physicians who are qualified to use radioactive byproduct materials for diagnostic and therapeutic medical purposes. The Society of Nuclear Medicine (SNM) is an association of 11,300 members with about 4,750 physicians who practice nuclear medicine. Members of the ACNP/SNM who use byproduct radioactive materials must be licensed by either the NRC or an Agreement State.

Adverse Impacts on the Petitioners

The petitioners have submitted this petition for rulemaking because they believe they have been adversely affected by the current license fee rule. The petitioners state that the fees imposed by the NRC unfairly burden medical licensees and threaten the continuation of many nuclear medicine practices. The petitioners state that fees for its member physicians have increased by up to 1400% and that this constitutes a substantial, additional expense for the practice of nuclear medicine. The petitioners state that since the fee increase over 400 nuclear medicine licensees have either terminated or applied to terminate their NRC licenses.

The petitioners state that, in addition to the direct fee increase, they are also affected indirectly. Increased user fees are also reflected in the cost of radiopharmaceuticals due to the increase in fees for radiopharmaceutical manufacturers and radiopharmacy licenses. The petitioners state that this additional fee is passed on to the practitioner, thereby raising their operating costs.

The petitioners state that substantial numbers of their members practice in hospitals because these hospitals are required to provide nuclear medicine services. The petitioners also state that about 40% of all fees for nuclear medicine service are covered by Medicare. However, according to the petitioners, Medicare reimbursement limits do not consider NRC license fee increases. Thus, the recent substantial increases in NRC license fees have had to be absorbed into the non-reimbursable costs of nuclear medicine practices.

The petitioners believe that the recent amendments to the license fee rule have had an inequitable impact on them. They believe they are in a unique situation and should be given special consideration similar to what the NRC has given to other limited categories of licensees. For example, non-profit educational institutions retained their fee exemption under part 170 and were given an additional exemption under part 171 in recognition of their unique contributions to society. The petitioners believe that their unique contributions to socity should also warrant an exemption.

The petitioners believe that the NRC discounted the unique societal benefits provided by members of the ACNP/SNM, their unique circumstances regarding reimbursement, and the hardships imposed on individual physicians by the fee rules. In addition, the petitioners assert that fees for the remaining NRC medical licensees may rise substantially again under the present fee recovery policy because several hundred medical licensees have terminated their licenses. The petitioners believe the increases could further extend the competitive disadvantage in favor of alternative modalities and identical services in Agreement States. The petitioners indicate that the fee increase may also impact medical practice resulting in limiting patient choices in some geographical areas.

The Petitioner's Proposals

The petitioners request that parts 170 and 171 be amended to minimize the inequitable impacts of NRC-imposed fees on the practice of nuclear medicine. The petitioners request that the NRC amend its regulations in 10 CFR parts 170 and 171 to recognize factors the petitioners contend the NRC considers for other licensees. The petitioners' specific suggestions include the following items. The NRC should—

1. Provide an exemption for a medical service similar to the exemption provided for a non-profit institution.

2. Provide for uniform consideration of each licensee's particular circumstances. For example, the petitioners suggest that the NRC develop a simple template for structuring exemption requests.

3. Adopt a sliding scale of fees depending on the size of an entity and not just providing a fee cap for those entities who qualify as "small entities."

4. Allow licensees a greater voice in the NRC's decision-making process for developing new programs where the development costs could have substantial economic impacts. The petitioners believe that if the NRC proposes to develop a regulation which is not necessary for the adequate protection of the public health and safety, the NRC should be required to show that the regulation would result in a substantial increase in safety and that the benefits exceed the costs.

Petitioners' Conclusion

The petitioners have identified several significant adverse impacts which they assert have affected its members as a result of the recent increases in NRC license and annual fees. The petitioners believe that the fees imposed by the NRC unfairly burden medical licensees and threaten the continuation of many nuclear medicine practices, and request that the NRC consider its proposals to amend the rules in parts 170 and 171.

Dated at Rockville, Maryland, this 6th day of October 1992.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 92–24747 Filed 10–9–92; 8:45 am]

BILLING CODE 7590–01–M

FARM CREDIT ADMINISTRATION

12 CFR Parts 612 and 617

RIN 3052–AB33

Personnel Administration; Referral of Crimes and Suspected Crimes

AGENCY: Farm Credit Administration (FCA).

ACTION: Proposed rule.

SUMMARY: The FCA, by order of the FCA Board, issues for public comment a proposed regulation governing the referral of known and suspected criminal violations. Proposed part 617 would mandate the use of a uniform FCA Criminal Referral Form (FCA 8058, hereinafter, Referral Form) which will replace the various form that are currently being used by Farm Credit System (FCS) institutions. Conforming amendments to part 612 would be.

DATES: Comments must be submitted on or before November 12, 1992.

ADDRESSES: Comments should be mailed or delivered (in triplicate) to Patricia W. DiMuzio, Division Director, Regulation Development Division, Office of Examination, Farm Credit Administration, McLean, Virginia 22102–

5090. Copies of all comments received will be available for examination by interested parties in the Regulation Development Division, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT:

Eric Howard, Policy Analyst, Office of Examination, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4498, or
Anthony N. Torres, Litigation and Enforcement Division, Office of General Counsel, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4040, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION: Pursuant to the Farm Credit Act of 1971, as amended, the FCA regulates and examines FCS institutions for safety and soundness and compliance with laws and regulations. FCS institutions have the responsibility to establish and maintain safeguards designed to detect, deter, and report criminal activity involving the assets, operations, or affairs of the institution. Violations of Federal criminal statutes may affect the safety and soundness of FCS institutions and may undermine public confidence in the FCS. Additionally, the law enforcement agencies need to receive timely and specific information on known or suspected criminal activity to permit them to determine whether investigations and prosecutions are warranted.

The Interagency Bank Fraud Working Group (Working Group), a task force consisting of Federal financial institution regulators and law enforcement agencies, has designed a uniform referral form (Referral Form, FCA 8058) to facilitate the reporting of criminal activity by financial institutions and to enhance the law enforcement agencies' ability to investigate and prosecute the matters reported. In order to promote use of the Referral Form and ensure proper reporting, the FCA proposes to adopt regulations that would (1) mandate uniform procedures for filing criminal referrals and (2) mandate the use of the Referral Form in making certain criminal referrals.

The Referral Form, with instructions explaining how to complete, file, and distribute the form, can be obtained from the Office of General Counsel (OGC) of the FCA. Filing of the Referral Form would be required in all cases in which one of the circumstances listed in § 617.2(a) exists, but only when such circumstances exist. However, nothing in this proposed regulation should be construed as reducing in any way the general responsibility to report criminal activities in which these circumstances do not exist to the appropriate investigatory and/or prosecuting authorities, whether State or Federal. Therefore, the FCA strongly encourages institutions to report all known or suspected criminal activity to the appropriate Federal, State, or local law enforcement authorities.

Comments are sought on all the provisions contained in the regulation.

List of Subjects

12 CFR Part 612

Agriculture, Banks, banking, Conflict of interests, Rural areas.

12 CFR Part 617

Criminal referrals, Criminal transactions, Defalcations, Embezzlement, Insider abuse, Institutions of the Farm Credit System, Money laundering, Theft.

For the reasons stated in the preamble, parts 612 and 617 of chapter VI, title 12 of the Code of Federal Regulations are proposed to be amended to read as follows:

PART 612—PERSONNEL ADMINISTRATION

1. The authority citation for part 612 continues to read as follows:

Authority: Secs. 5.9, 5.17, 5.19 of the Farm Credit Act; 12 U.S.C. 2243, 2252, 2254.

2. Section 612.2180 is amended by revising paragraph (b) to read as follows:

§ 612.2180 Enforcement.

* * * * * *

(b) The bank, Funding Corporation, or service organization shall promptly notify the Farm Credit Administration of those cases where it has determined that there is a known or suspected criminal violation (*See* part 617).

* * * * * *

3. Part 617 is revised to read as follows:

PART 617—REFERRAL OF CRIMES AND SUSPECTED CRIMES

Sec.
617.1 Purpose and scope.
617.2 Referrals.
617.3 Notification of board of directors and bonding company.

Authority: Secs. 5.9, 5.17 of the Farm Credit Act; 12 U.S.C. 2243, 2252.

§ 617.1 Purpose and scope.

(a) This part applies to all institutions of the Farm Credit System as defined in section 1.2(a) of the Act (12 U.S.C. 2002(a)) including, but not limited to, associations, banks, service corporations chartered under section 4.26 of the Act, the Federal Farm Credit Banks Funding Corporation, the Farm Credit System Financial Assistance Corporation, and the Federal Agricultural Mortgage Corporation (hereinafter, institutions). The purpose of this part is to reduce potential losses to institutions resulting from certain known or suspected criminal activities by requiring notification on forms designed to help law enforcement agencies determine whether investigations or prosecutions are warranted. This part requires that institutions use FCA Criminal Referral Form (FCA 8058, hereinafter, Referral Form) to notify the appropriate Federal authorities when any known or suspected Federal criminal violations of the type described in § 617.2 are discovered by an institution.

(b) The specific referral requirements of this part are limited to known or suspected criminal violations of the United States Code involving the assets, operations, or affairs of an institution in certain cases. This part prescribes procedures for referring those violations to the proper Federal law enforcement agencies and the FCA. Nothing in this part shall be construed as reducing in any way the general responsibility to report criminal activities to the appropriate investigatory and/or prosecuting authorities, whether State or Federal.

§ 617.2 Referrals.

(a) Each institution shall refer known or suspected criminal violations of the United States Code involving or affecting its assets, operations, or affairs to the appropriate regional offices of the United States Attorney and the Federal Bureau of Investigation in the manner required by this section in circumstances where there is:

(1) Any known or suspected criminal activity (e.g., theft, embezzlement), mysterious disappearance, unexplained shortage, misapplication, or other defalcation, regardless of amount, where an institution employee, officer, director, agent, or other person participating in the conduct of the affairs of such an institution is suspected;

(2) Any known or suspected criminal activity involving an actual or potential loss (before reimbursement or recovery) of $1,000 or more where the institution has a substantial basis for identifying a possible suspect or group of suspects and the suspect(s) is not an employee, officer, director, or agent of the institution;

(3) Any known or suspected criminal activity involving an actual or potential

loss (before reimbursement or recovery) of $5,000 or more where the institution has no substantial basis for identifying a possible suspect or group of suspects; or

(4) Any known or suspected criminal activity involving a financial transaction that used the institution as a conduit for such criminal activity (such as money laundering/structuring schemes).

(b) Each referral required by paragraph (a) of this section shall be made on the Referral Form in accordance with the Referral Form Instructions relating to its filing and distribution and the requirements of paragraphs (c) and (d) of this section.

(c) No later than 14 days after the institution's management has determined that there is a known or suspected criminal violation, the Referral Form shall be filed and a copy shall be provided to the FCA's Office of General Counsel. In circumstances where there is also a known or suspected violation of State criminal law, the institution shall also notify the appropriate State law enforcement authorities.

(d) In addition to the requirements of paragraph (c) of this section, the institution shall immediately notify by telephone the offices specified on the Referral Form upon discovery of cases involving known or suspected criminal violations requiring urgent attention or where a referable violation is ongoing. Such cases include, but are not limited to, those where:

(1) There is a likelihood that the suspect(s) will flee;

(2) The magnitude or the continuation of the known or suspected criminal violation may imperil the institution's continued operation; or

(3) Key institution personnel are involved.

§ 617.3 Notification of board of directors and bonding company.

(a) The institution's board of directors shall be notified, not later than their next meeting, of the filing of any Referral Form by the institution. Each institution shall establish effective policies and procedures designed to ensure compliance with this part, including, but not limited to, adequate internal controls.

(b) If any losses can be recovered under a surety bond or other contract for protection against losses, the institution involved shall promptly make all required notifications.

Dated: October 7, 1992.

Curtis M. Anderson,

Secretary, Farm Credit Administration Board.

[FR Doc. 92-24791 Filed 10-9-92; 8:45 am]

BILLING CODE 6705-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 25

[Docket No. NM-75, Notice No. SC-92-6-NM]

Special Conditions: Airbus Industrie Model A340 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This document proposes special conditions for the Airbus Industrie Model A340 airplane. This airplane will have novel and unusual design features when compared to the state of technology envisioned in the airworthiness standards of part 25 of the Federal Aviation Regulations (FAR). This document contains the additional safety standards which the Administrator considers necessary to establish a level of safety equivalent to that provided by the airworthiness standards of part 25.

DATES: Comments must be received on or before November 27, 1992.

ADDRESSES: Comments may be mailed in duplicate to: Federal Aviation Administration, Office of the Assistant Chief Counsel, Attn: Rules Docket (ANM-7), Docket No. NM-75, 1601 Lind Avenue SW., Renton, Washington, 98055-4056; or delivered in duplicate to the Office of the Assistant Chief Counsel at the above address. Comments must be marked Docket No. NM-75. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Greg Holt, FAA, Standardization Branch, ANM-113, Transport Standards Staff, Transport Airplane Directorate, Aircraft Certification Service, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2140.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of these proposed special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before further rulemaking action on this proposal is taken. The proposals contained in this notice may be changed in light of the comments received. All comments received will be available in the Rules Docket, both before and after the closing date for comments, for examination by interested parties. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. NM-75." The postcard will be date stamped and returned to the commenter.

Background

Special conditions are prescribed under the provisions of § 21.16 of the FAR when the applicable regulations for type certification do not contain adequate or appropriate standards because of novel or unusual design features.The new Airbus Model A340 incorporates a number of such design features.

Airbus Industrie, 1 Rond Point Maurice Bellonte, 310707 Cedex, France, has applied for French type certification of their Model A340 by the French Direction Generale de l'Aviation Civile (DGAC) in accordance with existing European standards and for U.S. type certification under the provisions of a bilateral agreement between the governments of the U.S. and France.

The bilateral agreement was reached in 1973 to facilitate French acceptance of aeronautical products exported from this country and of such products imported from France. It provides, in part, for U.S. acceptance of certification by the DGAC that a product, in this case the Model A340, complies with the applicable U.S. laws, regulations and requirements (the U.S. type certification standards). Alternatively, the bilateral agreement provides for U.S. acceptance of certification by the DGAC that the product complies with the applicable French laws, regulations and requirements (the French type certification standards) plus any additional requirements the U.S. finds necessary to ensure that the product meets a level of safety equivalent to that provided by the U.S. type certification standards.

The type certification standards of both the U.S. and France are amended from time to time to impose more stringent standards and to reflect the advancing state of the art in aircraft

technology. As provided in the bilateral agreement, the type certification standards of the importing country used (in this case the U.S.) are those in effect on the reference date for the type of certification basis of the exporting country (France). The reference date for the French type certification basis is June 15, 1988, and is therefore the date that establishes the U.S. type certification standards.

The DGAC has elected to certify that the Model A340 complies with the French type certification standards plus any additional requirements identified by the FAA. Based on the above reference date, the DGAC has advised that the French type certification standards include Joint Airworthiness Requirements-25 (JAR–25) with Changes 1 through 12 thereto, and Joint Airworthiness Requirements-All Weather Operations (JAR–AWO). In addition, Airbus has elected to comply with certain portions of JAR–25 as further amended by Change 13.

Joint Airworthiness Requirements-25 is a document developed jointly and accepted by the airworthiness authorities of various European countries, including France, for type certification of transport category airplanes. It is similar to part 25 of the FAR; however, there are certain specified differences in the requirements of the two documents.

Based on this same reference date, the U.S. type certification standards are part 25 of the FAR, as amended by Amendments 25–1 through 25–63 thereto, and the special conditions proposed in this notice. (As noted above, special conditions are prescribed under the provision of § 21.16 when the applicable regulations for type certification do not contain adequate or appropriate safety standards because of a novel or unusual design feature.) Airbus has elected to comply with portions of part 25 amended by Amendments 25–64 applicable to passenger seats. In addition, Airbus has also elected to comply with the sections of part 25 amended by Amendments 25–65, 25–66 and 25–77.

Special conditions are also prescribed by the DGAC when JAR–25 does not contain adequate or appropriate safety standards. In order to preclude confusion with the special conditions proposed in this notice, those special conditions will be referred to herein as the "French special conditions."

Because the DGAC has elected to certify that the Model A340 complies with the French type certification standards, the FAA will make a comparison of the French type certification basis and the U.S. type certification standards described above. Based on this comparison, the FAA will prescribe any additional requirements that are necessary to ensure that the Model A340 meets a level of safety equivalent to that provided by the U.S. type certification standards. The U.S. type certification basis for the Model A340 will, therefore, consist of the French type certification basis, these additional requirements, and the special conditions proposed in this notice.

Noise certification is beyond the scope of the bilateral agreement; however, French test data are accepted by separate arrangement. The French noise certification basis is their "Arrete" (order) dated November 26, 1991 (ICAO Annex 16). The U.S. noise certification basis for the Model 340 is part 36 of the FAR, as amended by Amendments 36–1 through 36–18 and subsequent amendments adopted prior to the date on which the U.S. type certificate is issued. French noise certification test data will be reviewed by the FAA for compliance with the U.S. noise certification basis. In addition to compliance with part 36, the statutory provisions of Public Law 92–574, "Noise Control Act of 1972," require that the FAA issue a finding of regulatory adequacy pursuant to section 611 of that Act.

The Model A340 must also comply with the fuel venting and exhaust emission requirements of part 34 of the FAR, including any amendments in effect on the date the type certificate is issued. Emission requirements are also beyond the scope of the bilateral agreement; however, certification of compliance by the DGAC will be accepted by separate arrangement.

A340 Design Features

General

The Model A340 Airplane presented for U.S. type certification is a long range, four engine, transport category airplane powered by CFMI CFM56–5C2 engines with 31,200 lb. thrust ratings. The airplane has a seating capacity in a typical three class long range configuration of 262 and a range of 7,500 nautical miles. The maximum takeoff weight is 558,900 lbs. The maximum landing weight is 399,000 lbs. The maximum operating altitude is 41,000 ft.

The structure of the A340 is generally of conventional design and construction, but with considerable use of composite materials. Elements of the primary structure (the fin and horizontal tail) are constructed of composites, as well as components such as flaps, spoilers, ailerons, and engine cowls. The composite horizontal tail is also an integral fuel tank, both inboard and outboard of the fuselage contour. The landing gear system employs a center landing gear for use during ground handling conditions with heavy airplane weights. The structural design also makes use of a speed limiting system, and the electronic flight control system provides the potential for a wide range of structural and system interactions.

The Model A340 utilizes fly-by-wire (FBW) flight controls for the elevators, ailerons, spoilers, tailplane trim, slats and flaps, speed brakes, trim in yaw, and engine control. The aerodynamic surfaces are positioned relative to the pilot's command by electronic signals sent via airplane wiring from the flight control computers to hydraulic actuators. Conventional mechanical control is provided for the rudder and tailplane trim hydraulic actuators. Should a short-term interrupt occur in the electronic flight controls, flight could be maintained for a period of time through the use of mechanical control of rudder and tailplane trim.

Hydraulic power to the flight control system is simultaneously provided by three independent hydraulic systems. Functions are shared among these systems in order to ensure airplane control in the event of loss of one or two systems. The three systems are pressurized by variable displacement pumps driven by the engine accessory gearbox. In addition, the systems can be powered by electrically driven pumps.

Normal electrical power is supplied by four constant frequency generators, one on each engine. An auxiliary power unit (APU)-driven electrical generator is also available. Two batteries and a hydraulically driven constant speed motor generator (CSMG) provide an alternative source of electrical power for the continuous operation of the A340 fly-by-wire flight controls. The CSMG is powered by the green hydraulic circuit. The CSMG can also be powered by the ram air turbine (RAT) which is automatically deployed in case of loss of the green hydraulic power. Deployment of the RAT may also be selected manually by pushing an electrical switch.

The engine control system consists of a dual channel full authority digital engine control (FADEC) mounted on the fan case of each engine. Each FADEC interfaces with various airplane computer systems. The FADEC provides gas generator control, engine limit protection, power management, thrust reverser control, and engine parameter inputs for the flight deck displays. In addition to control of the engines from the flight deck through changes in power

lever position, an autothrust mode is provided that commands thrust changes directly to the FADEC without a corresponding change in power lever position. In this mode of operation, the position of the power lever sets the upper limit for thrust, except when alpha floor is reached. Alpha floor is a design feature in the airplane whereby, upon reaching a specific angle of attack, the engines are automatically commanded to full thrust, regardless of lever position, to provide high angle-of-attack (AOA) protection. The autothrust mode can be disengaged by pushing a button on the power lever. The engine FADEC and associated airplane related systems form the complete propulsion control system.

Pitch and roll control inputs are made through flight deck side-stick controllers mounted on the lateral consoles of the pilot and copilot positions, in place of central control columns. The flight instruments are displayed on six cathode ray tube (CRT) displays. Two CRT's are mounted directly in front of both the pilot and copilot and display primary flight instruments and navigational information. The other two CRT's are located in the center of the instrument panel and display engine parameters, warnings, and system diagnostics.

The proposed type design of the A340 contains novel or unusual design features not envisioned by the applicable Part 25 airworthiness standards and therefore special conditions are considered necessary in the following areas:

Systems

1. Operation Without Normal Electrical Power.

In the A340, a source of electrical power is required by the electronic flight control system. Service experience with traditional airplane designs has shown that the loss of electrical power generated by the airplane's engines is not extremely improbable. The electrical power system of the A340 must therefore be designed with standby or emergency electrical sources of sufficient reliability and capacity to power essential loads in the event of the loss of normally generated electrical power. The need for electrical power for electronic flight controls was not envisioned by Part 25 since in traditional designs, cables and hydraulics are utilized for the flight control system. Therefore, Special Condition No. 1 is proposed.

2. Electronic Flight Control System (EFCS) Failure and Mode Annunciation

The A340 flight control system architecture utilizes redundant elements, as well as alternative operational modes, to deal with losses of equipment and/or signal interfaces.

Existing Part 25 has been considered adequate for stability and automatic flight systems in traditional airplane designs because those designs did not have submodes of operation (they are either on or off), the airplane handling qualities were adequate with the systems either on or off, and the systems were not actively participating in load relieving functions. These rules are not sufficient for the A340 because they do not address differences in handling qualities and levels of envelope protection between submodes of operation and because elements of the automatic system must remain active in order to maintain safe flight and landing. Therefore, Special Condition No. 2 is proposed.

3. Command Signal Integrity

Command and control of the control surfaces will be achieved by fly-by-wire systems that will utilize electronic interfaces (AC, DC, or digital data buses). These interfaces involve not only the commands to the control surfaces, but all the control feedback and sensor input signals as well. These signal paths, as well as the digital electronics that manage them, can be susceptible to spurious signals that may cause unacceptable or unwanted control responses. These spurious signals may originate from electromagnetic or electrostatic sources, or from failures of subsystems in the control loop. Therefore, special designs are needed to maintain the integrity of the fly-by-wire interfaces to an immunity level equivalent to that of traditional hydro-mechanical designs. In addition, similar to the conventional steel cable controls, routing of wire bundles must provide separation and redundancy to ensure maximum protection from damage due to a common cause. Therefore, Special Condition No. 3 is proposed.

4. Protection From Lightning and Unwanted Effects of High Intensity Radiated Fields (HIRF) and Radio Frequency (RF) Energy

The use of fly-by-wire designs to command and control engines and flight control surfaces increases the airplane's susceptibility to lightning and HIRF sources external to the airplane. The airworthiness regulations do not provide adequate requirements for protection from lightning and unwanted effects of HIRF.

Lightning interaction with an airplane can result in numerous problems. Physical damage (direct effects) can result from a lightning attachment to the airplane. Such damage is characterized by burning, eroding, and blasting, and is the consequence of either the extreme heat loading and accompanying acoustic shock wave, or deforming by magnetic forces from the high current component of lightning. An additional effect (indirect) results from the fast changing electrical and magnetic fields produced by the high currents of a direct or near strike. These fields can couple voltage transients into the airplane wiring and subsequently reach the electrical and electronic systems within.

High intensity radiated fields also have the potential to cause adverse and potentially hazardous effects on fly-by-wire systems if design measures are not taken to ensure the immunity of such systems. This particularly true with the trend toward increased power levels from ground based transmitters and the advent of space and satellite communications.

The A340 is being designed with only electrical interfaces between crew inputs and: (1) The elevator, aileron, spoiler flight control surfaces and, (2) the engines. These interfaces, and the interconnection among the electronic subsystems controlling these functions can be susceptible to disruption of both command/response signals and the operational mode logic as a result of electrical magnetic interference. Traditional airplane designs have utilized mechanical means to connect the primary flight controls and the engine to the flight deck. This traditional design results in control paths that are substantially immune to the effects of lightning strike and effects of HIRF. A special condition is required to ensure that critical and essential systems be designed and installed to preclude component damage and system upset or malfunction due to both the direct and indirect effects of lightning, and the unwanted effects of HIRF. Therefore, Special Condition No. 4 is proposed.

Airframe

1. Interaction of Systems and Structures

The airplane has a full time electronic flight control system in the pitch, yaw, and roll axes and automatic trim of the horizontal stabilizer. These systems can directly, or as a result of failure or malfunction, affect structural performance. This degree of system and structures interaction was not

envisioned by the structural design regulations for transport airplanes contained in part 25. To provide comprehensive criteria in which the structural design safety margins are dependent on systems reliability, Special Condition No. 5 is proposed.

2. Structural Design Speed With a Speed Protection System

The structural design dive speed is established in order to provide structural integrity during inadvertent overspeed above the maximum operating speed. The A340 has an overspeed protection system as well as protection against extreme attitudes (pitch and roll) and stall. These systems provide for automatic protection against inadvertent upset and subsequent overspeed which was not envisioned by § 25.335(b). That section provides criteria for establishing the structural design dive speed which accounts for inadvertent upsets and inadvertent overspeeds which could result from pilot inattention. This is provided by assuming that the airplane is in a prescribed dive condition for a specified time that includes pilot recognition and reaction time. These criteria do not take into account systems which automatically protect against inadvertent upsets and which automatically initiate recovery. Therefore, to establish appropriate criteria for determining an adequate structural design dive speed with speed protection, Special Condition No. 6 is proposed.

3. Design Maneuver Requirements

In a conventional airplane, pilot inputs directly affect control surface movement (both rate and displacement) for a given flight condition. In the A340, the pilot provides only one of several inputs to the control surfaces, and it is possible that the pilot control displacements specified in §§ 25.331(c)(1), 349(a) and 351 of the FAR may not result in the maximum displacement and rates of displacement of the elevator. The intent of these noted rules may not be satisfied if literally applied. Because of certain bank angle and roll rate limits provided by the electronic flight control system, it may not be possible to obtain full aileron deflections at the design maneuvering speed (V_A). On the other hand, the flight control system may, under some conditions, produce higher aileron spoiler or elevator deflections than the pilot input is capable of providing. Therefore, Special Condition No. 7 is proposed.

4. Limit Pilot Control Forces

The pilot effort loads in § 25.397(c) for the cockpit pitch and roll controls are based on a two-handed effort with conventional controls. In the A340, the cockpit pitch and roll controls are designed for a one-handed operation. Therefore, to provide structural design pilot effort loads for the side stick controllers, Special Condition No. 8 is proposed.

5. Tailtank Emergency Landing Loads

The A340 carries fuel in the horizontal tail. Since the horizontal tailtank is located to the rear and above the fuselage, the failure of this tank in an emergency landing could result in fuel spillage on, and adjacent to, the rear fuselage and rear emergency exits. Section 25.963(d) provides structural design criteria for fuel tanks that could become a hazard from spillage in an emergency landing, however, this applies only to tanks inside the fuselage contour. Therefore, to provide emergency landing design load factors for the tail tank, Special Condition No. 9 is proposed.

6. Limit Engine Torque Loads

The limit engine torque load imposed by sudden engine stoppage due to malfunction or structural failure (such as compressor jamming) has been a specific requirement for transport category airplanes since 1957. The size, configuration, and failure modes of jet engines has changed considerably from those envisioned by § 25.361(b) when the engine seizure requirement was first adopted. Engines have grown much larger and are now designed with large bypass fans capable of producing much higher torque loads if they become jammed.

Relative to the engine configuration that existed when the rule was developed in 1957, the present generation of engines as used in the A340 are sufficiently different and novel to justify issuance of a special condition to establish appropriate design standards. The latest generation of jet engines are capable of producing engine seizure torque loads that are significantly higher than previous generations of engines. The FAA is developing a new regulation and a new advisory circular that will provide more comprehensive criteria for treating engine torque loads resulting from sudden engine stoppage. In the meantime, a special condition is needed to establish appropriate criteria for the Airbus A340 type designs.

The proposed criteria distinguished between the more common seizure events and those rare seizure events results from structural failures. For these more rare but severe seizure events, the proposed criteria would allow some deformation in the engine supporting structure (ultimate load design) in order to absorb the higher energy associated with the high bypass engines, while at the same time protecting the adjacent primary structure in the wing and fuselage by providing a higher factor of safety for those structures. To provide appropriate structural design criteria for the engine torque on the A340, Special Condition No. 10 is proposed.

7. Center Landing Gear

The A430 landing gear arrangement includes a central unbraked landing gear under the fuselage. The purpose of the central landing gear is to assist the main landing gear during ground handling conditions for heavy airplane weights. This center landing gear is not intended for energy absorption during landing, even if it can participate in the impact under certain conditions. The current landing gear design criteria are applicable to conventional landing gear arrangements. Therefore, to provide additional taxi, takeoff, and landing criteria for this arrangement, Special Condition No. 11 is proposed.

Flight Characteristics

The A340 will employ an EFCS which has no direct coupling from controllers to surface in pitch and roll; it has response-command control laws in these axes for primary operating modes, and it has designated back-up control laws that are utilized when the normal operating state is unavailable. With fully augmented airplanes like the A340, almost all the flying qualities characteristics are independent of each other, and individual characteristics cannot, therefore, be used as predictors of acceptable flying qualities in other areas.

1. Flight Characteristic Compliance Determination by Handling Qualities Rating System for EFCS Failure Cases

The technology of the A340 EFCS has outpaced existing regulations (written essentially for unaugmented airplanes with provisions for limited ON/OFF augmentation.) The existing regulations assume that the pilot receives immediate direct feedback in response to control inputs, but this is not the case for a EFCS airplane. Interpretive material for § 25.672(c) and related subpart B requirements of the FAR need to be provided to aid in evaluating EFCS failure cases. Therefore, Special Condition No. 12 is proposed.

2. Longitudinal Stability

The A340 and similar airplanes with command-type control systems lacking airspeed or angle of attack (AOA) feedback will not pass the current part 25 demonstration for "static longitudinal stability," even though the basic airframe may have constant Mach gust stability. In the "normal" flight regime, these airplanes have short-term flight path stability, tending to hold zero pitch rate 1-g normal to the flight path when stick force is zeroed at a new speed away from initial trim. Benefits for such a command-control system are quick, accurate pitch response, minimization of pitch overshoots, and lack of transients associated with gear/flap/speed brake extension and thrust changes. Pilot adaptation and pilot ratings have been favorable for airplanes of this type for most of the flight envelope and flight phases. Because the A340 does not meet the part 25 requirements for static longitudinal stability, and since the pitch damping is also defined by the control laws, the simple requirement for "heavy damping" may not be appropriate for this design. Therefore, Special Condition No. 12 is proposed.

3. Lateral-Directional Stability

Because of the A340 roll axis design feature in which aileron force commands roll rate, a stabilized constant heading sideslip will result in zero aileron forces, which does not comply with § 25.177 of the FAR. This condition will exist for bank angles up to 33°. Therefore, Special Condition No. 12 is proposed.

4. Control Surface Awareness

With a response-command type flight control system and no direct coupling from cockpit controller to control surface, the pilot is not aware of actual surface position utilized to fulfill the requested demand. Some unusual flight condition, arising from atmospheric conditions and/or airplane or engine failures, may result in full or near-full surface deflection. Unless the flightcrew is made aware of excessive deflection or impending control surface limiting, piloted or auto-flight system control of the airplane might be inadvertently constrained in such a manner to cause an unsatisfactory stability or performance characteristic. Therefore, Special Condition No. 12 is proposed.

Flight Envelope Protection

1. General Limiting Requirements

The manufacturer has elected to develop extensive flight envelope protection features integral to the basic EFCS design. Envelope protection parameters include AOA, normal load factor, bank angle, pitch angle, and speed. To accomplish this envelope limiting, a significant change (or multiple changes) occurs in the EFCS control laws as the limit is approached, or exceeded. When EFCS failure states occur, envelope protection features can likewise either be modified or, in some cases, eliminated. The current regulations were not written with comprehensive envelope-limiting systems in mind. Therefore, Special Condition No. 13 is proposed.

2. Angle-of-Attack Limiting

The A340 design incorporates a low speed protection feature (alpha limit) which cannot be overridden by the flightcrew. When operating normally, the low speed protection system limits the ability to demonstrate steady speeds lower than, essentially, 1.06 times the 1-g stall speed (V_{SIG}), i.e., at coefficients of lift (C_L) less than the maximum aerodynamic coefficient of lift (C_{LMAX}). Airbus Industrie believes that the strict application of § 25.103 of the FAR will impose a takeoff and landing performance penalty on the A340 in comparison with conventional-control airplanes.

Stalling speed (V_S) is defined as $V_S = V_{CLMAX}/\sqrt{N_{NZ}}$, where N_{NZ} is the normal flight path load factor. The speed is determined from the certification stalling maneuver with all aspects of the EFCS operating normally, except auto thrust is disengaged or overridden and a higher than production AOA limit is set so that aerodynamic C_{LMAX} can be achieved. The flight characteristic at the AOA for C_{LMAX} must be suitable in the traditional sense at forward and aft center of gravity (CG) in straight and turning flight at IDLE power. Although for a normal EFCS and a steady full aft stick, this AOA for C_{LMAX} cannot be achieved, the AOA can be obtained momentarily under dynamic circumstances and deliberately in a steady state sense with some EFCS failure conditions.

A re-definition of the stalling reference speed for the A340 will have impact on various performance and flying qualities requirements currently prescribed in part 25. Areas of re-evaluation are principally: (1) Factors for trim speed and speed range requirements for flying qualities tests, and (2) the operating speed selection for performance conditions and tests. Therefore, Special Condition No. 13 is proposed.

3. Normal Load Factor (g) Limiting

The A340 flight control design incorporates normal load factor limiting on a full-time basis that will prevent the pilot from inadvertently or intentionally exceeding the positive or negative airplane limit load factor. The limiting feature is active in all normal and some alternate flight control modes and cannot be overridden by the pilot. This feature is unique in that traditional airplanes are limited in the pitch axis only by the elevator surface position limit, which is normally sized for adequate controllability and maneuverability but which may allow limit structural design values to be exceeded. Therefore, Special Condition No. 13 is proposed.

4. High-Speed Limiting

The longitudinal control law design of the A340 incorporates an overspeed protection system in the normal mode; this would prevent the pilot from inadvertently or intentionally exceeding a speed equivalent to the maximum speed for stability characteristics (V_{FC}) or attaining the maximum demonstrated flight diving speed (V_{DF}). The regulations do not contain requirements for a high speed limiter which might preclude or modify flying qualities assessments in the overspeed region. Therefore, Special Condition No. 13 is proposed.

5. Pitch and Roll Limiting

Airbus Industrie proposes to implement pitch and roll attitude limiting via the EFCS normal modes that will prevent the pilot from commanding pitch attitudes greater than approximately +35° and −15° body attitude and roll angles greater than ±65°. In addition, positive, artificial spiral stability is introduced for roll angles greater than 33° for speeds below the maximum operating limit speed (V_{MO}) or the maximum operating limit Mach (M_{MO}) and 0° for speeds above V_{MO}/M_{MO}. At speeds greater than V_{MO} and up to V_{DF}, maximum aileron force will command only 40° maximum bank. Conventional airplanes are not limited in pitch and roll. While limits may provide certain benefits such as protection from upsets, these limits should not restrict normal and emergency maneuvering. Therefore, Special Condition No. 13 is proposed.

Side Stick Controllers

1. Pilot Strength.

The A340 design incorporates side stick controllers for pitch and roll in lieu of conventional wheel controls. the temporary and prolonged force requirements of § 25.143(c), and related flying qualities force requirements in other paragraphs, are valid for wheel control only. Appropriate force

requirements must be established for side stick controllers. Therefore, Special Condition No. 14 is proposed.

2. Controller Coupling

The side stick controllers are not mechanically interconnected, as in conventional airplanes; instead, electronic coupling is used to meet the requirements of § 25.671 of the FAR. Therefore, Special Condition No. 14 is proposed.

3. Pilot Control

Side stick controllers for A340 pitch and roll are a relatively new controlling method for transport airplanes. The regulations do not address these types of airplane controlling devices. Therefore, Special Condition No. 14 is proposed.

4. Autopilot Quick-Release Control Location

The A340 autopilot quick-release is located on the side stick controllers. Since the A340 do not have a yoke, the A340 cannot literally comply with the regulations. Therefore, Special Condition No. 14 is proposed.

Airplane Flight Manual

The A340 flight manual performance section will eliminate traditional performance charts and replace them with reference to a computer-based, first principles calculation method, and corresponding data files which will yield the same information. The computer program proposal is ground-based, and not related to onboard processing or up-linking. This proposal requires a different interpretation of the relevant regulations (particularly § 25.1587(b)) since the required performance information would not be in a directly usable form in the airplane flight manual (AFM) itself. Therefore, Special Condition No. 15 is proposed.

Special conditions may be issued and amended as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.17(a)(1) do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane. Special conditions, as appropriate, are issued in accordance with § 11.49 after public notice as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis in accordance with § 21.17(a)(2).

Conclusion: This action affects only certain unusual or novel design features on one model series of airplanes. It is not a rule of general applicability and affects only the manufacturer who applied to the FAA for approval of these features on the airplanes.

List of Subjects in 14 CFR Parts 21 and 25

Air transportation, Aircraft, Aviation safety, Safety.

The authority citation for these proposed special conditions is as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2); 42 U.S.C. 1857f-10, 4321 et seq.; E.O. 11514; and 49 U.S.C. 106(g).

The Proposed Special Conditions

Accordingly, the Federal Aviation administration (FAA) proposes the following special conditions as part of the type certification basis for the Airbus Industrie Model A340 series airplanes.

1. Operations Without Normal Electrical Power

In lieu of compliance with § 25.1351(d), it must be demonstrated by test, or combination of test and analysis, that the airplane can continue safe flight and landing with inoperative normal engine generated electrical power (electrical power sources excluding the battery and any other standby eletrical sources). The airplane operation should be considered at the critical phase of flight and include the ability to restart the engines and maintain flight for the maximum diversion time capability being certified.

Discussion: The Electronic Flight Control System installations establish the criticality of the electrical power generation and distribution systems, since the loss of all electrical power may be catastrophic to the aircraft.

The A340 fly-by-wire control system requires a continuous source of electrical power in order to maintain the flight control system. The current § 25.1351(d), "Operation Without Normal Electrical Power," requires safe operation in visual flight rules (VFR) conditions for at least five minutes with inoperative normal power. This rule was structured around a traditional design utilizing mechanical control cables for flight control while the crew took time to sort out the electrical failure and was able to re-establish some of the electrical power generation capability.

In order to maintain the same level of safety associated with traditional designs, the A340 design must not be time limited in its operation without the normal source of engine generated electrical power. It should be noted that service experience has shown that the loss of all electrical power which is generated by the airplane's engines is not extremely improbable. Thus, it must be demonstrated that the airplane can continue safe flight and landing with the use of its emergency electrical power systems (batteries, auxiliary power unit, hydraulic motor driven generator, etc.). This emergency electrical power system must be able to power loads that are essential for continued safe flight and landing. Also, the availability of emergency electrical power sources, including any credit taken for APU start reliability, must be validated in a manner acceptable to the FAA.

The emergency electrical power system must be designed to supply:

—Electrical power required for immediate safety, which must continue to operate without the need for crew action following the loss of the normal electrical power system;

—Electrical power required for continued safe-flight and landing;

—Electrical power required to restart the engines.

For compliance purposes:

1. A test demonstration of the loss of normal engine generated power is to be established such that:

a. The failure condition should be assumed to occur during night instrument meteorological conditions (IMC) at the most critical phase of flight relative to the electrical power system design and distribution of equipment loads on the system.

b. After the unrestorable loss of the source of normal electrical power, the airplane engines must be capable of being restarted and operations continued in IMC until visual meteorological conditions (VMC) can be reached. (A reasonable assumption can be made that turbojet transport category airplane will not have to remain in IMC for more than 30 minutes after experiencing the loss of normal electrical power).

c. After 30 minutes of operation in IMC, the airplane should be demonstrated to be capable of continuous safe flight and landing in VMC conditions. The length of time in VMC conditions must be computed based on the maximum flight duration capability for which the airplane is being certified. Consideration for speed reductions resulting from the associated failure must be made.

2. Since the availability of the emergency electrical power system operation is necessary for safe-flight, this system must be available before each flight.

3. The emergency electrical power system must be shown to be

satisfactorily operation in all flight regimes.

2. Electronic Flight Control System (EFCS) Failures and Mode Annunciation

(a) In lieu of compliance with § 25.672(c) of the FAR, it must be shown that after any single failure or combination of failures of the flight control system that are not shown to be extremely improbable—

(1) The airplane, has the following characteristics:

(i) Suitable handling qualities (Refer to proposed FAA Special Condition No. 12, entitled "Flight Characteristics,", paragraph (a) "Flight Characteristic Compliance Determination by Handling Qualities Rating System for EFCS Failure causes."

(ii) Structural margins as identified by proposed FAA Special Condition No. 5, entitled "Interaction of Systems and Structures."

(2) The airplane has suitable handling qualities for continued safe-flight and landing.

(b) In addition to § 25.672 of the FAR—

(1) If the design of the electronic flight control system or any other automatic or power-operated system has submodes of operation that significantly change or degrade the flight or operating characteristics of the airplane, a means must be provided to indicate to the crew the current submode of operation. Crew procedures must be available to ensure safe and proper operation for the annunciated flight control submode; and

(2) The electronically signalled flight control system (including its electrical or hydraulic power supplies), must be designed so that its total loss is shown to be extremely improbable if its loss would prevent continued safe flight and landing.

Discussion: The A340 flight control system requires the use of electronics in order to maintain safe flight and landing. To achieve this level of availability, the system architecture utilizes redundant elements as well as alternative operational modes to deal with losses of equipment and/or signal interfaces. For the case of temporary loss of the electronics, short term safe-flight is anticipated to be maintained through the use of mechanical control of the rudder and pitch trim. Parts 25.671 and 25.672 in Subpart D "Design and Construction," are the pertinent rules covering flight control systems. Section 25.672 contains the design guidelines for automatic and power-operated systems for the aerodynamic control surfaces. This regulation, in essence, states that the design must: (a) Provide a warning for failures in the system which could result in an unsafe condition which requires crew attention (i.e., a "red" condition of § 25.1322); (b) allow for crew counteraction of failures specified in § 25.671(c) either by deactivation or overriding the control movement in a normal sense; (c) that single failures of the system do not impair the handling qualities below a level needed to permit continued safe flight and landing after control system malfunctions associated with (1) all single failures excluding jams, (2) combinations of failures not shown to be extremely improbable excluding jams, and (3) jams in any control position which can be encountered in flight; and (d) the airplane be controllable if all engines fail.

These rules have been considered adequate for stability and automatic flight systems in traditional aircraft designs since those designs did not have submodes of operation (they are either on or off), the aircraft handling qualities were adequate with the systems either on or off, and the systems were not actively participating in load relieving functions. However, with the A340, elements of the automatic system must remain on in order to maintain safe-flight and landing. Therefore, in order to maintain the level of safety provided for by the regulations for these novel and unusual features, special conditions are necessary.

Suitable handling qualities, for the purpose of this special condition are those determined from compliance with Special Condition No. 12(a).

Note that Special Condition No. 12(a) is also proposed in lieu of § 25.672(c).

3. Command Signal Integrity

In addition to compliance with § 25.671 of the FAR, it must be shown that the Electronic Flight Control System (EFCS) signals cannot be altered unintentionally, or that the altered signal characteristics are such that:

(a) Stable gain and phase margins will be maintained for all aerodynamically closed loop flight control systems.

(b) The control authority characteristics will not be degraded to a level that will prevent continued safe-flight and landing.

Failures which would otherwise prevent the airplane from continued safe flight and landing need not be considered, provided they are extremely improbable.

Discussion: The A340 will be using fly-by-wire (FBW) as a means to command and control flight control surface actuators. In the FBW design being presented, command and control of the control surfaces will be achieved by electronic interfaces (AC, DC, or digital data buses). These interfaces involve not only the direct commands to the control surfaces, but all the feedbacks and sensor signals as well.

In fly-by-wire systems, the occurrence of spurious signals coupling into the command signal loop may lead to unacceptable system response, with consequent flight hazards. Malfunctions could cause system instabilities, loss of function or freeze-up of the control actuator. It is imperative that the command signal remain continuous within the sampling interval and no command signal discontinuities shall be observed when sampling successive finite time intervals.

The current regulations, which primarily address hydro-mechanical flight control systems, §§ 25.671 and 25.672, make no specific or implied reference that command and control signals remain unaltered from internal or external interferences. Present designs feature steel cables and pushrods as a means to control hydraulic surface actuators. These designs are inherently immune to electromagnetic spurious signals, unlike the FBW designs which may exhibit a safe degree of immunity only after special attention.

It should be noted that:

—The proposed working "signals cannot be altered unintentionally" is used in the Special Condition to emphasize the need for design measures to protect the FBW control system from the effects of electromagnetic interference (EMI and RF), fluctuations in electrical power, accidental damage caused by contained rotary machinery debris (engine burst is addressed in § 25.903d), environmental factors such as temperature, local fires, and any other spurious signals or disruptions that affect the command signals as they are being transmitted from their source of origin to the Power Control Actuators.

—A gain margin is the minimum change in loop gain, at nominal phase, which results in an instability beyond that allowed as a residual oscillation.

—A phase margin is the minimum change in phase, at a nominal loop gain, which results in an instability.

—"Control authority characteristics" refers to the ability of the aerodynamic control surfaces to move the airplane.

—"Aerodynamically closed loop" are those elements (electrical signals, cables, bellcranks, etc.) which connect sensors and command signals to the Power Control Actuator that moves

the aerodynamic control surface (aileron, spoiler, stabilizer, etc.).

4. Protection from Lightning and Unwanted Effects of High Intensity Radiated Fields (HIRF)

(a) In the absence of specific requirements for protection from the unwanted effects of HIRF, the following apply:

Each airplane system which performs critical functions must be designed and installed to ensure that the operation and operational capabilities of these systems to perform critical functions are not adversely affected when the airplane is exposed to high intensity radiated fields.

Discussion: The Airbus A340 airplanes will utilize electrical and electronic systems which perform critical functions. These systems include the electronic displays, integrated avionics computer, electronic/engine controls, engine overspeed/ overtemperature protection, etc. The existing airworthiness regulations do not contain adequate or appropriate safety standards for the protection from the effects of HIRF which are external to the airplane.

Airplane designs which utilize metal skins and mechanical command and control means have traditionally been shown to be immune from the effects of HIRF energy from ground-based and airborne transmitters. With the trend toward increased power levels from these sources, plus the advent of space and satellite communications, the immunity of the airplane to HIRF energy must be established. No universally accepted guidance to define the maximum energy level in which civilian airplane system installations must be capable of operating safely has been established.

For the purposes of this special condition, the following definition applies:

Critical Functions: Functions whose failure would contribute to or cause a failure condition that would prevent the continued safe flight and landing of the airplane.

At this time the FAA and other airworthiness authorities are unable to precisely define or control the HIRF energy level to which the airplane will be exposed in service. Therefore, the FAA hereby defines two acceptable interim methods for complying with the requirement for protection of systems that perform critical functions.

(1) The applicant may demonstrate that the critical systems, as installed in the airplane, are protected from the external HIRF threate environment defined in the following table:

Frequency	Field strength (V/m)	
	Peak	Average
10 KHz–500 KHz	60	60
500 KHz–2 MHz	80	80
2 MHz–30 MHz	200	200
30 MHz–100 MHz	33	33
100 MHz–200 MHz	150	33
200 MHz–400 MHz	56	33
400 MHz–1 GHz	4020	935
1 GHz–2 GHz	7850	1750
2 GHz–4 GHz	6000	1150
4 GHz–6 GHz	6800	310
6 GHz–8 GHz	3600	668
8 GHz–12 GHz	5100	1270
12 GHz–18 GHz	3500	551
18 GHz–40 GHz	2400	750

or,

(2) The applicant may demonstrate by a laboratory test that the critical system elements and their associated wiring harnesses can withstand a peak electromagnetic field strength of 100 volts per meter, without the benefit of airplane structural shielding, in the frequency range of 10 KHz to 18 GHz.

Compliance Method:

This paragraph describes an acceptable method of showing compliance with the HIRF energy protection requirements.

(1) Compliance Plan: The applicant should present a plan for the cognizant airworthiness authority approval, outlining how compliance with the HIRF energy protection requirements will be attained. This plan should also propose pass/fail criteria for the operation of critical systems in the HIRF environment.

(2) System Criticality: A hazard analysis should be performed by the applicant for approval by the cognizant airworthiness authority to identify electrical and/or electronic systems which perform critical functions. These systems are candidates for the application of HIRF energy protection requirements.

(3) Compliance Verification: Compliance with the HIRF energy protection requirements may be demonstrated by tests, analysis, models, similarity with existing systems, or a combination thereof as acceptable to the cognizant airworthiness authority. Service experience alone is not acceptable since such experience in normal flight operations may not include an exposure to the HIRF environmental condition.

(4) Pass/Fail Criteria: Acceptable system performance is attained by demonstrating that the system under consideration continues to perform its intended function during and after exposure to the required electromagnetic fields. Deviations from system specification may be acceptable depending on an independent assessment of the deviations for each application.

(5) Test Methods and Procedures: RTCA document DO–160C. Section 20, provides information on acceptable test procedures. In addition, the following information on modulation is presented to supplement that found in DO–160C.

Equipment and subsystem radiated susceptibility qualification tests should be conducted by slowly scanning the entire frequency spectrum with an unmodulated signal which produces the required average electric field strength at the equipment under test (EUT) and its wiring. A peak level detector should be used to monitor the peak values of the signal and these values should be recorded at each test point. The EUT should not be damaged by this test and should operate normally for frequencies below 400 MHz. Deviations from normal operation for test frequencies above 400 MHz should be recorded. The test should be repeated with an appropriate modulation applied to the test signal. At each test point, the amplitude of the RF test signal should be adjusted to the peak values recorded during the unmodulated test. The modulation should be selected as the signal most likely to disrupt the operation of the equipment under test based on its design characteristics. For example, flight control systems may be susceptible to 3 Hz square wave modulation while the video signals for CRT displays may be susceptible to 400 Hz sinusoidal modulation. If the worst case modulation is unknown or cannot be determined, default modulations may be used. Suggested default values are a 1KHz sine wave with 80% depth of modulation in the frequency range from 10 KHz to 400 MHz and 1KHz square wave with greater than 90% depth of modulation from 400 MHz to 18 GHz. For frequencies where the unmodulated signal caused deviations from normal operation of the EUT, several different modulating signals with various waveforms and frequencies should be applied.

Modern laboratory equipment may not be able to continually scan the spectrum in the manner of older analog equipment. These units will only generate discrete test frequencies. For such equipment, the number of test points and the dwell time at each test point must be specified. For each decade of the frequency spectrum (a ten times increase in frequency, i.e., 10 KHz to 100 KHz) there should be at least 25 test points, and for the decades from 10 MHz to 100 MHz, and 100 MHz to 1 GHz,

there should be a minimum of 180 test points each. The dwell time at each test point should be at least 0.5 second.

(6) Data Submittal: An accomplishment report should be submitted to the cognizant airworthiness authority showing fulfillment of the HIRF energy protection requirements. This report should contain test results, analysis, and other pertinent data.

(7) Maintenance Requirements: The applicant (manufacturer) must provide maintenance requirements to assure the continued airworthiness of the installed system(s)."

(b) In addition to compliance with the requirements of §§ 25.581 and 25.954 of the FAR concerning lightning protection:

(1) Each electronic system which performs critical functions must be designed and installed to ensure that the operation and operational capabilities of these systems to perform critical functions are not adversely affected when the airplane is exposed to lightning.

(2) Each essential function of new or modified electronic systems or installations must be protected to ensure that the essential function can be recovered in a timely manner after the airplane has been exposed to lightning.

For the purpose of these special conditions, the following definitions apply:

Critical Functions: Functions whose failure would contribute to or cause a failure condition which would prevent the continued safe flight and landing of the airplane.

Essential Functions: Functions whose failure would contribute to or cause a failure condition which would significantly impact the safety of the airplane or the ability of the flight crew to cope with adverse operating conditions.

Discussion: Lightning interaction with an airplane can result in numerous problems. Physical damage (direct effects) and result from a lightning attachment to the airplane. Such damage is characterized by burning, eroding, and blasting, and is the consequence of either the extreme heat loading and accompanying acoustic shock wave or deforming by magnetic forces from the high current component of lightning. An additional effect (indirect effect) results from the fast changing electrical and magnetic fields produced by the high currents of a direct strike. These fields can couple voltage transients into the airplane wiring and subsequently reach the electrical and electronic systems within.

The A340 is being designed with electrical and electronic systems which perform critical and essential functions. These systems may be susceptible to disruption to both the command/response signals and the operational mode logic as a result of electrical and magnetic interference. To ensure that a level of safety is achieved equivalent to that of existing operating airplanes, special conditions will be needed which require that systems performing critical and essential functions, including all dispatchable states, be designed and installed to preclude component damage and interruption of function due to both direct and indirect effects of lightning. To provide a means of compliance to these proposed special conditions, a clarification of the threat definition for lightning is needed.

The following "threat definition", based on FAA Advisory Circular (AC) 20-136, is proposed as a basis to use in demonstrating compliance with the proposed lightning protection special condition:

The lightning current waveforms (Components A, D, and H) defined below, along with the voltage waveforms in AC 20-53A, will provide a consistent and reasonable standard which is acceptable for use in evaluating the effects of lightning on the airplane. These waveforms depict threats that are external to the airplane. How these threats affect the airplane and its systems depend upon the systems installation configuration, materials, shielding, airplane geometry, etc. Therefore, tests (including tests on the completed airplane or an adequate simulation) and/or verified analysis need to be conducted in order to obtain the resultant internal threat to the installed systems.

To evaluate the induced effects to these systems, three considerations are required:

1. First Return Stroke (Severe Strike—Component A, or Restrike—Component D) This external threat needs to be evaluate to obtain the resultant internal threat and to verify that the level is sufficiently below the equipment "hardness" level; then

2. Multiple Stroke Flash: (½ Component D). A lightning strike is often composed of a number of successive strokes, referred to as a multiple-stroke. Although multiple strokes are not necessarily a salient factor in a damage assessment, they can be the primary factor in a system upset analysis. Multiple strokes can induce a sequence of transients over an extended period of time. While a single event upset of input/output signals may not affect systems performance, multiple signal upsets over an extended period of time (2 seconds) may affect the systems under consideration. Repetitive pulse testing and/or analysis needs to be carried out in response to the multiple stroke environment to demonstrate that the system response meets the safety objective. This external multiple stroke environment consists of 24 pulses and is described as a single Component A followed by 23 randomly spaced restrikes of ½ magnitude of Component D (peak amplitude of 50,000 amps). The 23 restrikes are distributed over a period of up to 2 seconds according to the following constraints: (1) the minimum time between subsequent strokes is 10ms, and (2) the maximum time between subsequent strokes is 200ms. An analysis or test needs to be accomplished in order to obtain the resultant internal threat environment for the system under evaluation; and,

3. Multiple Burst: (Component H) In-flight data-gathering projects have shown bursts of multiple, low amplitude, fast rates of rise, short duration pulses accompanying the airplane lightning strike process. While insufficient energy exists in these pulses to cause direct (physical damage) effects, it is possible that indirect effects resulting from this environment may cause upset to some digital processing systems.

The representation of this interference environment is a repetition of low amplitude, high peak rate of rise, double exponential pulses which represent the multiple bursts of current pulses observed in these flight data gathering projects. This component is intended for an analytical (or test) assessment of functional upset of the system. Again, it is required that this component be translated into an internal environmental threat in order to be used. This "Multiple Burst" consists of 24 random sets of 20 strokes each, distributed over a period of 2 seconds. Each set of 20 strokes made up of repetitive Component H waveforms distributed within a period of one millisecond. The minimum time between individual Component H pulses within a burst is 10 microseconds, the maximum is 50 microseconds. The 24 bursts are distributed over a period of up to 2 seconds according to the following constraints: (1) The minimum time between subsequent strokes is 10ms, and (2) the maximum time between subsequent strokes is 200ms. The individual "Multiple Burst" Component H waveform is defined below. The following current waveforms constitute the "Severe Strike" (Component A), "Restrike/Swept/Stoke" (Component D), "Multiple Stoke" (½ Component D), and the "Multiple Burst" (Component H). These components are defined by the following double exponential equation:

S-340999 0012(00)(09-OCT-92-21:06:18)

$i(t) = I_o (e^{-at} - e^{-bt})$ where:

t = time in seconds,
i = current in amperes, and

	Severe stroke (component A)	Restrike (component D)	Multiple stroke (⅓ component D)	Multiple burst (component H)
I_o(a) =	218,810	109,405	54,703	10,572
a(s^{-1}) =	11,354	22,708	22,706	187,191
b(s^{-1}) =	647,265	1,294,530	1,294,530	19,105,100

This equation produces the following characteristics:

i_{peak} =	200KA	100KA	50KA	10KA
$(di/dT)_{max}$ (A/S)t=0+ sec =	1.4×10^{11}	1.4×10^{11}	0.7×10^{11}	2×10^{11}
di/dt (A/S) =	1.0×10^{11}@t = .5 μs	1.0×10^{11}@t = .25 μs	0.5×10^{11}@t = .25 μs	
Action Integral (A^2s) =	2.0×10^6	$.25 \times 10^6$	$.0625 \times 10^6$	

5. Interaction of Systems and Structures

(a) *General.* For an airplane equipped with flight control systems, load alleviation systems or flutter control systems, which directly or as a result of a failure or malfunction affect its structural performance, the influence of these systems and their failure conditions shall be taken into account in showing compliance with subparts C and D of part 25 of the Federal Aviation Regulations (FAR).

(b) *System fully operative.* With the system fully operative, the following apply:

(1) Limit loads must be derived in all normal operating configurations of the systems from all the deterministic limit conditions specified in subpart C, taking into account any special behavior of such systems or associated functions or any effect on the structural performance of the airplane which may occur up to the limit loads. In particular, any significant nonlinearity (rate of displacement of control surface, thresholds or any other system non-linearities) must be accounted for in a realistic or conservative way when deriving limit loads from limit conditions.

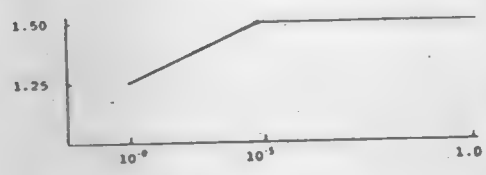
(2) The airplane must meet the strength requirements of part 25 (static strength, residual strength), using the specified factors to derive ultimate loads from the limit loads defined above. The effect of non-linearities must be investigated beyond limit conditions to ensure the behavior of the systems presents no anomaly compared to the behavior below limit conditions. However, conditions beyond limit conditions need not be considered when it can be shown that the airplane has design features that make it impossible to exceed those limit conditions.

(3) The airplane must meet the aeroelastic stability requirements of § 25.629.

(c) *System in the failure condition.* For any system failure condition not shown to be extremely improbable, the following apply:

(1) *At the time of occurrence.* Starting from 1–g level flight conditions, a realistic scenario, including pilot corrective actions, must be established to determine the loads occurring at the time of failure and immediately after failure. The airplane must be able to withstand these loads, multiplied by an appropriate factor of safety, related to the probability of occurrence of the failure. These loads should be considered as ultimate loads for this evaluation. The factor of safety is defined as follows:

Factor of Safety at Time of Occurrence



Probability of occurrence (per hour)

(i) The loads must also be used in the damage tolerance evaluation required by § 25.571(b) if the failure condition is probable. The loads may be considered as ultimate loads for the damage tolerant evaluation.

(ii) Freedom from flutter and divergence must be shown at speeds up to V_D or $1.15V_C$, whichever is greater. However, at altitudes where the speed is limited by Mach number, compliance need be shown only up to M_D, as defined by § 25.335(b). For failure conditions which result in speed increases beyond V_C/M_C, freedom from flutter and divergence must be shown at increased speeds, so that the above margins are maintained.

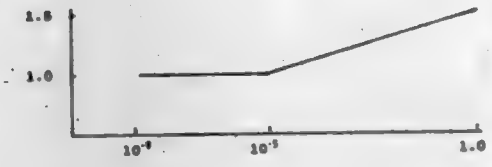
(iii) Notwithstanding subparagraph (1) of this paragraph, failures of the system which result in forced structural vibrations (oscillatory failures) must not produce peak loads that could result in permanent deformation of primary structure.

(2) *For the continuation of the flight.* For the airplane, in the failed configuration and considering any appropriate flight limitations, the following apply:

(i) Static and residual strength must be determined for loads induced by the failure condition if the loads could continue to the end of the flight. These loads must be combined with the deterministic limit load conditions specified in subpart C.

(ii) For static strength substantiation, each part of the structure must be able to withstand the loads in subparagraph (2)(i) of this paragraph multiplied by a safety factor depending on the probability of being in this failure state. The factor of safety is defined as follows:

Factor of safety for Continuation of Flight

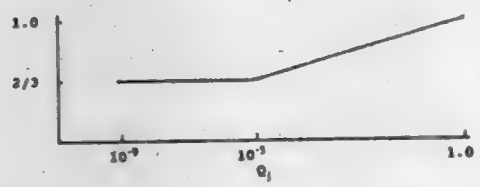


Q_j = Probability of being in failure state j
$Q_j = T_j * P_j$ where:
T_j = Average time spent in failure condition
P_j = Probability of occurrence of failure mode

Note: If P_j is greater than 10^{-4} per flight hour then a safety factor of 1.5 must be used.

(iii) For residual strength substantiation as defined in § 25.571(b), for structures also affected by failure of the system and with damage in combination with the system failure, a reduction factor may be applied to the residual strength loads of § 25.571(b). However, the residual strength level must not be less than the 1-g flight load combined with the loads introduced by the failure condition plus two-thirds of the load increments of the conditions specified in § 25.571(b) in both positive and negative directions (if appropriate). The reduction factor is defined as follows:

Residual Strength Reduction Factor

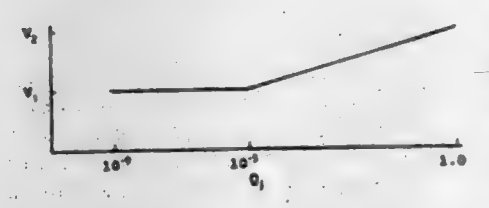


$Q_j = T_j * P_j$ where:
T_j = Average time spent in failure condition
P_j = Probability of occurrence of failure mode

Note: If P_j is greater than 10^{-3} per flight hour then a safety factor of 1.0 must be used.

(iv) Freedom from flutter and divergence must be shown up to a speed determined by the following figure:

Flutter Clearance Speed



$V_1 = V_D$ or 1.15 V_c whichever is greater.
V_2 = Flutter clearance speed required for normal (unfailed) conditions by § 25.629.

$Q_j = T_j * P_j K$ where:
T_j = Average time spent in failure condition
P_j = Probability of occurrence of failure mode.

Note: If P_j is greater than 10^{-3} then the flutter clearance speed must not be less than V_2.

(v) Freedom from flutter and divergence must also be shown up to V_1, in the above figure, for any probable system failure condition combined with any damage required or selected for investigation by § 25.571(b).

(vi) If the time likely to be spent in the failure condition is not small compared to the damage propagation period, or if the loads induced by the failure condition may have a significant influence on the damage propagation, then the effects of the particular failure condition must be addressed and the corresponding inspection intervals adjusted to adequately cover this situation.

(vii) If the mission analysis method is used to account for continuous turbulence, all the systems failure conditions associated with their probability must be accounted for in a rational or conservative manner in order to ensure that the probability of exceeding the limit load is not higher than the prescribed value of the current requirement.

(d) *Warning considerations.* For system failure detection and warning, the following apply:

(1) Before flight, the system must be checked for failure conditions, not extremely improbable, that degrade the structural capability below the level as intended in paragraph (b) of this special condition. The crew must be made aware of these failures, if they exist, before flight.

(2) An evaluation must be made of the necessity to signal, during the flight, the existence of any failure condition which could significantly affect the structural capability of the airplane and for which the associated reduction in airworthiness can be minimized by suitable flight limitations. The assessment of the need for such signals must be carried out in a manner consistent with the approved general warning philosophy for the airplane.

(3) During flight, any failure condition, not shown to be extremely improbable, in which the safety factor existing between the airplane strength capability and loads induced by the deterministic limit conditions of subpart C of part 25 is reduced to 1.3 or less must be signaled to the crew if appropriate procedures and limitations can be provided so that the crew can take action to minimize the associated reduction in airworthiness during the remainder of the flight.

(e) *Dispatch with failure conditions.* If the airplane is to be knowingly dispatched in a system failure condition that reduces the structural performance, then operational limitations must be provided whose effects combined with those of the failure condition allow the airplane to meet the structural requirements as described in paragraph (b) of this special condition. Subsequent system failures must also be considered.

Discussion

This special condition is intended to be applicable to flight controls, load alleviation systems and flutter control systems. The criteria provided by the special condition only address the direct structural consequences of the systems responses and performances and therefore cannot be considered in isolation but should be included into the overall safety evaluation of the airplane. The presentation of these criteria may in some instances duplicate standards already established for this evaluation. The criteria are applicable to structure, the failure of which could prevent continued safe flight and landing.

The following definitions are applicable to this special condition.

1. Structural performance: Capability of the airplane to meet the requirements of Part 25.

2. Flight limitations: Limitations which can be applied to the airplane flight conditions following an inflight occurrence and which are included in the flight manual (e.g., speed limitations, avoidance of severe weather conditions, etc.).

3. Operations limitations: Limitations, including flight limitations, which can be applied to the airplane operating conditions before dispatch (e.g., payload limitations).

4. Probabilistic terms: The probabilistic terms (probable, improbable, extremely improbable) used in this special condition should be understood as defined in AC 25.1309–1.

5. Failure condition: The term failure condition is defined in AC 25.1309–1, however this special condition applies only to system failure conditions which have a direct impact on the structural performance of the airplane (e.g., failure conditions which induce loads or change the response of the airplane to inputs such as gusts or pilot actions).

6. Design Dive Speed: In lieu of compliance with § 25.335(b)(1) of the FAR, if the flight control system includes functions which act automatically to initiate recovery before the end of the 20 second period specified in § 25.335(b)(1) the greater of the speeds resulting from the following conditions may be used:

(a) From an initial condition of stabilized flight at V_C/M_C, the airplane is upset so as to take up a new flight path 7.5 degrees below the initial path. Control application, up to full authority, is made to try to maintain this new flight path. Twenty seconds after initiating the upset, manual recovery is made at a load factor of 1.5g (0.5g acceleration increment), or such greater load factor that is automatically applied by the system with the pilot's pitch control neutral. The speed increase occurring in this maneuver may be calculated, if reliable or conservative aerodynamic data are used. Power as specified in § 25.175(b)(1)(iv) of the FAR, is assumed until recovery is made, at which time power reduction and the use of pilot controlled drag devices may be assumed.

(b) From a speed below V_C/M_C, with power to maintain stabilized level flight at this speed, the airplane is upset so as to accelerate through V_C/M_C, at a flight path 15 degrees below the initial path (or at the steepest nose down attitude that the system will permit with full control authority if less than 15 degrees). The pilots controls may be in the neutral position after reaching V_C/M_C and before recovery is initiated.

(c) Recovery may be initiated three seconds after operation of high speed warning system by application of a load of 1.5g (0.5g acceleration increment), or such greater load factor that is automatically applied by the system with the pilot's pitch control neutral. Power may be reduced simultaneously. All other means of decelerating the airplane, the use of which is authorized up to the highest speed reached in this maneuver, may be used. The interval between successive pilot actions must not be less than one second.

Discussion

This special condition relates to the structural design dive speed which is established at a sufficient margin above the operating speed to provide structural integrity in the event of inadvertent overspeed conditions. this special condition establishes criteria for determining the minimum value of the design dive speed taking into account the automatic operation of speed protection systems.

7. Design Maneuver Requirements

(a) In lieu of compliance with § 25.331(c)(1) of the FAR, the airplane is assumed to be flying in steady level flight (point A1 within the maneuvering envelope of § 25.333(b)) and, except as limited by pilot effort in accordance with Special Condition No. 9 concerning pilot effort forces, the cockpit pitching control device is suddenly moved to obtain extreme positive pitching acceleration (nose up). In defining the tail load condition, the response of the airplane must be taken into account. Airplane loads which occur subsequent to the point at which the normal acceleration at the center of gravity exceeds the maximum positive limit maneuvering factor, n, need not be considered.

(b) In addition to the requirements of § 25.331(c), it must be established that pitch maneuver loads induced by the system itself (e.g. abrupt changes in orders made possible by electrical rather than mechanical combination of different inputs) are acceptably accounted for.

(c) In lieu of compliance with § 25.349(a) of the FAR, the following conditions, speeds, spoiler and aileron deflections (except as the deflections may be limited by pilot effort) must be considered in combination with an airplane load factor of zero and of two-thirds of the positive maneuvering factor used in design. In determining the required aileron and spoiler deflections, the torsional flexibility of the wing must be considered in accordance with § 25.301(b).

(1) Conditions corresponding to steady rolling velocities must be investigated. In addition, conditions corresponding to maximum angular acceleration must be investigated. For the angular acceleration conditions, zero rolling velocity may be assumed in the absence of a rational time history investigation of the maneuver.

(2) AT V_a, sudden deflection of the cockpit roll control up to the limit is assumed. The position of the cockpit roll control must be maintained until a steady roll rate is achieved and then must be returned suddenly to the neutral position.

(3) AT V_c, the cockpit roll control must be moved suddenly and maintained so as to achieve a rate of roll not less than that obtained in paragraph (2).

(4) AT V_d, the cockpit roll control must be moved suddenly and maintained so as to achieve a rate of roll not less than one third of that obtained in paragraph (2) of this paragraph.

(5) It must also be established that roll maneuver loads induced by the system itself (i.e. abrupt changes in orders made possible rather than mechanical combination of different inputs) are acceptably accounted for.

(d) In lieu of compliance with § 25.351, the airplane must be designed for loads resulting from the conditions specificed in sub-paragraphs (a) and (b) of this paragraph. Unbalanced aerodynamic moments about the center of gravity must be reacted in a rational or conservative manner considering the principal masses furnishing the reacting inertia forces. Physical limitations of the aircraft from the cockpit yaw control device to the control surface deflection, such as control stop position, maximum power and displacement rate of the servo controls, and control law limiters may be taken into account.

(1) Maneuvering. At speeds from V_{mc} to V_a, the following maneuvers must be considered. In computing the tail loads, the yawing velocity may be assumed to be zero:

(i) With the airplane in unaccelerated flight at zero yaw, it is assumed that the cockpit yaw control device (pedal) is suddenly displaced (with critical rate) to the maximum deflection, as limited by the stops.

(ii) With the cockpit yaw control device (pedal) deflected as specified in sub-paragraph (1) of this paragraph, it is assumed that the airplane yaws to the resulting side slip angle (beyond the static side slip angle).

(iii) With the airplane yawed to the static sideslip angle with the cockpit yaw control deflected as in sub-paragraph (1) of this paragraph, it is assumed that the cockpit yaw control device is returned to neutral.

8. Limit Pilot Forces

For airplanes equipped with stick controls designed for forces to be applied by one wrist and not arms, the limit pilot forces are as follows:

(a) For all components between and including the handle and its control stops.

Pitch	Roll
Nose Up 200 lbf..... Nose down 200 lbf.....	Nose left 100 lbf. Nose right 100 lbf.

(b) For all other components of the side stick control assembly, but excluding the internal components of the electrical sensor assemblies, to avoid damage as a result of an in-flight JAM.

Pitch	Roll
Nose Up 125 lbf..... Nose down 125 lbf.....	Nose left 50 lbf. Nose right 50 lbf

9. Tailplane Tank Emergency Landing Loads

In addition to the requirements of § 25.963(d), the following applies:

(a) The tailplane tank in the horizontal stabilizer must be able to resist rupture and to retain fuel, under the inertia forces prescribed for the emergency landing conditions in § 25.561.

(b) For the side load condition the quantity of fuel need not exceed 85% when determining pressure loads outside the fuselage contour for the 3g lateral direction.

10. *Limit Engine Torque*

In lieu of § 25.361(b) the following special condition is proposed:

For Turbine engine and auxiliary power unit installations, the mounts and local supporting structure must be designed to withstand each of the following:

(a) The maximum limit torque load imposed by;

(1) Sudden deceleration due to a malfunction which could result in a temporary loss of power or thrust capability, and could cause a shut down due to vibrations, and

(2) The maximum acceleration of the engine or auxiliary power unit.

(b) The maximum torque load, considered as ultimate, imposed by sudden engine or auxiliary power unit stoppage due to a structural failure including fan blade failure.

(c) The load condition defined in paragraph (b) of this special condition is also assumed to act on adjacent airframe structure, such as the wing and fuselage. This load condition is multiplied by a factor of 1.25 to obtain ultimate loads when the load is applied to the wing and fuselage structure.

11. *Ground Load Conditions for Center Landing Gear*

Notwithstanding § 25.477, the requirements of §§ 25.473 and 25.479 through 25.485 apply except as noted:

(a) In addition to the requirements of § 25.473, the landing should be considered on a level runway and on a runway having a convex upward shape that may be approximated by a slope of 1.5 percent with the horizontal at main landing gears stations. The maximum loads determined from these two conditions must be applied to each main landing gear and to the central landing gear.

(b) The requirements of § 25.483 apply and, in addition, the condition represented by the following figure also applies:

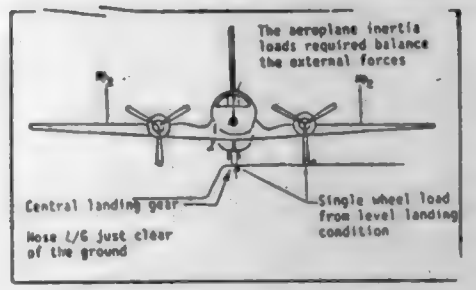


Figure 1. Center gear landing condition

(c) In lieu of the requirements of § 25.485, the following apply:

(1) The airplane is considered to be in the level attitude with only the main and central wheels contacting the ground.

(2) Vertical reactions of one-half of the maximum vertical reaction obtained at each main and central gear in the level landing conditions should be considered. The vertical loads must be combined with side loads that for the main gear are 0.8 of the vertical reaction (on one side) acting inward and 0.6 of the vertical reaction (on the other side) acting outward, and for the central gear are 0.7 of the vertical reaction acting in the same direction as main gear side loads. (Drag load=0)

(d) In lieu of § 25.489 "Ground handling conditions," the following applies: The airplane should be considered to be on a level runway and on a runway having a convex upward shape that may be approximated by a slope of 1.5 percent with the horizontal at main landing gears stations. The ground reactions must be distributed to the individual landing gear units in a rational or conservative manner (zero lift, shock struts in the static position).

(e) In lieu of the requirements of § 25.503, the following apply:

(1) The airplane is assumed to pivot about one of the outer main gears with the brakes locked on the selected gear. The limit vertical load factor must be 1.0 and the coefficient of friction must be 0.8.

(2) The airplane is assumed to be in static equilibrium, with the loads being applied at the ground contact points.

(3) All of the main gear units must be designed for the scrubbing or torsion loads, or both, induced by pivoting during ground maneuvers produced by;

(i) Towing at the nose gear, no brakes applied, and

(ii) Application of symmetrical or unsymmetrical forward thrust to aid pivoting and with or without braking on the outside main gear closest to the pivot center.

(f) The following applies to the central gear in lieu of § 25.723 "Shock absorption tests":

(1) The central landing gear should not fail in a test demonstrating its reserve energy absorption capacity at design landing weight assuming airplane lift no greater than the airplane weight acting during an impact simulating:

(i) A center gear descent velocity of 120 percent of the maximum aircraft descent velocity at the time of central landing gear ground contact, or

(ii) A 12 fps airplane landing impact taking into account both main and central gear acting during the impact, whichever is more critical.

12. *Flight Characteristics*

(a) *Flight Characteristic Compliance Determination by Handling Qualities Rating System for EFCS Failure Cases.* In lieu of compliance with § 25.672(c) and affected paragraphs of subpart B and affected paragraphs of subpart B of the FAR, a handling qualities rating system will be used for evaluation of EFCS configurations resulting from single and multiple failures not shown to be extremely improbable. The handling qualities ratings are:

(1) Satisfactory: Full performance criteria can be met with routine pilot effort and attention;

(2) Adequate: Adequate for continued safe flight and landing; full or specified reduced performance can be met, but with heightened pilot effort and attention.

(3) Controllable: Inadequate for continued safe flight and landing, but controllable for return to a safe flight condition, safe flight envelop and/or reconfiguration so that the handling qualities are at least adequate. Handling qualities will be allowed to progressively vary with failure state, atmospheric disturbance level, and flight envelope. Specifically within the normal flight envelope, the pilot-rated handling qualities must be satisfactory/adequate in moderate atmospheric disturbance for probable failures, and must not be less than adequate in light atmospheric disturbance for improbable failures.

(b) *Longitudinal Stability.* In lieu of compliance with the requirements of §§ 25.171, 25.173, 25.175, and 25.181(a) of the FAR, the airplane must be shown to have suitable dynamic and static longitudinal stability in any condition normally encountered in service, including the effects of atmospheric disturbance.

(c) *Lateral-Directional Stability.* (1) In lieu of compliance with § 25.171 of the FAR, the airplane must be shown to have suitable static lateral-directional

stability in any condition normally encountered in service, including the effects of atmospheric disturbance.

(2) In lieu of compliance with §§ 25.177(b) and 24.177(c), the following applies: In straight, steady, sideslip (unaccelerated forward slips) the rudder control movements and forces must be substantially proportional to the angle of sideslip, and the factor of proportionality must lie between limits found necessary for safe operation throughout the range of sideslip angles appropriate to the operation of the airplane. At greater angles, up to the angle at which full rudder control is used or a rudder pedal force of 180 pounds is obtained, the rudder pedal forces may not reverse and increased rudder deflection must produce increased angles of sideslip. Unless the airplane has suitable sideslip indication, there must be enough bank and lateral control deflection and force accompanying sideslipping to clearly indicate any departure from steady unyawed flight.

(d) *Control Surface Awareness.* In addition to compliance with §§ 25.143, 25.671, and 25.672 of the FAR, when a flight condition exists where, without being commanded by the crew, control surfaces are coming so close to their limits that return to the normal flight envelop and/or continuation of safe flight requires a specific crew action, a suitable flight control position annunciation shall be provided to the crew, unless other existing indications are found adequate or sufficient to prompt that action.

Note: The term suitable also indicates an appropriate balance between nuisance and necessary operation.

13. *Flight Envelope Protection*

In the absence of specific requirements for flight envelope protection, the following apply:

(a) *General Limiting Requirements*—(1) Normal Operation. (i) Onset characteristics of each envelope protection feature must be smooth, appropriate to the phase of flight and type of maneuver, and not in conflict with the ability of the pilot to satisfactorily change airplane flight path, speed, or attitude as needed.

(ii) Limited values of protected flight parameters (and if applicable, associated warning thresholds) must be compatible with:

(A) Airplane structural limits;

(B) Required safe and controllable maneuvering of the airplane; and

(C) Margin to critical conditions. Unsafe flight characteristics/conditions must not result in dynamic maneuvering, airframe and system tolerances (both manufacturing and in-service), and non-steady atmospheric conditions, in any appropriate combination and phase of flight, can produce a limited flight parameter beyond the nominal design limit value.

(iii) The airplane must be responsive to intentional dynamic maneuvering to within a suitable range of the parameter limit. Dynamic characteristics such as damping and overshoot must also be appropriate for the flight maneuver and limit parameter in question.

(iv) When simultaneous envelope limiting is engaged, adverse coupling or adverse priority must not result.

(2) *Failure States.* Electronic flight control system (including sensor) failures must not result in a condition where a parameter is limited to such a reduced value that safe and controllable maneuvering is no longer available. The flightcrew must be alerted by suitable means if any change in envelope limiting or maneuverability is produced by single or multiple failures of the EFCS not shown to be extremely improbable.

(3) *Abnormal Attitudes.* In case of abnormal attitude or excursion of any other flight parameters outside the protected flight boundaries, the operation of the EFCS, including the automatic protection functions, must not hinder airplane recovery.

(b) *Angle-of-Attack Limiting*—(1) Part 1, § 1.2, Abbreviations and Symbols.

(i) In lieu of the definition of V_s in § 1.2, the following applies in subparts B, E, F, and G of part 25 of the FAR: "V_{SR} means the reference stalling speed."

(ii) In lieu of the definition of V_{SO} given in § 1.2, the following applies: "V_{SRO} means the reference stalling speed in the landing configuration."

(iii) In lieu of the definition of V_{SI} given in § 1.2, the following applies: "V_{SRI} means the reference stalling speed in a specific configuration."

(iv) In addition to the definitions given, the following also apply:

"V_{REF} means the steady landing approach speed."

"V_{FTO} means final takeoff speed."

"V_{SW} means the speed at which onset of natural or artificial stall warning occurs."

(2) Part 25—Airworthiness Standards: Transport Category Airplanes. (i) In lieu of compliance with § 25.21(b), the following applies: "The flying qualities will be evaluated at speeds based upon the forward CG stalling speed."

(ii) In lieu of compliance with § 25.103(a), the following applies: "V_{SR} is a calibrated airspeed as defined in paragraph (c) of this section. V_{SR} is determined with—"

(iii) In lieu of compliance with § 25.103(a)(1), the following applies: "Stalling speed may be determined at not greater than IDLE thrust. (Note: automatic go-around thrust application feature must be disengaged)."

(iv) In lieu of compliance with § 25.103(a)(1), the following applies: "Engines idling, or, if that resultant thrust causes an appreciable decrease in stalling speed, not more than zero thrust at the stall speed;"

(v) Compliance with § 25.103(a)(2) is not required.

(vi) In lieu of compliance with 25.103(a)(3), the following applies: "The airplane in other respects (such as flaps and landing gear) in the condition existing in the test in which V_{SR} is being used;"

(vii) In lieu of compliance with § 25.103(a)(4), renumber the old 25.103(a)(3) and change "V_S" to "V_{SR}."

(viii) In lieu of compliance with § 25.103(a)(5), the following applies: "The center of gravity position that results in the highest value of reference stall speed; and"

(ix) In addition to compliance with § 25.103(a)(5), the following also applies: "The airplane trimmed for straight flight at a speed selected by the applicant, but not less than 1.13 V_{SR} and not greater than 1.30V_{SR}."

(x) In lieu of compliance with § 25.103(b), the following applies: "Starting from the stabilized trim condition, apply elevator control to decelerate the airplane so that the speed reduction does not exceed one knot per second."

(xi) Compliance with §§ 25.103 (b)(1) and (b)(2) is not required.

(xii) In lieu of compliance with § 25.103(c), the following applies: "The reference stall speed, V_{SR}, may not be less than a 1-g stall speed, which is a calibrated airspeed determined in the stalling maneuver and expressed as: $V_{SR}=V_{CLMAX}/\sqrt{n_{ZW}}$ where $-V_{CLMAX}$=Speed occurring when lift coefficient is first a maximum; and n_{ZW}=Flight path normal load factor (not greater than 1.0) at V_{CLMAX}."

(xiii) In lieu of compliance with § 25.107(b)(1), the following applies: "1.13V_{SR} for * * *"

(xiv) In lieu of compliance with § 25.107(b)(2), the following applies: "1.08V_{SR}."

(xv) In addition to compliance with § 25.107(c)(3), the following also applies: "A speed that provides the maneuvering capability specified in § 25.143(f)."

(xvi) In addition to compliance with § 25.107(f), the following also applies: "V_{FTO}, in terms of calibrated airspeed, must be selected by the applicant to

provide at least the gradient of climb required by § 25.121(c), but may not be less than—

(A) 1.18V_{SR}; and

(B) A speed which provides the maneuvering capability specified in § 25.143(f)."

Note: Unless AOA protection system production tolerances are acceptably small, so as to produce insignificant changes in performance determinations, the flight test settings for features such as Alpha floor and stall warning should be set at the low AOA tolerance limit; high AOA tolerance limits should be used for characteristics evaluations.

(xvii) In lieu of compliance with § 25.111(a) the following applies: "V_{FTO} is reached."

(xviii) In lieu of compliance with § 25.119(b), the following applies: "A climb speed of not more than V_{REF}."

(xix) In lieu of compliance with § 25.121(c) the following applies: "For four-engine airplanes, at V_{FTO} and with—"

(xx) In lieu of compliance with § 25.121(d), the following applies: "In a configuration corresponding to the normal all-engines-operating procedure in which V_{SR} for this configuration does not exceed 110 percent of the V_{SR} for the related all-engines-operating landing configuration, the steady gradient of climb may not be less than 2.1 percent for two-engine airplanes, 2.4 percent for three-engine airplanes, and 2.7 percent for four-engine airplane, with—"

(xxi) In lieu of compliance with § 25.121(d)(3), the following applies: "but not more than 1.4V_{SR}; and" In addition to compliance with § 25.121(d), the following also applies: "Landing gear retracted."

(xxii) In lieu of compliance with § 25.125(a)(2), the following applies: "A stabilized approach, with a calibrated airspeed of not less than V_{REF}, must be maintained down to the 50-foot height. V_{REF} may not be less than:

(A) 1.23 V_{SRO}, and

(B) a speed that provides the maneuvering capability specified in § 25.143(f)."

(xxiii) In addition to compliance with the requirements of § 25.143, the following also apply: "The maneuvering capabilities in a constant speed coordinated turn, as specified in the following table, must be free of stall warning, alpha floor, or other characteristics that might interfere with normal maneuvering. "The airplane must be shown to have suitable flight-path stability and control characteristics both in normal flight and when wind shear is encountered in a takeoff or landing configuration. This may be shown by an appropriate combination of simulation and flight test."

Note: Suitable characteristics are those no worse than conventionally controlled aircraft in similar conditions.

(xxiv) In addition to the requirements to § 25.143, the following also applies: "Operation of automatic features (such as significant EFCS stability or control changes) must not adversely affect normal flight operations, including during expected levels of atmospheric disturbance."

Configuration	Speed	Maneuvering bank angle	Thrust representative of
Takeoff.....	V_2	30° (stall warning).	Asymmetric.
		25° (alpha floor).	[1] Wat-limited.
Takeoff.....	V_2+XX	40°.....	All-engines-operating [2]Climb.
Enroute....	V_{FTO}	40°.....	Asymmetric Wat-limited.
Landing..::	V_{REF}	40°	Symmetric for −3° flight path angle.

(A) A combination of Weight, Altitude and Temperature (WAT) such that the thrust or power setting produces the minimum climb gradient specified in 25.121 for the flight condition.

(B) Airspeed approved for all-engines-operating initial climb.

(C) That thrust or power setting which, in the event of failure of the critical engine and without any crew action to adjust the thrust or power of the remaining engines, would result in the thrust or power specified for the takeoff condition at V_2, or any lesser thrust or power setting that is used for all-engines-operating initial climb procedures.

(xxv) In lieu of compliance with § 25.145(a), and (a)(1), the following applies: "It must be possible at any speed between the trim speed prescribed in § 25.103(a)(6) and the minimum speed obtained in conducting a stalling maneuver to pitch the nose downward so that the acceleration to this selected trim speed is prompt with—

(A) The airplane trimmed at the speed prescribed in § 25.103(a)(6);"

(xxvi) In lieu of the speeds given in the following part 25 regulations, comply with speeds as follows:

§ 25.145(b)(1)–(4), 1.3V_{SR1}, in lieu of 1.4V_{S1}.

§ 25.145(b)(1), 30 percent, in lieu of 40 percent.

§ 25.145(b)(1), reference stall speed, in lieu of stalling speed.

§ 25.145(b)(6), 1.3V_{SR1}, in lieu of 1.4V_{S1}.

§ 25.145(b)(6), V_{SW}, in lieu of 1.1V_{S1}.

§ 25.145(b)(6), 1.6V_{SR1}, in lieu of 1.7V_{S1}.

§ 25.145(c), 1.08V_{SR1}, in lieu of 1.1V_{S1}.

§ 25.145(c), 1.13V_{SR1}, in lieu of 1.2V_{S1}.

§§ 25.147(a), (a)(2), (c), (d), 1.3V_{SR1}, in lieu of 1.4V_{S1}.

§ 25.149(c), 1.13V_{SR}, in lieu of 1.2V_{S1}.

§§ 25.16(b), (c)(1), (c)(2), (c)(3), (d), 1.3V_{SR1}, in lieu of 1.4V_{S1}.

§ 25.161(e)(3), 0.013V_{SRO}^2, in lieu of 0.013VSO^2.

§§ 25.175(a)(2), (b)(1), (b)(2), (b)(3), (c)(4), 1.3V_{SR1}, in lieu of 1.4V_{S1}.

§ 25.175(b)(2)(ii), $(V_{MO}+1.3V_{SR1})/2$, in lieu of $(V_{MO}+1.4V_{S1})/2$.

§ 25.175(c), V_{SW} and 1.7V_{SR1}, in lieu of 1.1V_{S1} and 1.8V_{S1}.

§ 25.175(d), V_{SW} and 1.7V_{SRO} in lieu of 1.1V_{SO} and 1.3V_{SO}.

§ 25.175(d)(5), 1.3V_{SRO} in lieu of 1.4V_{SO}.

Note: The stability requirements of §§ 25.173 and 25.175 are further amended by the Special Condition associated with longitudinal stability.

§§ 25.177(a), (b)(1), 1.13V_{SR1} in lieu of 1.2V_{S1}.

§ 25.181(a), (b) 1.13V_{SR} in lieu of 1.2V_S.

§ 25.201(a)(2), 1.5V_{SR1} in lieu of 1.6V_{S1} and,V_{SR1} in lieu of V_{S1}, and reference stall speeds in lieu of stalling speed.

(xxvii) In lieu of compliance with § 25.207(a), the following applies: "With the AOA limiter operating normally, stall warning is not required. For failure states with the AOA limiter inoperative, sufficient stall warning margin must be provided in the following straight and turning flight conditions:

(A) Stall-free characteristics must be shown in power-off, straight ahead stall approaches to a speed five percent (but not less than five knots) below V_{SW}.

(B) Stall-free characteristics must be shown in turning flight stall approaches, at entry rates up to three knots per second, when recovery is initiated not less than one second after the onset of stall warning."

(xxviii) The requirements of § 25.207(c) are not applicable.

(xxix) In lieu of compliance with the requirements of §§ 25.233(a) and 25.237(a), (b)(1), and (b)(2), the following applies: "0.2V_{SRO} in lieu of 0.2V_{SO}."

(xxx) In lieu of the requirements of § 25.735(f)(2), the following applies: "$KE=0.0443(WV^2/N)$"; Change the V definition to read: "$V=V_{REF}/1.3$" and: "V_{REF} = Airplane reference landing speed, in knots, at the maximum design landing weight and the lowest authorized landing flap setting for that weight at sea level; and"

(xxxi) In lieu of compliance with § 25.735(g), the following applies: "The minimum speed rating of each main wheel-brake assembly (that is, the initial speed used in the dynamometer tests) may not be more than the V used in the determination of kinetic energy in accordance with paragraph (f) of this section, assuming * * *"

(xxxii) In lieu of the speeds given in the following Part 25 regulations, comply with speeds as follows:

§ 25.773(b)(1)(i), $1.5V_{SR1}$ in lieu of $1.6V_{S1}$.
§ 25.1001(c)(1) and (c)(3), $1.3V_{SR1}$ in lieu of $1.4V_{S1}$.
§ 25.1323(c)(1), $1.23V_{SR1}$ in lieu of $1.3V_{S1}$.
§ 25.1323(c)(2), $1.23V_{SR0}$ in lieu of $1.3V_{S0}$.
§ 25.1325(e), $1.23V_{SR0}$ in lieu of $1.3V_{S0}$, and $1.7V_{SR1}$ in lieu of $1.8V_{S1}$.

(3) *Part 36—Noise Standards: Aircraft Type and Airworthiness Certification*

Note: It has been determined that the following is equivalent for the purposes of FAR part 36 certification.

(i) In lieu of the requirements of Appendix C, Sec. C36.9(e)(1), the following applies: "V_{REF}=10 knots."

(c) *Normal Load Factor (g) Limiting.* In addition to compliance with the requirements of § 25.143, the following apply:

(1) The positive limiting load factor must not be less than 2.5g (2.0g with high-lift devices extended) for the EFCS normal state.

(2) The negative limiting load factor must be equal to or more negative than minus 0.5g (0.0g with high lift devices extended) for the EFCS normal state.

Discussion

This allows an incremental plus or minus 1.5g for maneuvering flaps up, and plus or minus 1.0g flaps extended. This Special Condition does not impose an upper bound for the limiter, nor does it require that the limiter exist. If the limit is set at a value beyond the structural design limit maneuvering load factor "n" of §§ 25.333(b) and 25.337(b) and (c), there should be a very positive tactile feel built into the controller and obvious to the pilot that serves as a deterrent to inadvertently exceeding the structural limit.

(d) *High-speed Limiting.* In addition to compliance with the requirements of § 25.143 of the FAR, the following applies: "Operation of the high-speed limiter during all routine and descent procedure flight must not impede normal attainment of speeds up to overspeed warning."

(e) *Pitch and Roll Limiting.* In addition to compliance with the requirements of § 25.143 of the FAR, the following applies: "Operation of the pitch and roll limiter must not:

(1) Impede normal maneuvering for pitch angles up to the maximum required for normal maneuvering, including a normal all-engine takeoff, plus a suitable margin to allow for satisfactory speed control.

(2) Restrict or prevent attainment of roll angles up to 65 degrees or pitch attitude necessary for emergency maneuvering."

14. *Side Stick Controllers*

(a) *Pilot Strength.* In lieu of the "strength of pilots" limits of § 25.143(c) for pitch and roll, and in lieu of specific pitch force requirements of §§ 25.145(b) and 25.175(d), the following applies: "It must be shown that the temporary and maximum prolonged force levels for the side stick controllers are suitable for all expected operating conditions and configurations, whether normal or non-normal."

(b) *Controller Coupling.* In the absence of specific requirements for controller coupling, the following applies: "The electronic side stick controller coupling design must provide for corrective and/or overriding control inputs by either pilot with no unsafe characteristics. Annunciation of controller status must not be confusing to the flighcrew."

(c) *Pilot Control.* In the absence of specific requirements for side stick controllers, the following applies: "It must be shown by flight tests that the use of sidestick controllers does not produce unsuitable pilot-in-the-loop control characteristics when considering precision path control/tasks and turbulence."

(d) *Autopilot Quick-Release Control Location.* In lieu of compliance with § 25.1329(d) of the FAR, quick release (emergency) controls must be on both side stick controllers. The quick release means must be located so that it can readily and easily be used by the flighcrew.

15. *Computerized Airplane Flight Manual (AFM) Performance Information*

In the absence of specific requirements for computerized AFM performance information, the following apply: If computerized AFM performance information is used for the purpose of compliance with § 25.1587(b) of the FAR then it must be shown that such information will:

(a) Provide at least the same level of accuracy as traditional paper AFM charts.

(b) Have an availability and ease of use equivalent to that provided by paper AFM charts.

(c) Be protected from inadvertent or deliberate alteration outside of an FAA approved revision process.

Discussion

1. General Requirements.

a. Official Reference

(1) The conventional hardcopy portion of the AFM shall contain appropriate references about applicability of the FAA-approved AFM software application. Each change to FAA-approved AFM software will lead to a revision of this reference (see paragraph 3.d.).

(2) The AFM should contain a statement similar to the following: "Generation of FAA-approved performance information may be accomplished only by use of the FAA-approved AFM software application. Any modification to the FAA-approved AFM software application and/or subsequent alteration to the generated output will cancel the approval of the information, unless this change was approved by the appropriate airworthiness authority. This will be applicable independently of the printed approval status on the generated output."

b. Approved and Unapproved Information.

(1) Approved performance information must be clearly identified and segregated from unapproved information that may be presented. Therefore, the approval status of generated output must be clearly indicated on the screen and printed on each printout page of any calculated results. If the program is capable of being used for calculations to more than one certification basis (i.e., FAA rules vs. JAA rules), the certification basis being used must be identified and included on generated output.

c. Software Usage Aspects. Airbus Industrie shall substantiate that the A340 computerized AFM is designed to:

(1) Provide generated output that contains all the information required by Part 25 of the FAR in the conventional AFM that is replaced or supplemented by the computerized AFM. This includes all relevant information (e.g., variables used for a specific condition) to determine operating condition and applicability of the generated output. Further, the total AFM performance presentation (hardcopy plus software) to the air carrier must be such to allow that carrier to comply with the FAR:

(2) Provide equivalent or conservative results to that obtained by direct use of a first principles calculation utilizing certified baseline parameters (e.g., lift, drag, thrust):

(3) Provide two-way performance interrogation (ability to switch independent and dependent variables), as appropriate;

(4) Preclude calculations that generate FAA-approved results by:

(i) Extrapolation of data outside of performance bounds approved by the FAA and the manufacturer, and;

(ii) Use of unapproved methods; A note must be added to the AFM performance section, where reference is made to computerized performance, to read essentially as follows: "The various gross weight, operational, and environmental limitations provided in the limitations section of this AFM take precedence over what otherwise may be listed as approved performance results from the computerized output."

(5) Provide at least the standard of transparency (e.g., understanding of performance relations and limitations) and accessibility of the data (e.g., usage time to generate a result) that is available by use of conventional AFM presentation;

(6) Prevent mistakes or misunderstanding by a skilled user during data input and interpretation of output. Emphasis should be placed upon ease of use. If multiple screens are required to fully enter input data, it should be possible to access entries on previous screens and review, or correct, input data prior to final program execution.

2. Computerized Airplane Flight Manual Contents

a. Performance Section.

(1) The computerized portion of the A340 AFM may include the information and capability that is required to generate all FAA-approved performance data.

(2) Independent of, and in addition to performance presented in the computerized portion of the A340 AFM, the following information, as a minimum, shall be presented in conventional form in the hard copy AFM, unless this information is available to the flight crew aboard the airplane from an FAA approved source intended for this purpose (e.g., Flight Crew Operating Manual): (i) Stalling Speeds (calibrated airspeed); (ii) Alternate Static Source Position Error Calibrations (if corrections are significant); (iii) Stabilizer Trim Setting for Takeoff; (iv) Engine Thrust Settings for Takeoff, Maximum Continuous, and Go-Around Ratings;(v) V_{2MIN} Speeds (indicated airspeed); (vi) One-Engine-Inoperative En Route Flight Path Gradients; (vii) Two-Engines-Inoperative En Route Flight Path Gradients, if applicable; (viii) Approach/Landing Climb Weight Limits; (ix) Reference Landing Speeds (indicated airspeed); (x) Landing Field Lengths; (xi) Configuration Deviation List; (xii) Noise Characteristics.

Note: This does not preclude calculation of information by the FAA-approved computerized AFM and subsequent inclusion of the output as a permanent part of the hardcopy AFM.

(3) Configuration Deviation List (CDL) and Master Minimum Equipment List (MMEL) effects on performance may be included if they are FAA-approved and applications are clearly identified on the generated output.

(4) Although it is intended that the output from computations should be usable without adjustment, corrective factors through hard copy AFM instructions may be acceptable in the following cases: (i) CDL and MMEL information; (ii) Urgent temporary FAA-approved revisions made necessary for safety reasons; (iii) Any case where the appropriate data are not available from the computer and it is clear to the user that hard copy corrective factors must be applied. In these cases, the official reference as indicated under paragraph 1.a. (1) must be changed accordingly.

(5) Supplementary performance information may be included in accordance with paragraph 1.b. (e.g., runways contaminated with standing water, slush, snow, or ice).

(6) The manufacturer must request FAA-approval of supplementary computerized AFM applications e.g., Optimized Runway Performance). This supplementary software application will not be required by the FAA for type Certification.

3. Software Integrity, Development, and Documentation Requirements.

a. Software Integrity.

(1) The computation of hazardously misleading primary information such as takeoff speeds schedules, landing approach reference speeds, engine thrust, engine limit data or other related airplane performance data, should be improbable. The AFM software application shall, as far as practicable, be designed to be protected from inadvertent, or unauthorized, deliberate alterations.

(2) The level of integrity established for the computerized AFM is the basis for the software development process and should be addressed in the plan for software aspects of certification (see paragraph 3.b.).

(3) Each part of the FAA-approved AFM software application (e.g., program, data) should bear a unique notation, a unique date and/or revision number.

(4) A means to check the original status of programs and data to avoid undetected failures should be provided (e.g., a checksum routine, tabular data to verify a check case, or provisions for a line-by-line file comparison).

(5) No unapproved software may be used to process data identified as "FAA-approved," unless the use of these software elements is agreed to by the FAA. Operating systems (e.g., DOS or equivalent software) will not be approved, but will have to be specified and agreement obtained.

(6) If unapproved software is an integral part of the software delivery, it must be justified that there is no interference between approved and unapproved parts that would jeopardize correct functioning of the FAA-approved AFM software application.

b. *Software Development.*

(1) The manufacturer must propose the software development process in the plan for software aspects of certification, documenting the methods, parameters, and allowable range of conditions contained in the computerized portion of the AFM. The results obtained from the computerized portion of the AFM must be shown to meet all applicable part 25 requirements. This compliance may be shown using substantiation documentation, demonstrations, or other means mutually agreed upon by the FAA and the manufacturer. The software development process described in AC-115A (RTCA DO-178A) is valid, in general, for developing either airborne or ground-based software, and is an acceptable approach for developing software for the computerized AFM. Some of the specific guidance provided in AC 20-115A, however, may not apply to the computerized AFM.

(2) The manufacturer must submit a description of the computerized portion of the AFM and the plan for software aspects of certification to the FAA for review early in the certification process. This plan must propose the schedule and means by which compliance with the requirements will be achieved, and the means by which certification data and supporting records will be made available for review.

c. Hardware and Software Environment. The AFM software application may be FAA-approved independent of the hardware and software environment in which it is installed (e.g., the development of computerized AFM software application to be run in a commercial-off-the-shelf hardware and software environment). The manufacturer must provide for

below items (1), plus either item (2) or (3), as appropriate:

(1) A mechanism, such as an installation utility function or test set, that verifies the proper functioning of the AFM software application in the target software and hardware environment;

(2) If the computerized portion of the AFM is intended for a commercial-off-the-shelf hardware and software environment, installation information that describes the minimum requirements, including limitations and constraints, for the software and hardware environment;

(3) If the computerized portion of the AFM is intended for a specific hardware/software system, installation information that describes the specific hardware and software environment in which the AFM software application must be installed. Additionally, the manufacturer should provide a configuration management scheme that ensures the hardware and software environment that will be used in service is identical to the environment specified in the FAA-approved installation data.

d. Revisions to A340 AFM Software Application.

(1) Revisions to the FAA-approved computerized portion of the AFM must be submitted for evaluation and FAA-approval in accordance with software development methodology established in paragraph 3.b. A log of FAA-approved AFM software application parts must be furnished by the manufacturer. For historical purposes, records should be maintained by the manufacturer, which will permit the reproduction of the computerized AFM for any past approved revision level.

(2) The manufacturer must submit a description of the proposed changes and an updated plan for software aspects of certification. In addition, the manufacturer must: (i) Re-assess the software integrity level (paragraph 3.a.) of the revised computerized AFM; (ii) Demonstrate that the revisions do no affect any of the unrevised portions of the computerized AFM; and (iii) Demonstrate that the revisions are compatible with the hardware and software environment intended for the AFM software application.

(3) When revisions are incorporated, a means (e.g., document) of indicating those parts of the software that have been changed must be provided.

(4) Each revised software element must be identified in the same manner as the original with the exception of the new date and/or revision notation (see 3.a.(3)).

e. Submittal and FAA-Approval of Software.

(1) The manufacturer will be considered the responsible party for all matters pertaining to AFM application software, including submitting for, and obtaining FAA-approval.

(2) Data structures and calculation models shall be discussed between the manufacturer and the FAA, and agreement obtained.

(3) The manufacturer is responsible for ensuring that the FAA certification office is provided with the equipment specification to use the computer files and any required initial instruction on use of the computer program.

(4) The FAA may require assessment of program details and data structures as deemed necessary to allow judgement about software integrity. Any hardware environment required to accomplish this which is not readily available to the FAA shall be provided by the manufacturer.

f. Documentation requirements. Documentation containing the following information shall be provided to the FAA for agreement before FAA-approval is granted.

(1) Approval Plan that describes the software aspects of certification, including an outline of the desired applications, design objectives for software and data integrity, and a statement to the effect of impact on flight safety.

(2) Software Development Plan, including methods to provide the design objectives.

(3) Software Descriptions, including substantiation that program structures and calculation models are appropriate to their intended function.

(4) Data Conformity Document, including substantiation for data conformity of airplane performance characteristics (e.g., tested performance data) and the developed software (e.g., FAA-approved data files) and/or generated output.

(5) Operating Instructions, that include all information for proper use of the AFM software, including installation instructions and identification of suitable hardware and software environment.

(6) Software Configuration Reference, including a log of approved software elements.

4. Provisions For FAA Post Certification Access To Computerized portion of AFM. In the plan for software aspects of certification, the manufacturer must propose which components of the computerized AFM will be submitted to the FAA. In cases where the AFM software application can be installed on FAA equipment, then only the AFM software application, which includes the installation data and operating guide need be provided. However, if the AFM software application requires a hardware and software environment that is not available to the FAA, then the manufacturer must also provide to the appropriate FAA certification office, access to the necessary components for the hardware and software environment.

Issued in Renton, Washington, on September 30, 1992.

Darrell M. Pederson,

Assistant Manager, Transport Airplane Directorate, Aircraft Certification Service, ANM-100.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Ch. VII

[Docket No. 921053-2253]

Request for Comments on Effects of Foreign Policy-Based Export Controls

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Request for comments on foreign policy-based export controls.

SUMMARY: The Bureau of Export Administration (BXA) is reviewing the foreign policy-based export controls in the Export Administration Regulations to determine whether they should be modified, rescinded or extended. To help make this determination, BXA is seeking comments on how existing foreign policy-based export controls have affected exporters and the general public.

Although the Export Administration Act of 1979, as amended (EAA), expired on September 30, 1990, the President invoked the International Emergency Economic Powers Act and continued in effect, to the extent permitted by law, the provisions of the EAA and the EAR in Executive Order 12730 of September 30, 1990.

DATES: Comments must be received by November 20, 1992 to assure full consideration in the formulation of export control policies.

ADDRESSES: Written comments (six copies) should be sent to Patricia Muldonian, Regulations Branch (room 4054), Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: John Bolsteins, Foreign Policy Branch, Office of Technology and Policy Analysis, Bureau of Export Administration, Telephone: (202) 482–4252.

SUPPLEMENTARY INFORMATION: The current foreign policy controls maintained by the Bureau of Export Administration (BXA) are set froth in the Export Administration Regulations (EAR), Parts 776 (Special Commodity Policies and Provisions), 778 (Proliferation Controls), and 785 (Special Country Policies and Provisions). These controls apply to: supercomputers (§ 776.11); crime control and detection commodities (§ 776.14); regional stability commodities and equipment (§ 776.16); equipment and related technical data used in the design, development, production, or use of missiles capable of delivering nuclear weapons (§ 778.7); chemical precursors and biological agents and associated equipment and technical data related to the production of chemical and biological agents (§ 778.8); activities of U.S. persons in transactions related to missile technology or chemical or biological weapons proliferation in named countries (§ 778.9); embargoed countries (§ 785.1); South Africa (§ 785.4(a)); countries designated as supporters of acts of international terrorism (§ 785.4(d)); and, Libya (§ 785.7).

Effective January 21, 1992, the Secretary of Commerce extended for one year all foreign policy controls then in effect. Changes in foreign policy controls since the date of that extension have included the publication of Supplement No. 6—Missile Technology Destinations (57 FR 26773 of June 16, 1992), the termination of the embargo against Cambodia (57 FR 11576 of April 6, 1992), the expansion of controls on supercomputers (57 FR 20963 of May 18, 1992), and the revision of the embargo on Vietnam that eases restrictions on exports of humanitarian items (57 FR 31685 of July 17, 1992).

To assure maximum public participation in the review process, comments are solicited on the extension or revision of the existing foreign policy controls for another year. Among the criteria the Departments of Commerce and State consider in determining whether to continue or revise U.S. foreign policy controls are the following:

1. The likelihood that such controls will achieve the intended foreign policy purpose, in light of other factors, including the availability from other countries of the goods or technology proposed for such controls;

2. Whether the foreign policy purpose of such controls can be achieved through negotiations or other alternative means;

3. The compatibility of the controls with the foreign policy objectives of the United States and with overall United States policy toward the country subject to the controls;

4. The reaction of other countries to the extension of such controls by the United States is not likely to render the controls ineffective in achieving the intended foreign policy purpose or be counterproductive to United States foreign policy interests;

5. The effect of the controls on the export performance of the United States, the competitive position of the United States in the international economy, the international reputation of the United States as a supplier of goods and technology, or the economic well-being of individual United States companies and their employees and communities does not exceed the benfit to United States foreign policy objectives; and

6. The ability of the United States to enforce the controls effectively.

BXA is particularly interested in the experience of individual exporters in complying with these controls, with emphasis on economic impact and specific instances of business lost to foreign competitors. BXA is also interested in comments relating to the effects of foreign policy controls on exports of replacement and other parts.

Parties submitting comments are asked to be as specific as possible. All comments received before the close of the comment period will be considered by BXA in reviewing the controls and developing the report to Congress.

BXA will consider requests for confidential treatment. The information for which confidential treatment is requested should be submitted to BXA separate from any non-confidential information submitted. The top of each page should be marked with the term "Confidential Information." BXA will either accept the submission in confidence, or if the submission fails to meet the standards for confidential treatment, will return it. A non-confidential summary must accompany such submissions of confidential information. The summary will be made available for public inspection.

Information accepted by BXA as confidential will be protected from public disclosure to the extent permitted by law. Communications between agencies of the United States Government or with foreign governments will not be made available for public inspection.

All other information relating to the notice will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, BXA requires written comments. Oral comments must be followed by written memoranda, which will also be a matter of public record and will be available for public review and copying.

The public record concerning these comments will be maintained in the Freedom of Information Records Inspection Facility, Room 4525, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW, Washington, D.C. 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about inspection and copying of records at this facility may be obtained from Margaret Cornejo, BXA Freedom of Information Officer, at the above address or by calling (202) 377–5653.

Authority: Pub. L. 96–223, 91 Stat. 1626 (50 U.S.C. 1701 *et seq.*); Pub. L. 95–242, 92 Stat. 120 (22 U.S.C. 3201 *et seq.*); Pub. L. 96–72, 93 Stat. 503, (50 U.S.C. App. 2401 *et seq.*), as amended; E.O. 12002 of July 7, 1977 (42 FR 35623, July 7, 1977); E.O. 12214 of May 2, 1980 (45 FR 29783, May 6, 1980); E.O. 12730 of September 30, 1990 (55 FR 40373, October 2, 1990); E.O. 12735 of November 16, 1990 (55 FR 48587, November 20, 1990); and E.O. 12769 of July 10, 1991 (56 FR 31855, July 12, 1991).

Dated: October 6, 1992

James M. LeMunyon,

Acting Assistant Secretary for Export Administration.

BILLING CODE 3510–07–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92–224, RM–8074]

Radio Broadcasting Services; Dardanelle, AR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rule making filed on behalf of Ramsey Communications, Inc., licensee of Station KWKK(FM), Channel 272A, Dardanelle, Arkansas, seeking the substitution of Channel 272C3 for

Channel 272A and modification of its license accordingly to specify operation on the higher powered channel. Coordinates for this proposal are 35–13–41 and 93–15–20.

Petitioner's modification proposal complies with the provisions of Section 1.420(g) of the Commission's Rules. Therefore, we will not accept competing expressions of interest in the use of Channel 272C3 at Dardanelle, Arkansas, or require the petitioner to demonstrate the availability of an additional equivalent class channel.

DATES: Comments must be filed on or before November 27, 1992, and reply comments on or before December 14, 1992.

ADDRESSES: Secretary, Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Marvin Rosenberg and Robert D. Primoech, Esqs., Fletcher, Heald & Hildreth, 1225 Connecticut Avenue, NW., suite 400, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92–224, adopted September 11, 1992, and released October 5, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1990 M St., NW., suite 640, Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AB

Endangered and Threatened Wildlife and Plants; Notice of Public Meeting on California Candidate Plant Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of public meeting.

SUMMARY: As part of the 1991 settlement of litigation over the Fish and Wildlife Service's (Service) progress in proposing for listing as endangered or threatened species approximately 159 California plants designated as "category 1" listing candidates, the Service is holding the second annual public meeting. The meeting will provide a forum for discussing issues related to proposing the plants for listing under the Endangered Species Act (16 U.S.C. 1531–1544).

DATES: The public meeting will be held from 9:30 a.m. to 12:30 p.m. on October 29, 1992 in Santa Barbara, California.

ADDRESSES: The public meeting will be held at the Santa Barbara Botanic Garden, 1212 Mission Canyon Road, Santa Barbara, California.

FOR FURTHER INFORMATION CONTACT: Carl Benz, Branch Chief for Listing and Recovery, Southern California Field Station, Ventura Office, 2140 Eastman Avenue, suite 100, Ventura, California 93003 (telephone 805/644–1766 or 818/904–6040).

SUPPLEMENTARY INFORMATION:

Background

On August 21, 1991, the U.S. District Court for the Eastern District of California approved a settlement of a lawsuit brought by the California Native Plant Society to challenge delays by the Service in proposing to list 159 species of California plants as endangered or threatened. Under the terms of the settlement approved by the court, the Service is holding the second annual public meeting to discuss the Service's progress in proposing the plants for listing as well as other issues related to development of listing proposals for the plants. The meeting will be held in Santa Barbara, California on October 29, 1992, at the time and place specified above.

Author

The primary author of this notice is Connie Rutherford, Botanist, U.S. Fish and Wildlife Service, Southern California Field Station, Ventura Office, 2140 Eastman Avenue, suite 100, Ventura, California 93003 (telephone 805/644–1766 or 818/904–6040).

Authority

The authority for this action is the Endangered Species Act (16 U.S.C. 1361–11407; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.)

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 651

[Docket No. 90927–2255]

Northeast Multispecies Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notification of Flexible Area Action System #6.

SUMMARY: NMFS issues this document to inform the public and the fishing industry that the New England Fishery Management Council (Council) is considering Flexible Area Action System #6 under Amendment 3 to the Northeast Multispecies Fishery Management Plan (FMP). The purpose of the action would be to protect a concentration of yellowtail flounder that are smaller than the legal minimum landing size but are being caught and wastefully discarded at sea. The area affected is located offshore of Massachusetts and New Hampshire and is generally described as Ipswich Bay.

DATES: Written comments on the proposed action must be received by October 22, 1992.

ADDRESSES: Copies of the NMFS Northeast Regional Director's (Regional Director) fact-finding report and the Council's impact analysis will be available on October 16, 1992, upon request from Douglas G. Marshall, Executive Director, New England Fishery Management Council, 5 Broadway (Route 1), Saugus, MA 01960.

Send comments on the proposed action, the fact-finding report and the Council's impact analysis to Richard B. Roe, Regional Director, National Marine Fisheries Service, One Blackburn Drive, Gloucester, MA 01930.

FOR FURTHER INFORMATION CONTACT: Jack Terrill, NMFS, Resource Policy Analyst, 508–281–9252.

SUPPLEMENTARY INFORMATION: This action is taken under 50 CFR 651.26 as established by Amendment 3 to the FMP. Amendment 3 was approved by the Secretary of Commerce on November 24, 1989, and published on December 22, 1989 (54 FR 52803), with the regulations effective on December 19, 1989. Section 651.26 specifies a Flexible Area Action System (FAAS) whereby protection can be provided to concentrations of juvenile, sublegal, or spawning fish. As part of this process, the Regional Director initiates a fact-finding investigation of the alleged discard problem. The Council also provides an impact analysis of alternative measures that might be implemented under this action.

The Council received a request for action after it was reported that operators of vessels using scallop dredge gear are landing and discarding significant amounts of sublegal (less than 13 inches in length) yellowtail flounder in the vicinity of Ipswich Bay. These vessels have appeared in the area in the past 2 years and tend to remain in the area until December. To determine the extent of the problem and whether it is appropriate to take action, the Council has initiated this action. Both the Regional Director's fact-finding report and the Council's impact analysis will be available by October 16, 1992, at the Council office (see **ADDRESSES**). The Council will hold a public hearing on October 22, 1992, at 9 a.m. at the King's Grant Inn, Danvers, Massachusetts, in conjunction with a meeting of the Council to solicit comments on the proposed action. More specific information is below.

(1) The area of the proposed action is Ipswich Bay, which is located off the Massachusetts and New Hampshire coast. Ipswich Bay is bounded by the following: 42°42′ N. Latitude on the south, 70°30′ W. Longitude on the east, 43°00′ N. Latitude on the north and the territorial sea on the west.

(2) The principal species that will be affected by any action will be yellowtail flounder, Atlantic cod, northern shrimp, pollock, winter flounder, American plaice (dab), haddock, silver hake, angler (monkfish), and American lobster.

(3) The types of gear that could be affected by this action are all types of gear capable of catching groundfish, including, but not limited to, otter trawls, midwater trawls, gillnets, scallop dredges, and hook-and-line gear, both commercial and recreational.

(4) The fisheries that potentially will be impacted are the commercial and recreational groundfish fisheries that operate in the area of the proposed action and use the gear types listed above.

(5) The principal ports that will be affected are Boston, Massachusetts, Gloucester, Massachusetts, New Bedford, Massachusetts, Portland, Maine, Portsmouth, New Hampshire, Provincetown, Massachusetts, and other small ports in the vicinity of Ipswich Bay.

(6) The expected duration of the action is up to 180 days. If implemented as early as October 27, 1992, the action could last until April 24, 1993.

(7) The Committee expects to recommend that those areas that are determined to have large concentrations of small yellowtail flounder (less than 13 inches in length) be closed to fishing with the types of gear described in (3) above.

Other actions which might be considered are: (a) A prohibition on the use of scallop dredges in the area; (b) a minimum mesh size in the trawl and/or gillnet fisheries; (c) a prohibition of mobile net gear; and (d) a prohibition of all fishing, except with hook gear.

(8) The Council will begin analyzing the potential impacts from possible actions upon publication of this notice.

(9) The Council's impact analysis will be available on October 16, 1992.

Meat Import Limitations; Fourth Quarterly Estimate

Public Law 88–482, enacted August 22, 1964, as amended by Public Law 96–177, Public Law 100–418, and Public Law 100–449 (hereinafter referred to as the "Act"), provides for limiting the quantity of fresh, chilled, or frozen meat of bovine, sheep except lamb, and goats; and processed meat of beef or veal (Harmonized Tariff Schedule of the United States subheadings 0201.10.00, 0201.20.20, 0201.20.40, 0201.20.60, 0201.30.20, 0201.30.40, 0201.30.60, 0202.10.00, 0202.20.20, 0202.20.40, 0202.20.60, 0202.30.20, 0202.30.40, 0202.30.60, 0204.21.00, 0204.22.40, 0204.23.40, 0204.41.00, 0204.42.40, 0204.43.40, and 0204.50.00), which may be imported, other than products of Canada, into the United States in any calendar year. Such limitations are to be imposed when the Secretary of Agriculture estimates that imports of articles, other than products of Canada, provided for in Harmonized Tariff Schedule of the United States subheadings 0201.10.00, 0201.20.40, 0201.20.60, 0201.30.40, 0201.30.60, 0202.10.00, 0202.20.40, 0202.20.60, 0202.30.40, 0202.30.60, 0204.21.00, 0204.22.40, 0204.23.40, 0204.41.00, 0204.42.40, 0204.43.40, and 0204.50.00 (hereinafter referred to as "meat articles"), in the absence of limitations under the Act during such calendar year, would equal or exceed 110 percent of the estimated aggregate quantity of meat articles prescribed for calendar year 1992 by section 2(c) as adjusted under section 2(d) of the Act.

As announced in the Notice published in the **Federal Register** on January 7, 1992 (57 FR 553), the estimated aggregate quantity of meat articles other than products of Canada prescribed by section 2(c) as adjusted by section 2(d) of the Act for calendar year 1992 is 1,192 million pounds.

In accordance with the requirements of the Act, I have determined that the fourth quarterly estimate of the aggregate quantity of meat articles other than products of Canada which would, in the absence of limitations under the Act, be imported during calendar year 1992 is 1,311.1 million pounds.

Done at Washington, DC this 5th day of October, 1992.

Edward Madigan,
Secretary of Agriculture.

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: Marine Recreational Fishery Statistics Survey.

Agency Form Number: None.

OMB Approval Number: 0648–0052.

Type of Request: Revision of a currently approved collection.

Burden: 18,426 hours.

Number of Respondents: 557,966.

Avg Hours Per Response: Ranges between 30 seconds and 7 minutes.

Needs and Uses: Catch and effort statistics are fundamental for assessing the influence of fishing on any stock of fish. Because recreational fishing impacts fish resources, catch, effort and participation data are collected from recreational fishermen. The data are used to develop, implement and monitor fishery management plans.

Affected Public: Individuals or households, small businesses or organizations.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ron Minsk, (202) 395–3084.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Ron Minsk, OMB Desk Officer, room 3019, New Executive Office Building, Washington, DC 20503.

Dated: October 6, 1992.

Edward Michals,
Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–CW–F

International Trade Administration

[A–580–812]

Notice of Postponement of Preliminary Antidumping Duty Determination: Dynamic Random Access Memory Semiconductors of one Megabit and Above From the Republic of Korea

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: October 13, 1992.

FOR FURTHER INFORMATION CONTACT: John Beck, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, at (202) 482–3464.

Postponement

On May 12, 1992, the Department of Commerce (the Department) initiated an antidumping duty investigation of dynamic random access memory semiconductors of one megabit and above (DRAMs) from the Republic of Korea. The notice stated that we would issue our preliminary determination on or before September 29, 1992 (57 FR 28483, June 25, 1992). On September 3, 1992, petitioner requested that the Department postpone our preliminary determination by one week. On September 8, 1992, the Department granted this request and postponed the preliminary determination until October 6, 1992 (57 FR 42544, September 15, 1992).

On October 5, 1992, the Department notified petitioner and respondents that it intended to postpone the preliminary determination by 14 days. In accordance

with 19 CFR 353.15(b), the Department finds this investigation extraordinarily complicated due to certain complex issues regarding the cost information submitted by the three respondents. Additionally, the respondents are cooperating in this investigation. Therefore, we are postponing the date of this preliminary determination in this investigation until not later than October 20, 1992. The U.S. International Trade Commission is being advised of this postponement in accordance with section 733(f) of the Tariff Act of 1930, as amended (the Act).

This notice is published pursuant to section 733(c)(2) of the Act and 19 CFR 353.15(d).

Dated: October 6, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Export Trade Certificate of Review

ACTION: Notice of issuance of an export trade certificate of review, application No. 92-00009.

SUMMARY: The Department of Commerce has issued an Export Trade Certificate of Review to Northern Textile Export Trading Company, Inc ("NTETC"). This notice summarizes the conduct for which certification has been granted.

FOR FURTHER INFORMATION CONTACT: George Muller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202-482-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. Sections 4001-21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 15 CFR part 325 (1991) (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Secretary of Commerce to publish a summary of a Certificate in the **Federal Register**. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

Export Trade

1. Products

Fibers, yarns, and fabrics for both commercial and apparel uses in every segment of the textile industry including, but not limited to, man-made fiber, wool, cotton, elastic, flock, felt, and luxury fiber products.

2. Services

Engineering, design, and affiliated services related to the Products and to articles that incorporate the Products.

3. Technology Rights

Patents, trademarks, service marks, copyrights, trade secrets, technical expertise, physical and computer modeling and designs associated with the Products, Services, and/or Export Trade Facilitation Services.

4. Export Trade Facilitation Services (as They Relate to the Export of Products, Services, and Technology Rights)

Technical service; international market research; marketing and trade promotion; trade show participation; insurance; legal assistance; testing and certification; transportation; trade documentation and freight forwarding; communication and processing of export orders; warehousing; foreign exchange; financing; and taking title to goods.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

3. Export Trade Activities and Methods of Operations

3.1 Activities and Operations. NTETC and/or one or more of its Members may:

a. Engage in joint bidding or other joint selling arrangements for Products and/or Services in the Export Markets and allocate sales resulting from such arrangements;

b. Establish export prices for sales of Products and/or Services by the Members in Export Markets, with each Member being free to deviate from such prices by whatever amount it sees fit;

c. Discuss and reach agreements relating to specifications and engineering requirements demanded by specific potential customers for Products and Services for Export Markets;

d. With respect to Products and/or Services, refuse to quote prices for, or to market or sell in, Export Markets;

e. Provide and/or jointly negotiate for and purchase from Suppliers Export Trade Facilitation Services for Members;

f. Solicit non-Members to sell the Products and/or Services of such non-Members or to offer Export Trade Facilitation Services provided by such non-Members through the certified activities of NTETC and/or its Members;

g. Coordinate with respect to the servicing of Products and/or Services in Export Markets;

h. Engage in joint promotional activities, such as advertising and trade shows, aimed at developing or enhancing existing or new Export Market opportunities;

i. Bring together from time to time groups of Members to plan and discuss how to fulfill the technical Product requirements of specific export customers of Export Markets;

j. Form and operate joint ventures and/or jointly owned entities, such as for-profit subsidiaries, partnerships, and/or other enterprises owned exclusively by Members, for the purpose of engaging in the Export Trade Activities and Methods of Operation herein certified, subject to such entities' adherence to the terms of paragraph 3.2(c) below;

k. Enter into contractual arrangements with non-Members in the Export Markets (including, but not limited to, sales agents, exclusive or non-exclusive distributors, and joint ventures formed and operated by NTETC and/or one or several Members) to distribute the Products and/or Services;

1. Provide Export Trade Facilitation Services as an exclusive or non-exclusive Export Intermediary for the Members whereby NTETC and/or one or more of the Members may:

i. Arrange to have NTETC and/or one or more of the Members and/or non-Members act as an exclusive or non-exclusive Export Intermediary for the Members; and

ii. Establish an entity owned jointly and exclusively by Members to act as an exclusive or non-exclusive Export Intermediary for the Members.

m. Agree that any information obtained pursuant to this Certificate shall not be provided to any non-Member;

n. Forward inquiries to the appropriate individual Members concerning requests for information received from entities in the Export Markets;

o. Refuse to provide Export Trade Facilitation Services or participation in Export Trade, Export Trade Activities and Methods of Operation to non-Members;

p. Individually purchase Products and/or Services for export to the Export Markets;

q. Enter into agreements whereby one or more Members, or an entity owned jointly and exclusively by Members, will provide transportation services to Members, such as the chartering and space chartering of vessels, the negotiation and utilization of intermodal rates with common and contract carriers for inland freight transportation for export shipments to United States export terminals, ports, or gateways;

r. Provide any Member or Supplier the benefit of any Export Trade Facilitation Services to facilitate the export of Products, Services or Technology Rights to Export Markets. This may be accomplished by NTETC itself, or by agreement with Members or other parties;

s. Meet to engage in the Export Trade, Export Trade Activities, and Methods of Operation certified herein; and

t. Agree that, should a Member withdraw from NTETC, such withdrawing Member will not, directly or indirectly for a period of two years from the date of such withdrawal, sell to, through, or with the assistance of any customer, consultant, co-venturer, employee, distributor, sales agent, or other representative of NTETC the Products and/or Services it has sold on the Export Markets as a Member. This prohibition, however, shall not restrict a Member from resuming a business relationship with any party with which that Member was doing business prior to becoming a Member.

3.2 *Licensing Technology Rights.* Any Member may license and sub-license Technology Rights in the Export Markets to non-Members, provided that all such licenses shall be negotiated and concluded between the Member and such non-Member without coordination with NTETC or any other Member. Such licenses and sub-licenses may:

a. Convey exclusive or non-exclusive rights in the Export Markets;

b. Impose requirements as to the prices at which Products and/or Services incorporating, manufactured, or produced using Technology Rights may be sold or leased in the Export Markets;

c. Impose requirements as to pricing and other terms and conditions of licenses or sub-licenses of Technology Rights in the Export Markets;

d. Restrict licensees and sub-licensees as to the field of use, or maximum sales or operations, in the Export Markets;

e. Impose territorial restrictions relating to any Export Market on foreign licensees and sub-licensees;

f. Require the assignment back or exclusive or non-exclusive grant back to the licensor Member of rights in the Export Market to all improvements in Technology Rights, whether or not such improvement falls within the field of use authorized in such license;

g. Require package licensing of Technology Rights; and

h. Require products and/or services (including, but not limited to, Products and/or Services) to be used, sold, or leased as a condition of the license of Technology Rights.

3.3 *Information Exchange.* NTETC and/or the Members may exchange and discuss the following types of information with respect to the Export Markets only:

a. Information (other than information about the costs, output, capacity, inventories, domestic prices, domestic sales, domestic orders, terms of domestic marketing or sale; or United States business plans, strategies, or methods) that is already generally available to the trade or public;

b. Information about sales or marketing efforts for Export Markets; activities and opportunities for sales of Products and Services in Export Markets; selling strategies for Export Markets; pricing in Export Markets; projected demand in Export Markets; customary terms of sale in Export Markets; the types of Products available from competitors for sale in particular Export Markets, and the prices therefor; and customer specifications for Products in Export Markets;

c. Information about the export prices, quality, quantity, source, and delivery dates of Products available from Members for export; provided, however, that exchanges of information and discussions as to export prices, Product quality and/or quantity, source, and delivery dates must be on a transaction-by-transaction basis only and involve only those Members which are participating or have a genuine interest in participating in such transaction;

d. Information about terms, conditions and specifications of particular contracts for sales in Export Markets to be considered and/or bid on by NTETC or the Members;

e. Information about joint bidding, selling or servicing arrangements for Export Markets and allocation of sales resulting from such arrangements among the Members;

f. Information about expenses specific to exporting to and within Export Markets, including, without limitation, transportation, intermodal shipments, insurance, inland freight to port, port storage, commissions, export sales, documentation, financing, customs, duties, and taxes;

g. Information about U.S. and foreign legislation and regulations affecting sales in Export Markets; and

h. Information about NTETC's or the Members' export operations, including without limitation sales and distribution networks established by NTETC or the Members in Export Markets, and prior export sales by Members (including prior export price information).

3.3 *Definitions.* a. "Export Intermediary" means a person who acts as a distributor, sales representative, sales or marketing agent or broker, or who performs similar functions, including providing or arranging for the provision of Export Trade Facilitation Services.

b. "Members" (within the meaning of § 325.2(1) of the Regulations) means the firms listed as follows: Cascade Woolen Mill, Inc., Oakland, Maine; L.W. Packard & Co., Inc., Ashland, New Hampshire; Charles W. Fifield, Jr., Co., Inc., Hingham, Massachusetts; and Woolrich, Inc., Woolrich, Pennsylvania.

c. "Suppliers" means a person who produces, provides, or sells Products, Services, or Export Trade Facilitation Services.

A copy of each certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Dated: October 6, 1992.

George Muller,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510-DR-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Issuance of Permit (P77#57).

On April 17, 1992, notice was published in the **Federal Register** (57 FR 13709) that an application had been filed by the National Marine Mammal Laboratory, Northwest and Alaska Fisheries Science Center, National

Marine Fisheries Service, 7600 Sand Point Way, N.E. BIN C15700, Seattle, Washington 98115, for a Permit to collect and import an unspecified number of specimen materials taken from dead individuals of all cetacean species, all pinniped species, and sea otters worldwide.

Notice is hereby given that on October 1, 1992, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), the National Marine Fisheries Service and the Fish and Wildlife Service issued a Permit for the above taking and importation, subject to certain conditions set forth therein.

The application and accompanying documentation satisfy the issuance criteria for scientific research permits and the requested activities are consistent with the purposes and policies of the MMPA and ESA. The research will further a *bona fide* scientific purpose that does not involve unnecessary duplication of other research.

Issuance of this Permit for the taking of endangered species as required by the Endangered Species Act of 1973 was based on a finding that such Permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which are the subject of this Permit; and (3) is consistent with the purposes and policies set forth in section 2 of the Endangered Species Act of 1973.

Documents submitted in connection with this Permit are available for review, by appointment, in the:

Permits Division, Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East-West Highway., suite 7324, Silver Spring, MD 20910 (301/713–2289);

Director, Alaska Region, National Marine Fisheries Service, NOAA, 9109 Mendenhall Mall Road, suite 6, Juneau, AK 99802 (907/586–7221);

Director, Northwest Region, National Marine Fisheries Service, NOAA, 7600 Sand Point Way, NE., BIN C15700, Seattle, WA 98115 (206–526–6150);

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The South Atlantic Fishery Management Council (Council) and its Committees will hold public meetings on October 26–29, 1992, at the Sheraton New Bern Hotel and Marina, One Bicentennial Park, New Bern, NC, telephone: (919) 638–3585.

The Council's Sea Scallop Committee will meet on October 26 at 3 p.m., to review Amendment #4 to the Sea Scallop Fishery Management Plan (FMP), before it is taken to public hearings by the New England Fishery Management Council, lead council on scallops.

The last public scoping meeting on marine fishery reserves will be held on October 26 at 6 p.m., to solicit input on the concept of reserves within which fishing for snapper and grouper would be prohibited.

The Snapper-Grouper Committee will meet on October 27 at 1:30 p.m. and on October 28 at 8:30 a.m., to discuss developing quotas for amberjack, golden tilefish, blueline (gray) tilefish, and snowy and yellowedge grouper as part

of Amendment #6 to the Snapper-Grouper FMP. Other items in the amendment to be reviewed by the Committee include quotas, a definition of allowable gear, and a requirement for Federal dealer permits. The Committee also will request an extension to the 90-day emergency rule that redefines sea bass pots and removes restrictive possession limits for sea bass fishermen off North Carolina and South Carolina. The Committee will approve an amendment to implement the new sea bass pot definition on a permanent basis.

The Council will hold closed sessions (not open to the public) of the Personnel Committee and Advisory Panel Selection Committee on October 27 at 8:30 a.m. and 9:30 a.m. respectively.

A detailed agenda with specific meeting times is available to the public. For more information contact Carrie Knight, Public Information Officer; South Atlantic Fishery Management Council; One Southpark Circle, suite 306; Charleston, SC 29407–4699; telephone: (803) 571–4366.

Dated: October 5, 1992.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Request for Public Comments on Bilateral Textile Consultations with the Government of Bahrain on Certain Cotton and Man-Made Fiber Textile Products

October 6, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Notice.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on categories for which consultations have been requested, call (202) 482–3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

On September 16, 1992, under the terms of Section 204 of the Agricultural Act of 1956, as amended, the Government of the United States requested consultations with the Government of Bahrain with respect to men's and boys' cotton and man-made fiber woven shirts in Categories 340/640, produced or manufactured in Bahrain.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations with the Government of Bahrain, the Committee for the Implementation of Textile Agreements may later establish a limit for the entry and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 340/640, produced or manufactured in Bahrain and exported during the twelve-month period which began on September 16, 1992 and extends through September 15, 1993, at a level of not less than 99,458 dozen.

A summary market statement concerning Categories 340/640 follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Categories 340/640, or to comment on domestic production or availability of products included in Categories 340/640, is invited to submit 10 copies of such comments or information to Auggie D. Tantillo, Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, DC 20230; ATTN: Helen L. LeGrande. The comments received will be considered in the context of the consultations with the Government of Bahrain.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, room H3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Further comments may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning Categories 340/640. Should such a solution be reached in consultations with the Government of Bahrain, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Market Statement—Bahrain

Category 340/640—Men's and Boys Cotton and Man-Made Fiber Woven Shirts

September 1992

Import Situation and Conclusion

U.S. imports of men's and boys' cotton and man-made woven shirts, Category 340/640, from Bahrain reached 99,458 dozen during the year ending June 1992, over four times the 24,005 dozen imported during the year ending in June 1991. During the first six months of 1992, imports of Category 340/640 from Bahrain reached 63,810 dozen, over eight times the 7,669 dozen imported during the same period a year earlier and one and one half times Bahrain's total calendar year 1991 Category 340/640 imports.

The sharp and substantial increase in Category 340/640 imports from Bahrain is causing disruption in the U.S. market for men's and boys' cotton and man-made fiber woven shirts.

Import Penetration and Market Share

U.S. production of men's and boys' cotton and man-made fiber woven shirts, Category 340/640, declined 28 percent falling from 16,401,000 dozen in 1988 to 11,729,000 dozen in 1991. U.S. production during the year ending March 1992 remained relatively even with the year ending March 1991 level. U.S. imports of men's and boys' cotton and man-made fiber woven shirts, Category 340/640, declined in 1990 and 1991. However, Category 340/640 imports surged in 1992, increasing 30 percent in the first half over the January-June 1991 level and reaching 27,298,374 dozen in the year ending in June 1992, 18 percent above the 23,196,118 dozen imported during the year ending June 1991 and the highest 12 month level since the year ending in July 1987.

The ratio of imports to domestic production increased from 157 percent in 1988 to 205 percent in 1991. This trend

continued in 1992, with the ratio of imports to production reaching 208 percent during the year ending March 1992. The domestic manufacturers' share of the market for men's and boys' cotton and man-made fiber woven shirts fell from 39 percent in 1988 to 33 percent in 1991. This decline continued in 1992, with the domestic manufacturers' share of the market falling to 32 percent during the year ending March 1992.

Duty-Paid Value and U.S. Producers' Price

Approximately 89 percent of Category 340/640 imports from Bahrain during the year ending June 1992 entered the U.S. under HTSUSA number 6205.20.2065—other men's cotton shirts, other than yarn dyed. These shirts entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable shirts.

BILLING CODE 3510-DR-F

Request for Public Comments on Bilateral Textile Consultations with the Government of Qatar on Certain Cotton and Man-Made Fiber Textile Products

October 6, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Notice.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on categories for which consultations have been requested, call (202) 482-3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

On September 24, 1992, under the terms of Section 204 of the Agricultural Act of 1956, as amended, the Government of the United States requested consultations with the Government of Qatar with respect to cotton and man-made fiber women's and girls' woven shirts and blouses, produced or manufactured in Qatar.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations with the Government of Qatar, the Committee for the Implementation of Textile Agreements may later establish a limit for the entry and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 341/641, produced or manufactured in Qatar and exported during the twelve-month period which began on September 24, 1992 and extends through September 23, 1993, at a level of not less than 100,089 dozen.

A summary market statement concerning Categories 341/641 follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Categories 341/641, or to comment on domestic production or availability of products included in Categories 341/641, is invited to submit 10 copies of such comments or information to Auggie D. Tantillo, Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, DC 20230; ATTN: Helen L. LeGrande. The comments received will be considered in the context of the consultations with the Government of Qatar.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, room H3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Further comments may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning Categories 341/641. Should such a solution be reached in consultations with the Government of Qatar, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Market Statement—Qatar

Category 341/641—Women's and Girls' Cotton and Man-Made Fiber Woven Shirts and Blouses

September 1992

Import Situation and Conclusion

U.S. imports of women's and girls' cotton and man-made fiber woven shirts and blouses, Category 341/641, from Qatar reached 100,089 dozen in the year ending in June 1992, triple the 32,963 dozen imported during the year ending June 1991. During the first six months of 1992, imports of Category 341/641 from Qatar surged to 78,067 dozen, six and one half times the 12,028 dozen imported in January-June 1991, and double Qatar's total calendar year 1991 imports.

The sharp and substantial increase in Category 341/641 imports from Qatar is causing disruption in the U.S. market for cotton and man-made fiber woven shirts and blouses.

U.S. Production, Import Penetration, and Market Share

U.S. production of women's and girls' cotton and man-made fiber woven shirts and blouses, Category 341/641, declined in every year since 1987, falling from 23,838,000 dozen in 1987 to 14,875,000 dozen in 1991, a decline of 38 percent. U.S. production in the year ending in March 1992 was 5 percent below the year ending March 1991 level. U.S. imports of women's and girls' cotton and man-made fiber woven shirts and blouses, Category 341/641, were volatile between 1987 and 1991, declining in 1988, increasing in 1989, dropping again in 1990, and increasing in 1991. However, Category 341/641 imports surged in 1992, increasing 22 percent in the first half over the January-June 1991 level and reaching 23,926,420 dozen in the year ending in June 1992, 15 percent above the year ending June 1991 level.

The ratio of imports to domestic production increased from 95 percent in 1987 to 144 percent in 1991. This increase continued in 1992, with the ratio of imports to domestic production reaching 147 percent for the year ending March 1992. The domestic manufacturers' share of the U.S. women's and girls' cotton and man-made fiber woven shirt and blouse market fell from 51 percent in 1987 to 41 percent in the year ending March 1992.

Duty-Paid Value and U.S. Producers' Price

Approximately 80 percent of Category 341/641 imports from Qatar during the year ending June 1992 entered the U.S. under HTSUSA number 6206.40.3030—women's man-made fiber woven blouses

and shirts, other than yarn dyed. These blouses and shirts entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable women's and girls' woven blouses and shirts.

BILLING CODE 3510-DS-F

DEPARTMENT OF DEFENSE

Office of the Secretary

DOD Advisory Group on Electron Devices; Advisory Committee Meeting

SUMMARY: The DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATES: The meeting will be held at 0900, Tuesday, 27 October 1992.

ADDRESSES: The meeting will be held at Palisades Institute for Research Services, Inc., 2011 Crystal Drive, One Crystal Park, suite 307, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Becky Terry, AGED Secretariat, 2011 Crystal Drive, One Crystal Park, suite 307, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The AGED meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The agenda for this meeting will include programs on Radiation Hardened Devices, Microwave Tubes, Displays and Lasers. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Public Law 92-463, as amended (5 U.S.C. App. II 10(d) (1988)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552(c)(1) (1988), and that accordingly, this meeting will be closed to the public.

Dated: October 6, 1992.

L.M. Bynum,

Alternate, OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92-24756 Filed 10-9-92; 8:45 am]

BILLING CODE 3810-01-M

DOD Advisory Group on Electron Devices; Advisory Committee Meeting

SUMMARY: Working Group C (Mainly Opto-Electronics) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATES: The meeting will be held at 0900, Wednesday and Thursday, 28-29 October 1992.

ADDRESSES: The meeting will be held at Fort Monmouth, NJ, Myer Center, Bldg 2700 (HEX), room 4D121.

FOR FURTHER INFORMATION CONTACT: Gerald Weiss, AGED Secretariat, 2011 Crystal Drive, suite 307, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. This opto-electronic device area includes such programs as imaging device, infrared detectors and lasers. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Public Law 92-463, as amended, (5 U.S.C. App. II 10(d) (1988)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly, this meeting will be closed to the public.

Dated: October 6, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Defense Advisory Committee on Military Personnel Testing

Pursuant to Public Law 92-463, notice is hereby given that a meeting of the Defense Advisory Committee on Military Personnel Testing is scheduled to be held from 8:30 a.m. to 4:30 p.m. on Nov 12, 1992 and from 8:30 a.m. to 4:30 p.m. on Nov 13, 1992. The meeting will be held at the Inn of the Governors, 234 Don Gaspar, Santa Fe, NM. The purpose of the meeting is to review planned changes in the Department of Defense's Student Testing Program and progress in developing paper-and-pencil and computerized enlistment tests. Persons desiring to make oral presentations or submit written statements for consideration at the Committee meeting must contact Dr. Jane M. Arabian, Assistant Director, Accession Policy, Office of the Assistant Secretary of Defense (Force Management and Personnel), room 2B271, The Pentagon, Washington, DC 20301-4000, telephone (703) 695-5525, no later than Oct 30, 1992.

Dated: October 6, 1992.

L.M. Bynum,

Alternate ODS Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Defense Nuclear Agency

Membership of the Defense Nuclear Agency Performance Review Board

AGENCY: Department of Defense, Defense Nuclear Agency.

ACTION: Notice of membership of the Defense Nuclear Agency Performance Review Board.

SUMMARY: This notice announces the appointment of the members of the Performance Review Board (PRB) of the Defense Nuclear Agency. The publication of PRB membership is required by 5 U.S.C. 4314(c)(4). The Performance Review Board shall provide fair and impartial review of Senior Executive Service performance appraisals and make recommendations regarding performance and performance awards to the Director, Defense Nuclear Agency.

EFFECTIVE DATE: The effective date of service for the appointees of the DNA PRB is on or about 10 November 1992.

FOR FURTHER INFORMATION CONTACT: D. Dial-Alfred, Workforce Effectiveness Branch (CVWE), Defense Nuclear Agency, Washington, DC 20305-1000, (703) 325-7593.

SUPPLEMENTARY INFORMATION: The names and titles of the members of the DNA PRB are set forth below. All are DNA officials unless otherwise identified:

Dr. George W. Ullrich, Deputy Director
RADM Hugh D. Wisely, Director for Operations
Dr. Don A. Linger, Director for Test
Mr. Robert L. Brittigan, General Counsel
Mr. Curtis L. Dierdorff, Director of Personnel, Defense Mapping Agency
Dr. Robert L. Drummond, Acting Director, Defense Network Systems Organization
Defense Information Systems Agency

The following DNA officials will serve as alternate members of the DNA PRB, as appropriate.

Dr. E. John Ainsworth, Scientific Director
Dr. Paul H. Carew, Comptroller
Mr. Frederick S. Celec, Deputy Director for Operations
Mr. Jonathan Z. Farber, Special Assistant to the Deputy Director
Mr. David G. Freeman, Director, Acquisition Management Office
Dr. Kent L. Goering, Chief, Structural Dynamics Division
Mr. Richard L. Gullickson, Chief, Electromagnetic Applications Division
Mr. Joseph W. LaComb, Chief, Nevada Operations Office
Dr. Don A. Linger, Director for Test
Mr. Clifton B. McFarland, Jr., Director for Shock Physics
Mrs. Joan Ma Pierre, Director for Radiation Sciences
Mr. Robert C. Webb, Chief, Electronic Effects Division
Dr. Leon A. Wittwer, Chief, Atmospheric Effects Division

Dated: October 5, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92-24758 Filed 10-9-92; 8:45 am]

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Teleconference Meeting

AGENCY: National Assessment Governing Board; Education.

ACTION: Notice of teleconference meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Subject Area Committee #1 of the National Assessment Governing Board. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: October 14, 1992.

TIME: 3:30 p.m. (e.t.).

LOCATION: 800 North Capitol Street, suite 825, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mary Ann Wilmer, Operations Officer, National Assessment Governing Board, suite 825, 800 North Capitol Street NW., Washington, DC 20002-4233, telephone (202) 357-6738.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Educational Progress Improvement Act (NAEP Improvement Act), title III-C of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100-297), (20 U.S.C. 1221e-1).

The Board is established to formulate policy guidelines for the National Assessment of Educational Progress. The Board is responsible for selecting subject areas to be assessed, developing assessment objectives, identifying appropriate achievement goals for each grade and subject tested, and establishing standards and procedures for interstate and national comparisons.

The Subject Area Committee #1 of the National Assessment Governing Board will meet October 14, 1992, from 3:30 p.m. until 5 p.m. Because this is a teleconference meeting, facilities will be provided so the public will have access to the Committee's deliberations. The purpose of this teleconference meeting is to take final action on the 1993 NAEP Geography and U.S. History field test items in preparation for the committee's report to the full Board at its quarterly meeting, November 1992. The public is given less than fifteen days notice of this teleconference because unforeseen technical changes in several of the items resulted in the analysis not being completed until October 1, 1992.

Records are kept of all Board proceedings and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, suite 825, 800 North Capitol Street, NW., Washington, DC, from 8:30 a.m. to 5 p.m.

Dated: October 6, 1992.

Mary Ann Wilmer,

Acting Executive Director, National Assessment Governing Board.

[FR Doc. 92-24766 Filed 10-9-92; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Office of Environmental Restoration; Departmental Response

AGENCY: Office of Environmental Restoration, [DOE EM-43], Department of Energy.

ACTION: Notice.

SUMMARY: DOE published a notice in the September 6, 1991, **Federal Register** (56 FR 44078) requesting public comments on the Priority System being developed and implemented for its Office of Environmental Restoration. This **Federal Register** Notice explains the main issues raised in the comments and summarizes DOE responses to these comments. DOE has also prepared a "Priority System Comment-Response Document" responding in more detail to public comments and is sending it to all commenters. Copies of this **Federal Register** Notice, of the detailed comment-response document, and of all comments received by DOE are available in DOE reading rooms.

ADDRESSES AND FURTHER INFORMATION: To receive a copy of the Priority System Comment-Response Document, or to receive further information about the Priority System, please contact: Frank Baxter, U.S. Department of Energy, Office of Environmental Restoration, EM-433, 1000 Independence Avenue, SW., Washington, DC 20585, or call (301) 903-7435, or FAX (301) 903-8134.

DOE is providing a copy of this **Federal Register** Notice and a copy of the more comprehensive Priority System Comment Response-Document to each signatory of the comment letters, to members of the State and Tribal Government Working Group, to members of the Priority System External Review Group, and to participants in the October 1991 National Workshop on the Priority System.

Copies of this **Federal Register** Notice, of the comment-response document, and of the public comments will also be available in DOE reading rooms. These reading rooms are located at:

U.S. Department of Energy, Room 1E-190, 1000 Independence Avenue, SW., Washington, DC 20585.
U.S. Department of Energy, Albuquerque Field Office, National Atomic Energy Museum, Building 20358, Kirkland Air Force Base, Wyoming Boulevard, Albuquerque, NM 87115.
U.S. Department of Energy, Amarillo Area Office, P.O. Box 30030, Amarillo, TX 79120.
U.S. Department of Energy, Chicago Field Office, 9800 South Cass Avenue, Argonne, IL 60439.
U.S. Department of Energy, Fernald Environmental Management Project, Public Environmental Information Center, Jamtek Building, 10845 Hamilton Cleves Highway, Harrison, OH 45030.
Idaho National Engineering Laboratory, Pocatello Office, 215 North 9th, Pocatello, ID 83201.
Idaho National Engineering Laboratory, Twin Falls Office, 1061 Blue Lakes Blvd., North, Suite 106, Twin Falls, ID 83001.
U.S. Department of Energy, Idaho Field Office, 1776 Science Center Drive, Idaho Falls, ID 83402.
U.S. Department of Energy, Nevada Field Office, 2753 South Highland Avenue, Las Vegas, NV 89192-8518.
U.S. Department of Energy, Oak Ridge Field Office, 200 Administration Road, Oak Ridge, TN 37831-8510.

U.S. Department of Energy, Richland Field Office, 825 Jadwin Avenue, Richland, WA 99352.
Rocky Flats Public Reading Room, Front Range Community College, 3645 West 112th Avenue, Westminister, CO 80030.
U.S. Department of Energy, San Francisco Field Office, 1333 Broadway, Oakland, CA 94612.
U.S. Department of Energy, Savannah River Operations Office, Gregg-Granite Library, University of South Carolina-Aiken, 171 University Parkway, Aiken, SC 29801.

SUPPLEMENTARY INFORMATION: DOE received 14 letters in response to the September 6, 1991, **Federal Register** Notice requesting public comment on the Priority System being developed by the Office of Environmental Restoration of DOE's Office of Environmental Restoration and Waste Management (EM) for use in its environmental restoration (ER) program. Many of the letters raised similar points and DOE has organized its response to the letters by grouping the comments into 14 topics, summarizing the issues raised by commenters, and explaining DOE's responses to these issues in the Priority System Comment-Response Document. This **Federal Register** Notice submission contains a summary of these issues and DOE responses.

1. Use of the Priority System in the DOE Budget Planning Process

Issue. Commenters expressed concern that DOE proposes to apply the Priority System to create budget requests that are insufficient to meet all of DOE's commitments. One commenter objected to using the Priority System to establish initial funding requests and said that using the system as a budget planning technique is suspect.

Response. DOE does not plan to use the Priority System to justify budget requests insufficient to meet legal commitments. DOE intends to request sufficient funds to support compliance with applicable environmental standards, as required by Executive Order 12088. In carrying out its program activities, DOE is committed to comply with applicable State and Federal laws, regulations, agreements, and treaty rights and to consider the cultural interests of Native Americans. In the available documentation on the Priority System, DOE has stated that the Priority System would be useful in developing the total budget request. However, several parties have suggested that this is not an appropriate use of the Priority System. DOE agrees with this recommendation. Priority System outputs that seem to imply a "recommended" total funding level will be eliminated. DOE will not use the Priority System to develop the total Environmental Restoration budget request level.

2. Regulatory Issues

Issue. Commenters suggested that the Priority System should be used only in instances where Congress has allocated insufficient funds to meet all legal requirements or when there are funds available beyond those required to meet all such requirements. Other commenters added that even if regulators and stakeholders were adequately involved in implementing the prioritization system, the results would still have to be used only in consensual contexts. That is, the results could be used in negotiating or renegotiating permit or agreement schedules.

Response. DOE agrees that Priority System results will be most useful in instances where more or less money is available than is called for by the requirements case; that is, when more or less money is available than is required to perform all the activities necessary to meet all legal requirements. DOE further agrees that the system could be useful in consensual situations. If the Priority System results suggested that certain activities mandated by environmental agreements were not an efficient or effective use of resources, and if DOE believed it could justify a proposal to delay or cancel those activities, then DOE would work with the regulators to resolve the issue.

3. Public Involvement

Issue. Commenters said that DOE should establish definitive procedures for public and regulatory involvement in the Priority System implementation. Commenters also said that States, Tribes, and the public should be informed of and involved in every aspect, judgment, and decision in the Priority System's application and ongoing development, including input to, review of, and, in the view of some commenters, concurrence with proposed activities, cost estimates, scores, rankings, cases, sensitivity analyses, and weights. Commenters said that numerous budget decisions are made beyond the application of the Priority System and that there is a great deal of concern regarding the appropriate degree of external involvement in each of these stages.

Response. DOE is developing a public participation process that will integrate public participation in all EM programs. Public participation in Priority System applications will be integrated with public participation in other EM programs.

4. System Complexity

Issue. Some commenters said that the Priority System is too data-intensive and complex for its purposes. Others stated that the Priority System it too simple for accurately assessing risk and too complex to be a practical budgeting tool. Some commenters stated that parts of the system are overly simplistic, while others said that the complexity of the system would continue to hamper public participation during the implementation of the system.

Response. DOE's goal has been to make the Priority System no more complex than necessary to address the problem it is meant to aid. Unfortunately, the problem of allocating environmental restoration funds among DOE field offices and their projects is itself complex. Problem complexities include: (1) The large number of hazardous waste problems that must be addressed, (2) the nature and number of criteria (prioritizing considerations) that must be accounted for by the Priority System, and (3) the varying amount and quality of available data that must be accommodated. The complexities of the Priority System reflect the inherent complexities of the problems facing the Environmental Restoration program. The Priority System could be simplified, but not without losses in system accuracy, defensibility, or usefulness. Asked to comment on the degree of system complexity, and independent expert from the Electric Power Research Institute concluded that, although the system seems complicated, it would be difficult to simplify it without reducing its usefulness. The Priority System is quantitative, which may contribute to the perception that it is complex. The independent Technical Review Group (TRG) concluded that a quantitative approach is appropriate and much to be preferred over qualitative approaches. The TRG also labeled the theory underlying the system, multiattribute utility, as the best approach for a problem of this difficulty. Finally, while DOE agrees that the system is too simple for accurately assessing risk, this is not the function of the Priority System. The system's function is to aid in making environmental restoration funding allocation decisions (wherein risk is a date input).

5. Screening

Issue. Commenters addressed the Priority System screening process. One commenter strongly supported separate funding for emergency and time-critical activities. Another agreed with the specific criteria used to determine

whether an activity is time-critical, stating that all these factors are important. One commenter suggested that the DOE defined the category of emergency activities too narrowly. Others suggested specific additions to the list of factors which qualify an activity as emergency or time-critical.

Response. DOE appreciates the generally positive view of the screening process and considers the screening process to be a very useful part of the system. DOE does not believe that the emergency activities category has been too narrowly defined. The screening criteria are deliberately narrow, since the criteria are designed to identify activities that would be funded regardless of the competition for funding other activities. In response to suggestions from commenters, DOE will update system documentation and scoring instructions to address significant further spread of off-site contamination as a "time-critical" problem, and to clarify that all other activities required by regulations are included in the "other high benefit" category.

6. Criteria and Weighting Factors

Issue. Commenters discussed the criteria and the weighting factors used in the system. One commenter stated that the objectives outlined are appropriate and comprehensive, while others suggested additional criteria or revisions and clarifications to existing criteria. Additional criteria suggested included: The quantity and quality of remediated and closed sites; timing of environmental risk; response to laws and treaties pertinent to Indian tribes and Nations; remediation worker health effects, and DOE's 30-year cleanup goal. However, a few commenters argued that the system is too ambitious in its objectives and suggested that the uncertainty reduction criterion could be eliminated or combined with other criteria.

Response. In deciding on objectives to include as criteria in the Priority System, DOE considered it desirable to include all significant factors that motivate ER activities. At the same time, DOE had to consider the complexity added to the system by additional criteria and the level of effort required to provide the system inputs. DOE developed a list of candidate factors for making environmental restoration budgeting decisions through an extensive process involving DOE Headquarters and field office personnel, as well as external parties (through the External Review Group). This list was reduced to the current criteria included in the system by eliminating factors that are generally less significant or difficult to formalize. DOE believes that this set of criteria adequately captures the main drivers for conducting environmental restoration activities. That is, if a project is not intended to reduce health risks, reduce environmental risks, reduce uncertainty over risks and costs, reduce adverse socioeconomic impacts, or respond to regulatory agreements, it should generally be a lower priority. While all the suggested additions have merit, their inclusion would result in increased complexity, which is another concern about the system. DOE does not believe the objectives currently included in the system are too ambitious. Furthermore, DOE believes that eliminating any of the current objectives would reduce the system's usefulness and credibility. In particular, removing the uncertainty reduction criterion would lead the system to drastically undervalue characterization activities.

7. Scoring and Professional Judgment

Issue. Commenters had questions and comments about the scoring process. Some concerned specific criteria, but most related to the role of professional judgment in developing the scores and the subjectivity of some of the judgments required. General concerns about the scoring process included: That the scoring process is inherently subjective, that the usefulness of the scoring instructions is a function of the expertise and experience of people making the judgments, and that the subjectivity of the inputs makes the outputs essentially meaningless. Among commenters who felt that some type of professional judgment is necessary in this system, the primary concern was the question of who is qualified to make those judgments. Several commenters suggested that DOE's credibility was too low to engender any faith in their estimates and suggested that these judgments should instead be made by an independent party.

Response. DOE agrees that the scoring process requires subjective judgment and depends upon the expertise of the scorer. Virtually any professional undertaking depends to a large degree upon professional judgment and the expertise of the participant, whether that person is a doctor, lawyer, remediation project engineer or manager. DOE has adopted the following approach to increase the accuracy of the judgments and, therefore, the credibility of the inputs. DOE provides specialized training to scorers and the scoring process includes a formal review of each score by Priority System experts and program managers. DOE does not agree that inputs based on subjective expert judgments result in meaningless outputs. In any situation in which objective, undisputed data are not available, there are two choices: Make no decisions until better data are available or base the decisions on the best data available, including professional judgments. Given that budgeting decisions must be made on an annual basis, DOE chose the latter approach. DOE believes that budgeting decisions made in light of the insights provided by the system are much better than decisions made without the benefit of the system. The issue of who is to make the judgments required by the system is a difficult one. DOE has assigned responsibility for generating inputs to field office managers, whom DOE considers best equipped with the knowledge required to answer the site-specific questions asked. Scorers develop the inputs for the system using the best available data in consultation with site experts in the relevant areas.

8. Quality of Data

Issue. Several commenters were concerned about the quality of data available to support the scoring judgments, particularly in the area of risks. One commenter stated that the lack of reliable data makes use of the Priority System premature at best. One commenter said that the data limitations are severe enough to warrant abandoning the system. Several commenters suggested that in the past, DOE's position has been that the weapons complex poses no immediate threat to public health and that this position is unsubstantiated and somewhat misleading. These commenters also said that because of this history, DOE should not have a significant role in performing risk assessments, but rather than any risk assessments should be performed by independent agencies.

Response. Hard data concerning environmental problems that DOE must address are, indeed, largely lacking. What to do in the face of data of varying degrees of quality is a difficult problem. DOE's philosophy is that it is better to make decisions by applying logic and using the best data available than to make no decisions until better data is available. DOE recognizes the need to improve the quality of available data, not only for the Priority System, but for general planning purposes as well. The Priority System is not intended to be a substitute for efforts to collect better information. As better data become available, that data will be used as input to the system. DOE is particularly disturbed by the suggestion that the

Priority System be abandoned until some time in the future when better data is available at all sites. The Priority System represents an explicit and defensible logic for combining available information and data. Limited data does not obviate the need for sound logic. DOE believes the system is a valuable aid to the finding allocation decision making process. It helps improve the quality of funding decisions and also provides a means for clearly documenting the logic underlying the choices which must be made. In making multimillion-dollar investments designed to reduce human health risks, DOE must estimate levels of risk and the potential effectiveness of expenditures to reduce risk. Therefore, it is essential that the Priority System incorporate available risk information, even as DOE makes efforts towards improving the quality of that information. DOE also recognizes that the issue of current health impacts from DOE installations needs to be further explored and that statements about the risk from DOE sites will have much more credibility if they come from an agency other than DOE. Accordingly, DOE has been working with the Agency for Toxic Substances and Disease Registry (ATSDR) of the U.S. Public Health Service to conduct health consultations at DOE sites. In particular, DOE and ATSDR signed an Interagency Agreement on August 19, 1991. This allows ATSDR to staff-up and begin their activities in 1992.

9. Sensitivity Analyses

Issue. Commenters provided suggestions concerning sensitivity analyses, stating that a sensitivity analysis is necessary to conduct a thorough assessment of the technical aspects of the system. One commenter stated that the sensitivity analyses conducted by DOE consider the impact of only relatively small changes to individual system components.

Response. DOE has conducted numerous sensitivity analyses, as summarized below. However, in response to this comment, DOE will request that the National Academy of Sciences perform an independent review of this issue and determine if additional sensitivity analyses are warranted. DOE has conducted analyses of the sensitivity of Priority System outputs to changes in weights and scores. DOE has conducted analyses that investigated systematic changes in scores and changes in weights on regulatory responsiveness, individual health risk, environmental risk, and socioeconomic impacts. DOE has also conducted analyses to discern the sensitivity of system results to joint changes in weights and scores. These analyses show that the results are not very sensitive at the programmatic level, but are sensitive at the field office and project levels. That is, if the weights are changed, the amount of funding the Priority System would allocate to On-Site Remediation, Decontamination and Decommissioning, UMTRA, and the FUSRAP does not vary significantly, but the amount of funding the system would allocate to a particular field office or project can vary quite significantly.

10. Risk and Risk Assessment

Issue. Commenters expressed concern that risk assessment is an inexact science, that risk assessments are based on assumptions that are subject to some controversy, and that risk assessments are not consistent across installations.

Response. DOE agrees that risk assessment is an inexact science. Risk assessment is a relatively new and evolving discipline and is often viewed as an art as much as a science. Because risk assessments are not consistent across projects, scorers are required to provide risk inputs to the Priority System using the best data available and in accordance with a clearly defined quantitative scale. (For example, a score of 4 on the individual health risks scale indicates that the highest risk posed to any individual from the waste problems being scored is 10^{-4}; a score of 5 indicates an individual risk of 10^{-5}.) The use of a consistent, quantitative scale helps to ensure that two projects where DOE managers believe the risks to be similar are scored similarly, rather than scored differently depending, perhaps, on the varying degrees of conservatism in the risk assessments for the two sites. DOE also supports the use of quantitative risk models, such as the Multimedia Environmental Pollutant Assessment System, at all of its field offices. DOE currently has an agreement with the ATSDR to conduct health consultations as input to the Priority System.

11. Detailed Technical Questions and Comments

Several commenters asked questions about technical aspects of the Priority System and how it works and commented on the techniques and methodologies implemented in the system. These comments and the DOE responses are listed in the Priority System Comment-Response Document.

12. Priority System in Relation to Other Systems

Commenters asked questions about the Priority System's relationship to the EM Programmatic Environmental Impact Statement (PEIS), to the EM Office of Waste Management's Resource Allocation Support System (RASS), to the EM Five Year Plan, and to other priority setting approaches. These comments and the DOE responses are listed in the Priority System Comment-Response Document.

13. Comments on the Preliminary Design Report as a Document

Several commenters made very useful suggestions and comments about the Preliminary Design Report, the document which describes the Priority System. Wherever possible, DOE will update the documentation to incorporate these suggestions and to clarify passages which commenters thought were misleading. The comments and the DOE responses are listed in the Priority System Comment-Response Document.

14. Other Issues

Commenters raised several issues related to the Priority System which cannot be addressed easily in any of the categories above. These comments and the DOE responses are listed in full in the Priority System Comment-Response Document.

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

[FR Doc. 92-24676 Filed 10-9-92; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. RP93-3-00]

Arkla Energy Resources a Division of Arkla, Inc.; Proposed Changes in FERC Gas Tariff

October 6, 1992.

Take notice that on October 1, 1992, Arkla Energy Resources ("AER"), a division of Arkla, Inc. tendered for filing proposed changes in its FERC Gas Tariff, Second Revised Volume No. 1 and First Revised Volume No. 1-A. AER states that the proposed tariff sheets reflect an annual overall jurisdictional rate increase of approximately $61 million, based on the 12-month period ending June 30, 1992, as adjusted. AER states that the rates approved in the settlement in Docket No. RP91-65 were based on the cost of service and throughput levels in AER's previous rate case filed in 1987. Since that time, much has changed in terms of AER's investment in and services rendered on its system. AER states that its currently-

effective rates do not reflect AER's current cost of service or throughput levels.

AER states that in this filing it proposes to recover in its rates costs associated with Line AC, and requests removal of the "at-risk" condition imposed with respect to Line AC. AER states that it proposes to amend its Rate Schedule FT to modify its currently-effective capacity assignment program to be consistent with the capacity release program outlined in Order Nos. 636 and 636-A and to provide for flexible delivery point procedures, also as outlined in Order Nos. 636 and 636A. AER further proposes to provide cash balancing as an option to design gathering rates using the enhanced fixed variable methodology, to require that all transportation customers provide fuel in-kind, and to exclude all products extraction costs from its jurisdictional rates.

AER states that copies of the filing were served on AER's jurisdictional customers and interested state public commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before October 13, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-24707 Filed 10-9-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER92-723-000]

Massachusetts Electric Company; Filing

October 6, 1992.

Take notice that on October 1, 1992, New England Power Service Company, on behalf of the Massachusetts Electric Company (MECo), tendered for filing an amendment to MECo's initial filing of its FERC Electric Service Tariff, Volume No. 1. MECo's proposed tariff would govern its borderline sales to other utilities. The amendment provides additional data regarding such sales.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before October 15, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-24708 Filed 10-9-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER92-537-000]

Union Electric Company Filing

October 6, 1992.

Take notice that Union Electric Company, on September 28, 1992 tendered for filing a Second Amendment to the 25 Hertz Wholesale Power Agreement between Union Electric Company (UE) and Iowa Electric Light and Power Company (IELP), and a Second Amendment to the Interchange Agreement between UE and IELP.

UE states that the purpose of the Second Amendment to the 25 Hertz Agreement is to specify a cap in the rates based on the maximum demand and energy charges for UE's Callaway Plant.

The purpose of the Second Amendment to the Interchange Agreement is to make changes to the caps for IELP's Short Term Power, System Participation Power, Term Energy, and its FERC Order 84 Adder. Also, the Second Amendment changes the FERC Order 84 Adders of both IELP and UE to make explicit that the $1/Mwh charge for hard to quantify costs shall only apply to transactions of less than one year's duration.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before October 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-24709 Filed 10-9-92; 8:45 am]

BILLING CODE 6717-01-M

Office of Fossil Energy

[FE Docket No. 92-61-NG]

P.M.I. Comercio Internacional, S.A. de C.V.; Order Granting Blanket Authorization To Export Natural Gas to Mexico

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting P.M.I. Comercio Internacional, S.A. de C.V. blanket authorization to export up to 219 Bcf of natural gas during the first year and 292 Bcf during the second year of a two-year period beginning on the date of first delivery.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 6, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92-24802 Filed 10-9-92; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[AD-FRL-4520-8]

National Air Pollution Control Techniques Advisory Committee; Open Meeting

ACTION: Notice of open meeting.

SUMMARY: A meeting of the National Air Pollution Control Techniques Advisory Committee will be held at the Durham Hilton, Trinity Ballroom, 3800 Hillsborough Road, Durham, North Carolina 27705. The telephone number is (919) 383–8833.

DATES: November 17 and 18, 1992.

FOR FURTHER INFORMATION CONTACT: All meetings are open to the public. Anyone wishing to make a presentation must contact Ms. Mary Jane Clark at the Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, by November 6, 1992. The telephone number is (919) 541–0386.

SUPPLEMENTARY INFORMATION: The agenda for the meeting is as follows:

November 17 (Tuesday)—9:00 a.m.
Emission Standards Division (ESD)—overview for committee*
ESD Title III Activities—Requirements of 1990 Clean Air Act Status Reports on 11 Projects Under Development (Description of Program, Overview of Issues, and Future Schedules)
—Source Categories Schedule (A–91–14)
—Early Reductions (A–90–47)
—General Provisions (A–91–09)
—Hazardous Organic NESHAP (HON) (A–90–19)
—Modification, Section 112(g) (A–91–64)
—State Program Guidance, Section 112(1) (A–92–46)
—Dry Cleaning (A–88–11)
—Coke Ovens (A–79–15)
—Municipal Waste Combustors (MWC) (A–90–45)
—Pulp and Paper (Non-Combustion Sources) (A–92–40)
—Secondary Lead (A–92–43)
ESD Title I Activities—Overview
Source Category Deletion Petition Process (A–91–62)
(Section 112(c) of the Clean Air Act)
National Emission Standards for Hazardous Air Pollutants (NESHAP)
(Section 112 of the Clean Air Act)
Gasoline Distribution (Stage I), Status Report (A–92–38)
Halogenated Solvent Cleaning-Degreasing, Regulatory Development (A–92–39)
November 18, (Wednesday)—8:30 a.m
Continuation of November 17—As Required
National Emission Standards for Hazardous Air Pollutants (NESHAP)
(Section 112 of the Clean Air Act)
Polymers and Resins Industry (Basic Liquid Epoxy and Wet Strength Resins), Regulatory Development (A–92–37)
Magnetic Tape Manufacturing Industry, Regulatory Development (A–91–31)
Cleanup Solvents Control Techniques Guidelines

A lunch break will be taken from 1–2 p.m. each day (breaks will be taken at approximately 11 a.m. and 4 p.m. each day)

*This session is designed to provide information to the Committee members regarding ongoing ESD activities. Only EPA presentations will be given during this session.

The dockets numbers are shown beside each subject on the agenda, if appropriate. Dockets containing material relevant to these subjects are located in the U.S. Environmental Protection Agency, Air Docket, room M1500, 1st floor-Waterside Mall, 401 M Street, SW., Washington, DC 20460. The dockets may be inspected between 8:30 a.m. and 3:30 p.m. on weekdays, and a reasonable fee may be charged for copying.

Dated: October 2, 1992.

Michael Shapiro,

Acting Assistant Administrator for Air and Radiation.

[FR Doc. 92–24786 Filed 10–9–92; 8:45 am]

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 1911]

Petitions for Reconsideration or Clarification Application for Review of Actions in Rulemaking Proceedings

October 6, 1992.

Petitions for reconsideration or clarification and application for review have been filed in the Commission rulemaking proceedings listed in this Public Notice and published pursuant to 47 CFR § 1.429(e). The full text of these documents are available for viewing and copying in room 239, 1919 M Street NW., Washington, DC, or may be purchased from the Commission's copy contractor Downtown Copy Center (202) 452–1422. Oppositions to these petitions and application must be filed by October 28, 1992. See § 1.4(b)(1) of the Commission's rules (47 CFR 1.4(b)(1)). Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

Subject: Reevaluation of the Depreciated-Original-Cost Standard in Setting Prices for Conveyances of Capital Interests in Overseas Communications Facilities Between or Among U.S. Carriers. (CC Docket No. 87–45) Number of Petitions Filed: 1

Subject: Amendment of Section 73.202(b), Table of Allotments, FM Broadcast Stations. (Neenah-Menasha, Rhinelander and Rudolph, Wisconsin) (MM Docket 89–308, RM Nos. 6891 & 7008) Number of Petitions Filed: 1

Subject: Amendment of Section 73.202(b), Table of Allotments, FM Broadcast Stations. (Decatur, Petal and Newton, Mississippi) (MM Docket No. 90–566, RM Nos. 7421, 7656 & 7657) Number of Petitions Filed: 1

Subject: Amendment of Section 73.606(b), Table of allotments, TV Broadcast Stations, (Bellingham and Anacortes, Washington) (MM Docket No. 92–47, RM No. 7929) Number of Petitions Filed: 1

Application for Review

Subject: Amendment of § 73.202(b), Table of allotments, FM Broadcast Stations, (Elkins, West Virginia; Mountain Lake Park and Westernport, Maryland) (MM Docket No. 89–580, RM Nos. 6977, 7177 & 7446) Number of Applications Filed: 1

Federal Communications Commission.

Donna R. Searcy,

Secretary.

[FR Doc. 92–24698 Filed 10–9–92; 8:45 am]

BILLING CODE 6712–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–961–DR]

Hawaii; Amendment to a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Hawaii (FEMA–961–DR), dated September 12, 1992, and related determinations.

EFFECTIVE DATE: September 18, 1992.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Hawaii, dated September 12, 1992, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of September 12, 1992: The island of Molokai for Individual Assistance and Public Assistance.

Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.

Grant C. Peterson,

Associate Director, State and Local Programs and Support.

[FR Doc. 92-24778 Filed 10-9-92; 8:45 am]

BILLING CODE 6718-02-M

[FEMA-961-DR]

Hawaii; Amendment to a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

EFFECTIVE DATE: September 18, 1992.

SUMMARY: This notice amends the notice of a major disaster for the State of Hawaii (FEMA-961-DR), dated September 12, 1992, and related determinations.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3606.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated September 18, 1992, the President amended the cost-sharing arrangements concerning Federal funds provided under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), in a letter to Wallace E. Stickney, Director of the Federal Emergency Management Agency, as follows:

I have determined that the damage in certain areas of the State of Hawaii, resulting from Hurricane Iniki on September 11, 1992, is of sufficient severity and magnitude that special conditions are warranted regarding the cost-sharing arrangements concerning Federal funds provided under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act") for the Public Assistance program.

Therefore, I amend my previous declaration, which limited the Federal reimbursement share for certain categories of expenditures, and I hereby authorize an increase in Federal reimbursement to 100 percent of eligible public assistance costs exceeding $10 per capita, where allowed under the law for extreme disasters. This 100 percent reimbursement for costs above $10 per capita applies to all authorized public assistance costs, including debris removal to eliminate immediate threats to public health and safety, emergency work to save lives and protect public health and safety, and repair or reconstruction of uninsured public and private non-profit facilities. Temporary housing assistance, mortgage/rental assistance, crises counseling assistance and disaster unemployment assistance will continue to be 100 percent federally funded, where allowed under the law. Funds for public assistance up to $10 per capita will be reimbursed pursuant to the conditions set forth in my previous declaration. However, if the eligible costs of responding to Hurricane Iniki in Hawaii do not reach the level of $10 per capita, then the cost sharing formula which I set forth in my original declaration letter of September 12, 1992 still applies.

This waiver of State and local cost-sharing requirements above $10 per capita applies to all public assistance costs eligible for such a waiver under the law. The law specifically prohibits a similar waiver for funds provided to States for the Individual and Family Grant program. These funds will continue to be reimbursed at 75 percent of total eligible costs.

This amended declaration is consistent with the request made to you by the Governor of the State of Hawaii.

Please notify the Governor of the State of Hawaii and the Federal Coordinating Officer of this amendment to my major disaster declaration.

Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.

Wallace E. Stickney,

Director.

[FR Doc. 92-24779 Filed 10-9-92; 8:45 am]

BILLING CODE 6718-02-M

FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL

Appraisal Subcommittee; Agency Form Submitted for OMB Review

AGENCY: Appraisal Subcommittee, Federal Financial Institutions Examination Council.

ACTION: Notice.

SUMMARY: The Appraisal Subcommittee of the Federal Financial Institutions Examination Council ("ASC") has sent to the Office of Management and Budget the following proposal for the collection of information under the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be received on or before November 12, 1992.

ADDRESSES: Send comments to Paul N. Romani, Associated Director for Administration, Appraisal Subcommittee, 2100 Pennsylvania Avenue, NW., Suite 200; Washington DC 20037, and Gary Waxman, Clearance Officer, Office of Management and Budget, New Executive Office Building, room 3228, Washington DC 20503.

FOR FURTHER INFORMATION CONTACT: Paul N. Romani, Associated Director for Administration, Appraisal Subcommittee, 2100 Pennsylvania Avenue, NW., Suite 200; Washington DC 20037, or at (202) 634-6520, from whom copies of the information collection and supporting documents are available.

Summary of Proposal(s)

(1) *Collection title:* 12 CFR part 1102, subpart D, Freedom of Information Act implementation.
(2) *Form(s) submitted:* Not applicable.
(3) *Frequency of collection:* On occasion.
(4) *Use:* The information will be used by the ASC and its staff in terminating whether requests for access to ASC records should be provided and whether appeals from adverse agency decisions regarding access should be granted under the Freedom of Information Act, 5 U.S.C. 552.
(5) *Estimated number of respondents:* 11.
(6) *Frequency of response:* Once.
(7) *Estimated hours for respondents to provide information:* 20 minutes per respondent.
(8) *Estimated total annual reporting and recordkeeping burden:* 3.67 hours.

Dated: 6 October 1992.

By the Appraisal Subcommittee, Federal Financial Institutions Examination Council.

Edwin W. Baker,

Executive Director.

[FR Doc. 92-24723 Filed 10-9-92; 8:45 am]

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

Performance Review Board; Membership; Senior Executive Service

AGENCY: General Services Administration.

ACTION: Notice.

SUMMARY: Notice is hereby given of the names of the member of the Performance Review Board.

FOR FURTHER INFORMATION CONTACT: Donald P. Heffernan, Director of Personnel, General Services Administration, 18th & F Streets, NW., Washington, DC 20405, (202) 501-0398.

SUPPLEMENTARY INFORMATION: Section 4313 (c)(1) through (5) of title 5 U.S.C. requires each agency to establish in accordance with regulations prescribed by the Office of Personnel Management one or more Performance Review Board(s). The Board(s) shall review the performance rating of each senior executive's performance by the supervisor, along with any recommendations to the appointing authority relative to the performance of the senior executive.

Members of the Review Board are:

1. James A. Lobmaster, (Chairperson), Chief of Staff.

2. Carlene Bawden, Associate Administrator for Administration.

3. June V. Huber, Deputy Regional Administrator, National Capital Region.
4. Roger D. Daniero, Commissioner, Federal Supply Service.
5. Richard H. Hopf, Associate Administrator for Acquisition Policy.
6. Delwyn D. Stromer, Regional Administrator, Region 6.
7. Steven R. Mead, Controller, Public Buildings Service.
8. Judith A. Parks, Assistant Commissioner for GSA Information Resources Management.
9. John F. Wynn, Director, Office of Small and Disadvantaged Business Utilization.

Dated: October 5, 1992.

Donald P. Heffernan,

Director of Personnel.

BILLING CODE 6820-34-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

[Announcement Number 305]

Program Announcement and Availability of Funds for Fiscal Year 1993 Cooperative Agreements for National/Regional Minority Organization HIV/STD Prevention, Immunization, and TB Projects

AGENCY: Centers for Disease Control (CDC), Public Health Service, HHS.

ACTION: Request for comments.

SUMMARY: CDC is preparing to announce the availability of fiscal year (FY) 1993 funds to provide support to national and regional minority organizations to carry out human immunodeficiency virus and sexually transmitted diseases (HIV/STD) prevention, immunization, and tuberculosis (TB) projects. This program announcement will assist the Nation's disease prevention efforts by broadening current partnerships between CDC and NMO and RMOs to include collaborative efforts directed at HIV/STD prevention, Immunization of preschool children, and TB elimination. Opportunities will be provided to strengthen capacities of national and regional minority organization and, through the technical assistance and training provided, community-based organizations, governmental agencies and other state/local organizations and agencies to address multiple public health problems and needs of racial/ethnic minority populations. This program will provide a foundation for even broader partnerships in the future capable of addressing additional public health problems affecting racial/ethnic minority populations. Because of the unique nature of this program, CDC invites comments from organizations and individuals on the draft of this announcement which is included in its entirety. Based on comments received, revisions will be made in this draft and the final announcement will be published in early calendar year 1993.

DATES: Written comments in response to this notice should be submitted to the Office of the Director, National Center for Prevention Services, Attention: Gary West, Centers for Disease Control, Mailstop E-07, Atlanta, GA 30333. Comments must be received on or before November 12, 1992.

FOR FURTHER INFORMATION CONTACT: Gary West, Office of the Director, National Center for Prevention Services, Centers for Disease Control, (404) 639-1480.

SUPPLEMENTARY INFORMATION: The following is the complete text of the draft program announcement for the national and regional minority HIV/STD prevention, Immunization, and TB projects.

Introduction

The Centers for Disease Control (CDC), the Nation's prevention agency, announces the availability of fiscal year (FY) 1993 funds for cooperative agreements with national and regional minority organizations. These agreements will support national and regional racial and ethnic minority organizations assisting community-based organizations (CBOs), state and local health agencies, and other organizations and agencies serving racial/ethnic minority populations for (I) HIV/STD prevention, (II) Preschool immunization, and (III) tuberculosis (TB) prevention and control. A cooperative agreement is a legal agreement between CDC and the recipient in which CDC provides financial assistance to and substantial Federal programmatic involvement with the recipient during the project.

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and to improve the quality of life. This announcement pertains to the priority areas of Educational and Community-Based Programs, HIV Infection, Sexually Transmitted Diseases (STDs), and Immunization and Infectious Diseases. (For ordering a copy of Healthy People 2000, see the section **WHERE TO OBTAIN ADDITIONAL INFORMATION**).

Authority

This program is authorized under sections 301(a) and 317 of the Public Health Service Act, (42 U.S.C. 241(a) and 247b), as amended.

Eligible Applicants

Eligible applicants include national (NMOs) or regional minority organizations (RMOs) that provide documentation proving they meet all of the following criteria. To be eligible a national or regional organizations must:

A. Be an established nonprofit organization (a nongovernmental, nonprofit corporation or association whose net earnings in no part lawfully accrue to the benefit of private shareholders or individuals). The following is acceptable evidence of nonprofit status:

- A reference to the applicant's organization in the Internal Revenue Service's most recent list of tax-exempt organizations described in section 501(c)(3) of the IRS code; or
- A copy of a currently valid IRS tax exemption certificate.

B. Have the specific charge from its Articles of Incorporation or Bylaws or a resolution from its governing body or board to operate nationally or regionally (multistate) within the United States and its Territories.

C. Have at least 12 months documented experience in operating and centrally administering a coordinated public health or related program serving racial/ethnic minority populations within a major portion or region (multistate) of the United States through its own offices, organizational affiliates, or the participation of other minority organizations.

D. Have a governing body or board that is composed of more than 50% racial or ethnic minority group members who are representative of the population to be served.

E. Document that each of the participating affiliates, chapters, or other participating minority organizations has a governing body or board whose membership is composed of more than 50% racial or ethnic minority group members.

F. Document that its program and administrative staff and the affiliates and participating organizations involved in the project are representative of the population to be served.

Proof of nonprofit and organizational status in accordance with other eligibility criteria must be submitted with the application for determination of

eligibility. No application will be accepted without proof of nonprofit status.

Availability of Funds

I. HIV/STD Prevention (HIV/STD)

On the basis of the President's FY 1993 budget, $7,000,000 is expected to be available to fund approximately 15 to 20 NMOs or RMOs to provide technical assistance, training, and other priority assistance in support of HIV/STD prevention services. At least 8 of these awards will be made to national organizations serving racial/ethnic minority populations in a major portion of the United States. Awards will range from $300,000 to $600,000 with an average award of $400,000.

Consideration will be given to supporting HIV/STD projects for each of the following racial and ethnic minority populations: African-Americans, Alaskan Natives, American Indians, Asian Americans, Latinos/Hispanics, and Pacific Islanders. These groups are identified in accordance with OMB Directive 15. Organizations serving subgroups which have significant portions of their members at increased risk, such as Caribbean Americans, will also have priority for funding.

II. Immunization

On the basis of the President's FY 1993 budget, $500,000 is expected to be available to fund approximately 1 to 3 NMOs or RMOs to provide technical assistance and training in support of preschool immunization activities. Awards will range from $175,000 to $500,000.

III. TB Prevention and Control (TB)

On the basis of the President's FY 1993 budget, $500,000 is expected to be available to fund approximately 1–3 NMOs or RMOs to provide technical assistance and training in support of TB screening, prevention and treatment activities. Awards will range from $175,000 to $500,000.

Applicants may apply for funds under any one or any combination of the funding categories (i.e., HIV/STD, Immunization, or TB), but the proposal must clearly state under which category funds are being requested. Regional affiliates of national organizations may not apply if the parent national organization submits an application.

Awards will be made for a 12-month budget period within a 5-year project period. (*Budget period* is the interval of time into which the project period is divided for funding and reporting purposes. *Project period* is the total time for which a project has been programmatically approved.) Continuation awards for new budget periods within an approved project period are made on the basis of satisfactory performance and the availability of funds.

These funds may not supplant or duplicate existing funding. Although contracts with other organizations are allowable under these cooperative agreement awards, applicants themselves must perform a substantive portion of the activities for which funds are requested. No funds will be provided for direct patient medical care or purchase of drugs or vaccines.

Background

Racial and ethnic minority populations have many important public health needs. Among these are disproportionate rates of HIV and other STDs, low levels of immunization among preschool children, and an increasing prevalence of tuberculosis. All three of these are important problems in themselves, however, factors such as poverty, underemployment, and poor access to the health care system, contribute to their disproportionate impact on the public health of racial and ethnic minority communities. The following provides background information concerning needs in these three critical public health program areas:

I. HIV/STD Prevention

Racial and ethnic minority populations have been disproportionately affected by HIV infection and AIDS since the beginning of the epidemic in the United States. Through June 1992, the CDC had received reports of 67,972 Blacks, 38,113 Hispanics, 1426 Asians/Pacific Islanders and 388 American Indians/Alaska Natives who have AIDS. In 1991, 50% of all reported AIDS cases were among Blacks and Hispanics, while they represent only 21% of the U.S. population. Men who have sex with men and injecting drug users continue to account for the majority of AIDS cases in minority populations; however, heterosexual cases are increasing. Minority women and children have been particularly hard hit. In New York State and New Jersey, AIDS is already the leading cause of death among Black women 15–44 years of age. And in New York State in 1988, AIDS became the leading cause of death among Hispanic children 1–4 years of age, and the second leading cause of death among Black children in the same age group.

During the past 40 years, there have been dramatic increases in the scope and complexity of STDs. Currently, U.S. STD rates are among the highest in the industrialized world and, in some areas, rival those in developing countries. In FY 1990, reported syphilis rates among Blacks were 56 times higher than in whites, and rates among Hispanics were 7 times higher. Increases in women have been echoed by at least a five-fold increase in congenital syphilis. The multiple, long term, debilitating consequences of STDs disproportionately affect women and infants. These consequences are particularly common among racial and ethnic minority populations. In addition, STDs promote HIV transmission. Simultaneously, HIV infection may increase susceptibility to several STDs and make it more difficult to treat these diseases. As a result, STD and HIV infection can greatly amplify each other, so STD control is essential to HIV prevention.

These statistics do not indicate individuals are at risk just because they are a member of a racial or ethnic minority group—these numbers simply reflect the fact that many minority populations are disproportionately represented in communities that have a high incidence of HIV and other sexually transmitted infections.

During FY 1993, CDC will award cooperative agreements to NMOs and RMOs to: (1) Assist in providing culturally competent/relevant technical assistance and training to organizations and agencies providing HIV/STD prevention services to racial/ethnic minority populations, (2) assess and help address the unmet HIV/STD prevention needs of racial and ethnic minority populations in the United States, and (3) implement programs intended to change community norms pertaining to safer behavior.

II. Immunization

In the United States, the immunization levels of children entering school have been at least 95 percent for many years. However, among preschool children the rates of vaccine coverage are far lower. Retrospective surveys of children entering school in urban areas were recently conducted to determine their immunization status as of their second birthday. Complete coverage (4 Diphtheria, Tetanus, Pertussis (DTPs), 3 Oral Polio Vaccine doses (OPVs), and 1 Measles, Mumps, and Rebella (MMR) immunization) ranged from a low of 10 percent to a high of 42 percent in some urban areas.

The most visible consequence of these low immunization levels in preschool children has been the recent increases in measles morbidity. Since 1989, CDC

has received reports of over 50,000 measles cases and 160 measles related deaths. The highest risk of disease occurred among infants and preschoolers. Almost one half of all reported cases occurred among unvaccinated preschool children, with Black and Hispanic children having 4–9 times the disease incidence of white preschool children. The greatest risk was among children living in inner cities.

During FY 1993, CDC will award cooperative agrements to NMOs and RMOs to provide culturally competent/relevant technical assistance and training to organizations and agencies providing immunization services to racial and ethnic minority populations, and to help assess and address the immunization needs of racial/ethnic minority populations.

III. TB Prevention and Treatment

From 1953, when nationwide TB reporting was first implemented, to 1984, the United States experienced an average decrease of 5% each year in the number of TB cases reported. In 1985, this decrease leveled off and in 1986 and subsequent years there has been an actual increase. During 1991, 26,283 cases were reported, an 18% increase since 1985. Using the trend data from 1980 through 1984 to estimate the number of cases from 1985 through 1991, CDC estimates that in the past seven years there have been over 39,000 more cases than would have been expected had the previous downward trend continued. From 1985 to 1991, TB cases increased 26% in Blacks, 72% in Hispanic, and 32% in Asian-Americans. The largest increase in the number of TB cases has occurred in the 25 to 44-year-old group. This is of particular interest because 76% of all reported AIDS cases are in this age group. In this age group, from 1985 to 1991, reported TB cases increased 52%; there was a 30% increase among non-Hispanic whites, a 60% increase among Blacks, a 96% increase among Hispanics, and a 24% increase among Asian-Americans.

During FY 1993, CDC will award cooperative agreements to NMOs and RMOs to assist in providing culturally competent/relevant technical assistance and training to organizations and agencies providing TB prevention and treatment services to racial and ethnic minority populations and to help assess and address the TB awareness, prevention and treatment needs of racial and ethnic minority populations in the United States.

National Program Goals

I. HIV/STD Prevention

A. Establish and maintain effective HIV/STD provention programs implemented in collaboration with state and local health departments' other state and local agencies, CBOs' healths care providers' and national organizations throughout the United States and its territories.

B. Effect and evaluate the initiation and maintenance of behavior change among persons whose behavior places them at risk of HIV infection and other STDs.

C. Increase access to prevention and early intervention services for HIV-infected persons in order to reduce risks of further transmission, as well as to maintain the health of asymptomatic clients.

D. Increase collaboration and support among agencies, organizations, groups, and constituencies providing HIV prevention services.

II. Immunization

A. Establish and maintain effective vaccine delivery services and immunization programs implemented in collaboration with state and local health departments, other state and local agencies, CBOs, health care providers, and national organizations throughout the United States and its territories.

B. Effect and evaluate the initiation and maintenance of behavior change among parents whose behavior places their children at risk for low immunization levels or high morbidity of vaccine-preventable diseases.

C. Increase access to vaccine delivery services and early intervention activities for persons at risk for low immunization levels and high morbidity of vaccine-preventable diseases in order to reduce risk of further transmission, as well as to maintain the health of preschool children.

D. Increase collaboration and support among agencies, organizations, groups, and constituencies providing vaccine delivery and immunization services.

III. TB Prevention and Treatment

A. Increase awareness among populations about risk factors for TB, TB symptoms, and the availability of TB screening, prevention, and treatment services in the community.

B. Increase participation of at-risk populations in tuberculin skin testing, preventive therapy and treatment programs.

C. Increase the skills of community leaders and health care professionals in carrying out TB awareness, tuberculin skin testing, and directly observed therapy (DOT) for persons with TB infedtion or disease.

D. Develop and maintain effective referral systems between CBOs and state, local, and county TB control programs for clients with symptoms of TB, with TB infection or disease, or with risk factors for TB.

E. Establish and maintain effective DOT services for individuals with TB infection or disease through collaboration among state and local health departments, other state and local health care providers, and national organizations throughout the United States and its territories.

F. Increase collaboration and support among agencies, organizations, groups, and constituencies providing TB screening and DOT services.

Purpose of NMO/RMO Cooperative Agreement Programs

This program announcement will assist the Nation's disease prevention efforts by broadening current partnerships between CDC and NMO and RMOs to include collaborative efforts for immunization of preschool children, and TB elimination in addition to HIV/STD prevention. Opportunities will be provided to strengthen capacities of national and regional minority organizations and, through the technical assistance and training provided, community-based organizations, governmental agencies and other state/local organizations and agencies to address multiple public health problems and needs of racial and ethnic minority populations. This program will provide a foundation for even broader partnerships in the future capable of addressing additional public health problems affecting racial and ethnic minority populations. Specifically this program will:

I. HIV/STD Prevention

A. Strengthen and increase the effectiveness of HIV/STD prevention for racial and ethnic minority populations at high risk, including men who have sex with men (gay-identified and non-gay identified), substance abusers, persons with repeated STD infections, women in high-risk situations, youth in high-risk situations, sex partners of persons at high risk for HIV infection, and residents in areas of high HIV seroprevalence. A more detailed description of high risk populations is attached to this announcement.

B. Work toward improving the organizational capacities, programmatic efforts, and coordination of the HIV/STD prevention efforts of governmental and nongovernmental agencies and

organizations serving racial/ethnic minority populations. These might include CBOs, state/local health departments, affiliates of NMOs and RMOs, state offices of minority health, HIV prevention service agencies, youth service organizations, criminal justice systems, substance abuse agencies, primary health care providers, women's health care providers, and other organizations and agencies serving racial and ethnic minorities at high risk for HIV/STD infection.

II. Preschool Immunization

A. Strengthen and increase the effectiveness of immunization activities for racial and ethnic minority preschool (children younger than 5 years with especially those under 24 months of age) populations with low immunization levels and high morbidity of vaccine-preventable diseases.

B. Work toward improving the organizational capacities, programmatic efforts, and coordination of preschool immunization efforts of governmental and nongovernmental organizations. These might include CBOs, state/local health departments, Head Start programs, affiliates of NMOs and RMOs, HIV prevention service agencies, youth service organizations, criminal justice systems, substance abuse agencies, primary health care providers, women's health care providers, other child care providers, and other social service agencies who contribute to the health and welfare of preschool racial and ethnic minority children.

C. Increase consumer demand for immunization and vaccine services.

III. TB Prevention and Control

A. Strengthen and increase the effectiveness of TB prevention and treatment efforts for racial and ethnic minority populations, especially the 25 to 44 year old age group.

B. Work toward improving the organizational capacities, programmatic efforts, and coordination of TB awareness and prevention efforts of governmental and nongovernmental organizations. These might include state and local health departments, primary health care providers, CBOs, substance abuse agencies, criminal justice systems, and other health and social service agencies.

C. Promote TB prevention and control, information dissemination, and training and education.

Program Requirements

In conducting the activities to achieve the goals of this program, the recipient shall be responsible for conducting the activities under A, B, and C, below, and CDC shall be responsible for conducting activities under D, below:

A. Recipient Requirements and Guidance

All applicants must develop realistic, specific, time-phased objectives for proposed activities and services under each of the funding categories for which support is requested: (I) HIV/STD prevention activities, (II) preschool immunization activities, or (III) TB awareness and prevention activities. All proposed projects must undertake priority activity 1 and may also propose undertaking optional priority activity 2. HIV applicants may also propose to undertake priority activity 3. Applicants may elect to defer requests for assistance for priority activities 2 or 3 until future budget years in the project period.

B. Priority Activities

1. National/Regional Technical Assistance and Training Programs (Required of all applicants).

National and regional organizations must undertake activities a, b, and c. In planning programs and determining which technical assistance and training activities to undertake, national and regional organizations should, in collaboration with the organizations/agencies to be served, first identify and interpret the findings of ongoing and completed needs assessments or, if unavailable or inadequate, conduct such assessments to identify and interpret unmet HIV/STD, immunization, or TB prevention-related technical assistance and training needs.

a. Provide capacity-building technical assistance and training to minority CBOs and other organizations and agencies serving racial and ethnic minority populations. Such assistance should include technical assistance and training on resource development; grant writing, fiscal management; board development and training; information dissemination; networking and collaboration with local health departments, other CBOs and other state/local agencies and organizations; staff and volunteer recruitment and retention; and program development, evaluation, and quality assurance. National and regional minority organizations that are unable to provide technical assistance and training in all of these selected areas may acquire this expertise through collaboration with other organizations or through the use of consultants subsequent to award. However, priority will be given to applicants who demonstrate current ability to provide the technical assistance and training described above.

b. Provide programmatic technical assistance and training to organizations and agencies serving racial and ethnic minority populations including CBOs, state and local health departments, substance abuse agencies, criminal justice systems and institutions, professional organizations, and other national and regional organizations participating in the respective disease prevention activities (HIV, Immunization, or TB). Specifically, assistance should be provided to organizations and agencies serving racial and ethnic minority populations and communities in planning, implementing, and evaluating programs and providing services that are:

(1) Within a culturally competent system (i.e., a system of care which acknowledges and incorporates at all levels the importance of culture, the assessment of cross-cultural relations, vigilance towards the dynamics that result from cultural differences, the expansion of cultural knowledge, and the adoption of services to meet culturally unique needs.

(2) Developmentally appropriate (i.e., information and services provided at a level of comprehension that is consistent with the skills of the persons to be served);

(3) Linguistically specific and appropriate (i.e., information is presented in dialect and terminology consistent with the target population's language and style of communication and is educationally appropriate); and

(4) Feasible, based on, or predicted by, organizational experience or social, organizational, behavioral, or psychological theory.

The following are examples of the types of technical assistance and training services that may be offered:

—Assistance in the development of scientifically sound and culturally competent assessments of unmet prevention needs.

—Assistance in increasing the collaboration and the coordination of services among organizations and agencies serving racial and ethnic minority populations.

—Assessment and analysis of the cultural competence of paid and volunteer staff (including administrators, program managers, and personnel responsible for direct services).

—Staff training in issues related to cultural competency/relevancy and special needs of racial and ethnic minorities.

—Assistance in developing plans for improving the access to and the quality of (I) HIV/STD prevention

services, (II) immunization services to preschool children, or (III) TB prevention and therapeutic services for racial/ethnic minority populations.
—Assistance in evaluating the cultural competency/relevancy of (I) HIV/STD prevention interventions and educational materials, (II) immunization educational materials, or (III) TB information and educational materials for racial and ethnic minority populations.
—Production and dissemination of materials such as pamphlets, audiovisuals, guidelines, manuals, and funding alerts.

Note: Before funds awarded through this cooperative agreement are used to develop HIV/AIDS-related materials, an inquiry must be made through the CDC National AIDS Clearinghouse to determine if suitable materials are already available.

c. Disseminate information on prevention technologies and successful and unsuccessful (I) HIV/STD prevention programs, (II) immunization programs, or (III) TB prevention and treatment programs for racial and ethnic minorities through case studies, workshops, and other mechanisms.

2. Racial/Ethnic Minority Community Needs Assessment and Targeted Technical Assistance (Optional): Develop and implement a consensual, participatory, time-phased process that includes CBOs, state and local health departments and other local agencies, to identify and assess the unmet (I) HIV/STD prevention, (II) immunization, or (III) TB prevention and treatment needs of racial and ethnic minority populations in a specific geographic community or region of the United States. Based on the results of the assessment, in coordination with CDC, provide tailored technical assistance, to nongovernmental and governmental organizations serving this population.

Although this activity incorporates some elements of the previous program activity, it is distinctive in three important ways. First, it is targeted to specific geographic communities (e.g., a region, state, or metropolitan area) or specific racial/ethnic minority populations within a geographic community (e.g., gay men of color, minority substance abusers, minority women or minority youth at risk). Secondly, it involves a planned and coordinated assessment of both HIV prevention and technical assistance/training needs prior to the development of a technical assistance plan. Thirdly, it requires the active participation of the local community (e.g., CBOs, health department, other governmental agencies, local universities and other researchers) in the interpretation of the needs assessment and in the development of a prioritized plan to address the identified technical assistance needs. CDC will not consider supporting, under this activity, needs assessments that do not include use of the information collected to design and target technical assistance programs.

In conducting this activity: a. Using a scientifically sound methodology, identify and assess the unment (I) HIV/STD, (II) immunization, or (III) TB prevention needs of racial and ethnic minority populations and the technical assistance and training needs of the prevention programs serving racial and ethnic minority communities or populations in:

(1) Metropolitan areas, or regions heavily affected by HIV, STDs, TB or low levels of immunization or (2) in smaller cities and rural areas where racial/ethnic minority populations are underserved. The assessment should determine, describe, and document:

(1) Access to and the availability of prevention services for racial/ethnic minority populations at high risk (e.g., gay and non-gay identified men, IDU, women and youth in high-risk situations), barriers to obtaining services, and specific unmet prevention needs.

(2) Technical assistance and training needs of nongovernmental organizations and governmental agencies, serving, or proposing to serve, racial and ethnic minorities. The types, the extent, and the use of current technical assistance from all identified sources should be thoroughly documented and evaluated as part of the assessment.

b. Use information from the needs assessment and other sources to:

(1) Develop with the CBOs, health departments, and other local agencies serving or proposing to serve racial and ethnic minorities: (i) a prioritized technical assistance and training program and (ii) prioritized program strategies and plans to provide services responsive to the needs and the issues identified through the assessment. Program strategies and services may include:

(a) Community-specific workshops for the personnel of organizations and agencies serving racial and ethnic minority individuals at risk.

(b) Establishment or expansion of systems for providing long-term technical assistance to CBOs, health departments, health care providers, and other organizations and agencies serving racial and ethnic minority populations in the target community or area.

(2) Document, in a case study format, the procedures used to identify and assess prevention needs, the actual unmet needs and their priorities, the actions taken to address the identified priority needs, and the lessons learned from the needs assessment and the technical assistance services, so that this information can be shared with other organizations and agencies.

3. Community Intervention Programs (Optional, HIV/STD Applicants Only): Applicants may propose to conduct community intervention programs on a national or regional basis. Community intervention programs are prevention programs directed at the community level, rather than individuals, to influence community norms in support of those behaviors known to reduce the risk of HIV/STD infection and transmission. The primary goals of these programs are to improve health status, to promote healthy behaviors, and to change factors that affect the health of community residents. Community intervention programs should target racial and ethnic, populations whose behavior places them at high risk for infection with HIV and other STDs. CDC will not consider supporting proposed community intervention program unless they undertake all of the activities described in a. through c. below:

a. Identifying, assessing, and prioritizing the significant structural, environmental, behavioral, and psychosocial facilitators and barriers to risk reduction, including:

(1) Sources and patterns of communication and social influence surrounding the initiation and maintenance of risk-reduction behavior;

(2) Individual and community beliefs and attitudes about the acceptance of safer behaviors and primary and secondary HIV/STD prevention activities and services;

(3) The significance of condom and contraceptive use within sexual and family relationships;

(4) Cultural, linguistic, and religious influences;

(5) Incentives and disincentives to risk reduction; and

(6) Alcohol and drug use associated with HIV/STD transmission.

6. Developing and implementing culturally competent/relevant and linguistically specific/appropriate interventions to influence specific structural, environmental, behavioral, and psychosocial factors thought to promote risk reduction such as:

(1) Changing community norms to support abstinence from sex and drugs, mutual monogamy, condom and contraceptive use, and other risk-reduction strategies through

communications such as role play and persuasion;

(2) Identifying and enlisting family, peer, and community networks (e.g., HIV family networks, parents of youth-at-high-risk, women's networks) to promote and reinforce risk reduction;

(3) Creating and mobilizing networks of communication in support of risk reduction;

(4) Providing opportunities for acquiring skills in risk reduction and reinforcing behavior change; and

(5) Involving community leaders as role models in locally developed media to present information and persuasive messages about risk reduction.

c. Persuading community members who are at risk of acquiring or transmitting HIV and other STDs to accept and use HIV/STD prevention services such as: HIV prevention counseling, HIV-antibody testing and follow-up, STD detection and treatment, HIV early intervention, and psychosocial support.

C. General Requirements

All applicants must undertake the following:

1. Collaborate with and coordinate on programs, activities, services and technical assistance with other organizations and agencies serving racial and ethnic minority populations, especially state and local health departments, state offices of minority health, state/local substance abuse agencies, state/local Ryan White CARE consortia, other organizations and agencies providing HIV/STD, Immunization, or TB-related services, especially those receiving Federal funds for such purposes, and criminal justice systems. Applicants should submit evidence of collaboration or document efforts made to initiate collaboration that were rejected or ignored. Such efforts might include jointly developed plans for providing technical assistance, or evidence of past partnerships or joint projects with other national and regional organizations, state and local health departments, or community-based organizations.

2. Conduct an on-going process evaluation of activities funded through this cooperative agreement. Process evaluation is a quantitative and qualitative description of the program activities, the services, and the recipients of services. Each applicant must develop and implement an on-going evaluation plan, using process evaluation. The evaluation plan should be detailed and clearly articulated. It should present an evaluation design appropriate to the project objectives and activities. Applicants proposing to undertake optional priority activity number 3 do not need to submit an evaluation plan for this activity in their application. CDC will collaborate with successful applicants to develop evaluation plans for this activity.

The required evaluation plan should be capable of answering the following questions related to priority activities numbers 1 and 2 and the answers should be included in quarterly reports:

A detailed description of each program activity and progress in achieving each objective.

b. Detailed answers to the following questions:

(1) To which organizations or agencies were the services provided and how many representatives participated?

(2) What was the service and who provided it?

(3) When, how often, how long was the service provided?

(4) Where was it provided?

(5) How were the services provided?

(6) Was the service useful to the recipient organizations and agencies as assessed by them?

(7) Was the service delivered in a timely manner?

(8) What was the impact of providing the service on the recipient organizations and agencies (e.g., what specific capacities were increased; what changes in programmatic strategies or services occurred; how has collaboration between organizations improved; and what new programs were implemented based on the findings of the needs assessment)?

Applicants should ensure that they will be able to answer all these questions before undertaking any of the priority activities. To answer questions 6, 7, and 8, organizations will need to conduct follow-up data collection efforts of recipients of technical assistance and training.

c. Describe internal problems that affect the planning or implementation of program activities (e.g., problems in recruiting, hiring, or retaining staff; training of staff; monitoring and ensuring staff performance). Also document and describe problems related to the administrative and financial management and accounting systems.

d. Describe program successes, barriers, and other external problems encountered in planning, implementing, or providing services. This may include difficulty in initiating or maintaining effective collaborative relationships or in coordinating services with other organizations and agencies serving the target population.

Because of the additional cost and need for scientific support beyond the scope of these cooperative agreements, NMOs and RMOs are not expected to conduct individual behavioral or health outcome evaluations with these funds (i.e., long-term effects of the program in terms of changes in behavior or health status, such as changes in HIV seroincidence after intervention).

D. Centers for Disease Control Activities

1. Provide consultation and technical assistance in planning, operating, and evaluating program activities under this announcement.

2. Provide up-to-date scientific information on: I. HIV/STD: (a) The risk factors for HIV/STD infection, (b) the increases in HIV/STD rates and AIDS cases for various behavioral populations of racial and ethnic minority men and women, and (c) prevention and program strategies for preventing HIV infection. II. Immunization: the risks and benefits of immunization, recommended immunization schedules and practices, information on immunization levels in racial and ethnic minority populations, and the epidemiology of vaccine-preventable diseases in the U.S. III. TB: the risks and benefits of early diagnosis, treatment and preventive treatment, and appropriate follow-up for those with TB infection.

3. Assist in developing plans for evaluation of all program activities and services and interpreting evaluation findings. CDC will provide special assistance and collaborate with applicants awarded funding for community intervention activities to jointly develop an evaluation plan.

4. Assist successful applicants in collaborating with state and local health departments and other PHS grantees.

5. Facilitate the transfer of successful prevention interventions and program models to other areas.

6. Monitor the successful applicant's program activities, protection of client confidentiality, and compliance with other requirements.

7. Facilitate the exchange of program information and technical assistance among community organizations, health departments, and NMOs and RMOs.

Reporting Requirements

A. Subject to OMB approval under the Paperwork Reduction Act, quarterly narrative progress reports will be required 30 days after the end of each quarter. Quarterly progress reports should document services provided and problems encountered. Successful applicants should pay careful attention to answering the evaluation questions and documenting accomplishments and problems encountered in meeting

program objectives as described in the evaluation requirements section in their reports. The quarterly progress report is intended not only as a way of informing CDC of the progress made by cooperative agreement recipients in implementing programs and services and evaluating their success, but also as a tool for documenting and sharing information of importance to other organizations and agencies. NMOs and RMOs are encouraged to use the progress report to document successful programs and activities that can be models for other organizations as well as unsuccessful efforts as lessons learned which are presented for the benefit of other organizations. The CDC will share portions of progress reports with other NMOs, RMOs, and other recipients of CDC funds. NMOs and RMOs may choose to send copies of their progress reports directly to other interested organizations and agencies.

B. Annual financial status reports are required no later than 90 days after the end of each budget period. Final financial status and performance reports are required 90 days after the end of the project period.

Applicant Content

All applicants must prepare their applications in accordance with PHS Form 5161–1, information contained in the program announcement, and the general instructions outlined below. When writing the application, careful consideration should be given to the "Review and Evaluation Criteria" section below. The applicant should provide a detailed description of the objectives, program plan, intended collaboration, and evaluation activities for the first-year budget period only and briefly describe future activities during the project period in the "Program Plan" section.

Applicants may submit applications for (I) HIV/STD, (II) Immunization, and (III) TB. If applying for financial assistance for more than one of the funding categories (HIV, Immunization, or TB), a separate budget and narrative, including information relevant to the appropriate sections of the application content instructions, is required for each. Organizations requesting financial support for more than one priority activity within a single funding category must clearly describe plans for each activity and how its progress and achievements will be evaluated.

Proof of nonprofit and organizational status and compliance with all other eligibility criteria must be submitted with the application for determination of eligibility. No application will be accepted without proof of nonprofit status.

All applicants must attach a listing of the offices, affiliates, and organizations participating in the proposed national or regional program. NMOs or RMOs administering programs through participating affiliates, chapters, or other minority organizations should identify the racial and ethnic composition of the membership of the governing bodies. The governing bodies must consist of more than 50% racial or ethnic minorities. In addition, letters from each of the organizations must be provided showing that they agree to participate in the proposed program.

Application Narrative Format

Applicants must use the following format for the narrative portion of their applications and refer to the relevant program requirements and guidance, address requirements and issues in A–J as follows, and consider the review and evaluation criteria when developing the application.

A. Abstract (not to exceed 1 page): Summarize the program category (i.e., HIV/STD, Immunization, TB) for which funds are requested, including the organizations and target racial and ethnic minority population(s) to be served and the priority activities to be undertaken. The applicant's organizational structure must also be summarized as well as proposed collaboration and coordination with CBOs, state and local health departments, and other organizations and agencies.

B. Experience in Providing Technical Assistance and Training (Not to exceed 4 pages): Describe the applicant's experience in providing (I) HIV/STD-related, (II) immunization, (III) TB, or other relevant technical assistance and training to affiliates, and other organizations and agencies serving racial and ethnic minority populations.

C. Program Rationale and Need (Not to exceed 4 pages): Describe the rationale for the program and include a summary of existing information on unmet prevention needs that the proposed program will help address in the geographic area in which it will be implemented. This should include a summary of the technical assistance and training needs of organizations, agencies and providers serving the target racial and ethnic minority population(s).

D. Program Objectives (Not to exceed two pages): Specify the program objectives and show how they will relate to the identified needs. Include at least one objective for each priority activity within each program category which will be undertaken.

E. Plan to Provide National and Regional Technical Assistance and Training (Not to exceed 5 pages):

1. Describe the applicant's plan to conduct a national or regional technical assistance and training program for affiliates, organizations or agencies serving the target racial/ethnic minority population.

2. Summarize the applicant's capacities to develop, implement, and evaluate the proposed program. Specify the geographic area in which the program will be implemented.

3. Provide an estimate of the number and identify the types of organizations and agencies that will be eligible to receive technical assistance and the populations they are serving.

4. Explain how each of the technical assistance activities listed under the national and regional technical assistance program will be conducted. The plan must clearly describe how, in what format, and under what circumstances organizations and agencies will be provided technical assistance and training.

5. Describe the procedures that organizations will have to use to access and obtain technical assistance and training. How frequently will organizations be able to obtain technical assistance.

6. Show how the plan will meet the identified prevention needs and objectives and increase the capacities of organizations and agencies receiving technical assistance and training.

7. Indicate how lessons learned will be disseminated to other organizations and agencies.

F. Collaboration/Coordination (Not to exceed 4 pages):

1. Describe in detail the intended collaboration, coordination and contractual relationships with community-based organizations, other national organizations, state/local health agencies, and other organizations and agencies serving the target racial/ethnic minority population.

2. Describe the roles of each of the collaborating organizations including the specific activities each of the organizations will undertake in the proposed program plan. Summarize unsuccessful efforts to secure collaboration in the proposed program plan.

3. Describe past experience, if any, in collaborating and coordinating programs and activities with these organizations.

4. Include in the attachments evidence of intended and past collaboration and coordination such as jointly developed work plans or memoranda of understanding.

G. Evaluation Plan (Not to exceed 3 pages): Describe the plan for evaluating program activities and services. Indicate how progress made in achieving objectives will be measured and how the quality of services provided will be ensured. Describe how needs for technical assistance and training will be identified and monitored, and specify the process through which program objectives and plans will be modified to meet the emerging and changing needs of target populations and the organizations and agencies serving them.

H. Applicants seeking funds for community needs assessments and targeted technical assistance and training must provide the following additional information (not to exceed 5 pages).

1. A summary of the proposed activities to ensure representation of the target racial and ethnic minority community or population in planning and implementing the project.

2. A description of how the racial/ethnic minority community or population for which needs will be assessed will be identified and prioritized. How many needs assessments are proposed? How will the cooperation and assistance of CBOs, health departments, and other organizations serving the target racial and ethnic minority population be secured?

3. A description of how scientific input and support will be obtained for planning, implementing, monitoring, and evaluating the needs assessments and targeted technical assistance.

4. A description of how the needs assessments will be carried out: which prevention needs will be assessed; what sources of information will be used; and what procedures will be used to collect and analyze information about the needs of the target racial/ethnic minority community or population and the needs and capacities of organizations and agencies serving them.

5. The timeframe for the needs assessments.

6. A description of how the findings of the needs assessments will be documented (e.g., case study format, report of findings, other publication).

7. The procedures for developing and implementing the targeted technical assistance and training programs for both the short (within the next 12 months) and long term (5 year period).

8. The plan for evaluating the assessments and the resulting technical assistance and training programs.

I. Organizations seeking funding for community intervention programs (HIV/STD applicants only) should provide the following information (Not to exceed 5 pages):

1. A summary of the proposed activities to ensure representation of the target racial/ethnic minority community or population in planning and implementing the project.

2. A description of how scientific input and support will be obtained for planning, monitoring, implementing, and evaluating the community intervention program.

3. A description of the target racial and ethnic minority community or population and information regarding the community's or the population's acceptance of safer behaviors (sex and drug use) and HIV prevention services.

4. A description of the target community norms and the specific behaviors the applicant is intending to influence. Summarize how these specific norms were identified and given priority. What ethnographic or other research has been accomplished or consulted that supports this determination?

5. A summary of the plan for identifying and describing the structural, environmental, behavioral, and psychosocial facilitators and barriers to risk reduction.

6. A description of existing related prevention services for the target racial and ethnic minority community or population.

7. A description of the proposed procedures for developing or implementing the interventions intended to influence perceptions of community norms.

J. Attachments (Attach, at a minimum, the following documents):

1. Proof of the applicant organization's non-profit status.

2. A copy of the applicant organizations's Articles of Incorporation, Bylaws, or Board resolution authorizing activities within a region or the nation.

3. A list of participating offices, affiliates, or organizations.

4. A list of the members of the Board or Governing body for the applicant and participating affiliates, chapters, and organizations, and their race/ethnicity.

5. A list of current and proposed staff and their race/ethnicity, their area of expertise, and relevant experience.

6. Evidence of collaboration/coordination with affiliates, participating minority organizations, state/local health departments, and other organizations and agencies.

Evaluation Criteria

Eligible applications submitted under this announcement will be evaluated through a competitive review process which will include review of an application describing and justifying the proposed program and may also include a predecisional site visit conducted by CDC staff to evaluate organizational capacities and technical assistance needs.

A. Application Review and Evaluation Criteria

Applicants may apply for funding to support national or regional technical assistance and training programs under any of the funding categories (HIV, Immunization, and TB) and propose to undertake one or more of the optional priority activities.

The CDC-convened committees will evaluate each application on an individual basis according to the following criteria:

1. The extent to which the applicant documents experience in providing (I) HIV/STD, (II) immunization, or (III) TB technical assistance and training from a national or regional level to organizations and agencies serving racial and ethnic minority populations. (20 points)

2. The extent to which the applicant documents other relevant experience in providing technical assistance and training on public health issues other than HIV/STD, Immunization or TB from a national or regional level to racial and ethnic minority populations. (10 points)

3. The extent to which the applicant demonstrates and documents its understanding of the types, magnitude, and priority of the unmet prevention needs of the target racial and ethnic minority communities, populations, organizations and agencies that will be addressed through the proposed program. (15 points)

4. The extent to which the proposed objectives are specific, measurable, time-phased, consistent with the program purpose and the proposed activities, and consistent with the applicant organization's overall mission. (10 points)

5. The quality of the applicant's plan for conducting program activities and the likelihood that the proposed methods will be successful in achieving proposed objectives. (25 points)

6. The extent to which the applicant demonstrates support and intended collaboration on the program plan and activities from CBOs, health departments, organizations and agencies serving racial and ethnic minority group populations. (10 points)

7. The extent to which the evaluation plan measures the achievement of

program objectives and monitors the implementation of proposed activities. (10 points)

B. Predecisional Site Visits

Site visits may be conducted before final funding decisions are made by CDC. Only the organizations with high ranking applications will be visited. During the visit, CDC staff will meet with project staff, a representative of the board of directors, and other outside consultants to assess the applicant's ability to implement the proposed program, review the application and program plans for current or planned activities; and determine the special programmatic conditions and technical assistance requirements of the applicant. As part of these visits, CDC and its consultants may visit state/local health departments and CBOs serving the geographic area in which the program will be implemented.

Executive Order 12372 Review

Applications are subject to Intergovernmental Review of Federal Programs as governed by Executive Order 12372. E.O. 12372 sets up a system for state and local government review of proposed Federal assistance applications. Applicants should contact their state Single Point of Contacts (SPOCs) as early as possible to alert them to the prospective applications and to receive instructions on the state process. For proposed projects that serve more than one state, the applicant should contact the SPOC for each state served. A current list of SPOCs is included in the application kit. If SPOCs have any state process recommendations on applications submitted to CDC, they should forward them no later than 60 days after the application deadline, to Clara M. Jenkins, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Atlanta, GA 30305. The CDC does not guarantee to accommodate or explain state process recommendations it receives 60 days after that date.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance Numbers are 93.939, HIV Prevention Activities—Non-governmental Organization Based; 93.185, Immunization Research, Demonstration, Public and Professional Education; 93.947, Tuberculosis Demonstration, Research, Public and Professional Education.

Other Requirements

A. Review of Materials

HIV funding recipients must comply with the terms and conditions in the document entitled Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs (June 1992) and must establish or use existing program review panels. At least one member of each funded organization's panel must also be a designated representative of a state or local health department. The names of review panel members must be listed on the Assurance of Compliance Form CDC 0.113. Cooperative agreement recipients must provide to CDC, as attachments to quarterly progress reports, signed statements of the chairperson of the Program Review Panel specifying the vote for approval or disapproval for each proposed item or activity that is subject to this guidance.

B. Requirement for a Certified Public Accountant

The services of a certified public accountant licensed by the State Board of Accountancy or equivalent must be retained throughout the budget period as a part of the recipient's staff or as a consultant to the recipient's accounting personnel. These services may include the design, the implementation, and the maintenance of an accounting system in which to record receipts and expenditures of Federal funds, in accordance with accounting principles, Federal regulations, and cooperative agreement terms.

The funds claimed by the recipient for reimbursement under this cooperative agreement must be audited by an independent certified public accountant. This audit must be performed within 60 days after the budget period, or at the close of an organization's fiscal year. The audit must be performed in accordance with generally accepted auditing standards (established by the American Institute of Certified Public Accountants), governmental auditing standards (established by the General Accounting Office), and Office of Management and Budget Circular A–133.

C. Confidentiality of Records

All identifying information obtained in connection with the provision of services to any person in any program that is being carried out with a cooperative agreement made under this announcement shall not be disclosed unless required by a law of a state or political subdivision or unless written, voluntary informed consent is provided by persons who receive services.

Paperwork Reduction Act

Projects that involve the collection of information from 10 or more individuals and funded by this cooperative agreement are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

Application and Submission Deadline

The original and two copies of the application (Form PHS–5161–1) must be submitted to Clara M. Jenkins, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Mailstop E–14, Atlanta, GA 30305 on or before 60 days following publication.

A. Deadline

Applications meet the deadline if they are either received on or before the deadline date or sent on or before the deadline date and received in time for submission to the independent review committee. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks will not be acceptable as proof of timely mailing.)

B. Late Applications

Applications that do not meet these criteria are late. Late applications will not be considered in the current competition and will be returned to the applicant.

Where to Obtain Additional Information

Information on application procedures may be obtained from Albertha Carey, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Atlanta, GA 30305, (404) 842–6575.

I. HIV Prevention

Programmatic technical assistance may be obtained from Jack Kirby, Division of Sexually Transmitted Diseases/Human Immunodeficiency Virus Prevention (DSTD/HIVP), National Center for Prevention Services, Centers for Disease Control, Atlanta, GA 30333, (404) 639–0500.

II. Immunization

Programmtic technical assistance may be obtained from Karen White, Division

of Immunization, National Center for Prevention Services, Centers for Disease Control, Atlanta, GA 30333, (404) 639–1867.

III. TB Prevention and Treatment

Programmatic technical assistance may be obtained from Harry Stern, Division of Tuberculosis Elimination, National Center for Prevention Services, Centers for Disease Control, Atlanta, GA 30333, (404) 639–2501.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report: Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report: Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325, (Telephone (202) 783–3238). Information on standard immunization practices and the national plan to combat Tuberculosis may also be obtained by writing CDC. For your information, the HIV, Immunization, and TB-related objectives are included in the application kit.

Dated: October 6, 1992.

Robert L. Foster,

Acting Associate Director for Management and Operations, Centers for Disease Control.

Food and Drug Administration

Advisory Committee; Amendment of Notice

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration is announcing an amendment to the agenda of a meeting of the Vaccines and Related Biological Products Advisory Committee which is scheduled for October 28 and 29, 1992. This meeting was announced in the **Federal Register** of September 28, 1992 (57 FR 44573). The change is being made to delete one agenda item and replace it with another. There are no other changes. This amendment will be announced at the beginning of the open portion of the meeting.

FOR FURTHER INFORMATION CONTACT: Anna J. Baldwin, Center for Biologics Evaluation and Research (HFB–5), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892, 301–295–8226.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 28, 1992 (57 FR 44573), FDA announced that a meeting of the Vaccines and Related Biological Products Advisory Committee would be held on October 28 and 29, 1992. On page 57 FR 44573 at 44574, column 1, the open committee discussion portion of the agenda is amended as follows:

Open committee discussion. On October 28, 1992, the committee will discuss a DTP/Haemophilus b combination vaccine (Lederle Laboratories) and two Haemophilus b conjugate vaccines (Merck, Sharp, and Dohme, Pasteur-Merieux). On October 29, 1992, the committee will discuss a vaccine for the prevention of typhoid fever (Pasteur-Merieux).

Dated: October 5, 1992.

Jane E. Henney,

Deputy Commissioner for Operations.

BILLING CODE 4160–01–F

Health Care Financing Administration

Public Information Collection Requirements Submitted to the Office of Management and Budget for Clearance

AGENCY: Health Care Financing Administration, HHS.

The Health Care Financing Administration (HCFA), Department of Health and Human Services, has submitted to the Office of Management and Budget (OMB) the following proposals for the collection of information in compliance with the Paperwork Reduction Act (Pub. L. 96–511).

1. *Type of Request:* New; *Title of Information Collection:* Impact of Home Health Care Plan Management and Evaluation, Home Care Quality Study; *Form Number:* HCFA–R–146; *Use:* Results of this study will permit HCFA to examine the impact of providing care plan management and evaluation as a Medicare home health treatment following the acute phase of a home health stay on access to care, quality of care, and the use of Medicare services; *Frequency:* One-time; *Respondents:* Individuals/households, businesses/other for-profit, and non-profit institutions; *Estimated Number of Responses:* 6,780; *Average Hours per Response:* .16; *Total Estimated Burden Hours:* 1,085.

2. *Type of Request:* Reinstatement; *Title of Information Collection:* End-Stage Renal Disease (ESRD) Medical Case Review; *Form Number:* HCFA–R–1; *Use:* Sections 1881(c)(2) (E) and (F) of the Social Security Act require ESRD network organizations to perform reviews of ESRD facilities, utilizing defined standards of care to assure that ESRD beneficiaries receive proper medical care; *Frequency:* Monthly; *Respondents:* Individuals/households, businesses/other for-profit, Federal agencies/employees, non-profit institutions, and small businesses or organizations; *Estimated Number of Responses:* 216; *Average Hours per Response:* 16; *Total Estimated Burden Hours:* 3,456 (reporting) and 21,600 (recordkeeping) for a total of 25,056.

3. *Type of Request:* Revision; *Title of Information Collection:* Medicare/Medicaid Hospital Swing-Bed Survey Report Form; *Form Numbers:* HCFA–1537C and 605; *Use:* In order to participate in the Medicare program as a "swing-bed" hospital, a provider must meet Federal standards. This form will be used by State survey agencies to record providers' compliance with the standards and report this information to the Federal Government; *Frequency:* Annually; *Respondents:* State/local governments; *Estimated Number of Responses:* 1,500; *Average Hours per Response:* 5; *Total Estimated Burden Hours:* 750.

4. *Type of Request:* Reinstatement; *Title of Information Collection:* Quarterly Medicaid Statement of Expenditures; *Form Number:* HCFA–64; *Use:* This form is submitted by Medicaid State agencies to report actual program benefit costs and administrative expenses to HCFA. HCFA uses the information to compute the Federal financial participation (FFP) for the States' Medicaid program costs; *Frequency:* Quarterly; *Respondents:* State/local governments; *Estimated Number of Responses:* 228; *Average Hours per Response:* 47.5; *Total Estimated Burden Hours:* 10,830.

5. *Type of Request:* Reinstatement; *Title of Information Collection:* Medicaid Program Budget Report; *Form Number:* HCFA–37 (formerly HCFA–25); *Use:* This form is prepared by the State Medicaid agencies and is used by HCFA for (1) developing national Medicaid budget estimates, (2) quantifying budget assumptions, and (3) issuing quarterly Medicaid Grant Awards; *Frequency:* Quarterly; *Respondents:* State/local governments; *Estimated Number of Responses:* 228; *Average Hours per Response:* 35; *Total Estimated Burden Hours:* 7,980.

6. *Type of Request:* Reinstatement; *Title of Information Collection:* Information Collection Requirements in Final Peer Review Organization (PRO) Sanction Regulations—42 CFR 1004.40(c), 1004.50(a), (b), and (c), 1004.60(a) and (b), and 1004.70(a) and (b); *Form Number:* HCFA–R–65; *Use:* The PRO is responsible for identifying situations where obligations are violated and afford the practitioner or

other person notice of the violation and the opportunity to discuss them. These requirements describe the notices to be sent and the report that is sent to the Office of the Inspector General (OIG) if violations are not resolved. The report to the OIG assists the OIG in making its final decision; *Frequency:* On occasion; *Respondents:* Businesses/other for profit and small businesses or organizations; *Estimated Number of Responses:* 1,080; *Average Hours per Response:* 28.4; *Total Estimated Burden Hours:* 30,104.

7. *Type of Request:* Reinstatement; *Title of Information Collection:* Information Collection Requirements in 42 CFR 498, Appeals Procedures for Determinations That Affect Participation in Medicare; *Form Number:* HCFA–R–103; *Use:* The Social Security Act provides for a hearing for any institution or agency dissatisfied with a Medicare program determination. This rule sets forth the procedures for appeals on determinations that affect participation of providers, suppliers, etc. in the program; *Frequency:* On occasion; *Respondents:* Individuals/households, businesses/other for profit, and small businesses or organizations; *Estimated Number of Responses:* 60; *Average Hours per Response:* 5; *Total Estimated Burden Hours:* 300.

8. *Type of Request:* Extension; *Title of Information Collection:* Request for Medical Review Information for Part B Intermediary Outpatient Therapy Bills and Other Part B Outpatient Bills; *Form Numbers:* HCFA–700–701, 9027; *Use:* Medicare contractors require certain medical information to determine that requirements for Medicare coverage are met. The information is used to determine if billed services are payable in accordance with Medicare law, regulations, and guidelines. The services in question may be provided by hospitals, SNFs, CORFs, RHC, Hospices, ESRD facilities and Christian Science hospitals and SNFs; *Frequency:* On occasion; *Respondents:* Non-profit institutions, businesses/other for profit, and small businesses or organizations; *Estimated Number of Responses:* 2,100,000; *Average Hours per Response:* .25; *Total Estimated Burden Hours:* 525,000.

9. *Type of Request:* New; *Title of Information Collection:* Medicaid—Limitations on Provider-related Donations and Health Care-related Taxes; Limitations on Payments to Disproportionate Share Hospitals; *Form Number:* HCFA–R–148; *Use:* As a result of sections 2, 3, and 4 of Public Law 102–234, States are required to report information related to provider-related tax and donation programs and aggregate disproportionate share hospital payments. These requirements implement the statutory requirements; *Frequency:* On occasion; *Respondents:* State/local governments; *Estimated Number of Responses:* 224; *Average Hours per Response:* 34.43; *Total Estimated Burden Hours:* 7,712.

Additional Information or Comments: Call the Reports Clearance Office on 410–966–5536 for copies of the clearance request packages. Written comments and recommendations for the proposed information collections should be sent directly to the following address: OMB Reports Management Branch, Attention: Allison Eydt, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: October 5, 1992.

William Toby, Jr.,

Acting Deputy Administrator, Health Care Financing Administration.

BILLING CODE 4160–15–M

DEPARTMENT OF THE INTERIOR

National Park Service

Completion of Inventory of Native American Human Remains and Associated Funerary Objects From Four Sites in Tuolumne County, California, in the Possession of the California Department of Parks and Recreation

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003(d), of the completion of the inventory of human remains and associated funerary objects from four sites in Tuolumne County, California, in the possession of the California Department of Parks and Recreation. Representatives of culturally affiliated Indian tribes are advised that the human remains and associated funerary objects from Tuolumne County will be retained by the Department at it headquarters facility until November 12, 1992, after which they may be repatriated to culturally affiliated groups.

The detailed inventory and assessment of the human remains and associated funerary objects from these four Tuolumne County sites has been made by the California Department of Parks and Recreation curatorial and archeological staff, contract specialists in physical anthropology and prehistoric archeology, and representatives of the Tuolumne Band of Me-wuk Indians and the Central Sierra Me-Wuk Cultural and Historic Preservation Committee.

Three of the collections [from CA–TUO–331, CA–TUO–342, and CA–TUO–S497 (the Lucas Gulch site)] were surface-collected in 1970 prior to flooding of the Don Pedro reservoir. The collection from CA–TUO–342 contains one human tooth which is probably late prehistoric or protohistoric, based on a desert side-notched point and olivella disc beads found during the survey. The collection from CA–TUO–331, a small village site with many bedrock mortar pits, and the collection form CA–TUO–S497 each contain one human bone fragment which are presumed to be late prehistoric or historic based on the degree of their preservation. No funerary objects have been identified from these surface-collections.

The fourth collection was excavated in 1968 from CA–TUO–395 (the Columbus Junior College site). The collection includes one cremation, two burials, and 60,050 funerary objects,

most of which are fire-exposed beads. The burials date from about 1860.

Two of the collections, CA-TUO-342 and CA-TUO-395, are clearly identifiable as being affiliated with the historic Central Sierra Miwok people, as they come from known historic or late prehistoric village sites and have artifacts which are consistent with this attribution. The two other collections, from CA-TUO-331 and CA-TUO-S497, can reasonably be believed to be affiliated with the historic Central Sierra Miwok people as they were collected from an area believed by archeologists to be inhabited by the Central Sierra Miwok since about AD 1400, with no contradictory evidence of the presence of another group.

This notice has been sent to officials of the Tuolumne Band of the Me-wuk and the Central Sierra Me-wuk Cultural and Historic Preservation Committee. Representatives of any other Indian group which believes itself to be culturally affiliated with the human remains and associated funerary objects from these four Tuolumne County collections should get in touch with Pauline Grenbeaux Spear, Committee on Repatriation, P.O. Box 942896, Sacramento, CA 94296-0001, (916) 324-6800 before November 12, 1992.

Dated: October 6, 1992.

Francis P. McManamon,

Departmental Consulting Archeologist, Chief, Archeological Assistance Division.

Office of Surface Mining Reclamation and Enforcement

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collection of information and related form may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the proposal should be made directly to the bureau clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1029–0030), Washington, DC 20503, telephone 202–395–7340.

Title: State Process for Designating Areas Unsuitable for Surface Coal Mining Operations, 30 CFR part 764.

OMB Approval Number: 1029–0030.

Abstract: This part establishes the minimum requirements for designating areas as unsuitable for all or certain types of surface coal mining operations. The information requested will be used by the regulatory authority to make its decision to approve or disapprove a petition to designate an area as unsuitable for surface coal mining or to terminate such as designation. The information will also be used to maintain a data base and inventory system.

Bureau Form Number: None.

Frequency: On occasion.

Description of Respondents: Persons petitioning to have land designated as unsuitable for surface coal mining operations or to have such a designation terminated, and State regulatory authorities who compile and maintain a data base and inventory system.

Estimated Completion Time: 1766 hours.

Annual Response: 6.

Annual Burden Hours: 10,597

Bureau Clearance Officer: John A. Trelease 202–343–1475.

Dated: September 2, 1992.

John Mosesso,

Chief, Division of Technical Services.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Advisory Committee on Voluntary Foreign Aid Meeting

Pursuant to the Federal Advisory Committee Act, notice is hereby given of a meeting of the Advisory Committee on Voluntary Foreign Aid (ACVFA) on:

Date: November 17–18, 1992

Location: U.S. Department of State

This meeting is the second in a two-meeting module which will examine the A.I.D./PVO relationship from the perspective of U.S. private voluntary organizations. The purpose of the meeting will be to examine the operational considerations of this relationship. Members of the committee and persons attending will hear from a variety of PVO, cooperative development and foundation representatives in this regard.

The meeting is free and open to the public. However, notification by Friday, November 13, 1992, through the advisory committee headquarters is required.

Persons wishing to attend the meeting must call Theresa Graham or Suasan Saragi (703) 351–0202, or facsimile (703) 351–0212. Persons attending must include their name, organization, birth date and social security number for security purposes.

Dated: September 29, 1992.

Lou Stamberg,

Deputy Assistant Administrator, Office of Private and Voluntary Cooperation (Acting), Bureau for Food and Humanitarian Assistance.

DEPARTMENT OF JUSTICE

Lodging of Proposed Consent Decree

A proposed Consent Decree in *United States* v. *American Seating Co., et al.*, No. 91–C–0835–S, was lodged with the United States District Court for the Western District of Wisconsin on September, 15, 1992. The Consent Decree is a cost recovery decree under the Comprehensive Environmental Response, Compensation, and Liability Act as amended ("CERCLA"), and resolves claims of the United States under section 107 of CERCLA, 42 U.S.C. 9607, against four potentially responsible parties that arranged for treatment or disposal of hazardous substances at the Mid-State Disposal Landfill Site in Marathon County.

Wisconsin. Under the terms of this Consent Decree, the defendants will pay the United States $1,578,958 of its unreimbursed response cost incurred at the Site.

The Department of Justice will receive comments relating to the proposed Agreed Order Modifying Consent Decree for 30 days following the publication of this Notice. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC. 20530, and should refer to *United States* v. *American Seating Co., et al.*, D.J. Ref. No. 90–11–3–392A.

The proposed Consent Decree may be examined at the Office of the United States Attorney for the Western District of Wisconsin, Office of the United States Environmental Protection Agency, 111 West Jackson Boulevard, Chicago, Illinois 60604, and at the Consent Decree Library, 601 Pennsylvania Avenue, NW., Washington, DC. 20004 (202–347–2072). A copy of the Consent Decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $20.00 (25 cents per page) for reproduction costs, payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 92–24909 Filed 10–9–92; 8:45am]

BILLING CODE 4410–01–M

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Re-Solve Inc., et al.*, Civil Action No. 90–10490K, was lodged on October 1, 1992 with the United States District Court for the District of Massachusetts. The four settling defendants are generators who arranged to have hazardous substances sent to Re-Solve, Inc. Superfund Site in North Dartmouth, Massachusetts for treatment. The proposed concent decree requires the defendants to pay the United States $330,000.00.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Re-Solve, Inc., et al.*, D.J. reference #90–11–2–58A

The proposed concent decree may be examined at the Office of the United States Attorney for the District of Massachusetts, 1107 J.W. McCormack Building, POCH, Boston, Massachusetts; the Region I Office of the Environmental Protection Agency, John F. Kennedy Federal Building, Boston, Massachusetts; and at the Consent Decree Library, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20004, (202) 347–2072. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library. In requesting a copy, please enclose a check in the amount of $7.50 (25 cents per page reproduction costs), payable to the Consent Decree Library.

John C. Cruden,

Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Antitrust Division

U.S. v. Cookson Group, plc, et al.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16 (b) through (h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the District of Columbia in *United States* v. *Cookson Group, plc, et al.*, Civil Action No. 92–2206.

The Complaint alleges that the proposed acquisition of Hollis Automation Co. of Nashua, New Hampshire by Electrovert U.S.A. Corp. of Providence, Rhode Island violates section 7 of the Clayton Act by substantially lessening competition in the North American high performance and mid-range wave soldering machine markets.

Electrovert and Hollis manufacture wave soldering machines, which are used to attach electronic components to a printed circuit board. Electrovert is the largest North American producer of mid-range wave soldering machines in 1991. Hollis was the second largest North American producer of mid-range wave soldering machines in 1991 and the largest North American producer of high performance wave soldering machines in 1991.

The proposed consent decree would require Electrovert to grant North American rights to all of Hollis' wave soldering technology to two other firms presently selling wave soldering machines in the United States. The technology that would be licensed includes Hollis' patented "hot air knife," a device that improves the quality of soldering.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to P. Terry Lubeck, Chief, Litigation II Section, Antitrust Division, Department of Justice, room 10–437, 555 Fourth Street NW., Washington, DC 20001 (telephone: (202) 307–0924).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

In the United States District Court for the District of Columbia

United States of America, Plaintiff, v. Cookson Group PLC, Electrovert Ltd., and Electrovert U.S.A. Corp., Defendants. Judge Hogan.

Filed: September 29, 1992.

Civil Action No. 92 2206.

Stipulation

It is hereby stipulated by and between the undersigned parties, by their respective attorneys, as follows:

(1) The Court has jurisdiction over the subject matter of this action and over each of the parties hereto, and venue of this action is proper in the District of Columbia.

(2) The parties consent that a Final Judgment in the form attached hereto may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (5 U.S.C. 16(b)–(h)), and without further notice to any part or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants and by filing that notice with the Court.

(3) The parties shall abide by and comply with the provisions of the proposed Final Judgment pending entry of the Final Judgment.

(4) In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever, and the making of this stipulation shall be without

prejudice to any party in this or any other proceedings.

Dated: September 29, 1992.

For Plaintiff United States of America.

Charles A. Jones,
Acting Assistant Attorney General.
John W. Clark,
Constance K. Robinson,
P. Terry Lubeck,
John F. Creaney,
Attorneys, U.S. Department of Justice, Antitrust Division.

Counsel for Cookson Group plc, Electrovert Ltd., and Electrovert U.S.A. Corporation.

Stipulation Approved for Filing
Done this 29th day of September, 1992.

Thomas F. Hogan,
United States District Judge.

United States of America, Plaintiff, v. Cookson Group PLC, Electrovert Ltd., and Electrovert U.S.A. Corp., Defendants.
Civil Action No. 92-2206.
Filed: September 29, 1992.
Judge Hogan.

Final Judgment

Whereas plaintiff, United States of America, having filed its Complaint herein on September 29, 1992, and plaintiff and defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue;

And whereas defendants have agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

And whereas the essence of this Final Judgment is prompt licensing of certain wave soldering technology to ensure that competition in the sale of wave soldering machines is not substantially lessened;

And whereas defendents have represented to plaintiff that the remedial action required below can be undertaken and that defendants will later raise no claim of financial hardship arising out of this Final Judgment or the license agreements required by this Final Judgment a grounds for asking the Court to modify any of the provisions contained below;

Now Therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, Adjudged, and Decreed as Follows:

This Court has jurisdiction of the subject matter of this action and of each of the parties hereto. The Complaint states a claim upon which relief may be granted against defendants under section 7 of the Clayton Act, as amended (15 U.S.C. 18).

II

As used in this Final Judgment:

A. "Cookson" means defendant Cookson Group plc, each subsidiary and division thereof, and each officer, director, employee, agent, and other person acting for or on behalf of any of them.

B. "Electrovert Ltd." means defendant Electrovert Ltd., each subsidiary and division thereof, and each officer, director, employee, agent, and other person action for or on behalf of any of them.

C. "Electrovert" means defendant Electrovert U.S.A. Corp., each subsidiary and division thereof, and each officer, director, employee, agent, and other person acting for or on behalf of any of them.

D. "Hollis" means the Hollis automation Co. whose assets were acquired by Electrovert on or about March 30, 1992.

E. "Wave soldering technology" means all intellectual property currently owned by Hollis relating to any wave soldering machine, equipment, parts, or processes produced, sold, utilized, or under development by Hollis, including all rights under any patents, patent applications, and patent improvements; all know-how, design specifications, drawings, and parts specifications; and a current list of all approved parts suppliers. Wave soldering technology includes, but is not limited to, Hollis' hot air knife, nitrogen, oil itermix, and horizontal conveyor technologies.

III

A. The provisions of this Final Judgment shall apply to defendants, to each of their successors and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

B. No portion of this Final Judgment is or has been created for the benefit of any third party and nothing herein shall be construed to provide any rights to any third party.

C. Cookson, Electrovert Ltd., and Electrovert shall require, as a condition of the sale or other dispositon of all or substantially all of their assets or capital stock, that the acquiring party or parties agree to be bound by the provisions of this Final Judgment.

IV

A. Electrovert is hereby ordered and directed, by no later than 90 days following the stipulation by the parties as to this Final Judgment, to license in perpetuity all North American rights to the wave soldering technology to two of the following four firms: Technical Devices Company, Sensbey Incorporated, Soltec International B.V., and Seitz & Hohnerlein. As to each proposed licensee it must be demonstrated to plaintiff's satisfaction and in plaintiff's sole discretion that, in view of the terms of the proposed technology license, the proposed licensee has the capability and incentive to produce wave soldering machines incorporating a "hot air knife" and to compete effectively in the sale of such wave soldering machines in North America within one year from the date of the license. If plaintiff objects to any proposed licensee, any grant by Electrovert of a license to that proposed licensee shall not satisfy the requirements of this paragraph.

B. If within 90 days Electrovert has not secured the two licenses as required by Paragraph IV.A., the Court shall, upon application of plaintiff, appoint a trustee selected by plaintiff to secure the required licenses. The trustee shall have the full power and authority to secure the licenses, including the power to grant worldwide rights to the wave soldering technology on such terms as are then obtained upon a reasonable effort by the trustee and shall have such other powers as the Court deems appropriate to secure such licenses. Defendants shall, as requested, use all reasonable efforts to assist the trustee in accomplishing the required licensing. Defendants shall not object to any license by he trustee on any grounds other than malfeasance. Any such objection by defendants must be conveyed in writing to plaintiff and the trustee within 10 days after the trustee has notified Electrovert of the proposed license.

C. The trustee shall serve at the cost and expense of Electrovert, pursuant to a fee agreement between them that provides for a fixed fee plus an incremental fee for each license secured. The trustee shall account for all monies

derived from the licenses and all costs and expenses incurred. After the accounting is completed to the parties' and the trustee's satisfaction, or upon Court approval if the parties and the trustee cannot agree, all monies derived from the licensing shall be paid to Electrovert and the trust shall be terminated. The trustee shall have six months from the time it receives the right to license the wave soldering technology to secure the necessary licenses.

D. The trustee shall have full and complete access to such personnel, books, and records of Electrovert that the trustee believes is necessary to enable the performance of the trustee's duties. Subject to appropriate confidentiality agreements, the trustee may disclose to prospective licensees such relevant information regarding wave soldering technology that the trustee believes is necessary to secure the aforementioned licenses.

E. The trustee shall file monthly reports with plaintiff, Electrovert, and the Court setting forth the trustee's efforts to accomplish the licenses ordered by this Final Judgment. If the trustee has not accomplished such licenses within six months after the trustee's appointment, the trustee shall thereupon promptly file with the Court a report setting forth (1) the trustee's efforts to accomplish the required licenses and (2) the reasons, in the trustee's judgment, why the required licenses have not been accomplished. To the extent such report contains information the trustee deems confidential, that portion of the report containing the confidential information shall not be filed in the public docket of the Court. Upon application by plaintiff, the Court may, in order to carry out the purpose of the trust, extend the term of the trust and the term of the trustee's appointment by no more than 90 days.

F. Defendants shall give 60 days notice to the Department of Justice prior to:

(1) Acquiring any interest in any assets of any person that, at any time during the 12 months immediately preceding the acquisition, used such assets to produce or sell wave soldering machines in the United States;

(2) Acquiring any capital stock, or any other securities with voting rights, of any supplier of wave soldering machines, that at any time during the twelve (12) months immediately preceding the acquisition had produced wave soldering machines for sale in the United States;

(3) Selling or transferring to any firm engaged in the production or sale of wave soldering machines in the United States any of defendants' assets that at any time during the 12 months immediately preceding the sale or transfer were used in the production or sale of wave soldering machines in the production or sale of wave soldering machines in the United States;

(4) Selling or transferring to any firm engaged in the production or sale of wave soldering machines in the United States any defendant's equity securities or any other securities with voting rights.

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice made to any defendant at its principal offices, be permitted:

(1) Access during office hours of the defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of the defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of the defendant and without restraint or interference from it, to interview officers, directors, employees, agents, or other persons acting for or on behalf of the defendant, who may have counsel present, regarding any such matters.

B. Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, made to any defendant's principal office, the defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this Section shall be divulged by any representatives of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If at the time information or documents are furnished by any defendant to plaintiff, the defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and the defendant marks each pertinent page of such material, "Subject to claim of privilege under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then 10 days notice shall be given by plaintiff to the defendant prior to divulging such material in any legal proceeding (other than grand jury proceedings) to which the defendant is not a party.

VI

Jurisdiction is retained by this Court for the purpose of enabling plaintiff and defendants to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction, implementation, or modification of any of the provisions of this Final Judgment, for the enforcement or compliance herewith, and for the punishment of any violations hereof.

VII

This Final Judgment will expire on the fifth anniversary of its date of entry.

VIII

Entry of this Final Judgment is in the public interest.

Dated: _____.

United States District Judge.

United States of America, Plaintiff, v. Cookson Group PLC, Electrovert LTD., and Electrovert U.S.A. Corp., Defendants.

Civil Action No. 92 2206.

Filed: September 29, 1992

Judge Hogan.

Competitive Impact Statement

Pursuant to section 2(b) of the Antitrust Procedures and Penalties Act ("APPA") (15 U.S.C. 16(b)–(h)), the United States of America files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry with the consent of Cookson Group plc, Electrovert Ltd., and Electrovert U.S.A Corp. in this civil antitrust proceeding.

I

Nature and Purpose of the Proceeding

On September 29, 1992, the United States filed a civil antitrust complaint under section 15 of the Clayton Act, 15 U.S.C. 25, alleging that the acquisition by Electrovert U.S.A. Corp. ("Electrovert") of the wave soldering machine assets of Hollis Automation Co ("Hollis") violated section 7 of the

Clayton Act, as amended, 15 U.S.C. 18. The Complaint alleges that the effect of the acquisition may be substantially to lessen competition in the North American high performance and mid-range wave soldering machine markets.[1] Electrovert Ltd. is the largest producer of such wave soldering machines, and Hollis was the second largest producer. The Complaint seeks an order requiring Electrovert to divest the wave soldering machine assets it acquired from Hollis to a purchaser able promptly to replace competition lost as a result of the acquisition.

On September 29, 1992, the United States and the defendants filed a Stipulation by which they consented to the entry of a proposed Final Judgment. Under the proposed Final Judgment, Electrovert is required to license Hollis' wave soldering technology, including Hollis' patented hot air knife, [2] to other industry participants. See Section III, *infra*. The United States and the defendants have agreed that the proposed Final Judgment, which is designed to eliminate the anticompetitive effects arising from Electovert's acquisition of Hollis' wave soldering machine assets, may be entered after compliance with the APPA, unless the government withdraws its consent after considering public comments on the proposal. Entry of the proposed Final Judgment will terminate the action, except that the Court will retain jurisdiction to construe, modify, and enforce the Judgment, and to punish any violations.

II

Events Giving Rise to the Alleged Violation

On or about March 30, 1992, Electrovert, a wholly owned subsidiary of Electrovert Ltd., acquired all of the assets of Hollis in a transaction valued at approximately $10 million. These assets included the production equipment in its wave soldering machine facility in Nashua, New Hampshire, and intellectual property.

Electrovert is engaged in the production and sale of wave soldering machines. Until its assets were acquired by Electrovert, Hollis was also engaged in the production and sale of wave soldering machines as an independent competitor of Electrovert.

The United States' investigation indicated that wave soldering machines are the only viable method used in mass production of printed circuit boards using pin-through-hole components. Such components have leads that are inserted through holes in the printed circuit board and are attached to circuits on the reverse side of the board with solder applied by a wave soldering machine. The other type of components are "surface mounted" and can be attached to the board by means of a different machine, called a reflow machine. The design and technical features of the circuit board will determine which type of component is needed, and thus which type or types of machines will be used for soldering. About 90 percent of printed circuit boards produced today contain both pin-through-hole components and surface-mounted components. Wave soldering machines are always used on these hybrid boards, and reflow machines may also be used, depending on the location of the components. Thus, wave soldering machines and reflow machines are not substitutes, and manufacturers will not use a reflow machine instead of a wave soldering machine in response to a small but significant and nontransitory price increase of wave soldering machines.

As noted above, high performance and mid-range wave soldering machines are significantly different from each other and from other types of wave soldering machines in production capability, complexity, and cost. Manufacturing customers would not switch from either type of machine to any other in response to a small but significant and nontransitory price increase. Consequently, the United States determined that high performance wave soldering machines and mid-range wave soldering machines were the appropriate product markets within which to analyze this transaction.

Because the cost associated with shutting down an assembly line is extremely large in relation to the cost of wave soldering machines, United States circuit board manufacturers strongly prefer to purchase from wave soldering machine companies that have a proven reputation in North America for supplying a reliable machine, as well as the ability to supply spare parts and to service the wave soldering machine within 24 hours. As a result, customers are unlikely to switch purchases to suppliers that have not sold in North America and do not have North American service and spare parts facilities in the face of a small but significant and nontransitory increase in price. Consequently, the United States determined that the relevant geographic market within which to analyze this transaction is North America.

The United States further concluded that the North American high performance and mid-range soldering machine markets are highly concentrated. In 1991, Electrovert accounted for about 33 percent of the sales of high performance wave soldering machines, and Hollis accounted for about 36 percent. In the same year, Electrovert accounted for over 50 percent of sales of mid-range wave soldering machines, and Hollis accounted for about 17 percent. Electrovert's acquisition of the wave soldering machine assets of Hollis increased the Herfindahl-Hirschman Index ("HHI") [3] by about 2400 to over 5200 in the high performance wave soldering machine market, and by about 1700 to nearly 5000 in the mid-range wave soldering machine market. Such increases in concentration in already concentrated markets potentially raise significant concerns, depending on other factors, that the transaction may result in the exercise of market power.

---

[1] Wave soldering machines are machines used by manufacturers to apply solder to connect electronic components to a printed circuit board using a process that applies a wave of solder to the underside of the board. Electronic firms and their subcontractor assemblers are the primary customers of these machines; appliance, automotive and aerospace firms are also significant purchasers. Such customers base their purchasing decisions upon a variety of technical considerations, such as throughput, pre-heat capability, solder wave configuration, number of waves, computer controls, and conveyor board width.

High performance wave soldering machines are used primarily by large assemblers of printed circuit boards, which may produce as many as one million boards per production run. These machines usually have 30 to 50 percent higher production capacity than mid-range machines, and have greater width capacity and computer sophistication. High performance wave soldering machines generally sell for between $100,000 and $250,000.

Mid-range wave soldering machines are used primarily by medium-sized assemblers of printed circuit boards, which produce boards in lower volumes that high performance machine customers, and therefore do not require a machine with as high production capacity, complexity and durability. Such customers, however, have sufficient volume that they cannot substitute low-end wave soldering machines which have smaller width capacity than mid-range machines. Mid-range wave soldering machines generally sell for between $25,000 and $100,000.

[2] A hot air knife is used to blow excess solder off the surface of the printed circuit board and is used to minimize the defects of soldering.

[3] The HHI is a measure of market concentration calculated by squaring the market share of each firm competing in the market and then summing the resulting numbers. For example, for a market consisting of four firms with shares of 30%, 30%, 20%, and 20%, the HHI is 2600 ($30^2 + 30^2 + 20^2 + 20^2 = 900 + 900 + 400 + 400 = 2600$). The HHI takes into account the relative size and distribution of the firms in the market. It approaches zero when a market is occupied by a large number of firms of relatively equal size and reaches its maximum of 10,000 when a market is controlled by a single firm. The HHI increases both as the number of firms in the market decreases and as the disparity in size between the leading firms and the remaining firms increases.

Further investigation revealed that Electrovert was the oldest and most recognized name in wave soldering machines. While wave soldering machines are differentiated products, that is wave soldering machines sold by different companies are not perfect substitutes for one another, Hollis machines were considered by many customers as close substitutes for Electrovert machines, primarily due to Hollis' optional "hot air knife" technology. About 75 percent of the wave soldering machines Hollis sold in the past few years contained a hot air knife. The patent for the hot air knife, now owned by Electrovert, will not expire for another thirteen years.

Because many customers considered the Electrovert and Hollis high performance machines to be close substitutes, relative to the wave soldering machines of other firms, a small but significant increase in the price of either machine prior to the acquisition would have caused a significant number of customers to purchase a high performance wave soldering machine of the other, thereby rendering the price increase unprofitable. The same situation was true for Electrovert's and Hollis' mid-range wave soldering machines. After the acquisition, however, such a price increase would be profitable because Electrovert, now owning the Hollis assets, would retain the profits associated with the customers who switched from one to the other as a result of the price increase. Without technology such as Hollis' hot air knife, other firms would be unlikely to reposition themselves to replace Hollis as the primary competitive alternative to Electrovert.

In addition, the Untied States determined that entry into the North American high performance and mid-range wave soldering machine markets would not mitigate the likely anticompetitive effects of the transaction. Entry would not be timely, because it takes three years or longer to design, develop, and test a line of high performance or mid-range wave soldering machines. New entrants, moreover, face difficulty in achieving market acceptance because customers are very reluctant to try machines that do not have a proven track record, given the high cost imposed by shutting down an assembly line in the event that the machine fails. Thus, consumers have a preference for producers with well-established reputations for supplying a reliable machine in North America, as well as the ability to supply spare parts and to service the wave soldering machines within 24 hours.

Based upon all these factors, the United States concluded that, without divestiture, Electrovert would be able to exercise market power unilaterally in the manner described above.

III

Explanation of the Proposed Final Judgment

The proposed Final Judgment, which requires Electrovert to license Hollis' wave soldering machine technology, including the patented hot air knife, provides relief that ill assure the continuation of a competitive marketplace. As discussed above in Section II, the acquisition raised the likelihood that Electrovert unilaterally could raise the price of Electrovert's or Hollis' high performance and mid-range wave soldering machines a small but significant amount without fear of losing a significant amount of sales to other producers. Electrovert's ability to exercise market power in that way, however, could be constrained if a significant number of customers would instead turn to other firms producing wave soldering machines.

Licensing Hollis' wave soldering technology to less established but current industry participants will enable these firms effectively to meet the full variety of customer needs for high performance and mid-range wave soldering machines. Licensees of the hot air knife, in particular, will be able to reposition their products to replace competition that would otherwise be lost by Electrovert's acquisition of Hollis's wave soldering machine assets.

Section IV(A) of the proposed Final Judgment would require Electrovert to grant North American rights to all of Hollis' wave soldering technology to two of the following four producers of wave soldering machines, all of which currently sell wave soldering machines in the United States: Technical Devices Company, Sensbey Incorporated, Soltec International B.V., and Seitz & Hohnerlein. As to each proposed license, Electrovert must demonstrate to the satisfaction of the United States that, in view of the terms of the proposed technology license, the proposed licensee has the capability and incentive to produce wave soldering machines incorporating the hot air knife technology and to compete effectively in the sale of such wave soldering machines in North America within one year from the date of the license. If the plaintiff objects to any proposed license, any grant by Electrovert of a license to that proposed licensee shall not satisfy the requirements of that portion of the proposed Final Judgment.

Section IV(B) of the proposed Final Judgment states that the Court will appoint a trustee to secure the required licenses if Electrovert has not secured the two required licenses within 90 days after the Stipulation to this proposed Final Judgment is entered. The trustee will have the full power to obtain the required licenses, including, if necessary, the power to grant worldwide rights to the acquired Hollis wave soldering technology.

Section VII provides that the Final Judgment will expire five years from the date of entry.

IV

Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorneys fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust actions under the Clayton Act. Under the provisions of Section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the proposed Final Judgment has no *prima facie* effect in any private lawsuit that may be brought against the defendants.

V

Procedures available for Modification of the Proposed Final Judgment

The APPA provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register**. The United States will evaluate the comments, determine whether it should withdraw its consent, and respond to the comments. All comments and the responses of the United States will be filed with the Court and published in the **Federal Register**.

Written comments should be submitted to P. Terry Lubeck, Chief, Litigation II Section, Antitrust Division, U.S. Department of Justice, 555 Fourth Street NW., room 10–437, Washington, DC 20001.

The proposed Final Judgment provides that the Court retains jurisdiction over this action and that any party may apply to the Court for any order necessary or appropriate for its modification, interpretation, or enforcement.

VI

Alternative to the Proposed Final Judgment

The United States considered, as an alternative to the proposed Final Judgment filed with this Court, litigation to seek an order requiring Electrovert to divest the acquired Hollis wave soldering machine assets. The Untied States rejected that alternative because the relief in the proposed Final Judgment should prevent the acquisition from having significant anticompetitive effects in the North American high performance and mid-range wave soldering machine markets, while allowing any procompetitive effects the acquisition may produce.

VII

Determinative Documents

No documents were determinative in the formulation of the proposed Final Judgment. Consequently, the United States has not attached any documents to the proposed Final Judgment.

Dates: September 29, 1992.

Respectfully submitted,

Willie L. Hudgins, Jr.,

Weeun Wang,

Erin L. Carter,

John J. Murphy,

BILLING CODE 4410–01–M

United States v. Greater Bridgeport Individual Practice Association, Inc.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given, pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b) through (h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the District of Connecticut, New Haven, Connecticut in *United States* v. *Greater Bridgeport Individual Practice Association, Inc.*, Civil Action No. 5:92CV00575 EBB.

The Complaint in this case alleges that Greater Bridgeport Individual Practice Association, Inc. ("GBIPA") engaged in an illegal boycott of a health-maintenance organization, Physicians Health Services of Connecticut, Inc. (PHS), by agreeing that its members would not contract individually with PHS in violation of section 1 of the Sherman Act, 15 U.S.C. 1.

The proposed Final Judgment enjoins GBIPA from entering into any contract, agreement, understanding or practice not to enter into, withdraw from, or threaten not to enter into or withdraw from any proposed or actual individual contract with any third-party payer. The proposed Final Judgment further prohibits GBIPA from engaging in activities that may facilitate such conduct and also from holding itself out of serving as an exclusive negotiating agent for its member physicians with third-party payers. The proposed Final Judgment also requires GBIPA to establish and maintain an antitrust compliance program.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to Robert E. Bloch, Chief, Professions & Intellectual Property Section, room 9903, Antitrust Division, Department of Justice, 555 4th Street NW., Washington, DC 20001 (telephone: (202) 307–0467).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

United States District Court for the District of Connecticut

United States of America, Plaintiff, v Greater Bridgeport Individual Practice Association, Inc., Defendant.

Civil Action No. 592CV00575 EBB

Filed: September 30, 1992.

Judge Burns.

Stipulation

It is stipulated by the undersigned parties, by their respective attorneys, that:

1. The parties consent that a Final Judgment in the form attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that the plaintiff has not withdrawn its consent, which it may do any time before the entry of the proposed Final Judgment by serving notice on defendant and by filing that notice with the Court.

2. If the plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated: September 29, 1992.

For the Plaintiff.

J. Mark Gidley,

Acting Assistant Attorney General.

Joseph H. Widmar,

United States District Court for the District of Connecticut

United States of America, Plaintiff, v Greater Bridgeport Individual Practice Association, Inc., Defendant.

Civil Action No.

Filed: September 30, 1992.

Judge Burns.

Final Judgment

Plaintiff, United States of America, having filed its Complaint on September 30, 1992, and plaintiff and defendant, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or an admission by any party with respect to any issue of fact or law;

Now, Therefore, before the taking of any testimony, and without trial or adjudication of any issue of fact or law, and upon consent of the parties, it is hereby

Ordered, Adjudged and Decreed as follows:

I

This Court has jurisdiction over the subject matter of this action and over the parties consenting to this Final Judgment. The Complaint states a claim upon which relief may be granted against the defendant under Section 1 of the Sherman Act, 15 U.S.C. 1.

II

As used in this Final Judgment:

(A) "GBIPA" means defendant Greater Bridgeport Individual Practice Association, Inc. and each of its

directors, members of any committee responsible for negotiating a collective service agreement with any third-party payer, officers, representatives, agents, employees, successors, and assigns.

(B) "Physician" means a doctor of medicine or osteopathy.

(C) "Individual service agreement" means any agreement or contract, oral or written, directly between any physician and any third-party payer, that sets forth the terms, including compensation, under which a physician will provide covered services to covered persons. The term does not include a service agreement GBIPA and any third-party payer or a physician agreement between GBIPA and any of its members.

(D) "Third-party payer" means any person or entity that reimburses for, purchases, or pays for health-care services provided to any other person and includes, but is not limited to, health-maintenance organizations, preferred-provider organizations, health-insurance companies, prepaid-hospital, medical, or other health service plans such as Blue Shield and Blue Cross plans, government health-benefits programs, administrators of self-insured health-benefits programs, and employers or other entities providing self-insured health-benefits programs.

III

This Final Judgment shall apply to GBIPA and to all other persons (including GBIPA members) acting in concert or participation, with GBIPA, who receive actual notice of this Final Judgment by personal service or otherwise.

IV

GBIPA is enjoined from, directly or indirectly:

(A) Encouraging, facilitating, assisting or entering into any contract, agreement, understanding or practice among GBIPA physicians concerning

(1) Not entering into, withdrawing from, or threatening not to enter into or to withdraw from any proposed or actual individual service agreement with any third-party payer; or

(2) Any of the terms upon which they would enter into, withdraw from, or threaten not to enter into or to withdraw from any proposed or actual individual service agreement with any third-party payer;

(B) Discussing, providing advice, or making recommendations to any GBIPA member physician concerning

(1) Any of the terms contained in any proposed or actual individual service agrement with any third-party payer;

(2) Entering into, not entering into, withdrawing from, or threatening not to enter into or to withdraw from any proposed or actual individual service agreement with any third-party payer; or

(3) That physician's or any other GBIPA member physician's intention or decision to enter into, not enter into, withdraw from, or threaten to not enter into or to withdraw from any proposed or actual individual service agreement with any third-party payer;

(C) Communicating to any third-party payer that any physician will or may not enter into or withdraw from any proposed or actual individual service agreement with any third-party payer;

(D) Encouraging, advocating, advising or recommending that any GBIPA member physician support GBIPA's negotiating position with any third-party payer that has offered individual service agreements to GBIPA member physicians; and

(E) Entering into any contract, agreement, understanding or practice

(1) To hold itself out or serve as an exclusive negotiating agent for GBIPA member physicians with any third-party payer; or

(2) That impedes or prohibits GBIPA member physicians from negotiating or entering into any proposed or actual individual service agreement with any third-party payer.

V

Nothing in Section IV shall prohibit any person to whom this Final Judgment applies form engaging solely with any other member or employee of such person's partnership, professional corporation, or other bona fide group practice in activities otherwise prohibited by section IV.

VI

GBIPA is ordered to establish and maintain an antitrust compliance program that shall include at a minimum:

(A) Appointing a person, and any necessary successor, to coordinate compliance activities;

(B) Establishing, adopting, and maintaining a written statement setting forth GBIPA's policy regarding compliance with the antitrust laws and this Final Judgment;

(C) Distributing by certified mail, return-receipt requested, within 60 days of the entry of this Final Judgment, copies of this Final Judgment, the Complaint and Competitive Impact Statement in this matter and the policy statement required by section VI(B) to each member and employee of GBIPA;

(D) Holding a briefing annually at a general membership meeting on the meaning and requirements of this Final Judgment and the antitrust laws;

(E) Providing a copy of this Final Judgment along with the Complaint and Competitive Impact Statement in this matter to each person joining GBIPA within 60 days of that person joining;

(F) Obtaining from each GBIPA director and officer an annual written certification that he or she: (1) Has read, understands, and agrees to abide by the terms of this Final Judgment; (2) has been advised and understands that noncompliance with this Final Judgment may result in his or her conviction for criminal contempt of court and imprisonment and/or fine; and (3) is not aware of any violation of this Final Judgment;

(G) Maintaining for inspection by plaintiff a record of recipients to whom the Final Judgment has been distributed and from whom the certification required by section VI(F) has been obtained; and

(H) Conducting an audit of its activities within 60 days from the entry of this Final Judgment, and annually thereafter, to determine compliance with this Final Judgment.

VII

(A) Within 75 days after the entry of this Final Judgment, GBIPA shall certify to plaintiff that it has appointed a person to coordinate compliance activities, whom it shall identify; that it has established and adopted a written antitrust compliance policy, and shall provide a copy of the policy to plaintiff; that it has distributed copies of this Final Judgment, the Complaint and Competitive Impact Statement, and the policy statement, as required by Sections VI(A)–(C) above; and that it has conducted an audit of its activities; and

(B) For 10 years after the entry of this Final Judgment, on or before its anniversary date, GBIPA shall certify annually to plaintiff whether GBIPA has complied with the provisions of sections VI(D)–(H) above.

VIII

Nothing in this Final Judgment shall bar the United States from seeking, or the Court from imposing, against GBIPA or any person any other relief available under any applicable provision of law for violation of this Final Judgment.

IX

(A) For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time, duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General

or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable written notice to GBIPA be permitted:

(1) Access during office hours of GBIPA, or its designated agent, to inspect and copy all records and documents in the possession or under the control of GBIPA, which may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of GBIPA, to interview GBIPA officers, employees and agents, who may have counsel present, regarding any such matters.

(B) Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to GBIPA, and subject to any legally recognized privilege, GBIPA shall submit such written reports, under oath if requested, to plaintiff relating to any of the matters contained in this Final Judgment as may be requested.

(C) No information or documents obtained by the means provided in this section IX shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

X

Jurisdiction is retained by this Court to enable either of the parties to this Final Judgment, but no other person, to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or implementation of this Final Judgment, for the enforcement or modification of any of its provisions, and for the punishment of any violation hereof.

XI

This Final Judgment shall expire ten (10) years from the date of entry.

XII

Public Interest Determination

Entry of this Final Judgment is in the public interest.

Dated:
United States District Judge.

United States District Court for the District of Connecticut

United States of America, Plaintiff, v. Greater Bridgeport Individual Practice Association, Inc., Defendant.
Civil Action No. 592CV00575EBB
Filed: September 30, 1992.
Judge Burns.

Competitive Impact Statement

Pursuant to section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b), the United States submits this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust action.

I

Nature and Purpose of the Proceeding

On September 30, 1992, the United States filed a civil antitrust Complaint alleging that defendant Greater Bridgeport Individual Practice Association, Inc., ("GBIPA") and its conspirators conspired not to contract individually with Physicians Health Services of Connecticut, Inc. ("PHS"), a health-maintenance organization, in violation of section 1 of the Sherman Act, 15 U.S.C. 1. According to the Complaint, the conspiracy unreasonably restrained price competiton among GBIPA physicians for the sale of their services to PHS and deprived PHS of the benefits of free and open competition in its purchase of physician servcies.

The Complaint seeks injunctive relief that would prevent and enjoin defendant from engaging in the same or similar violations if PHS or any other third-party payer for health-care services seeks to initiate, maintain, or renegotiate individual service agreements with GBIPA member physicians. This relief attempts to ensure through various remedial provisions that when a third-party payer seeks to contract, or has already contracted, with otherwise competing GBIPA physician members, GBIPA will not act to thwart individual contracting.

Entry of the proposed Final Judgment will terminate this action, except that the Court will retain jurisdiction over the matter for further proceedings that may be required to interpret, enforce, or modify the Judgment, or to punish violations of any of its provisions.

II

Description of the Practices Involved in the Alleged Violation

At trial, the United States would have offered evidence to establish the following:

1. Defendant GBIPA is a not-for-profit corporation organized and existing under the laws of the state of Connecticut and maintaining an office in Bridgeport, Connecticut. During the period of the alleged violation, its membership comprised approximately 670 greater Bridgeport area physicians, representing 85–95% of the physicians practicing in the area. GBIPA member physicians control GBIPA.

2. From 1980 to date, GBIPA has contracted with PHS to provide physician services to PHS members in the greater Bridgeport area. Pursuant to the contract, PHS pays GBIPA a set monthly capitation fee for each PHS member eligible to be served by GBIPA physicians. In 1990, GBIPA received over $60 million in such payments from PHS to provide physician services to approximately 82,000 PHS members in the greater Bridgeport area.

3. GBIPA contracts directly with individual physicians to obtain physician services for PHS members. Those contracts provide for payment for services rendered to PHS members, from the capitation fees paid to GBIPA by PHS, in accordance with a fee schedule and a percentage withholding arrangement. Most GBIPA physicians are in independent, private practices and are in potential or actual competition with other GBIPA physicians, in the same or overlapping specialties, to provide services to PHS members.

4. Before and during the period of the alleged violation, contracts between GBIPA and individual physicians did not authorize GBIPA to be the exclusive bargaining agent for GBIPA physicians in contractual negotiations with PHS, nor did the contracts prohibit GBIPA physicians from contracting individually with PHS.

5. From 1980 until 1989, the contract between PHS and GBIPA was renewed automatically each year. On May 8, 1989, GBIPA notified PHS that the contract would not be automatically renewed, and on May 11, 1989, PHS notified GBIPA that if PHS were unable to reach an agreement with GBIPA, PHS might seek to contract directly with individual GBIPA physicians.

6. Subsequent contractual negotiations reached an impasse around September 1, 1989. The major issues of disagreement concerned GBIPA's role in the governance of PHS and the amount that the capitation paid by PHS to GBIPA should increase. GBIPA had subordinated negotiations on the fee increase issue to the issue of governance on the stated view that the governance issue subsumed the fee issue.

7. After suspending negotiations with GBIPA, PHS sought to contract directly with individual GBIPA physicians to provide services to PHS members after its contract with GBIPA expired. On September 5, 1989, PHS mailed proposed individual contracts to GBIPA member physicians.

8. During several weeks preceding September 5, 1989, GBIPA's leadership, in anticipation of a negotiating impasse and PHS's pursuit of individual contracts, sent several letters to all GBIPA physicians seeking support for GBIPA's negotiating position and discouraging them from contracting individually with PHS should the contingency arise. Similar exhortations were made at the medical-staff meeting of at least one Bridgeport hospital.

9. After PHS has ceased negotiations with GBIPA and mailed individual contracts to GBIPA physicians, GBIPA leaders sent GBIPA physicians several additional letters urging them to support GBIPA and not sign the individual contracts. Two of those letters advised GBIPA physicians that the GBIPA Board of Directors and Negotiating Committee had unanimously agreed that PHS must negotiate with the GBIPA.

10. GBIPA's repeated communications urging GBIPA physicians to support its negotiating position and not sign individual contracts culminated at a called meeting of GBIPA physicians on September 20, 1989, attended by nearly 300 physicians. Among the presentations made at the meeting, at least two GBIPA speakers expressly urged the physicians not to sign individual contracts with PHS and warned them of adverse economic consequences of signing. Speakers also urged that individual contracts that had already been signed be withdrawn. Other speakers also warned of the adverse consequences.

11. In the context of the numerous letters sent over previous weeks urging GBIPA physicians to support the GBIPA negotiating position and not sign individual contracts with PHS, and after presentations urging that a resolution be sent to signal their group solidarity behind pursuing only joint negotiations to the exclusion of individual contracts, the GBIPA physicians at the September 20th meeting voted on a resolution expressing their full support for GBIPA's efforts to negotiate an improved contract with PHS and authorizing GBIPA to continue negotiations with PHS to take action to protect and enhance the interests of its members. Near the end of the meeting, the physicians' overwhelming support for the resolution was announced.

12. One of the speakers at the September 20th meeting recognized that approval of the resolution would require PHS to resume negotiations with GBIPA. As predicted, PHS decided to resume contractual negotiations with GBIPA. The contract that GBIPA and PHS eventually negotiated for 1990–92 provided for fees at significantly higher levels than those in the individual contracts and those earlier offered in negotiations with GBIPA.

III

Explanation of the Proposed Final Judgment

The Untied States and GBIPA have stipulated that the Court may enter the proposed Final Judgment after compliance with the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h). The proposed Final Judgment provides that its entry does not constitute any evidence against or admission by either party concerning any issue of fact or law.

Under the provisions of 15 U.S.C. 16(e), the Proposed Final Judgment may not be entered unless the Court finds that its entry is in the public interest. Section XII of the proposed Final Judgment sets forth such a finding.

The proposed Final Judgment is intended to ensure that defendant GBIPA does not disrupt individual contracting initiatives or arrangements and does not hold itself out or serve as an exclusive negotiating agent for its member physicians with third-party payers.

A. Prohibitions and Obligations

Section IV(A) of the proposed Final Judgment enjoins GBIPA from directly or indirectly encouraging, facilitating, assisting or entering into any contract, agreement, understanding or practice among GBIPA physicians concerning (1) not entering into, withdrawing from, or threatening not to enter into or to withdraw from any proposed or actual individual service agreement with any third-party payer; or (2) any of the terms upon which they would enter into, not enter into, withdraw from, or threaten not to enter into or to withdraw from any proposed or actual individual service agreement with any third-party payer. "GBIPA" is defined in section II of the proposed Final Judgment as "defendant Greater Bridgeport Individual Practice Association, Inc. and each of its directors, members of any committee responsible for negotiating a collective service agreement with any third-party payer, officers, representatives, agents, employees, successors, and assigns." "Individual service agreement" is defined in section II of the proposed Final Judgment as "any agreement or contract, oral or written, directly between any physician and any third-party payer, that sets forth the terms, including compensation, under which a physician will provide covered services to covered persons. The term does not include a service agreement between GBIPA and any third-party payer or a physician agreement between GBIPA and any of its members." "Third-party payer" is defined in section II of the proposed Final Judgment as "any person or entity that reimburses for, purchases, or pays for health-care services provided to any other person and includes, but is not limited to, health-maintenance organizations, preferred-provider organizations, health-insurance companies, prepaid-hospital, medical or other health service plans such as Blue Shield and Blue Cross plans, government health-benefits programs, administrators of self-insured health-benefits programs, and employers or other entities providing self-insured health-benefit programs."

Section IV(B) enjoins GBIPA from directly or indirectly discussing, providing advice, or making recommendations to any GBIPA member concerning (1) any of the terms contained in any proposed or actual individual service agreement with any third-party payer; (2) entering into, not entering into, withdrawing from, or threatening not to enter into or to withdraw from any proposed or actual individual service agreement with any third-party payer; and (3) that physician's or any other GBIPA member physician's intention or decision to enter into, not enter into, withdraw from, or threaten to not enter into or to withdraw from any proposed or actual individual service agreement with any third-party payer.

Section IV(C) enjoins GBIPA from directly or indirectly communicating to any third-party payer that any physician will or may not enter into or withdraw from any proposed or actual individual service agreement with any third-party payer.

Section IV(D) enjoins GBIPA from directly or indirectly encouraging, advocating, advising or recommending that any GBIPA member physician support GBIPA's negotiating position with any third-party payer that has offered individual service agreements to GBIPA member physicians.

Section IV(E) enjoins GBIPA from directly or indirectly entering into any contract, agreement, understanding or practice (1) to hold itself out or serve as an exclusive negotiating agent for GBIPA member physicians with any third-party payer; or (2) that impedes or prohibits GBIPA member physicians from negotiating or entering into any proposed or actual individual service agreement with any third-party payer.

Section V of the proposed Final Judgment provides that nothing in section IV shall prohibit any person to

whom the Final Judgment applies from engaging solely with any other member or employee of such person's partnership, professional corporation, or other bona fide group practice in activities otherwise prohibited by section IV.

Section VI requires GBIPA to establish and maintain in antitrust compliance program that shall include at a minimum: (A) Appointing a person, and any necessary successor, to coordinate compliance activities; (B) establishing, adopting, and maintaining a written statement setting forth GBIPA's policy regarding compliance with the antitrust laws and the Final Judgment; (C) distributing by certified mail, return-receipt requested, within 60 days of the entry of the Final Judgment, copies of the Final Judgment, the Compliant, this Competitive Impact Statement, and the required policy statement to each member and employee of GBIPA; (D) holding a briefing annually at a general membership meeting on the meaning and requirements of the Final Judgment and the antitrust laws; (E) providing a copy of the Final Judgment along with the Complaint and this Competitive Statement to each person joining GBIPA within 60 days of that person joining; (F) obtaining from each GBIPA director and officer an annual written certification that he or she (1) has read, understands, and agrees to abide by the terms of the Final Judgment, (2) has been advised and understands that noncompliance with the Final Judgment may result in his or her conviction for criminal contempt of court and imprisonment and/or fine, and (3) is not aware of any violation of the Final Judgment; (G) maintaining for inspection by plaintiff a record of recipients to whom the Final Judgment has been distributed and from whom the required certification has been obtained; and (H) conducting an audit of its activities within 60 days from the entry of the Final Judgment, and annually thereafter, to determine compliance with the Final Judgment.

Section VII of the proposed Final Judgment requires GBIPA to make specified certifications. Section VII(A) requires GBIPA to certify to plaintiff within 75 days after the entry of the Final Judgment that it has appointed a person to coordinate compliance activities, whom it shall identify; that it has established and adopted a written antitrust compliance policy, which shall be provided to plaintiff; that it has distributed copies of the Final Judgment, the Complaint and this Competitive Statement, and the policy statement as required by sections VI(A)–(C); and that it has conducted an audit of its activities. Section VII(B) requires GBIPA to certify annually to plaintiff whether GBIPA has complied with the provisions of sections VI (D)–(H).

Section VIII provides that nothing in the Final Judgment shall bar the United States from seeking, or the Court from imposing, against GBIPA or any person any other relief available under any applicable provision of law for violation of the Final Judgment.

Section IX(A) provides that an authorized representative of the Department of Justice may visit GBIPA's office after providing reasonable notice, to review its records and may conduct interviews regarding any matter contained in the Final Judgment. Section IX(B) requires GBIPA to submit, upon request, written reports, under oath, relating to any matter contained in the Final Judgment.

B. Scope of the Proposed Final Judgment

Section III of the proposed Final Judgment provides that the Final Judgment applies to GBIPA and to all other persons (including GBIPA members) acting in concert or participation, with GBIPA, who receive actual notice of the Final Judgment by personal service or otherwise.

Section XI of the proposed Final Judgment provides that the Final Judgment shall expire 10 years from the date of entry.

C. Anticipated Effects of the Proposed Judgment on Competition

Entry of the proposed Final Judgment should significantly deter GBIPA from engaging in anticompetitive conduct against PHS, or any other third-party payer, that seeks to enter into, maintain, or renegotiate individual service agreements with GBIPA physicians. Such individual contracting should assist third-party payers to contract with GBIPA physicians upon competitively determined terms. Third-party payers' ability to resort to individual contracting should also provide an incentive to GBIPA physicians, when negotiating as a group, to offer terms approximately the competitive level.

The Department of Justice believes that the proposed Final Judgment contains adequate provisions to prevent further violations of the type upon which the Complaint is based.

IV

Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages suffered, as well as costs and reasonable attorney's fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of such actions. Under the provisions of section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the judgment has no *prima* facie effect in any subsequent lawsuits that may be brought against GBIPA.

V

Procedures Available for Modification of the Proposed Final Judgment

As provided in section 2(d) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(d), any person believing that the proposed Final Judgment should be modified may submit written comments to Robert E. Bloch, Chief; Professions and Intellectual Property Section; U.S. Department of Justice; Antitrust Division; 555 4th Street NW.; room 9903; Judiciary Center Building; Washington, DC 20001, within the 60-day period provided by the Act. These comments, and the Department's responses, will be filed with the Court and published in the **Federal Register**. All comments will be given due consideration by the Department of Justice, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to entry. Section X of the proposed Final Judgment provides that the Court retains jurisdiction to enable either of the parties to the Final Judgment to apply to the Court for any order necessary or appropriate for the modification,interpretation, or enforcement of the Final Judgment.

VI

Alternatives to the Proposed Final Judgment

The alternative to the proposed Final Judgment would be litigation, possibly including a full trial of the case. In the view of the Department of Justice, such litigation would involve substantial cost to the United States and is not warranted because the Final Judgment provides the relief that the United States sought in its Complaint.

Stuctural relief was not considered to be appropriate in this case. The Complaint alleges a conduct violation, and the conduct relief chosen by the Department should deter recurrence of the violation alleged in the Complaint.

The Department also considered a provision that would have enjoined GBIPA from seeking to initiate, continue,

or resume contract negotiations with any third-party payer that had offered individual service agreements to GBIPA member physicians, unless expressly requested to do so in writing by the third-party payer. The Department of Justice concluded that the other extensive injunctive relief agreed to by GBIPA was sufficient to prevent further violations of the nature challenged in the Complaint and that such a provision might interfere with possible procompetitive relationships between GBIPA and third-party payers.

VII

Determinative Materials and Documents

No materials and documents of the type described in section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b), were considered in formulating the proposed Final Judgment.

Respectfully submitted.

Steven Kramer, by P.A.B.

Patricia A. Brink,

Attorneys, U.S. Department of Justice, Antitrust Division, 555 4th Street, NW., Washington, DC 20001, telephone (202) 307-0997.

BILLING CODE 4410-01-M

Notice Pursuant to the National Cooperative Research Act of 1984 Fuel Cell Commercialization Group

Notice is hereby given that, on August 12, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the Fuel Cell Commercialization Group ("FCCG) filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing the addition of fourteen members to the FCCG. The notification was filed for the purpose of invoking and extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the FCCG advised that Arizona Electric Power Cooperative, Benson, AZ; Baltimore Gas & Electric Co., Baltimore, MD; Charter Oak Energy, Berlin, CT; City of Burbank Public Service Department, Burbank, CA; City of Manassas Electric Department, Manassas, VA; City of Riverside, Riverside, CA; General Public Utilities, Johnstown, PA; Minnesota Power, Duluth, MN; New York State Electric & Gas, Binghamton, NY; Niagara Mohawk Power Corporation, Syracuse, NY; Northern California Power Authority, Roseville, CA; Rochester Gas & Electric Corporation, Rochester, NY; Sacramento Municipal Utility District, Sacramento, CA; and Wisconsin Public Service Corporation, Green Bay, WI have become members of the FCCG.

No other changes have been made in either the membership or planned activity of the FCCG. Membership in the FCCG remains open subject to certain adjustments in the membership benefits available to members joining the FCCG hereafter. The FCCG intends to file additional written notification disclosing any future change in membership.

On September 21, 1990, the FCCG filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on October 25, 1990, 55 FR 43050. The last notification was filed with the Department on September 20, 1991. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on October 16, 1991, 56 FR 51917.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-27,339; TA-W-27,340]

All Fab Corp., Everett, WA and Certified Aerospace Inc. Shelton, WA Negative Determination Regarding Application for Reconsideration

By an application dated September 15, 1992, the company requested administrative reconsideration of the Department's denial of adjustment assistance for workers at the subject firms. The denial notice was signed on August 6, 1992 and was published in the **Federal Register** on August 28, 1992 (57 FR 39241).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

Company officials state that All Fab and Certified Aerospace, both subsidiaries of Certified Holding Corporation have been adversely affected by foreign competition. Its alleged that domestic airlines have imported aircraft from foreign companies (Airbus Industries) which has resulted in reduced production schedules for Boeing 737 for which the subject firms produce aircraft parts.

The workers produce aircraft parts—aircraft door latch assemblies, structural fittings and aircraft subassemblies. Imports of finished articles (airplanes) cannot be considered like or directly competitive with their component parts (aircraft parts) which are incorporated into the finished article. Only increased imports of articles that are like or directly competitive with those produced at the workers' firm (aircraft parts) can be considered as contributing importantly to worker separations and declines in sales or production.

Further, the loss of future business for aircraft parts on Boeing's 777 aircraft would not form a basis for a worker group certification. One of the worker group criteria needed for certification is that there be an actual decline in sales or production of the article produced.

The Department's denial was based on the fact that the "contribution importantly" test of the increased import criterion was not met. The "contributed importantly" test is generally demonstrated through a survey of the workers' firm's customers. The Department's survey of the subject firms' major lost bids shows that they were awarded to other domestic companies.

The findings show that a large portion of the subject firms' parts production was for the Boeing 737 aircraft. However, the findings show no imports of these parts. Instead, Boeing has spread out its delivery of the aircraft at the request of the airlines which in turn are hurt by declining industry profits and fare wars. Since airline deregulation in the late 1970s, many airlines have ceased operations (Eastern, Pan Am, Midway and Braniff) others are in bankruptcy (TWA, American West and Continental) while others have merged. Further, the current economic slowdown is not helping airline profits either.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of

Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 2nd day of October 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Service, Unemployment Insurance Service.

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of September 1992.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-27,498; Allied Signal Aerospace Co., Garrett Fluid Systems Div., Tempe, AZ

TA-W-27,437; Soricon Corp., Boulder, CO

TA-W-27,511; Victor Fluid Power, Granite Falls, MN

TA-W-27,554; Sew Wright Apparel, Miami, OK

TA-W-27,416; Rogge Forest Products, Inc., Bandon, OR

TA-W-27,428; Lees Carpets, A div. of Burlington Industries, Inc. A Div. of Burlington Industries, Inc., Hillsville, VA

TA-W-27,477; Laser Magnetic Storage Co., Norristown, PA

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-27,576; Whitaker Oil Tools, Odessa, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,493; Major Electric Co., Inc., Odessa, TX

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-27,501 & TA-W-27,502; Online Resource Exchange, Inc., New Orleans, LA and Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,589; Commodore Semiconductor Group, Norristown, PA

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-27,602; Nokia-Maillefer, Inc., South Hadley, MA

U.S. imports of machines for working wire decreased in 1991 compared to 1990 and in the latest twelve month period July through June 1991-1992 compared to the same period July through June 1990-1991.

TA-W-27,285; Scott Paper Worldwide, Winslow, ME

U.S. imports of sanitary paper products are negligible.

TA-W-27,591; Timex Corp., Torrington, CT

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,560; General Electric Aerospace Operations Defense Systems Department, Pittsfield, MA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,497; New England Die Casting, Inc., West Haven, CT

The investigation revealed that criterion (2) and criterion (3) have not been met. Sales or production did not decline during the relevant period as required for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

TA-W-27,436; Sterling Group, Sewickley, PA

The investigation revealed that criterion (2) and criterion (3) have not been met. Sales or production did not decline during the relevant period as required for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations, or threated thereof, and to the absolute decline in sales or production.

TA-W-27,601; Dril-Quip, Inc., Houston, TX

U.S. imports of oil and gas field machinery were negligible in 1991 and in January-July 1992.

TA-W-27,498; General Motors Corp., Truck & Bus Div., Shreveport, LA

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-27,453; Welltech, Inc., Dickinson, ND

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-27,559; Grasso Supply Co., Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,547; Eastern States Exploration Co., Eastern States Production Co., Snow Shoe, PA

Increaes imports did not contribute importantly to worker separations at the firm.

TA-W-27,512; Wilson Industries, Wilson Supply Co., Tioga, ND

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,555; United Gas Pipe Line Co., Houston, TX

Increased imports did not contribute importantly to worker separations at the firm.

Affirmative Determinations

TA-W-27,606; Frigidaire Distribution Center, Ontario, OH

A certification was issued covering all workers separated on or after August 6, 1991.

TA-W-27,457; Wilmer, Inc., Bowanstown, PA

A certification was issued covering all workers separated on or after June 26, 1991.

TA–W–27,353; Morrilton Plastic Products, Morrilton, AR

A certification was issued covering all workers separated on or after May 26, 1991.

TA–W–27,509 & TA–W–27,510; Shelton Welltools, Inc., Woodwards, OK and Oklahoma City, OK

A certification was issued covering all workers separated on or after July 9, 1991.

TA–W–27,529; Ansewns Shoe Co., Skowhegan, ME

A certification was issued covering all workers separated on or after June 6, 1991 and before March 1, 1992.

TA–W–27,427; J. Gilmore Hill, Denver, CO

A certification was issued covering all workers separated on or after June 15, 1991.

TA–W–27,487 and TA–W–27,487A; American Tree Co., Inc., Jingle Bell Lane and Beasley Street, Lexington, KY

A certification was issued covering all workers separated on or after July 2, 1991.

TA–W–27,454; Benton Casing Services, Inc. Winnie, TX and Operating at the Following Locations: A; Victoria, TX, B; Lake Charkes, LA, and C; Houma, LA

A certification was issued covering all workers separated on or after June 15, 1991.

TA–W–27,479; Kneat Knits, Allentown, PA

A certification was issued covering all workers separated on or after June 30, 1991.

TA–W–27,613; Sure-Fit Products Co., El Paso, TX

A certification was issued covering all workers separated on or after August 4, 1991.

TA–W–27,615; Banner Elk Glove Co., Banner Elk, NC

A certification was issued covering all workers separated on or after August 7, 1991.

TA–W–27,567; Hosking Geophysical Corp., Mt. Pleasant, MI

A certification was issued covering all workers separated on or after July 24, 1991.

TA–W–27,600; M–I Drilling Fluids, Kalkaska, MI

A certification was issued covering all workers separated on or after July 30, 1991.

TA–W–27,603; M–I Drilling Fluids, Olney, IL

A certification was issued covering all workers separated on or after July 31, 1991.

TA–W–27,289; Kerr-McGee Chemical Corp., Headquartered in Oklahoma City, OK and Operating at the Following Locations: A—Henderson, NV, B—Ellington, MO, C—Springfield, MO

A certification was issued covering all workers separated on or after May 4, 1991.

TA–W–27,460; Exxon Corp., Exxon Co USA, Production Dept, South Texas Div., Corpus Christi, TX

A certification was issued covering all workers separated on or after June 19, 1991.

TA–W–27,792; Exxon Corp., Exxon Co., USA, Production Dept., Central Production Div., Houston, TX

A certification was issued covering all workers separated on or after August 28, 1991.

TA–W–27,456, & TA–W–27,456A; Conoco, Inc., Exploration and Production, North America, Oklahoma City, OK & Operating Out of Other Locations in The State of Oklahoma

A certification was issued covering all workers separated on or after June 18, 1991.

TA–W–27,480 and TA–W–27,480A; Conoco, Inc., Exploration and Production, North America, New Orleans, LA & Operating Out of Other Locations in the State of Louisiana

A certification was issued covering all workers separated on or after June 30, 1991.

TA–W–27,812; Conoco, Inc., Exploration and Production, North America Headquartered in Houston, TX & Operating Out of the Other Locations in the Following States: A—AK, B—CA, C—MI, D—MS, E—ND, F—NM, G—TX, H—WY

A certification was issued covering all workers separated on or after August 13, 1991.

TA–W–27,545; Conoco, Inc., Exploration and Production, North America, Midland, TX

A certification was issued covering all workers separated on or after July 20, 1991.

TA–W–27,632; Rupe Oil Co., Inc., Wichita, KS

A certification was issued covering all workers separated on or after August 13, 1991.

TA–W–27,699; Flory Fashions, Inc., Swoyersville, PA

A certification was issued covering all workers separated on or after August 5, 1991.

TA–W–27,575; Shape, Inc., Audio Products Div., Biddeford, ME

A certification was issued covering all workers separated on or after July 13, 1991.

I hereby certify that the aforementioned determinations were issued during the month of September 1992. Copies of these determinations are available for inspection in room C–4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: October 5, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address show below, not later than October 23, 1992.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Directors, Office of Trade Adjustment Assistance, at the address shown below, not later than October 23, 1992.

Total Estimated Burden: 30,080.

Roberta Dunn,

Congressional Liaison, National Endowment for the Arts.

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Arts.

ACTION: Notice.

SUMMARY: The National Endowment for the Arts (NEA) has sent to the Office of Management and Budget (OMB) a request for expedited clearance, by October 30, 1992, of the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be submitted by October 20, 1992.

ADDRESSES: Send comments to Mr. Steve Semenuk, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., room 3002, Washington, DC 20503; (202-395-7316). In addition, copies of such comments may be sent to Ms. Roberta Dunn, National Endowment for the Arts, Congressional Liaison Office, room 525, 1100 Pennsylvania Avenue, NW., Washington, D.C 20506; (202-682-5434).

FOR FURTHER INFORMATION CONTACT: Ms. Roberta Dunn, National Endowment for the Arts, Congressional Liaison Office, room 525, 100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5434).

SUPPLEMENTARY INFORMATION: The Endowment requests the review of a revision of a currently approved collection of information. This entry is issued by the Endowment and contains the following information:.

(1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) and estimate of the number of responses; (6) the average burden hours per response; (7) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. 3504(h).

Title: FY 93 International Projects Initiative Application Guidelines

Frequency of Collection: One time

Respondents: State, regional or local arts agencies; non-profit institutions

Use: Guideline instructions and application elicit relevant information from non-profit organizations and state, regional or local arts agencies that apply for funding under the International Projects Initiative category guidelines.

This information is necessary for the accurate, fair and thorough consideration of competing proposals in the review process.

Estimated Number of Respondents: 250.

Average Burden Hours per Response: 24.

Total Estimated Burden: 6,000.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The NRC has recently submitted to the OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. Type of submission, new, revision, or extension: Revision.

2. The title of the information collection: 10 CFR part 52, "Early Site Permits; Standards Design Certifications; and Combined Licenses for Nuclear Power Plants".

3. The form number if applicable: Not applicable.

4. How often the collection is required: On occasion and every ten to twenty years for applications for renewal.

5. Who will be required or asked to report: Designers of commercial nuclear power plants, electric power utilities, and any person eligible under the Atomic Energy Act to apply for a construction permit for a nuclear power plant.

6. An estimate of the number of responses: One application for an early site permit and two applications for certification of a standard design are expected over the next three years.

7. An estimate of the total number of hours needed to complete the requirement or request: 45,940 (Applicants for an early site permit, 1,940 per response; applicants for a design certification, 22,000 hours per response.)

8. An indication of whether section 3504(h), Public Law 96–511 applies: Not applicable.

9. Abstract: 10 CFR part 52 establishes requirements for the granting of early site permits, certifications of standard nuclear power plant designs, and licenses which combine in a single license a construction permit and an operating license with conditions (combined licenses). This part also establishes requirements for renewal of these permits, certifications, and licenses; amendments to them; exemptions from certifications; and variances from early site permits.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer: Ronald Minsk, Office of Information and Regulatory Affairs (3150–0151), NEOB–3019, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395–3084.

The NRC Clearance Officer is Brenda Jo Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 5th day of October 1992.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

BILLING CODE 7590–01–M

[Docket No. 50–29]

Yankee Atomic Electric Co., Yankee Nuclear Power Station; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from 10 CFR 50.54(q). This exemption would be granted to the Yankee Atomic Electric Company (Yankee or the licensee) for the Yankee Nuclear Power Station (Rowe) located in Franklin County, Massachusetts.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant an exemption from certain emergency preparedness requirements of 10 CFR 50.54(q) which in turn references 10 CFR 50.47(b) and appendix E. The licensee requested this action in their letter of July 2, 1992, which also requested our approval of a Defueled Emergency Plan for Rowe.

The Need for the Proposed Action

The licensee's letter of July 2, 1992, stated that the plant has permanently ceased power operation and that all nuclear fuel has been removed from the containment to the spent fuel pool and therefore the requirements of 10 CFR 50.54(q), which references 10 CFR 50.47(b) and appendix E, are no longer needed because there could not be any possible release of fission products into the environment resulting from reactor system pressure boundary releases. This exemption would permit the licensee to discontinue offsite planning activities and reduce the scope of its onsite response. The staff has issued an exemption dated July 24, 1992, which removes all training and drill requirements for offsite exercises and permits the licensee to postpone a scheduled November 1992 exercise into calendar year 1993.

Environmental Impacts of the Proposed Action

The proposed action does not have any effect on accident risk and the possibility of environmental impact is extremely remote.

The licensee submitted a safety analysis in a letter dated May 22, 1992, which analyzed the most credible accident with the fuel in the spent fuel pool. This accident was the drop of a fuel bundle and subsequent release of all gaseous gap activity. The staff reviewed the licensee's analysis and found it acceptable; our review was conducted as part of our exemption of July 24, 1992, referenced above.

Based on our review, we have concluded that the consequences of accidents which may potentially result in a radiological release are greatly decreased given the plant's permanently shutdown and defueled status.

Therefore, the proposed action does not increase the probability or consequences of any accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure onsite.

Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed action does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed action.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the action. This would not reduce environmental impacts of plant operation and would not enhance the protection of the environment nor public health and safety.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in previous reviews for the Yankee Nuclear Power Station. The plant was licensed prior to the requirement for issuance of a Final Environmental Statement.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed action. Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for exemption dated July 2, 1992, which contains the Defueled Emergency Plan, and is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at a local public document room at Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Dated at Rockville, Maryland, this 5th day of October 1992.

For the Nuclear Regulatory Commission.

Morton B. Fairtile,

Acting Director, Non-Power Reactors and Decommissioning Project Directorate, Division of Operating Reactor Support, Office of Nuclear Reactor Regulation.

[FR Doc. 92–24754 Filed 10–9–92; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards; Subcommittee on Advanced Boiling Water Reactors; Meeting

The ACRS Subcommittee on Advanced Boiling Water Reactors will hold a meeting on October 21 and 22, 1992, in room P–110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, October 21, 1992—8:30 a.m. until the conclusion of business
Thursday, October 22, 1992—8:30 a.m. until the conclusion of business

The Subcommittee will begin its review of the Final Safety Evaluation Report (FSER) for the GE ABWR design and the remainder of the SSAR submittals. The purpose of this meeting is to gather information, analyze relevant issues and facts, and to formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, GE Nuclear Energy, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff engineer, Dr. Medhat El-Zeftawy (telephone 301/492–9901) between 7:30 a.m. and 4:15 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: October 6, 1992.

Sam Duraiswamy,

Chief, Nuclear Reactors Branch.

BILLING CODE 7590–01–M

[Docket Nos. 50–498 and 50–499]

Houston Lighting & Power Co.; South Texas Project, Units 1 and 2 Issuance of Director's Decision Under 10 CFR 2.206

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has taken action with regard to a Petition for action Under 10 CFR 2.206 received from Mr. Thomas J. Saporito, Jr., dated February 10, 1992, with regard to the South Texas Project, Units 1 and 2.

The Petitioner requested that the NRC institute a proceeding pursuant to 10 CFR 2.202 and take a number of immediate and swift actions in the areas of physical security, maintenance activities, compliance with Technical Specifications and procedures, and training.

The Director of the Office of Nuclear Reactor Regulation has determined to grant the Petition in part and to deny the Petition in part. The reasons for this decision are explained in the "Director Decision Pursuant to 10 CFR 2.206," (DD–92–05) which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room for the South Texas Project, Units 1 and 2, located at the Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488. A copy of the decision will be filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206(c) of the Commission's regulations. As provided by this regulation, the Decision will constitute the final action of the Commission 25 days after the date of issuance of the Decision unless the Commission on its own motion institutes a review of the decision within that time.

Dated at Rockville, Maryland, this 5th day of October 1992.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

Power Authority of the State of New York

[Docket No. 50–286]

Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of the Power Authority of the State of New York (the licensee) to withdraw its June 18, 1990, application for proposed amendment to Facility Operating License No. DPR–64 for Indian Point Nuclear Generating Unit No. 3, located in Westchester County, New York.

The proposed amendment would have revised the facility technical specifications pertaining to containment air lock limiting conditions for operation and surveillance requirements.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on July 25, 1990 (55 FR 30309). However, by letter dated October 1, 1992, the licensee withdrew and proposed amendment.

For further details with respect to this action, see the application for amendment dated June 18, 1990, and the licensee's letter dated October 1, 1992, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Dated at Rockville, Maryland, this 5th day of October 1992.

For the Nuclear Regulatory Commission.

Nicola F. Conicella,

Project Manager Project Directorate I–I, Division of Reactor Projects—I/II Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-31289; International Series Release No. 467; File No. SR-NASD-92-27]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Issuer Notification Requirements and Fees For the Issuance of Additional Shares or the Certain Stock Plans.

October 5, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s9)(1), notice is hereby given that on June 17, 1992, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD.[1] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Below is the text of the proposed rule change. Proposed new language is italicized; proposed deletions are in brackets.

Schedule D to the NASD By-Laws; Part II—Qualification Requirements for NASDAQ Securities

Sec. 1 Qualification Requirements for Domestic and Canadian Securities

* * * * *

(c) * * *

(15) The issuer shall be required to file on a form designated by the Association notification of the creation of a stock option, stock purchase or similar plan or arrangement to issue additional shares or the issuance of additional shares of any class of securities included in the NASDAQ System no later than 15 calendar days prior to the creation of the plan, arrangement or issuance.

(16) The issuer of any class of securities included in the NASDAQ System shall notify the Association promptly in writing of any change in the issuer's transfer agent or registrar.

Subsections (15)–(17) are renumbered (17)–(19) repectively.

* * * * *

Sec. 2 Qualification Requirements for non-Canadian Foreign Securities and American Depositary Receipts

* * * * *

(e) * * *

(14) The issuer shall be required to file on a form designated by the Association notification of the creation of a stock option, stock purchase or similar plan or arrangement to issue additional shares or the issuance of additional shares of any class of securities include in the NASDAQ System, except for American Depositary Receipts, no later than 15 calendar days prior to the date of creation of the plan, arrangement or issuance.

(15) The issuer of any class of securities included in the NASDAQ System, except for American Depositary Receipts, shall notify the Association promptly in writing of any change in the issuer's transfer agent of registrar.

Subsections (14)–(16) are renumbered (16) to (18) respectively.

* * * * *

Part IV—Listing Fees; The NASDAQ Stock Market-National Market System

* * * * *

B. Additional Shares

1. The issuer of each class of security, other than American Depository Receipts, which is listed in the National Market System shall pay to the Corporation the fee set forth in paragraph 2. below in connection with the issuance or additional shares of each class of listed security set forth in paragraph 3. below.

2. The fee in connection with additional shares shall be $2,000 or $.02 per additional share, whichever is higher, up to a maximum of $17,500 per issuer.

3. The fee in connection with additional shares is applicable to the following issuances of securities:

a. Acquisitions, mergers or consolidations;

b. Public offerings;

c. Rights and subscription offerings;

d. Exchange offers; and

e. Private placements.

4. Payment of the fee to the Association shall be included with the issuer notification to the Association of the issuance of additional shares of securities as required under provisions of Sections 1(c)(15) and 2(e)(14) of Part II to Schedule D of the NASD By-Laws.

[B]*C* Annual Fee-Domestic and Foreign Issues

* * * * *

[C]*D* Annual Fee-American Depositary Receipts (ADRs)

* * * * *

Regular NASDAQ System

[D]*E.* Entry Fee

* * * * *

F. Additional Shares

1. The issuer of each class of security other than American Depositary Receipts which is listed in the Regular NASDAQ System shall pay to the Corporation the fee set forth in paragraph 2. below in connection with the issuance of additional shares of each class of listed security set forth in paragraph 3. below.

2. The fee in connection with additional shares shall be $1,000 or $.01 per additional share, whichever is higher, up to a maximum of $7,500 per issuer.

3. The fee in connection with additional shares is applicable to the following issuances of securities:

a. Acquisitions, mergers or consolidations;

b. Public offerings;

c. Rights and subscription offerings;

d. Exchange offers; and

e. Private placements.

4. Payment of the fee to the Association shall be included with the issuer notification to the Association of the issuance of additional shares of securities as required under provisions of Sections 1(c)(15) and 2(e)(14) of Part II to Schedule D of the NASD By-Laws.

Subsections E–G are renumbered G–I respectively.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

---

[1] On August 6, 1992, the NASD submitted a letter to the Commission which provides further clarification regarding the basis for the fee on the issuance of additional shares in the NASDAQ system as proposed in the additional shares in the NASDAQ system as proposed in the instant proposed rule change. Letter dated August 6, 1992, from Suzanne E. Rothwell, Associate General Counsel, NASD to Katherine A. England, Branch Chief, SEC. The contents of that letter are reflected in this notice.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The NASD currently does not require an issuer included in either the Regular Nasdaq System ("Nasdaq") or the Nasdaq National Market System ("Nasdaq/NMS") to file with the Association notification of the issuance of additional shares of securities included in the Nasdaq System or notification of creation of stock plans, stock purchase plans or other remuneration plans under which securities in the Nasdaq System will be issued. Upon review, the NASD believes that notification of such security-related activities would supply the NASD with relevant information regarding Nasdaq issuers and the purpose for which the securities are being issued. The NASD, specifically, believes that issuers [2] of securities included in Nasdaq or Nasdaq/NMS should be required to provide a detailed notification [3] to the NASD when additional included securities are issued. The NASD, therefore, proposes that domestic and foreign issuers of securities included in Nasdaq or Nasdaq/NMS, except for issuers having such securities held in American Depository Receipts ("ADRs"),[4] be required to file on a NASD designated form, notification regarding the issuance of additional shares of any class of securities included in the Nasdaq System no later than 15 calendar days prior to such issuance.[5] Issuances of additional securities would include securities issued in connection with dividends, stock splits, rights and exchange offers, public and private offers, acquisitions, mergers or consolidations. Issuances of additional shares would not include securities *issued under* a stock option, stock purchase or other similar plan or arrangement.

The NASD believes, however, that issuers of securities included in Nasdaq or Nasdaq/NMS should be required to provided a detailed notification to the NASD upon the *creation* of stock option, stock purchase or similar plans or arrangements. The NASD believes such plans have the potential for impacting the market of such issuers in the Nasdaq System. This notification will further facilitate NASD oversight of the Nasdaq/NMS criteria for shareholder approval of certain remuneration plans under Section 5(i) of Part III to Schedule D. In the case of such plans, the NASD believes only notification of creation of the plan would be necessary for oversight purposes and not actual notification of the periodic issuance of stock under the plan. The NASD, therefore, proposes that domestic and foreign issuers of securities included in Nasdaq or Nasdaq/NMS, except for issuers having such securities held in ADRs, be required to file on a NASD designated form notification regarding the creation of a stock option, stock purchase or similar plan or arrangement in connection with any class of securities included in the Nasdaq System no later than 15 calendar days prior to creation of such plan.

Notification of Change in Transfer Agent or Registrar

The NASD currently does not require an issuer in the Nasdaq System to notify the NASD when there is a change in the issuer's transfer agent or registrar. The NASD believes prompt receipt of such information is relevant to the NASD's oversight of the Nasdaq System. It is, therefore, proposed that foreign and domestic issuers of securities included in Nasdaq or Nasdaq/NMS, except for issuers of securities held in ADRs, notify the NASD promptly in writing of any change in the issuer's transfer agent or registrar. The exception for ADRs is proposed because notifications to U.S. holders of ADRs are provided by the U.S. depository bank that created the ADR and not the registrar or transfer agent of the foreign issuer.

Fee for Additional Issuances

The NASD is also proposing to impose a fee on Nasdaq and Nasdaq/NMS issuers to be paid when such issuers notify the NASD of the issuance of an additional amount of an already included security in connection with the following transaction: (a) Acquisitions, mergers or consolidations; (b) public offerings; (c) rights and subscription offerings; (d) exchange offers; and (e) private placements.[6] Under the proposed rule change, the issuance of additional share of an already included security in connection with a transaction that is not listed above would not have a fee for additional shares imposed. For example, the issuance of additional shares in connection with a stock option, dividend reinvestment plan, stock split or stock dividend would not result in a fee under the proposed rule change. Moreover, no fee is proposed in connection with the establishment of a stock option, stock purchase or similar plan.

The NASD is proposing a separate fee schedule for Nasdaq and Nasdaq/NMS issuers that the NASD believes reflects the different level of service and exposure provided to such respective issuers in the Nasdaq System. For securities designated on Nasdaq, it is proposed that issuances or plans to issue additional securities under the specific circumstances set forth above be subject to a fee of $1,000 or $ .01 per additional share, whichever is higher, up to a maximum of $7,500 per issuer. For securities included in Nasdaq/NMS, it is proposed that issuances or plans to issue additional securities be subject to a fee of $2,000 or $.02 per additional share, whichever is higher, up to a maximum of $17,500 per issuer.[7]

The fees obtained from the proposed rule change are intended to fund additional issuer-related operations that

---

[2] The term issuer for purposes of Schedule D of the NASD By-Laws and the proposed rule change includes both corporations and partnerships.

[3] In contrast to the application and approval procedures required by the New York Stock Exchange ("NYSE") and the American Stock Exchange ("AMEX") for issuance of additional securities, the NASD proposes to require issuers only to submit notification to the NASD of the issuance of additional shares. *See* Section 703.00, NYSE Manual and Sections 301–343 of Part 3 to the Listing Standards, Policies and Requirements of the AMEX Guide, Vol. 2. The NYSE and AMEX do not permit a listed company either to issue or to authorize the company's registrar or transfer agent to issue or register additional securities of a class listed on the exchange until the company has filed an application with the exchange. The application requirements of the NYSE and AMEX also apply to the creation of stock option, stock purchase and other remuneration plans involving listed securities.

[4] The NASD proposes to exempt foreign issuers having securities held in ADRs traded on the Nasdaq System because an increase or decrease of shares in an ADR normally reflects U.S. investor demand for such securities and may not reflect an increase or decrease of outstanding shares of the foreign issuer.

[5] Rule 10b–17 of the Act requires certain issuers to provide notification to the NASD in connection with: a dividend or other distribution in cash or in kind; a stock split or reverse split; or a rights or subscription offering. To avoid duplicate reporting to the NASD for issuers in the Nasdaq System who are commencing stock splits, rights offers, subscription offers, or a dividend or other distribution involving the issuance of additional shares, the NASD designated notification form would include the information required to be submitted to the NASD pursuant to Rule 10b–17. Following the approval of the proposed rule change, the NASD will inform issuers in the Nasdaq System by means of an NASD "Notice to Issuers" that compliance with the proposed rule change's notification requirements for purposes of a stock split, a rights offer, a subscription offer, or a dividend or other distribution involving the issuance of additional shares, will also satisfy Rule 10b–17's notification requirements to the NASD.

[6] The NYSE and the AMEX currently impose a fee when listed companies file an application to issue an additional amount of an already listed security. *See* Section 902.02b. of the NYSE Listed Company Manual and Section 142 to Part 3 of the Listing Standards, Policies and Requirements of the AMEX Guide, Vol. 2.

[7] The fee schedule for Nasdaq/NMS is equivalent to the AMEX fee schedule under Section 142 to Part 3 of the Listing Standards, Policies and Requirements of the AMEX Guide, Vol. 2.

include educational initiatives, issuer service initiatives, and NASD surveillance measures currently being created, or improved, which the NASD believes will enhance the quality of the Nasdaq System for issuers and improve the capital raising-capabilities for such issuers.

It is intended that the revenues obtained from the proposed fee will permit ongoing educational programs for different constituencies of the Nasdaq System that will increase interest in Nasdaq securities and further enhance the capital raising capabilities of Nasdaq/NMS and Nasdaq issuers. Specifically, educational programs are planned for registered representatives of NASD members to increase their knowledge of the market structure of the Nasdaq System. Training programs are also planned for the entry level personnel of NASD members to increase their knowledge of the NASD and the Nasdaq System by focusing on issues such as NASD market surveillance procedures, Nasdaq trading practices, and the qualifications criteria for companies in the Nasdaq System. Also planned is the development of educational programs for international investors regarding the qualification requirements of the Nasdaq System. In addition, the revenues obtained from the proposed fee will supplement current advertising to make the public more aware of the opportunities of investing in the stock of Nasdaq companies.

Revenues obtained from the proposed fee also will be used to enhance the ability of the Nasdaq System to educate individual companies on market-related issues whenever such individual corporate inquires arise. Specifically, a program is planned to increase the expertise of the Nasdaq representatives whose duty it is to help designated Nasdaq/NMS and Nasdaq issuers on a day-to-day basis with inquiries regarding the Nasdaq System, the securities markets, and questions of capital formation. It is also anticipated that the revenues obtained from the proposed fee will be used for the development and maintenance of experimental issuer information services including: (i) A system that would permit certain issuers to access current and historical trading data of the company via a personal computer, and to set-up and track the company's stock in comparison to the stock of peer companies; (ii) a surveillance system that would monitor trading in certain stocks pursuant to parameters set by the issuer and provide a next-day report to those companies; and (iii) a system that would provide certain issuers with quarterly and annual customized records of the company's stock trading activity. Revenues from the proposed fee are also intended to support further automation and streamlining of the Nasdaq/NMS and Nasdaq issuer application procedures, and for further automation of the work-flow process and analysis of maintenance qualifications. In particular, it is intended that monitoring and reviewing the issuances of additional shares of Nasdaq/NMS issuers will be enhanced to ensure compliance with Nasdaq/NMS corporate governance requirements imposed pursuant to Part III, Section 5 of Schedule D to the NASD By-Laws.

It is anticipated that revenues from the proposed fee will also support further development and ongoing implementation of NASD Market Surveillance procedures including the implementation of an incident tracking surveillance system, enhancements to the StockWatch automated tracking system ("SWAT"), procurement of additional commercially available surveillance data to better monitor issuer price and volume movement, the development of a surveillance system for the proposed high-yield fixed-income pricing system, enforcement of Rule 10b–6 in accordance with the NASD's passive market-making proposal, and enforcement of the proposed NASD short-sale rule.

Waiver of Fees for Issuances Pending on Effective Date of The Rule Change

The NASD recognizes that the board directors of some issuers in the Nasdaq System may have approved the issuance of additional shares without notice of the proposed fee herein and that the approved issuance may be pending on the effective date of the proposed rule change. To ensure that all Nasdaq insurers have adequate notice of the proposed fee prior to action by its board of directors, the NASD will waive the proposed fee for the issuance of additional shares if the company's board approved the issuance prior to the effective date of the proposed rule change.

The NASD believes that the proposed rule change is consistent with the provisions of section 15A(b)(6) of the Act, which requires the rules of a national securities association be designed to "promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing and setting, processing information with respect to, and facilitating transaction in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest" in that notification of additional issuances of securities will provide the NASD with greater oversight of such securities and such monitoring should further perfect the Nasdaq System and provide better protection to investors and the public interest. The NASD believes the proposed rule change is consistent with the provisions of section 15A(b)(5) of the Act, which requires that the rules of a national securities association "provide for the equitable allocation of reasonable dues, fee and other charges among members and issuers and other persons using any facility or system which the association operates or controls" in that the proposed rule will allow the NASD to fund additional issuer-related operations that include educational initiatives, issuer service initiatives, and NASD surveillance measures currently being created, or improved, which the NASD believes will enhance the quality of the Nasdaq System for issuers and improve the capital raising-capabilities for such issuers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the proposed rule change will result in any burden on competition that is not necessary of appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceeding to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing.

Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and coping at the principal office of the NASD. All submissions should refer to the file number in the caption above and be submitted by November 3, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3 (a) (12).

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-18997; 811-6141]

Mexico Capital Growth Fund, Inc., Application for Deregistration

October 5, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company act of 1940 (the "ACT").

APPLICANT: Mexico Capital Growth Fund, Inc.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application on Form N-8F was filed on September 28, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 30, 1992 and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicant, Tower 49, 12 East 49th Street, New York, New York 10017.

FOR FURTHER INFORMATION CONTACT: Nicholas D. Thomas, Staff Attorney, at (202) 504-2263, or Elizabeth G. Osterman, Branch Chief, at (202) 272-3016 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is a Maryland corporation and a close-end, non-diversified management investment company registered under the Act. SEC records indicate that on July 23, 1990, applicant filed a notification of registration on Form N-8A pursuant to section 8(a) of the Act. On the same date, applicant filed a registration statement on Form N-2 under the Securities Act of 1933. The registration statement never became effective, and applicant never made a public offering of its shares.

2. Applicant has never had any securityholders, assets, nor liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not now engaged in, nor does it presently intend to engage in, any business activities other than those necessary for the winding up of its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

Issuer Delisting; Application To Withdraw From Listing and Registration; (The Money Store, Inc., Common Stock, No Par Value) File No. 1-10785

October 6, 1992.

The Money Store, Inc. ("Company") has filed an application with the Securities and Exchange Commission) "Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

According to the Company, its Board of Directors (the "Board") unanimously approved resolutions on September 10, 1992, to withdraw the Company's Common Stock from listing on the American Stock Exchange ("Amex") and, instead, list such Common Stock on the National Association of Securities Dealers Automated Quotations/ National Market Systems ("NASDAQ/ NMS"). According to the Company, the decision of the Board followed a lengthy study of the matter, and was based upon the belief that listing of the Common Stock on NASDAQ/NMS will be more beneficial to its stockholders than the present listing on the Amex because:

(1) The Company believes that the NASDAQ/NMS system of competing market-makers will result in increased visibility and sponsorship for the Common Stock than is presently the case with the single specialist assigned to the stock on the Amex;

(2) The Company believes that the NASDAQ/NMS will offer the Company's stockholders more liquidity than that presently available on the Amex and less volatility in quoted prices per share when trading volume is slight. On NASDAQ/NMS the Company will have an opportunity to secure its own group of market-makers and, in doing so, expand the capital base available for trading in its Common Stock; and

(3) The Company believes that firms making a market in the Company's Common Stock will be inclined to issue research reports concerning the Company, thereby increasing the number of firms providing institutional research and advisory reports.

Any interested person may, on or before October 28, 1992 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 92-24722 Filed 10-9-92; 8:45 am]

BILLING CODE 8010-01-M

Issuer Delisting; Notice of Application To Withdraw from Listing and Registration; (Pall Corporation, Common Stock, $0.25 Par Value; Common Share Purchase Rights) File No. 1-4311

October 6, 1992.

Pall Corporation ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified securities from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing these securities from listing and registration include the following:

According to the Company, in addition to being listed on the Amex, its common stock is listed on the New York Stock Exchange, Inc. ("NYSE"). The Company's common stock commenced trading on the NYSE at the opening of business on October 5, 1992 and concurrently therewith such stock was suspended from trading on the Amex.

In making the decision to withdraw its Common Stock and Rights from listing on the Amex, the Company considered the direct and indirect costs and expenses attendant on maintaining the dual listing of its Common Stock and Rights on the NYSE and on the Amex. The Company does not see any particular advantage in the dual trading of the Common Stock and believes that dual listing would fragment the market for the Common Stock.

Any interested person may, on or before October 28, 1992 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

Office of the Historian; Advisory Committee on Historical Diplomatic Documentation; Meeting

[Public Notice 1708]

The Advisory Committee on Historical Diplomatic Documentation will meet November 5-6, 1992, at 9:30 a.m. in the Department of State.

The Committee will meet in open session from 9:30 a.m. on the morning of Thursday, November 5, 1992, until noon of that day, in room 1205, Main State. The remainder of the Committee's sessions, until the end of this session on Friday, November 6, at 4 p.m., will be closed to the public in accordance with section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463). It has been determined that discussions during these portions of the meeting will involve consideration of matters not subject to public disclosure under 5 U.S.C. 552b(c)(1), and that the public interest requires that such activities will be withheld from disclosure.

Questions concerning the meeting should be directed to William Z. Slany, Executive Secretary, Advisory Committee on Historical Diplomatic Documentation, Department of State, Office of Historian, Washington, DC, 20520, telephone (202) 663-1123.

Dated: October 1, 1992.

William Z. Slany,

Executive Secretary.

BILLING CODE 4910-62-M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended October 2, 1992

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 48374.
Date filed: September 28, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 26, 1992.
Description: Application of Family Airlines, Inc., pursuant to section 401(d)(1) of the Act and subpart Q of the act, applies for a certificate of public convenience and necessity authorizing it to engage in interstate and overseas scheduled air transportation of persons, property and mail.

Docket Number: 48378.
Date filed: October 1, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 29, 1992.
Description: Application of American Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, applies for amendment of its certificate of public convenience and necessity for Route 470 so as to add a new segment authorizing foreign air transportation of persons, property, and mail between the terminal point San Jose, California, and the terminal point Vancouver, British Columbia, Canada.

Docket Number: 48381.
Date filed: October 2, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 30, 1992.
Description: Application of Capital Air Express, pursuant to section 401(d)(3), of the Act and subpart Q of the Regulations requests a certificate of public convenience and necessity authorizing interstate, overseas, and foreign charter air transportation.

Docket Number: 47023.
Date filed: September 30, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 28, 1992.
Description: Application of Federal Express Corporation, pursuant to section 401 of the Act and subpart Q of the Regulations, for renewal of its existing certificate authority and frequency allocation to provide foreign air transportation of property and mail between New York, N.Y., on the one hand, and Moscow, Russia, on the other hand, as contained in Segment 4 of Federal Express' certificate of public concenience and necessity for Route 119.

Docket Number: 47730.
Date filed: September 28, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 26, 1991.
Description: Amendment No. 1 to the Application of South African Airways, pursuant to section 402 of the Act and subpart Q of the Regulations for a foreign air carrier permit seeking Third and Fourth Freedom authority to engage in regularly scheduled service and charter foreign air transportation of persons, property (i.e., baggage and cargo) and mail between any point or points in South Africa, its territories and possessions, and any point or points in the United States, its territories and possessions.

Docket Number: 48113.
Date filed: September 30, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 28, 1992.
Description: Amendment No. 1 to the Application of Dash Airlines, Inc., pursuant to section 401(d)(1) of the Act and subpart Q of the Regulations, for a certificate of public convenience and necessity to engage in scheduled foreign air transportation of persons, property, and mail from Miami, Florida to Grand Turk and Providenciales, Turks and Caicos Islands with onward service to Nassau, Bahamas Islands. (Supplemental Information).

Docket Number: 48114.
Date filed: September 30, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 28, 1992.
Description: Amendment No. 1 to the Application of Dash Airlines, Inc., pursuant to section 401(d)(1) of the Act and subpart Q of the Regulations, requests a certificate of public convenience and necessity authorizing it to engage in scheduled interstate air transportation. (Supplemental Information).

BILLING CODE 4910-62-M

Federal Aviation Administration

Approval of Noise Compatibility Program Ohio State University Airport, Columbus, OH

AGENCY: Federal Aviation Administration. DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by The Ohio State University under the provisions of title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96-52 (1980). On March 2, 1992, the FAA determined that the noise exposure maps submitted by The Ohio State University under part 150 were in compliance with applicable requirements. On August 24, 1992, the Assistant Administrator for Airports approved the Ohio State University Airport noise compatibility program.

A total of three (3) measures were included in the Ohio State University recommended program. Of the three (3) measures one (1) is listed as a Noise Control Measure, one (1) is listed as a Land Use Management Measure and One (1) is listed as a Program Management Measure. The FAA has approved all three (3) of the measures.

EFFECTIVE DATE: The effective date of the FAA's approval of the Ohio State University Airport noise compatibility program is August 24, 1992.

FOR FURTHER INFORMATION CONTACT: Robert H. Allen, Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, Michigan 48111, (313) 487-7296. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for Ohio State University Airport, effective August 24, 1992.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979

(hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in part 150 and the Act, and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government: and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noises compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Detroit Airports District Office in Belleville, Michigan.

The Ohio State University submitted to the FAA on July 2, 1990, noise exposure maps, descriptions and other documentation. This documentation was produced during the Airport Noise Compatibility Planning (Part 150) Study at Ohio State University Airport from August 1987 through July 1990. The Ohio State University Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on March 2, 1992. Notice of this determination was published in the Federal Register on March 25, 1992.

The Ohio State University Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 1994. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on March 2, 1992, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period would have been deemed to be an approval of such program.

The submitted program proposed by the airport sponsor contained three (3) measures for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The overall program, therefore, was approved by the Assistant Administrator for Airports effective August 24, 1992.

One (1) of the three measures submitted is listed as a "Noise Control Measure". The one noise control measure was approved which deals with development of an informal procedure to be implemented as a voluntary noise abatement measure. One of the three measures submitted is listed as a "Land Use Management Measure", which was approved. This measure includes sound attenuation and/or easement purchase for residential homes. One of the three measures submitted is listed as a "Program Management Measure" which was approved outright. This measure includes updating plan as necessary. These three determinations are set forth in detail in a Record of Approval endorsed by the Assistant Administrator for Airports on August 24, 1992. The Record of Approval, as well as other evaluation materials and documents which comprised the submittal to FAA are available for review at the following locations:

Federal Aviation Administration, 800 Independence Avenue, SW., room 617, Washington, DC 20591.

Federal Aviation Administration, Great Lakes Region, 2300 East Devon Avenue, room 261, Des Plaines, Illinois 60018.

Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, Michigan 48111.

Ohio State University, Administration Building, 2160 West Case Road, Columbus, Ohio 43235.

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Belleville, Michigan, September 25, 1992.

Dean C. Nitz,

Acting Manager, Detroit Airports District Office, Great Lakes Region.

[FR Doc. 92-24770 Filed 10-9-92; 8:45 am]

BILLING CODE 4910-13-M

Intent to Prepare an Environmental Impact Statement and 4(f) Statement for an Airport Surveillance Radar Model 9 (ASR-9) Facility for Washington National Airport, Washington, DC and Conduct Scoping

AGENCY: Department of Transportation, Federal Aviation Administration.

ACTION: Notice of intent to prepare an Environmental Impact Statement (EIS) and 4(f) Statement, and conduct public scoping.

SUMMARY: The Federal Aviation Administration (FAA) is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will be prepared to assess the potential effects of constructing and operating an Airport Surveillance Radar Model 9 (ASR-9) facility at either a site within Ward 8 of the District of Columbia or at Washington National Airport, Arlington County, Virginia. The purpose of this facility is to improve existing radar

coverage provided to air traffic control servicing Washington National Airport and the airspace over Washington, DC. To ensure that all significant issues related to the proposed action are identified, the FAA will conduct a public scoping meeting.

ADDRESSES: Comments may be mailed or delivered to the FAA at the following address: Federal Aviation Administration, Mr. Charles Hoch (AEA–400), Manager, Airway Facilities Division, Fitzgerald Federal Building, John F. Kennedy International Airport, Jamaica, New York, 11430.

FOR FURTHER INFORMATION CONTACT: Federal Aviation Administration, Mr. Mike Lanz, AEA–451.1, (718) 553–1198 or Mr. Thomas J. Schrope, Louis Berger & Associates, Inc. (202) 331–7775.

SUPPLEMENTARY INFORMATION: The FAA will prepare an EIS on constructing and operating an ASR–9 facility for Washington National Airport and the airspace over Washington, DC. Preliminary environmental documentation, including a site selection report and draft Environmental Assessment (EA), will be used as the basis for the Draft EIS. These documents presented preliminary analyses of potential alternative sites for the ASR–9 facility and the no action alternative. Several sites within Ward 8 of the District of Columbia, a site adjacent to the existing radar facility at Washington National Airport, Arlington County, Virginia, and the no action alternative will be evaluated in the EIS. Under the no action alternative the FAA would not proceed with the proposed construction and operation of the ASR–9 facility, and would continue to operate the existing ASR–7 radar facility located at Washington National Airport. The environmental review of the project will be conducted in accordance with the requirements of the National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4371, et seq), Council on Environmental Quality (CEQ) regulations (40 CFR parts 1500–1508), the Department of Transportation (DOT) Act of 1966, DOT/FAA Orders, and all applicable Federal regulations and District of Columbia ordinances.

Public Scoping Meeting

The FAA solicits public comments for consideration and possible incorporation in the Draft EIS through a public scoping meeting on the proposed action. To ensure the full range of issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Interested parties are invited to attend a public scoping meeting that will be conducted at 6:30 p.m. on October 20, 1992 in the Basement Meeting Room, Washington Highlands Library, 115 Atlantic Street, SW, Washington, DC. Written comments will be accepted until November 3, 1992.

Dated: October 2, 1992.

Charles Hoch,

Manager, Airway Facilities Division.

[FR Doc. 92–24771 Filed 10–9–92; 8:45 am]

BILLING CODE 4910–13–M

Executive Committee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Executive Committee of the Federal Aviation Administration Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on November 24, 1992, at 9 a.m. Arrange for oral presentations by November 13, 1992.

ADDRESSES: The meeting will be held at the Hyatt Regency Washington (on Capitol Hill), 400 New Jersey Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Miss Jean Casciano, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–9683.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II), notice is hereby given of a meeting of the Executive Committee to be held on November 24, 1992, at the Hyatt Regency Washington (on Capitol Hill), 400 New Jersey Avenue, NW., Washington, DC. The agenda will include:

- A discussion of proposed revisions to the committee charter.
- A discussion of the criteria applied by the FAA for assigning a task to a subcommittee.
- A discussion of economic and legal support for the subcommittees and working groups.
- A briefing on the products the FAA expects to receive from the subcommittees.
- Status reports from the chairs of the subcommittees.

Attendance is open to the interested public, but will be limited to the space available. The public must make arrangements by November 13, 1992, to present oral statements at the meeting. The public may present written statements to the executive committee at any time by providing 15 copies to the Executive Director, or by bringing the copies to him at the meeting. Arrangement may be made by contacting the person listed under the heading "**FOR FURTHER INFORMATION CONTACT:**."

Issued in Washington, DC, on October 2, 1992.

Chris A. Christie,

Executive Director, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910–S–M

National Highway Traffic Safety Administration

[Docket No. 92–26; Notice 2]

Determination that Nonconforming 1989 Bentley Turbo R Passenger Cars are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of determination by NHTSA that nonconforming 1989 Bentley Turbo R passenger cars are eligible for importation.

SUMMARY: This notice announces the determination by NHTSA that 1989 Bentley Turbo R passenger cars not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States because they are substantially similar to a vehicle originally manufactured for importation into and sale in the United States and certified by its manufacturer as complying with the safety standards, and they are capable of being readily modified to conform to the standards.

DATES: The determination is effective October 13, 1992.

FOR FURTHER INFORMATION CONTACT: Ted Bayler, Office of Vehicle Safety Compliance, NHTSA (202–366–5306).

SUPPLEMENTARY INFORMATION:

Background

Under section 108(c)(3)(A)(i) of the National Traffic and Motor Vehicle Safety Act (the Act), 15 U.S.C. 1397(c)(3)(A)(i), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States on and after January 31, 1990, unless NHTSA has determined that

(I) the motor vehicle * * * is substantially similar to a motor vehicle originally

manufactured for importation into and sale in the United States, certified under section 114 [of the Act], and of the same model year * * * as the model of the motor vehicle to be compared, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards * * *.

Petitions for eligibility determinations may be submitted by manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. After it receives a petition, NHTSA publishes notice in the **Federal Register** to solicit comments from interested members of the public. Following close of the comment period, NHTSA reviews the petition and comments, and publishes its determination in the **Federal Register.**

Liphardt & Associates, Inc., of Ronkonkoma, New York (Registered Importer No. R–90–004), petitioned NHTSA for a determination that 1989 Bentley Turbo R passenger cars are eligible for importation into the United States. NHTSA published notice of the petition on June 5, 1992, to afford an opportunity for public comment (57 FR 24079).

As stated in that notice, the vehicle that Liphardt claimed to be substantially similar is the version of the 1989 Bentley Turbo R that Rolls-Royce Motors offered for sale in the United States and certified as conforming to all applicable Federal motor vehicle safety standards. The petitioner alleged that it had carefully compared the two vehicles, and found them to be substantially similar with respect to most applicable Federal motor vehicle safety standards.

Specifically, the petitioner claimed that the non-U.S. certified 1989 Bentley Turbo R is identical to its U.S. certified counterpart with respect to compliance with Standards Nos. 102 *Transmission Shift Lever Sequence* * * *, 103 *Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 105 *Hydraulic Brake Systems*, 106 *Brake Hoses*, 107 *Reflecting Surfaces*, 109 *New Pneumatic Tires*, 111 *Rearview Mirrors*, 113 *Hood Latch Systems*, 116 *Brake Fluids*, 124 *Accelerator Control Systems*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 203 *Impact Protection for the Driver From the Steering Control System*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 209 *Seat Belt Assemblies*, 210 *Seat Belt Assembly Anchorages*, 211 *Wheel Nuts, Wheel Discs and Hubcaps*, 212 *Windshield Retention*, 214 *Side Door Strength*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, 301 *Fuel System Integrity*, and 302 *Flammability of Interior Materials.*

The petitioner also contended that the vehicle was capable of being readily modified to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* Substitution of a lens marked "Brake" for a lens with an ECE symbol on the brake failure indicator lamp.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* (a) Installation of U.S.-model headlamp assemblies which incorporated sealed beam headlamps and front sidemarkers; (b) installation of U.S.-model taillamp assemblies which incorporate rear sidemarkers; (c) installation of a high mounted stop lamp.

Standard No. 110 *Tire Selection and Rims*: Installation of a tire information placard.

Standard No. 114 *Theft Protection*: Installation of a buzzer relay in the steering lock electrical circuit, and a warning buzzer.

Standard No. 115 *Vehicle Identification Number*: Installation of a VIN plate that can be read from outside the left windshield pillar, and a VIN reference label on the edge of the door or latch post nearest the driver.

Standard No. 118 *Power-Operated Window Systems*: Rewiring of the power window system so that the window transport is inoperative when the ignition is switched off.

Standard No. 208 *Occupant Crash Protection*: Installation of an ignition switch-actuated seat belt warning buzzer.

Additionally, the petitioner stated that the energy absorbers on the front bumper of the 1989 Bentley Turbo R had to be replaced to comply with the Bumper Standard found in 49 CFR part 581.

One comment was received in response to the notice of the petition, from Rolls-Royce Motor Cars Inc. ("Rolls-Royce"), the United States importer of new Rolls-Royce and Bentley motor cars manufactured by Rolls-Royce Motor Cars Ltd. In its comment, Rolls-Royce stated that it is opposed to the importation of the 1989 Bentley Turbo R "or any similar vehicle not originally manufactured to conform to all applicable Federal motor vehicle safety standards." It contended that the vehicle meets neither of the criteria for import eligibility specified in section 108(c)(3)(A)(i) of the Act, 15 U.S.C. 1397(c)(3)A)(i), and that it should therefore be refused admission into the United States.

Specifically, Rolls-Royce stated that the testing that confirmed that the U.S. certified version of the 1989 Bentley Turbo complied with applicable occupant safety standards was performed on a left-hand drive vehicle, as opposed to the right-hand drive vehicle that it contends is the subject of the petition. Additionally, Rolls-Royce contended that its records, and those of the vehicle's manufacturer, indicate that when the non-U.S. certified 1989 Bentley Turbo R was manufactured, it did not comply with Standard Nos. 101, 108, 110, 111, 114, 115, 118, 208, and 209, nor did it comply with the Bumper Standard found in 49 CFR part 581. Without specifying the nature of these purported noncompliances, Rolls-Royce claimed that "considerable work and expense would be required" to bring the vehicle into compliance with the standards it identified.

NHTSA has reviewed each of the issues that Rolls-Royce has raised regarding the petition. The petition specified the modifications that are necessary to bring a non-U.S. certified 1989 Bentley Turbo R into compliance with all standards specified by Rolls-Royce, with the exception of Standard Nos. 111 and 209. As they have been performed with relative ease on thousands of vehicles imported over the years, none of the modifications described in the petition would preclude NHTSA from determining that the 1989 Bentley Turbo R is eligible for importation. With respect to Standard No. 111, NHTSA's review of compliance data for other Rolls-Royce vehicles revealed that they were all equipped with flat passenger side exterior mirrors that require no markings to comply with the standard. All Rolls-Royce vehicles for which compliance data was submitted were also equipped with seat belts that bore the requisite markings to indicate compliance with Standard No. 209. Although the petitioner did not identify the vehicle that it seeks to import as a right-hand drive model, it did furnish NHTSA with information revealing that there is no significant distinction in the parts equipped on the left or right-hand drive version of the 1989 Bentley Turbo R.

Vehicle Eligibility Number for Subject Vehicles

The importer of a vehicle admissible under any final determination must indicate on the Form HS–7 accompanying entry the appropriate vehicle eligibility number indicating that the vehicle is eligible for entry. VSP #16 is the vehicle eligibility number assigned to vehicles admissible under this notice of final determination.

Final Determination

Accordingly, on the basis of the foregoing, NHTSA hereby determines that a 1989 Bentley Turbo R that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards is substantially similar to a 1989 Bentley Turbo R that was originally manufactured for importation into and sale in the United States and certified under section 114 of the National Traffic and Motor Vehicle Safety Act, and that it is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

Authority: 15 U.S.C. 1397(c)(3)(A)(i)(I) and (C)(ii); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8

Issued on: October 6, 1992.

William A. Boehly,

Associate Administrator for Enforcement.

BILLING CODE 4910-59-M

[Docket No. 92-55; Notice 1]

Isis Imports Ltd.; Receipt of Petition for Temporary Exemption From Federal Motor Vehicle Standard No. 208

Isis Imports Ltd. of San Francisco, California, has petitioned for a temporary exemption from the automatic restraint requirements of Motor Vehicle Safety Standard No. 208 *Occupant Crash Protection*. The basis of the petition is that compliance would cause substantial economic hardship, and that the petitioner has, in good faith, attempted to meet the requirements of the standard.

This notice is published in accordance with statutory requirements (15 U.S.C. 1410(a)) to provide notice and an opportunity to comment, and does not represent any agency determination of the merits of the petition.

Petitioner was previously granted a 3-year exemption from paragraphs S4.1.2.1 and S4.1.2.2 of Standard No. 208, which expired October 1, 1992 (54 FR 43647).

The make and type of passenger car for which exemption is requested is the Morgan convertible. The British manufacturer of the Morgan has not offered its vehicle for sale in the United States since the early days of the Federal motor vehicle safety standards. In recent years, however, Isis has bought a small number of disassembled vehicles from Morgan, imported the parts, assembled the vehicles, and sold them in the United States. They differ from their British counterparts, not only in equipment items and modifications necessary for compliance with the Federal motor vehicle safety standards, but also in their engines, which are propane fueled. As the assembler of the vehicle, Isis certifies conformance to all applicable Federal motor vehicle safety, bumper, and theft prevention standards. The vehicle assembled by Isis in the U.S. is deemed sufficiently different from the one produced by Morgan in England that Isis may be regarded as its manufacturer, not its converter, even though the brand names are the same.

Isis assembled 11 Morgans for sale in the U.S. in the 12-month period preceding the filing of its petition. It asked for a further 3-year exemption from the automatic restraint requirements of Standard No. 208, during which time it would continue to provide protection through its current three-point lap-shoulder belt system. However, before the end of that time, it hopes to be able to offer an air bag system.

In arguing that compliance would cause it substantial economic hardship and that it had in good faith attempted to meet the requirements of the standard, Isis related its efforts to conform while the previous exemption was in effect. Initially, it had continued to pursue research on automatic belt systems, obtaining seat belt hardware and motor drive assemblies, and created a mock-up. However, both petitioner and Morgan's engineering staff concluded that this system was not feasible because, over time, the seat belt track would deform, rendering it unusable. Further, modelling of the path of belt travel over the legs of the driver and passenger indicated an unacceptable degree of contact between the belt and occupant legs. It also noted simultaneously a growing level of consumer resistance to the use of automatic belt systems. Consequently, in the Spring of 1991, it once again began to seek out air bag suppliers. The petition recounts in considerable detail the unsuccessful efforts of Isis to obtain air bag systems from Jaguar, Rover, Rolls-Royce and Lotus. The proposals that it received from Lotus and Breed to develop a vehicle-specific air bag system were prohibitive in cost.

However, two possible sources are awaiting development. The petitioner hopes to obtain eventual access to a system that Range Rover is developing for its vehicles. It has heard from the British Department of Transport that some retrofit components will be coming on the market over the next 2 years. Until these developments materialize, it will be unable to offer an air bag system, and will require an exemption.

The petitioner's net income in 1991 was $10,698. For the 4-year period 1988-91, it had a cumulative net loss of $4,414. The company states that it will have to cease business if its petition is denied. Sales of spare parts and service would be inadequate to fund development of an automatic restraint system without new car sales.

Petitioner argues that an exemption would be in the public interest and consistent with the objectives of The National Traffic and Motor Vehicle Safety Act because it would allow it to continue to support existing owners of Morgan cars (it has been the major supplier of Morgans in the U.S. since 1975, and supplies parts for older cars). An exemption would also allow it to contribute toward the diversity of vehicles for sale in the U.S. The small number of vehicles likely to be produced during the time that the exemption is in effect will not materially affect safety. Finally, the petitioner enclosed photographs showing the effect on a Morgan of a collision at an estimated closing speed of 90 mph, after which the Morgan's driver, restrained by the 3-point belt system, walked away from the accident with only a cracked rib caused by the seat belt crushing a ball point pen in his shirt pocket.

Interested persons are invited to submit comments on the petition. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the Federal Register pursuant to the authority indicated below.

Comment closing date: November 12, 1992.

Authority: 15 U.S.C. 1410; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on October 6, 1992.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

Research and Special Programs Administration

Office of Hazardous Materials Safety; Applications for Modification of Exemptions or Applications To Become a Party to an Exemption

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of Applications for Modification of Exemptions or Applications to Become a Party To an Exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Safety has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of the application have been shown in earlier **Federal Register** publications, they are not repeated here. Requests for modifications of exemptions (e.g., to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) are described in footnotes to the application number. Application numbers with the suffix "X" denote a modification request. Application numbers with the suffix "P" denote a party to request. These applications have been separated from the new applications for exemptions to facilitate processing.

DATES: Comments must be received on or before October 28, 1992.

ADDRESS COMMENTS TO: Dockets Unit, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the exemption number.

FOR FURTHER INFORMATION CONTACT: Copies of the applications are available for inspection in the Dockets Unit, room 8426, Nassif Building, 400 7th Street SW., Washington, DC.

Application No.	Applicant	Renewal of exemption
3121-X	U.S. Department of Defense, Falls Church, VA (See Footnote 1).	3121
6874-X	Degussa Corp., Ridgefield Park, NJ (See Footnote 2).	6874
9001-X	Chesterfield Cylinders Ltd., Chesterfield, Derbyshire, EN (See Footnote 3).	9001
10130-X	UF Strainrite, Lewiston, ME (See Footnote 4).	10130
10184-X	Praxair, Inc., Danbury, CT (See Footnote 5).	10814
10336-X	Morton International, Inc., Ogden, UT (See Footnote 6).	10336
10340-X	Schutz Container Systems, Inc., North Branch, NJ (See Footnote 7).	10340
10694-X	Polymet Alloys, Inc., Rima Electrometalurgia, S.A., Birmingham, AL (See Footnote 8).	10694
10870-X	Anderson Products, Inc., Chapel Hill, SC (See Footnote 9).	10870

[1] To renew and modify exemption to eliminate the operational emergency response plan requirement for nitrogen tetroxide for highway transportation routes.

[2] To modify exemption to increase the plywood thickness to 3/8 inch in the construction of non-DOT specification wooden boxes for use in transporting sodium cyanide, solid classed as Poison B.

[3] To amend exemption to allow a ten year retest of non-DOT specification cylinders for use in transporting flammable and nonflammable gases.

[4] To authorize specially reinforced, skid mounted non-reusable bulk bags containing various solid hazardous materials to be transported via privated or contract carriers without being shipped in full truckloads quantities.

[5] To modify exemption to provide for additional nonflammable, noncorrosive mixtures classed as nonflammable gases to be transported in DOT specification cylinders.

[6] To modify exemption to provide for 3½ gallon reusable plastic shipping container for use in transporting propellant explosives, solid, Class B.

[7] To modify the exemption to provide for a smaller polyethylene portable tank with a 169 gallon capacity to be used in transporting various material, flammable, combustible and corrosive liquids.

[8] To reinstate exemption originally issued on an emergency basis to authorize shipment of calcium silicon, Class 4.3 contained in a hermetically sealed steel sheath which is shrink wrapped and placed inside a metal cage.

[9] To reissue exemption originally issued on an emergency basis to authorize the transporation of ethylene oxide packaged in glass ampoules within a fiberboard box and to authorize cargo aircraft as an additional mode.

Application No.	Applicant	Parties to exemption
4884-p	Praxair, Inc., Danbury, CT.	4884
6614-p	B's Pool Supplies, Ontario, CA.	6614
7943-p	HASA of Arizona, Inc., Eloy, AZ.	7943
8074-p	GenEx, Ltd., Des Moines, IA.	8074
8426-p	Rich Sand Ethridge Co., San Ardo, CA.	8426
8451-p	Automotive Systems Laboratory, Inc., Farmington Hills, MI.	8451
8451-p	Accurate Arms Company, Inc., McEwen, TN.	8451
8451-p	Universal Propulsion Co., Phoenix, AZ.	8451
9108-p	Beta Chemicals, Inc., Cerritos, CA (See Footnote 1).	9108
9275-p	Scent Overnight, Inc., Port Washington, NY.	9275
9723-p	J.B. Hunt Special Commodities, Inc., Lowell, AR.	9723
10032-p	Ermetainer S.A., Geneve, France.	10032
10346-p	James River Corp., Camas, WA.	10346
10413-p	Occidental Chemical Corp., Dallas, TX (See Footnote 2).	10413
10709-p	Dowell Schlumberger, Inc., Tulsa, OK.	10709

[1] To authorize party status and provide for additional packaging consisting of 70 pounds of 25% water wetted PEDN, classified as initiating explosive, Class A explosive, 4 mil polyethene bag overpacked in 21C115 fiber drum.

[2] To reinstate exemption to authorize a one time shipment of approximately 148 non-DOT specificational drums containing sodium chlorate, solid, classified as an oxidizer.

This notice of receipt of applications for renewal of exemptions and for party to an exemption is published in accordance with part 107 of the Hazardous Materials Transportations Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on October 6, 1992.

J. Suzanne Hedgepeth,

Chief, Exemptions Branch, Office of Hazardous Materials Exemptions and Approvals.

BILLING CODE 4910-60-M

Office of Hazardous Materials Safety; Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of applicants for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Transportation has received the applications described herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

DATES: Comments must be received on or before November 12, 1992.

ADDRESS COMMENTS TO: Dockets Branch, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the exemption application number.

FOR FURTHER INFORMATION CONTACT: Copies of the applications are available for inspection in the Dockets Branch, room 8426, Nassif Building, 400 7th Street, SW, Washington, DC.

NEW EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10885-N	U.S. Department of Energy, Washington, DC.	49 CFR 172.101 Col. 9(b), 172.204(c)(3), 173.27(b)(2)+(3), 179.27(f) Table 2, 175.30(a)(1).	To authorize the transportation of Class A, B and C explosives which are forbidden or exceed the quantity limitations authorized for shipment by air. (Mode 4.)
10887-N	National Aeronautics and Space Administration, Washington, DC.	49 CFR 173.245	To authorize the transportation of dinitrogen tetroxide liquid, classed as poison gas, inhalation hazardous zone A; oxidizers and other liquid hazardous materials in non-DOT specification portable tanks comparable to the DOT-51 portable tank specification. (Mode 1.)
10888-N	The Clorox Co., Forest Park, GA	49 CFR 174.67(i)+(j)	To authorize chlorine filled tank cars to remain connected during unloading without the physical presence of an unloader. (Mode 2.)
10889-N	Safe Way Disposal Systems, Inc., Middletown, CT.	49 CFR 173.197	To authorize shipment of certain regulated medical waste contained in plastic bags overpacked in polyethylene carts of 150 gallon capacity. (Mode 1.)
10891-N	Inmark, Inc., Atlanta, GA	49 CFR 172.400, 172.402(a)(2), 172.504(a)+Table 1, 173.25(a), 173.3, 175.3.	To manufacture, mark and sell specifically designed composite type packaging, for shipment of small quantities of various flammable, corrosive, and poison B liquids and solids without labels. (Modes 1, 2, 4.)
10892-N	Pfizer Inc., Groton, CT	49 CFR 174.67(i)+(j)	To authorize chlorine filled tank cars to remain connected during unloading without the physical presence of an unloader. (Mode 2.)
10893-N	Olin Corp., Stamford, CT	49 CFR 173.31(c)(1), 173.31(c)(5)	To authorize the one-time shipment of an empty chlorine GATX41503 tank car in need of retest. (Mode 2.)
10895-N	Kansas City Missouri Water/Pollution Control, Dept. Kansas City MO.	49 CFR 174.67(i)+(j)	To authorize to chlorine filled tank cars to remain connected during unloading without the physical presence of an unloader. (Mode 2.)
10896-N	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.211(b)	To authorize the transportation of magnesium hydride (dangerous when wet) in specially designed containers constructed of type 316L welded stainless steel having a maximum operating pressure of 250 psig. (Modes 1, 3, 4.)
10898-N	HYDAC Corp., Bethlehem, PA	49 CFR 173.302	To authorize the transportation of nitrogen, classed as nonflammable gas, in precharged accumulators of various sizes not to exceed 5000 psig designed in accordance with ASME pressure vessel code. (Modes 1, 2, 3, 4.)
10899-N	Tuscarora Inc., Conyers, CA	49 CFR 173.158(b)(2)(e)	To authorize the manufacture, mark, and sell of a non-reusable, molded expanded polystyrene inner packaging for a 6.5 gallon glass carboy receptacle overpacked in a 4G box for use in transporting nitric acid of 70% or less. (Modes 1, 2, 3.)
10900-N	Mainwaire East, Inc., Dallas, TX	49 CFR 172.101, 173.27, 175.75	To authorize the transportation of Class A, B, and C explosives that are not permitted for shipment by air, or in quantities greater than those prescribed for shipment by air. (Mode 4.)
10901-N	Alabama River Pulp Company, Inc., Perdue Hill, AL.	49 CFR 174.67(i)+(j)	To authorize chlorine filled tank cars to remain connected during unloading without the physical presence of an unloader. (Mode 2.)
10904-N	InVitro International, Irvine, CA	49 CFR 173.136, 173.137	To authorize an alternative mechanical type test method to determine corrosivity and specific packaging group. (Mode 1.)
10905-N	Comdyne I, Inc., West Liberty, OH	49 CFR 173.302(a)(1), 173.304(a)(1), 175.3.	To manufacture, mark and sell non-DOT specification composite cylinders to be used in transporting certain flammable and non-flammable compressed gases. (Modes 1, 3, 4, 5.)
10906-N	United Parcel Service Co., Louisville, KY	49 CFR 172.204(c)(2), 175.30(a)(2), 175.35(a).	To authorize the air carrier engaged in transporting hazardous materials to collect one copy of the shipper certification, instead of the required two copies and provide for the five past shipping paper form as a substitute for the certificate to travel with the shipment. (Mode 4.)
10907-N	Russell-Stanley Corp., Red Bank, NJ	49 CFR 173.227(c)	To authorize the manufacture, mark and sell of 1H1 polyethylene drums for the shipment of Division 6.1, Hazard Zone B materials without a steel overpack. (Modes 1, 2, 3.)

This notice of receipt of applications for new exemptions is published in accordance with Part 107 of the Hazardous Materials Transportation Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on October 6, 1992.

Public Information Collection Requirements Submitted to OMB for Review

Dated: October 6, 1992.

The Department of Transportation has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

U.S. Customs Service

OMB Number: 1515-0170
Form Number: None
Type of Review: Extension
Title: Manufacturer/Shipper Identification Required at Time of Entry
Description: This information collection will require that all importers provide the name and complete address of the individual or firm who is responsible for invoicing the merchandise (for example, the manufacturer or the shipper). This information will enhance Customs ability to perform its cargo documentation and realize the full potential of the Automated Commercial System (ACS)
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 500
Estimated Burden Hours Per Respondent: 3 minutes
Frequency of Response: Other (Daily)
Estimated Total Reporting Burden: 5,978
Clearance Officer: Ralph Meyer (202) 927-1552, U.S. Customs Service, Paperwork Management Branch, room 6316, 1301 Constitution Avenue, NW., Washington, DC 20229
OMB Reviewer: Milo Sunderhauf (202) 395-6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4820-02-M

UNITED STATES INFORMATION AGENCY

U.S. Advisory Commission on Public Diplomacy; Meeting

AGENCY: United States Information Agency.

ACTION: Notice for the Federal Register.

The United States Advisory Commission on Public Diplomacy will meet in room 600, 301 4th Street, SW. on October 14 from 10:15 a.m. to 12:30 p.m.

The meeting will be closed to the public from 11 a.m.—11:45 a.m. because it will involve discussion of classified information relating to U.S. international broadcasting. (5 U.S.C. 552b(c)(1)).

From 10:15 a.m. to 11 a.m. the Commission will meet in open session with Mr. Michael Pack, Director of the U.S. Information Agency's Office of Worldnet Television and Film Service for a discussion of Worldnet television policies and programs. From 11:45 a.m. to 12:30 p.m. the Commission will meet with Mr. Leonard Baldyga, Director of the U.S. Information Agency's Office of European Affairs for a discussion of the Freedom Support Act and public diplomacy programs in Europe.

Please call Gloria Kalamets, (202) 619–4468 for further information.

Dated: October 6, 1992.

Eugene P. Kopp,

Acting Director.

BILLING CODE 8320–01–M

DEPARTMENT OF VETERANS AFFAIRS

Wage Committee; Meetings

The Department of Veterans Affairs (VA), in accordance with Public Law 92–463, gives notice that meetings of the VA Wage Committee will be held on:

Tuesday, October 20, 1992, at 2:30 p.m.
Wednesday, November 18, 1992, at 2:30 p.m.
Wednesday, December 2, 1992, at 2:30 p.m.
Wednesday, December 16, 1992, at 2:30 p.m.

The meetings will be held in room 1161, Veterans Affairs Central Office, 810 Vermont Avenue, NW., Washington, DC 20420.

The Committee's purpose is to advise the Chief Medical Director on the development and authorization of wage schedules for Federal Wage System (blue-collar) employees.

At these meetings the Committee will consider wage survey specifications, wage survey data, local committee reports and recommendations, statistical analyses, and proposed wage schedules.

All portions of the meetings will be closed to the public because the matters considered are related solely to the internal personnel rules and practices of the Department of Veterans Affairs and because the wage survey data considered by the Committee have been obtained from officials of private business establishments with a guarantee that the data will be held in confidence. Closure of the meetings is in accordance with subsection 10(d) of Public Law 92–463, as amended by Public Law 94–409, and as cited in 5 U.S.C. 552b(c) (2) and (4).

However, members of the public are invited to submit material in writing to the Chairperson for the Committee's attention.

Additional information concerning these meetings may be obtained from the Chairperson, VA Wage Committee, room 1161, 810 Vermont Avenue, NW., Washington, DC 20420.

Dated: October 5, 1992.

By Direction of the Secretary.

Diane H. Landis,

Committee Management Officer.

BILLING CODE 8320–01–M

Sunshine Act Meetings

Federal Register
Vol. 57, No. 199
Tuesday, October 13, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BLACKSTONE RIVER VALLEY

There will be a Public Hearing to accept proposals for inclusion within the boundary of the Blackstone River Valley National Heritage Corridor by the Boundary Subcommittee. Notice is hereby given in accordance with Section 552b of Title 5, United States Code, that this hearing will be held. The Commission was established pursuant to Public Law 99-647, in order to protect and interpret the nationally significant resources in the Blackstone Valley.

PLACE: Sutton Town Hall, 4 Uxbridge Road, Sutton, MA.

DATE: Thursday, October 15, 1992.

TIME: 7:00 p.m.

The Boundary Subcommittee is holding this hearing to entertain proposals from neighboring towns to be included in the Blackstone River Valley National Heritage Corridor boundary.

Presentations of proposals will be limited to 10 minutes each and proposals must also be provided in writing. All proposals must be received in the Commission office no later than October 14, 1992.

Written proposals to the subcommittee should be mailed to: Blackstone River Valley National Heritage Corridor Commission, 15 Mendon Street, P.O. Box 730, Uxbridge, MA 01569.

James Pepper,

Executive Director, Blackstone River Valley National Heritage Corridor.

LEGAL SERVICES CORPORATION

Board of Directors and Committee Meetings

TIME AND DATE: Meetings of the Legal Services Corporation Board of Directors and Operations and Regulations Committee will be held on October 19, 1992. The meetings will commence at 8:00 a.m. and will be held in the following order, with each meeting continuing until all business has been concluded:

1. Operations and Regulations Committee Meeting; and
2. Board of Directors Meeting.

PLACE: The Legal Services Corporation, 750 1st Street, NE., The Board Room, Washington, DC 20002, (202) 336–8896.

OPERATIONS AND REGULATIONS COMMITTEE MEETING:

STATUS OF MEETING: Open.

MATTERS TO BE CONSIDERED:

OPEN SESSION:

1. Approval of Agenda.
2. Approval of Minutes of September 24, 1992 Meeting.
3. Consideration of Proposed Changes to Parts 1607, 1609, 1610, 1611, 1612 and 1626 of the Corporation's Regulations.
4. Consideration of Whether to Publish for Comment in the **Federal Register**, a Notice of Proposed Amendments to the corporation's Freedom of Information Act Regulation, 45 CFR Part 1602.

BOARD OF DIRECTORS MEETING:

STATUS OF MEETING: *Open*, except that a portion of the meeting may be closed if a majority of the Board of Directors votes to hold an executive session. At the closed session, pursuant to receipt of the aforementioned vote, the Board will consider and vote on approval of the draft minutes of the executive session held on September 26, 1992. In addition, the Board will hear and consider the report of the General Counsel on litigation to which the Corporation is a party. The Board will also hear and consider the report of the Inspector General on several investigations. Likewise, the Board will discuss the future of the Corporation's regional offices and personnel assigned to the same. The Board will also consider the employment contract of the Corporation's Inspector General. Finally, the Board will hear and consider the report of the Board's Special Counsel for the matter of *Gawler* v. *LSC, et al,* including the consideration of whether portions of the transcripts of certain executive sessions of the Board should be released. The closing will be authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. Sections 552b(c)(2)(5), (6), (7)(C), (D) and (10)], and the corresponding regulation of the Legal Services Corporation [45 C.F.R. Section 1622.5(a), (d)(e), (f)(3), (4) and (h)].[1] The closing will be certified by the Corporation's General Counsel as authorized by the above-cited provisions of law. A copy of the General Counsel's certification will be posted for public inspection at the Corporation's headquarters, located at 750 First Street, N.E., Washington, DC, 20002, in its two reception areas, and will otherwise be available upon request.

[1] As to the Board's consideration and approval of the draft minutes of the executive session held on the above-noted date, the closing is authorized as noted in the **Federal Register** notice corresponding to that Board meeting.

BOARD OF DIRECTORS MEETING (Continued)

MATTERS TO BE CONSIDERED:

OPEN SESSION:

1. Approval of Agenda.
2. Approval of Minutes of September 26, 1992 Meeting.
3. Presentations by Elvera Anselmo, Director, Arizona Statewide Legal Services Project, and Other Representatives of the National Organization of State Support Units Regarding Provision of Support to Legal Services Programs at the State Level.
4. Chairman's and Members' Reports.
   a. Consideration of Meeting Schedule for Calendar Year 1993
5. Consideration of Operations and Regulations Committee Report.
6. Consideration of Office of the Inspector General Oversight Committee Report.
7. Consideration of Provision for the Delivery of Legal Services Committee Report.
8. Consideration of Audit and Appropriations Committee Report.
   a. Consideration of Report on Affect of a $500,000 Reduction in the Corporation's Monitoring Budget in Fiscal Year 1993
   b. Consideration and Review of Proposed Fiscal Year 1993 Consolidated Operating Budget

OPEN SESSION: (Continued)

9. Consideration of Reauthorization Committee Report.
10. Consideration of Efforts to Retain an Independent Insurance Consultant for the Corporation
11. President's Report.
   a. Presentation by James Caldwell, Jr., Chief Deputy Clerk, and Sandra Montrose, Executive Attorney to the Chief Judge, U.S. Court of Veterans Appeals, and Bart Stichman, Co-Executive Director, National Veterans Legal Services Project, on the Veterans Grant Project.
12. Inspector General's Report.

CLOSED SESSION:

13. Consideration of Results of Annual Assessment of the Job Performance of the Corporation's Inspector General.
14. Consideration of the Inspector General's Report on Several On-going Investigations Involving Allegations of Violations of Criminal Laws.
15. Disposition of the Corporation's Regional Offices and Regional Office Personnel.
16. Consideration of the General Counsel's Report on Pending Litigation to which the Corporation is a Party.
17. Consideration of Report of the Board's Special Counsel for the Matter of *Gawler vs. LSC, et al.*

CLOSED SESSION: (Continued)

   a. Counsel's Report on the Litigation
   b. Consideration of Whether Portions of the Transcripts of the Following Executive Sessions of the Board, Disclosure of Which Has Been Requested Pursuant to the Freedom of Information Act, Should be Released: July Through November 1991; February, May and July 1992

(i) Consideration of Whether Any Remaining Confidentiality Accorded Pursuant to the Government in the Sunshine Act and/or the Attorney Work Product Doctrine Should be Relinquished.

18. Approval of Minutes of Executive Session Held on August 10, 1992.

OPEN SESSION: (Resumed)

19. Consideration of Disposition of the Corporation's Regional Offices.

20. Consideration of Other Business.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of October 12, 1992.

An open meeting will be held on Thursday, October 15, 1992, at 10:00 a.m., in room 1C30.

The subject matter of the open meeting scheduled for Thursday, October 15, 1992, at 10:00 a.m. will be:

Consideration of whether to adopt several amendments to the Commission's proxy rules under Section 14(a) of the Securities Exchange Act of 1934. The amendments as initially proposed were issued for public comment on June 17, 1991 (Rel. Nos. 34–29315; IC–18201; File No. S7–22–91) and were reproposed for public comment on June 23, 1992 (Rel. Nos. 34–30849; IC–18803; File No. S7–15–92). The Commission also will consider whether to adopt new disclosure requirements regarding executive compensation. The executive compensation disclosure amendments were proposed for public comment on June 23, 1992 (Rel. Nos. 33–6940; 34–30851; File No. S7–16–92). The Commission received a combined total of more than 1100 letters in response to its request for comment on the reproposed proxy rule and proposed executive compensation amendments. For further information regarding the proxy rule amendments, contact: David Sirignano at (202) 272–3097, or Elizabeth Murphy or James Budge at (202) 272–2589. For further information regarding the executive compensation amendments, contact: Catherine Dixon at (202) 272–2589, or Gregg Corso at (202) 272–3097.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Paul Atkins at (202) 272–2000.

Dated: October 8, 1992.

Jonathan G. Katz,

Secretary.

Part II

Department of Labor

Pension and Welfare Benefits Administration

29 CFR Part 2550

Final Regulation Regarding Participant Directed Individual Account Plans (ERISA Section 404(c) Plans); Final Rule

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

29 CFR Part 2550

Final Regulation Regarding Participant Directed Individual Account Plans (ERISA Section 404(c) Plans)

AGENCY: Pension and Welfare Benefits Administration, Department of Labor.

ACTION: Final rule.

SUMMARY: This document contains a final regulation under section 404(c) of the Employee Retirement Income Security Act of 1974 (ERISA or the Act). That section provides that, where a participant or beneficiary of an employee pension benefit plan exercises control over assets in an individual account maintained for him under the plan; the participant or beneficiary is not considered a fiduciary by reason of his exercise of control and other plan fiduciaries are relieved of liability under part 4 of title I of ERISA for the results of the participant's or beneficiary's exercise of control. Section 404(c) specifically contemplates the issuance of regulations. The regulation describes the circumstances in which section 404(c) applies to a transaction involving a participant's or beneficiary's exercise of control over his individual account.

In general, in order for a participant or beneficiary to exercise control over the assets in his account, the participant or beneficiary must have the opportunity, under the plan, to: (1) Choose from a broad range of investment alternatives, which consist of at least three diversified investment alternatives, each of which has materially different risk and return characteristics; (2) give investment instruction with a frequency which is appropriate in light of the market volatility of the investment alternatives, but not less frequently than once within any three month period; (3) diversify investments within and among investment alternatives; and (4) obtain sufficient information to make informed investment decisions with respect to investment alternatives available under the plan. The regulation will affect employee benefit plans, their sponsors, participants and beneficiaries as well as plan fiduciaries.

EFFECTIVE DATE: This regulation is effective with respect to transactions occurring after the first day of the second plan year beginning after October 13, 1992, except with respect to transactions occurring under a plan maintained pursuant to a collective bargaining agreement. For plans maintained pursuant to one or more collective bargaining agreements, the regulation is effective after the later of the first day of the second plan year after October 13, 1992, or the date on which the last collective bargaining agreement terminates.

FOR FURTHER INFORMATION CONTACT: Deborah S. Hobbs, or Katherine D. Lewis, Pension and Welfare Benefits Administration, U.S. Department of Labor, Washington, DC 20210, telephone (202) 219–7901; or Daniel J. Maguire, Esq., or Diane Pedulla, Esq., Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, Washington, DC 20210, telephone (202) 219–4592 or (202) 219–4597. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: On September 3, 1987, the Department of Labor published a notice in the **Federal Register** (52 FR 33508) containing a proposed regulation (the "1987 proposal") that would describe the circumstances in which section 404(c) of ERISA [1] would apply to a transaction involving a participant's or beneficiary's exercise of control over his account and the effect of such application. The Department received more than 230 letters of comment regarding that proposal. A public hearing on the proposal was held in Washington, DC, on February 10 and 11, at which time 23 speakers testified.

After consideration of the issues raised by the written comments and oral testimony, the Department made substantial changes to the regulation. In view of the significance of the changes made to the 1987 proposal, the Department decided that interested members of the public should be afforded the opportunity to comment on the changes prior to the adoption of a final regulation. Accordingly, the Department withdrew the 1987 proposal and proposed a revised section 404(c) regulation on March 13, 1991 (56 FR 10724) (the "1991 proposal" or the "proposal").

The Department received more than 100 letters of comment in response to the proposal. A public hearing on the proposal was held in Washington, DC on July 11 and 12, 1991, at which time 27 speakers testified.

The following discussion summarizes the 1991 proposal and the major issues raised by commentators and explains the Department's reasons for the modifications reflected in the final regulation that is published with this notice.

[1] 29 U.S.C. 1104(c).

DISCUSSION OF THE REGULATION AND COMMENTS

I. The Statute

Section 404(c) of ERISA provides that where a participant or beneficiary of an employee pension benefit plan that provides for individual accounts exercises control over assets in his account, then (1) the participant or beneficiary shall not be deemed to be a fiduciary by reason of his exercise of control; and (2) no person who is otherwise a fiduciary shall be liable under the fiduciary responsibility provisions of ERISA for any loss, or by reason of any breach, which results from such participant's or beneficiary's exercise of control.

The relief from the fiduciary responsibility provisions of ERISA that is provided by section 404(c) applies only to individual transactions that meet the criteria established by that section, i.e., the transaction must be executed pursuant to the kind of plan described in section 404(c) and the participant or beneficiary must actually have exercised control with respect to the transaction. Thus, a determination whether section 404(c)(1) and (2) apply can only be made on a case by case basis. It is the Department's view that section 404(c) is similar to a statutory exception to the general fiduciary provisions of ERISA and, accordingly, the person asserting applicability of the exception will have the burden of proving that the conditions of section 404(c) and any regulation thereunder have been met.[2]

II. Consequences of Noncompliance With the Regulation

In response to comments on the 1987 proposal, the Department attempted to make clear in the preamble to the 1991 proposal that the regulatory standards established with respect to ERISA section 404(c) plans are limited to describing the requirements for an ERISA 404(c) plan, and the type and degree of independent control on the part of a participant or beneficiary of such a plan necessary to provide the

[2] See *Donovan* v. *Cunningham*, 716 F.2d 1455, 1465, 1467–68 (5th Cir. 1983) in which it was held that a fiduciary of an employee stock ownership plan had the burden of proof to show that the conditions to the availability of the statutory exemption found in section 408(e) of ERISA were met. As support, the court cited *SEC* v. *Ralston Purina Co.*, 346 U.S. 119, 126 (1953): "As the Supreme Court has observed in a different context, it seems 'fair and reasonable' to place the burden of proof upon a party who seeks to bring his conduct within a statutory exception to a broad remedial scheme. *SEC* v. *Ralston Purina Co.*, 346 U.S. 119, 126, 73 S.Ct. 981, 97 L.Ed. 1494 (1953)." *Id.* at 1467–68, n.27.

transactional relief described in section 404(c) and, therefore, were not intended to establish, by implication or otherwise, standards for all ERISA-covered plans concerning the types of investments a fiduciary must make in order to maintain a prudent investment portfolio. The Department also noted that a plan which does not meet the requirements for an ERISA section 404(c) plan may, nonetheless, have a prudent and well diversified investment portfolio. However, a number of commentators on the 1991 proposal indicated that, while the preamble language was helpful, the Department should, in an effort to avoid any confusion, include a clarification with respect to the limited effect of the section 404(c) standards in the operative language of the regulation inasmuch as preambles are not published as part of the Code of Federal Regulations. In response to these comments, the Department has amended paragraph (a) in the final regulation to include a separate subparagraph (2) which specifically provides that the standards set forth in the regulation are applicable solely for the purpose of determining whether a plan is an ERISA section 404(c) plan and whether a particular transaction engaged in by a participant or beneficiary of such plan is afforded relief by section 404(c). This subparagraph (2) further provides that the standards of the regulation are not intended to be applied in determining whether, or to what extent, a plan which does not meet the requirements for an ERISA section 404(c) plan or a fiduciary with respect to such plan satisfies the fiduciary responsibility or other provision of title I of the Act.

As was the case with the 1987 proposal, a number of commentators on the 1991 proposal suggested that the Department adopt the regulation as a "safe harbor" under ERISA section 404(c), thereby providing a fiduciary of a plan which fails to comport with the requirements of this regulation the opportunity to argue that the particular plan and any particular participant-directed transaction executed pursuant to such plan falls within the statutory definition, and, as such, should be afforded the exception to fiduciary liability described in ERISA section 404(c). After due consideration, the Department has decided not to adopt this suggestion. The Department continues to believe that it can best satisfy its statutory responsibility under ERISA section 404(c) by describing the basic framework necessary for a participant's or beneficiary's exercise of control, thereby providing guidance and clarification as to the application of ERISA section 404(c), while at the same time affording flexibility in the design of ERISA section 404(c) plans. Finally, as previously explained, non-complying plans do not necessarily violate ERISA; non-compliance merely results in the plan not being accorded the statutory relief described in section 404(c).

III. ERISA Section 404(c) Plans

In General

The proposal defined an "ERISA section 404(c) plan" as an individual account plant account plan described in section 3(34) of ERISA that permits a participant to make an independent choice, from a broad range of investment alternatives, regarding the manner in which any portion of the assets in his individual account is invested.[3] This definition permitted a plan to provide for participant control in many different ways and in varying degrees. For example, under the definition, a plan could meet the requirements for treatment as an ERISA section 404(c) plan notwithstanding that it only allows certain participants or beneficiaries to exercise control over their individual account balances and notwithstanding that it only permits participants or beneficiaries to exercise control over a specified portion of their account balances.[4] However, if a plan does not permit a participant or beneficiary to exercise control over all of the assets in his account, the provisions of section 404(c) would not, in any circumstances, apply to transactions involving assets with respect to which the participant or beneficiary is not permitted to exercise control. Thus, until a participant or beneficiary exercises control with respect to assets contributed on his behalf, plan fiduciaries are subject to all of the fiduciary duties and obligations set forth in part 4 of title I of ERISA with respect to such assets.[5]

Two commentators requested clarification concerning whether relief is available under the regulation for transactions involving "hybrid" plans, i.e., plans which include defined benefit features. One commentator stated that, in certain of such arrangements, the individual account portion of the plan has no relationship to the defined benefit portion while in others benefits under the individual account plan are taken into account in determining the benefits payable to the participant or beneficiary under the defined benefit plan. Section 404(c) contemplates separate individual accounting so that the investment decisions of a participant or beneficiary affect only the account of that participant or beneficiary. Accordingly, relief would be available under section 404(c) for the individual account portion of a "hybrid" plan where the decisions of a participant or beneficiary can only affect the account of the directing participant or beneficiary, provided that the other conditions of the regulation are met. However, to the extent that a participant's or beneficiary's investment decisions can affect the benefits which may be paid to others under the particular "hybrid" arrangement, section 404(c) relief would not be available.[6]

One commentator expressed the view that the regulation should provide relief under section 404(c) for transactions in an employee stock ownership plan. In this regard, the commentator urged that the regulation except such plans from the requirement to provide a broad range of investment alternatives. Other commentators contended that 404(c) relief should be available for certain specified decisions by participants and beneficiaries in any plan, without regard to whether the plan satisfies the requirements of the 404(c) regulation. Examples of such decisions included: Voting shares of employer stock allocated to the participant's or beneficiary's account, responses to

---

[3] Section 404(c) refers to a pension plan that "provides for individual accounts." However, the regulation limits coverage of section 404(c) to "individual account plans" described in section 3(34) of ERISA because the Conference Report accompanying ERISA, H.R. Rep. No. 1280, 93d Cong., 2d Sess., 306 (1974) (hereafter, the Conference Report accompanying ERISA, H.R. Rep. No. 1280, 93d Cong., 2d Sess., 306 (1974) (hereafter, the Conference Report), refers to individual account plans that provide for participant control and because control and because section 404(c) contemplates separate individual accounting so that each participant or beneficiary will bear the sole risk of loss attributable to his investment decision.

[4] This discussion deals only with the effect of such classifications on a plan's status as an ERISA section 404(c) plan; in certain circumstances such classifications may violate other provisions of law, including conditions to qualification of a pension plan under section 401(a) of the Internal Revenue Code (the Code).

[5] ERISA also imposes certain requirements which are not affected by a participant's or beneficiary's exercise of control over the assets in his individual account; those requirements, of course, continue to apply to plan fiduciaries even though a plan is an ERISA section 404(c) plan. For example, the bonding requirements of section 412 of ERISA would apply to all persons (other than the participant or beneficiary) who handle plan funds under an ERISA section 404(c) plan.

[6] Under an arrangement pursuant to which the defined benefit portion provides the floor or minimum benefit, adverse investment experience in the individual account portion could negatively impact on the ultimate liability of the defined benefit portion to provide the promised benefits.

tender and exchange offers, and decisions to withdraw from the employer stock fund where a plan's investment alternatives do not satisfy the broad range of investments requirement of the regulation. Another commentator indicated that the regulation should not include any plan-wide requirements, but should only require participant control for relief on a transactional basis. The Department has not adopted these requested modifications to the regulation. The Department continues to believe that, while the availability of section 404(c) relief is conditioned on the actual exercise of control by a participant or beneficiary over the assets in his account and, therefore, is transactional in nature, the plan itself must meet certain minimum conditions, such as offering a broad range of investment alternatives, to ensure that participants and beneficiaries are afforded a reasonable opportunity to exercise meaningful control over the assets in their accounts.

One commentator requested clarification as to whether relief would be available under the regulation when alternate payees direct investment of amounts which have been allocated to their accounts under qualified domestic relations orders. In this regard, the Department notes that alternate payees are considered to be beneficiaries under ERISA.[7] Accordingly, if the conditions of this regulation are otherwise satisfied, relief under ERISA section 404(c) would be available when alternate payees exercise control over assets which have been allocated to their accounts under qualified domestic relations orders.

The Department also received comments concerning several of the specific requirements of the definition of an ERISA section 404(c) plan contained in the proposal (paragraph (b)). These are discussed below.

1. Opportunity to Exercise Control

Paragraph (b)(1) of the proposed regulation provided that, to be an ERISA section 404(c) plan, a plan must (among other things) provide an opportunity for a participant or beneficiary to exercise control over the assets in his individual account in the manner described at paragraph (b)(2). In turn, paragraph (b)(2) set forth the rules with respect to a participant's or beneficiary's opportunity to exercise control. First, the terms of the plan must provide that participants and beneficiaries have a reasonable opportunity to submit investment instructions to an identified plan fiduciary who is obligated to comply with such instructions. Second, a plan may impose reasonable restrictions on the frequency with which participants and beneficiaries may give investment instructions. Third, certain other reasonable limitations may be imposed on the participant's or beneficiary's ability to exercise control. As discussed below, the general rules of paragraph (b)(2) have been retained with some modification, including new disclosure provisions, in response to comments on the 1991 proposal

A. The Identified Plan Fiduciary

Paragraph (b)(2)(i) of the 1991 proposal provided that a plan affords a participant or beneficiary with an opportunity to exercise control over assets in his account if, under the terms of the plan, the participant or beneficiary has a reasonable opportunity to give written investment instructions, or oral instructions followed by a written confirmation, to an identified plan fiduciary who is obligated to comply with such instructions.

A number of commentators requested that the regulation be clarified so as not to preclude the use of electronic or telephonic communications of investment instructions. It was not the intention of the Department to preclude the use of such communications. Accordingly, paragraph (b)(2)(i)(A) of the final regulation requires only that the participant or beneficiary be afforded a reasonable opportunity to provide investment instructions (written or otherwise) and an opportunity to obtain a written confirmation of such instructions. The Department believes that the ability of a participant or beneficiary to obtain a written confirmation of his investment instructions is considerably more important than the means by which investment instruction is communicated. In this regard, the Department notes that, unlike the 1991 proposal, the final regulation requires that the opportunity to obtain written confirmation of investment instructions be extended to all participants and beneficiaries who give investment instructions. A commentator also requested that the Department clarify that the specific means by which investment instructions are communicated are not required to be described in the plan document. The Department does not believe that the specific means by which participants and beneficiaries are to communicate investment instructions necessarily has to be in the plan document as long as the plan has written procedures for such communications and information concerning those procedures is furnished to participants and beneficiaries (see 2550.404c–1(b)(2)).

Other commentators requested that the Department clarify that the plan fiduciary responsible for receiving and acting on investment instructions may be identified in the plan by position rather than name inasmuch as responsible individuals often change and frequent plan amendments would be required to reflect such changes. It is the view of the Department that the identification of a fiduciary by position or function (e.g., plan administrator, investment committee, etc.) would satisfy the requirements of the regulation for an identified plan fiduciary under paragraphs (b)(2)(i)(A) and (b)(2)(i)(B)(*1*), and for a designated plan fiduciary for purposes of paragraph (d)(2)(ii)(E)(*4*)(*viii*). In this regard, the Department notes that the requirement for an identified plan fiduciary who is obligated to comply with participant and beneficiary instructions is applicable to all ERISA section 404(c) plans, including those which do not designate investment alternatives, i.e., those plans which permit investments in any asset which it is administratively feasible for the plan to hold and do not specifically describe any investment alternative.

In order to make clear that a fiduciary's obligation to follow investment instructions is not without limitation, the final regulation (paragraph (b)(2)(i)(A)) has been modified to recognize the exceptions to following investment direction described in paragraphs (b)(2)(ii)(B) and (d)(2)(ii).

B. Disclosure of Investment Information

The Proposal

Under the 1991 proposed regulation, the obligation to disclose investment information was limited to only those investment alternatives which were intended to be taken into account for purposes of the "broad range" of investment alternatives requirement. Specifically, paragraph (b)(3)(iii) of the proposal provided that an investment alternative would not be deemed to be part of a broad range of investment alternatives unless sufficient information as to that investment is available to the participant or beneficiary so as to permit informed investment decisions. However, the proposal would not have established an affirmative obligation on the part of ERISA section 404(c) plan fiduciaries to furnish the required information to participants and beneficiaries. Rather,

[7] See ERISA section 206(d)(3)(J).

broad public availability generally would have been sufficient. Where investment alternatives are limited to a designated group of investments, the proposal would have required that, at a minimum, an identified plan fiduciary be available to direct participants and beneficiaries as to means by with the required information could be obtained. With respect to the disclosure of investment information, the Department noted in the preamble to the proposal that the requirement that sufficient information be available to permit informed investment decisions applies not only to the initial investment decision but also to subsequent decisions with regard to that investment. The Department also noted that a participant must be given sufficient information to make informed decisions with regard to rights incident to the holding of an ownership interest in that investment in order for an investment to be taken into account for purposes of the broad range requirement. For example, in the case of a security, such information would include information sufficient to permit the participant to make informed decisions in exercising any voting rights attendant to such ownership.

The disclosure provisions of the proposal were the subject of considerable comment and concern. In general, commentators on the proposal recognized the importance of ensuring that participants and beneficiaries have sufficient information about their investment alternatives to make meaningful investment choices. Many commentators suggested that the Department should enhance and broaden the disclosure requirements of the regulation and made specific suggestions as to what information should be required to be disclosed. Other commentators, while acknowledging the need for more disclosure, recommended the retention of a general disclosure rule (e.g., only require that sufficient information be made available to enable participants and beneficiaries to make informed investment decisions), with examples in the preamble of the types of disclosures that might be necessary to satisfy the general rule. The following represents a summary of some of the specific comments on the issue of disclosure.

Comments

Various commentators recommended that the Department require mutual fund prospectus-type disclosures for bank and insurance company fixed rate investment contracts (e.g., bank investment contracts, savings and loan investment contracts and "guaranteed investment contracts" issued by insurance companies) and other look-through investment vehicles. Some commentators recommended prospectus-type disclosure for all investments made available to participants and beneficiaries under an ERISA section 404(c) plan, while other commentators took the position that prospectus-type disclosures should not be required at all because such disclosures would generally not be understood by participants and beneficiaries. The information commentators suggested should be disclosed or made available to participants and beneficiaries included information concerning: The investment objectives, risks and rewards associated with available investment alternatives; a description of the investment philosophy of the investment alternative; the composition of the portfolio of investment vehicles offered to participants and beneficiaries; past performance of the investments; whether or not investments are subject to wide fluctuations in value; the identity and rating of issuers of fixed rate investment contracts (e.g., insurance companies); the proportion of fixed rate investment contracts of each issuer comprising an investment alternative; the average maturity of fixed rate investment contracts in an investment alternative; restrictions on transfers in and out of investments; current financial information regarding an investment alternative; fees and other expenses charged by an investment alternative; and criteria utilized in selecting, holding and selling investments in an investment vehicle designed to hold securities of multiple issuers.

In addition to the comments from the general public, the Division of Market Regulation of the Securities and Exchange Commission (the "Division") submitted a number of recommendations relating to the disclosure of investment information to participants and beneficiaries in ERISA section 404(c) plans. Among other things, the Division recommended that the regulation require the identified plan fiduciary to, at a minimum, provide adequate investment information when requested regarding any investment permitted by the plan, including information about the current value of the investment and the financial condition of the issuer. The Division also expressed the view that the regulation should only provide relief for investment alternatives where participants and beneficiaries have access to readily available information about the alternatives. The Division recommended that the regulation specifically require the plan administrator to forward copies of prospectuses, proxies, periodic reports and similar materials to those who invest in registered securities.

The Division further suggested that the final regulation require a disclosure concerning the limited liability of plan fiduciaries with regard to participant-directed investments and that ERISA section 404(c) plans include, as appropriate, certain legends in their Summary Plan Descriptions ("SPDs"). For plans which designate investment alternatives, the Division recommended a legend stating that important additional information about the plan's designated investment alternatives is available and should be read carefully. For plans which do not designate investment alternatives but which allow investments in publicly offered securities, it recommended a legend encouraging participants to obtain and read a prospectus or other offering document, where available, and noting that public information is available with respect to investment managers who are registered under the Investment Advisers Act of 1940. For all ERISA section 404(c) plans, it recommended a legend disclosing the fact that fiduciaries of such plans may be relieved of certain fiduciary obligations and liabilities to which they would otherwise be subject.

With respect to mutual funds, the Division commented that a prospectus should be available from the identified plan fiduciary where the plan designates a mutual fund as an alternative, and that plans should be required to disclose that the price of fund shares does not reflect the same kind of market information about the issuer that may be reflected in the share price of publicly-traded securities. The Division also recommended that, where investment managers are designated by a plan or manage alternatives designated by a plan, the identified plan fiduciary should be required to provide the brochure described in Rule 204–3 under the Investment Advisers Act to participants and beneficiaries on request.

The Final Regulation: General Rule

After careful consideration of all the comments concerning the disclosure of investment information, the Department has concluded that changes in the disclosure requirements contained in the 1991 proposal are necessary to ensure that participants and beneficiaries in ERISA section 404(c) plans have sufficient information to make informed

investment decisions. As recognized by many commentators, the investment decisions made by participants and beneficiaries in ERISA section 404(c) plans will directly affect the funds available to such individuals at retirement. For this reason, participants and beneficiaries should be assured of having access to that information necessary to make meaningful investment decisions.

The following is a discussion of the changes in the disclosure requirements contained in the final regulation.

First, the Department has concluded that the obligation of an ERISA section 404(c) plan fiduciary to disclose information should not be limited to information concerning those investment alternatives intended to satisfy the "broad range" requirement of the regulation, but rather should extend to information concerning the plan itself and each investment alternative made available under the plan. The Department can find no reasonable basis for distinguishing between information concerning investment alternatives which are intended to satisfy the "broad range" requirement and information concerning any other investment alternative made available under a plan in terms of value to participants and beneficiaries in evaluating their investment options and making informed investment decisions. Second, the Department has concluded that fiduciaries of an ERISA section 404(c) plan should have an affirmative obligation to ensure that participants and beneficiaries are provided or can obtain basic information concerning the investment alternatives made available under the plan. The Department is persuaded that merely referring participants and beneficiaries to a source for investment information and requiring them to obtain the information is insufficent to ensure that participants and beneficiaries are in a position to make informed investment decisions. While, as discussed below, there is nothing in the regulation which precludes a plan fiduciary from designating another person or persons to actually furnish the required information, the regulation contemplates that the identified plan fiduciary will remain responsible for ensuring disclosure.

In implementing the foregoing changes, the "investment information" section of the 1991 proposal (2550.404c–1(b)(3)(iii)) has been eliminated and a new paragraph (b)(2)(i)(B) has been added to the final regulation. Under paragraph (b)(2)(i) of the final regulation, an ERISA section 404(c) plan will be considered to provide a participant or beneficiary an opportunity to exercise control over the assets in his account only if, in addition to affording the participant or beneficiary a reasonable opportunity to give investment instructions in accordance with paragraph (b)(2)(i)(A), the participant or beneficiary is provided or has the opportunity to obtain sufficient information to make informed investment decisions with regard to investment alternatives available under the plan and incidents of ownership appurtenant to such investments in accordance with paragraph (b)(2)(i)(B).

Disclosures Made to All Participants

In addition to the foregoing general rule, paragraph (b)(2)(i)(B) provides that a participant or beneficiary will not be considered to have sufficient investment information unless certain delineated items of information concerning the plan and available investment alternatives are provided to the participant or beneficiary and certain other information concerning both "designated investment alternatives" [a] and other available investment alternatives is provided upon request to the participant or beneficiary. The Department is persuaded that certain information is so fundamental to making informed investment decisions that such information should be available to all participants and beneficiaries in an ERISA section 404(c) plan. This information is generally described in subparagraphs (*1*) and (*2*) of paragraph (b)(2)(i)(B) of the final regulation.

Pursuant to subparagraph (*1*) of paragraph (b)(2)(i)(B), each participant and beneficiary is required to be provided the following information by an identified plan fiduciary (or a person or persons designated by the plan fiduciary to act on his behalf). First, an explanation that the plan is intended to constitute an ERISA section 404(c) plan, as decribed in this regulation, and that fiduciaries of the plan may be relieved of liability for any losses which are the direct and necessary result of investment instructions given by the participant and beneficiary. The Department believes that such an explanation will serve to reinforce participant and beneficiary awareness of the limited liability of the plan fiduciaries and of their own individual responsibility with respect to investment decisions concerning their assets.

Second, a description of the investment alternatives available under the plan and, with respect to each designated investment alternative, a general description of the investment objectives and risk and return characteristics of each such alternative, including information relating to the type and diversification of assets comprising the portfolio of the designated investment alternative. This requirement is intended to ensure disclosure of the most basic of information necessary to a participant's or beneficiary's investment decision. In the case of plans which permit participants and beneficiaries to invest in any asset administratively feasible for the plan to hold, a general statement so apprising participants and beneficiaries would be adequate, although participants and beneficiaries should be encouraged to obtain and review materials relating to potential investments prior to actually making an investment. In this connection, it should be noted that, to the extent that copies of prospectuses, financial statements and reports, or similar materials relating to the investment alternatives available under the plan, are furnished to the plan, such information would be required to be made available to the participant or beneficiary pursuant to paragraph (b)(2)(i)(B)(*2*)(*ii*). Third, if relevant, identification of any designated investment managers. Fourth, an explanation of the circumstances under which participants and beneficiaries may give investment instructions and an explanation of any specified limitations on such instructions under the terms of the plan, including any restrictions on transfers to or from a designated investment alternative, and any restrictions on the exercise of voting, tender and similar rights appurtenant to a participant's or beneficiary's investment in an investment alternative. This disclosure is intended to ensure that participants and beneficiaries are apprised as to how, when and to whom they may give investment instructions under the plan. This disclosure is also intended to ensure that participants and beneficiaries are aware of limitations on their ability to give investment instructions. For example, insofar as a withdrawal from an investment alternative prior to the maturity date of the investment may trigger a penalty or a valuation adjustment to the participant's or beneficiary's account,

[a] Paragraph (e)(4) defines "designated investment alternative" as a specific investment identified by a plan fiduciary as an available investment alternative under the plan. For example, if a 404(c) plan permitted its participants and beneficiaries to invest in any investment which it was administratively feasible for the plan to hold and specifically described an equity fund which was managed by the plan sponsor, the equity fund would be a "designated investment alternative" within the meaning of paragraph (e)(4) of this section.

information concerning the penalty or adjustment is required to be disclosed pursuant to subparagraph (*iv*) of paragraph (b)(2)(i)(B)(*1*). Finally, this disclosure is intended to ensure that participants and beneficiaries are aware of the extent to which voting, tender and similar rights attendant to ownership of an interest in an investment alternative are passed through to them under the terms of the plan when choosing to invest in such investment alternative.

Fifth, with respect to each investment alternative available under the plan, a description of any transaction fees and expenses which affect the participant's or beneficiary's account balance in connection with the purchase or sale of interests in such investment alternative (e.g., commissions, sales loads, deferred sales charges, redemption or exchange fees). With respect to investment alternatives which are not designated alternatives, the description need only state whether, or to what extent, transaction fees and expenses incurred in connection with the purchase or sale of interests in the investment alternative will be charged against the account of the participant or beneficiary. This requirement relates to the disclosure of fees and expenses directly assessed against the participant's or beneficiary's account, not expenses, fees or commissions incurred by the investment alternative attendant to the operation and management of the investment alternative.

Sixth, identification of the plan fiduciary (and, if applicable, any person or persons designated by the plan fiduciary) responsible for providing the information described in paragraph (b)(2)(i)(B)(*2*) upon request of a participant or beneficiary, and a description of the information described in paragraph (b)(2)(i)(B)(*2*) which may be obtained on request. As indicated earlier, plan fiduciaries may be identified by position (e.g., plan administrator, trustee, etc.), rather than by name, so long as participants have an available source for obtaining the information.

Seventh, in the case of plans offering as an investment alternative the ability to directly or indirectly acquire or sell any employer security, a description of the procedures established to provide for the confidentiality of information relating to such investments by participants and beneficiaries and the identification of the plan fiduciary responsible for monitoring compliance with those procedures. The Department believes that, given the elimination of the independent fiduciary requirement for most transactions involving employer securities (see discussion relating to employer securities and subparagraphs (d)(2)(ii)(E)(*4*)(*vii*)–(*ix*) below), participants and beneficiaries should be apprised of the procedures which have been established to ensure the confidentiality of information relating to investments in employer securities and that there is a plan fiduciary who is responsible for monitoring compliance with those procedures.

Eighth, in the case of an investment alternative which is subject to the Securities Act of 1933 (the Securities Act), and in which the participant or beneficiary has no assets invested, immediately following the participant's or beneficiary's initial investment, a copy of the most recent prospectus provided to the plan. Paragraph (b)(2)(i)(B)(*1*)(*viii*) provides that this condition will be deemed satisfied if the participant or beneficiary has been provided with a copy of such most recent prospectus immediately prior to the participant's or beneficiary's initial investment in such alternative. Thus, where a participant is furnished the most recent prospectus provided to the plan in connection with an opportunity to give investment instruction, and the prospectus is received by the participant prior to instruction being given, subparagraph (*viii*) does not require a copy of the same prospectus to be furnished to the participant immediately following his initial investment. This disclosure requirement is intended to ensure that, either immediately before or immediately after an investment in an investment alternative required to prepare prospectuses under the federal securities laws, participants and beneficiaries are afforded the opportunity to review such prospectuses, without mandating that every prospectus furnished to the plan subsequent to a participant's or beneficiary's initial investment be passed through to the participants and beneficiaries. Having been afforded the opportunity to review a prospectus in connection with his initial investment, a participant or beneficiary will be in the best position to determine the extent to which such disclosures are necessary to his making informed investment decisions with respect to continued investments in such investment alternatives. It should be noted that all prospectuses furnished to the plan must be made available to participants and beneficiaries upon request pursuant to paragraph (b)(2)(i)(B)(*2*)(*ii*).

Finally, subsequent to a participant's or beneficiary's investment in an investment alternative, the participant or beneficiary is required to be furnished any materials provided to the plan relating to the exercise of voting, tender or similar rights which are incidental to the holding in the account of such participant or beneficiary of an ownership interest in such investment alternative to the extent that such rights are passed through to participants and beneficiaries under the terms of the plan (paragraph (b)(2)(i)(B)(*1*)(*ix*)). Subparagraph (*ix*) also requires that, if there are any plan provisions which relate to the exercise of voting, tender or similar rights, participants and beneficiaries must be furnished either a description of or reference to such plan provisions.

To the extent that a plan provides for the pass-through of voting, tender and similar rights, participants and beneficiaries must be provided that information furnished to the plan pertaining to those rights if the participant or beneficiary is to be considered to have exercised control with respect to such rights. See paragraph (c)(1)(ii). The department notes that, except for investments in employer securities, there is nothing in the regulation which requires a pass-through of voting, tender or similar rights to plan participants and beneficiaries. However, to the extent that a plan does not provide for such a pass-through of rights, no 404(c) relief would be available to the plan fiduciaries with regard to the exercise of such rights by such plan fiduciaries.[9] With regard to the requirement that a reference to any relevant plan provisions be included with materials relating to incidents of ownership of an investment, the Department notes, for example, that, to the extent that there are plan provisions which govern voting, plan participants and beneficiaries should be on notice as to such provisions. This is particularly true where the plan provisions relate to situations where participants and beneficiaries do not affirmatively exercise their right to vote. This disclosure can either describe the applicable plan provisions, or reference participants to the relevant portions of the plan document where such provisions are described.

---

[9] The Department notes that, for purposes of the Securities Exchange Act of 1934, participants in an employee benefit plan are considered to be beneficial owners entitled to receive proxy materials if they have the right under the plan or otherwise to vote the securities held on their behalf. See Shareholder Communications Facilitation, Securities Exchange Act Release No. 23847 (Nov. 25, 1986), 51 FR 44287.

Disclosures Made Upon Request to Participants

In addition to the general information required to be furnished to each participant and beneficiary, subparagraph (*2*) of paragraph (b)(2)(i)(B) of the final regulation requires that certain specified information relating to designated investment alternatives be furnished by an identified plan fiduciary or person(s) designated by the fiduciary to act on his behalf, to the extent not otherwise provided, upon request of a participant or beneficiary. This subparagraph requires that the plan provide the following information, which shall be based on the latest information available to the plan: first, a narrative description of the annual operating expenses of each designated investment alternative, such as investment management fees, administrative fees and transaction costs, which reduce the rate of return to the participants or beneficiaries, and the aggregate amount of such expenses expressed as a percentage of average net assets of the designated investment alternative (paragraph (b)(2)(i)(B)(*2*)(*i*)); and, second, copies of any prospectuses, financial statements and reports, and any other materials relating to investment alternatives available under the plan, to the extent such information is provided to the pan (paragraph (b)(2)(i)(B) (*2*) (*ii*)). The Department notes that, for example, to the extent that the operating expenses described in subparagraph (*i*) of paragraph (b)(2)(i)(B) (*2*) are included information required to be provided on request pursuant to subparagraph (*ii*), such as in a prospectus, the requirements of subparagraph (*i*) would be satisfied by providing the prospectus. This requirement is not intended to mandate that plan fiduciaries create materials relating to the investment alternatives available under the plan where they are not provided to the plan. However, because the general rule of paragraph (b)(2)(i)(B) (which requires that a participant or beneficiary must be provided or have the opportunity to obtain sufficient information to make informed investment decisions) remains applicable to all investment alternatives offered by a 404(c) plan, including, for example, investment alternatives managed by the plan sponsor, relief will not be available for investments in investment alternatives managed by the plan sponsor unless a participant or beneficiary is provided or has the opportunity to obtain sufficient information to make informed investment decisions with regard to investments in such alternatives.

Paragraph (b)(2)(i)(B)(*2*) also requires the following to be disclosed upon request with respect to designated investment alternatives: a list of the assets comprising the portfolio of the designated investment alternative which constitute plan assets within the meaning of 29 CFR 2510.3–101, the value of each such asset (or the proportion of the investment alternative which it comprises), and, with respect to each such asset which is a fixed rate investment contract issued by a bank or similar institution (e.g., savings and loan association) or insurance company held in the portfolio of the investment alternative, the name of the issuer of the contract, the term of the contract and the rate of return on the contract (paragraph (b)(2)(i)(B)(*2*)(*iii*)). Subparagraph (*iv*) of paragraph (b)(2)(i)(B)(*2*) requires the disclosure of information concerning the value of shares or units in designated investment alternatives available to participants and beneficiaries under the plan, as well as the past and current investment performance of such alternatives determined, net of expenses, on a reasonable and consistent basis (taking into account the nature of the investment alternatives). Finally, subparagraph (*v*) of paragraph (b)(2)(i)(B)(*2*) requires the disclosure of information concerning the value of shares or units in designated investment alternatives held in the account of the participant or beneficiary.

On the basis of a number of comments, the Department believes that, with the exception of certain plan and participant specific information, the information required to be furnished and made available to participants and beneficiaries pursuant to subparagraphs (*1*) and (*2*) is information which is typically furnished by, or readily available from, investment managers, investment advisers, and issuers of securities. In addition, although the information required to be furnished to participants and beneficiaries upon request must be based on the latest information available to the plan, it is expected that, in most instances, fiduciaries will not have to create special disclosures to satisfy individual requests if such requests do not involve the disclosure of information pertaining to an individual participant's account. For example, paragraph (b)(2)(i)(B)(*2*)(*iii*) requires that an ERISA section 404(c) plan provide, on request, a list of plan assets, within the meaning of 29 CFR 2510.3–101, comprising the portfolio of each designated investment alternative and the value of each such asset (or the proportion of the investment alternative which it comprises). This information should be readily available to plan fiduciaries since it is essentially the same information required to be reported as part of a plan's annual report (Form 5500) under ERISA. It is anticipated that the disclosure of plan asset information based on the plan's latest annual report will satisfy the requirement of paragraph (b)(2)(i)(B)(*2*)(*iii*) so long as such information is sufficiently accurate to enable the participant or beneficiary to make an informed investment decision. Inasmuch as the exercise of control by a participant or beneficiary is dependent on the participant or beneficiary having sufficient information to make an informed investment decision, fiduciaries will have to consider, for example, whether any changes with respect to the investment portfolio of the investment alternative since the last annual report are sufficiently material that failure to disclose such changes would deprive the participant or beneficiary of the opportunity to make an informed investment decision. With regard to information concerning the value of shares or units in designated investment alternatives (paragraphs (b)(2)(i)(B)(*2*) (*iv*) and (*v*)), such information also may be based on the latest information available to the plan, which, in most cases, would be valuation information obtained in connection with the most recent opportunity afforded participants and beneficiaries to give investment instructions with respect to that investment alternative. Finally, the Department notes that the informational requirements of subparagraphs (*1*) and (*2*) of paragraph (b)(2)(i)(B) are described in the regulation in general terms in order to afford plan fiduciaries and plan sponsors the flexibility necessary to accommodate the variations in plan design and investment alternatives which may be available to participants and beneficiaries under the plan. For these reasons, compliance with the disclosure requirements of the final regulation should not impose any significant costs and burdens on plans or plan sponsors.

Timing of Disclosures

Several commentators on the 1991 proposal requested clarification regarding when investment information must be furnished. The following is intended to address these requests in the context of the disclosure requirements under paragraph (b)(2)(i)(B) of the final regulation. Under

paragraph (b)(2)(i)(B) of the final regulation, a participant or beneficiary will not be considered to have been provided an opportunity to exercise control over the assets in his account unless the participant or beneficiary is provided or has the opportunity to obtain sufficient information to make an informed investment decision. Accordingly, in order to ensure the availability of relief under section 404(c), plans must provide the required information to participants and beneficiaries in sufficient time to give the participant or beneficiary a reasonable opportunity to make informed decisions with regard to his investment options or, where rights are passed through to the participants or beneficiaries, incidents of ownership appurtenant to his investments (e.g., the exercise of voting rights). In this regard, it is expected that each participant and beneficiary will be furnished the information delineated in subparagraphs (*i*)–(*vii*) of paragraph (b)(2)(i)(B)(*1*) prior to the time he is permitted to give investment instructions and that any subsequent material changes in the information will be furnished in sufficient time to enable the participant to take into account such changes prior to making an investment decision. With respect to participant or beneficiary requests for copies of prospectuses (see paragraph (b)(2)(i)(B)(*2*)(*ii*)), and with respect to materials relating to the exercise of voting, tender and similar rights (see paragraph (b)(2)(i)(B)(*1*)(*ix*)), it is expected that the participant or beneficiary will be provided such information in a sufficiently timely manner to enable the participant or beneficiary to make informed investment and voting decisions. The Department notes that to the extent that any of the information required by the regulation has been included in a plan's most recent summary plan description or otherwise provided to participants and beneficiaries prior to the effective date of this regulation, such information is not required to be provided again to such participants or beneficiaries subsequent to the effective date of the regulation unless changes in the information have occurred which are sufficiently material that failure to disclose such changes would deprive the participant or beneficiary of the opportunity to make an informed investment decision.

Two commentors asked that the final regulation indicate that plans are not required to disclose the value of participants' accounts. One commentator stated that this information is not relevant to making an informed choice to invest a percentage of the account in a particular investment alternative. Another stated that the valuation of investment alternatives is often not completed until after elections are made by participants and beneficiaries and monies are allocated to the chosen investments. The Department believes that information concerning the value of investments held in a participant's or beneficiary's account may be critical to a participant or beneficiary in evaluating investment performance and alternative investment options. For this reason, the Department believes that participants and beneficiaries should have access to information concerning the value of shares or units in investment alternatives held in their individual accounts. In this connection, the Department notes that such information is required to be disclosed upon request of a participant or beneficiary under paragraph (b)(2)(i)(B)(*2*)(*v*) of the final regulation. The Department also notes, however, that such requests may be satisfied by using the latest valuation information available to the plan. Inasmuch as valuations are necessary to effectuate investment instructions, the Department does not believe the provision of this information should result in additional costs. Furthermore, there is nothing in the regulation which would preclude a plan from establishing procedures which would serve to limit the frequency of requests for account balance information or from requiring that such requests be made only at particular times as long as such limitations did not result in participants or beneficiaries being prevented from obtaining sufficient investment information to make informed investment decisions within the meaning of paragraph (b)(2)(i)(B) of the final regulation.

Disclosure: Miscellaneous Comments

With regard to the types of information which the 1991 proposed regulation required to be made available, one commentator asked for clarification that plan sponsors are not required by the regulation to release information on competitors or to bring participants and beneficiaries up to the level of financial expertise of the fiduciaries of the plan. No such requirement is imposed by the final regulation.

Several commentators requested a clarification that expenses which represent a share of general fees charged to a fund, such as investment management and brokerage fees, did not have to be disclosed pursuant to paragraph (b)(2)(ii)(A) of the proposal. The Department believes that information concerning such expenses is readily available to plan fiduciaries or investment managers and should be available to participants and beneficiaries because it is the type of information which may affect a participant's or beneficiary's investment decision. For this reason, and as noted earlier, paragraph (b)(2)(ii)(B)(*2*)(*i*) requires that participants and beneficiaries be provided, on request, a narrative description of each designated investment alternative's annual operating expenses (e.g., the investment management fees, administrative fees, transaction costs) which reduce the rate of return to participants and beneficiaries on interests in the investment alternative, and the aggregate amount of such expenses expressed as a percentage of average net assets of the designated investment alternative.

One commentator inquired whether plans are required to revise quarterly reports provided by investment advisers to make them more readily understandable before distributing them to participants and beneficiaries. The final regulation does not require any information forwarded to participants and beneficiaries regarding the investments held by the plan on their behalf to be revised.

Another commentator inquired whether all proxies must be passed through the participants and beneficiaries. As stated previously, with regard to all investment alternatives other than employer security alternatives, the final regulation requires, as a condition to 404(c) relief, only that participants and beneficiaries be provided, subsequent to an investment, with materials relating to voting and similar rights if such rights are passed through to participants and beneficiaries under the terms of the plan (see paragraph (b)(2)(i)(B)(*1*)(*ix*)). Of course, if a plan does not provide for such a pass-through of rights, no 404(c) relief would be available to the plan fiduciaries with regard to the exercise of such rights by such plan fiduciaries.

Lastly, several commentators expressed concern that the providing of investment information to participants and beneficiaries might be construed as rendering "investment advice", within the meaning of section 3(21)(A)(ii) of the Act, resulting in fiduciary responsibility with respect to such advice. It is the view of the Department that providing the disclosures described in subparagraphs (*1*) and (*2*), as well as any other general information concerning available investment

alternatives, including research materials, would not, in and of itself, constitute the rendering of "investment advice."

C. Frequency of Opportunity to Give Investment Instructions

The General Volatility and Three-Month Minimum Rules

The Proposal

Both the 1987 and 1991 proposals were based on the principle that the frequency of opportunity to give investment instructions (i.e., to transfer account assets to or from an investment) is properly judged in relation to the anticipated volatility of the investment. As was explained in the preamble to those proposals, in order to assure that participants and beneficiaries in fact exercise control over the investment of their plan accounts, they must have the ability to transfer their account assets from investment alternatives at intervals reasonably commensurate with the anticipated volatility of the investment in order to minimize the risk of loss. What is reasonable in turn depends on the nature of the investment alternatives which are made available to participants and beneficiaries by the plan.

The 1991 proposed regulation provided a more specific framework than had the 1987 proposal with respect to this issue, while retaining the basic concept concerning the relationship between frequency of transfer opportunity and the volatility of the related investment alternative. This revised framework assigned a specific minimum frequency of transfer opportunity and the volatility of the related investment alternative. This revised framework assigned a specific minimum frequency of transfer opportunity to at least three investment categories made available by a plan to its participants and beneficiaries to satisfy the broad range requirement of paragraph (b)(3) of the proposed regulation. These three (or more) categories subject to the minimum are referred to elsewhere herein as the "core" investment alternatives or categories.[10] Thus, paragraph (b)(2)(ii)(C) of the proposal provided generally that, with respect to each investment alternative made available by a plan, the opportunity to exercise control will not exist unless participants and beneficiaries are afforded the opportunity to give investment instructions with a frequency which is appropriate in light of the volatility to which the investment may reasonably be expected to be subject. This principle is referred to herein as the "general volatility rule". However, subparagraph (*1*) of paragraph (b)(2)(ii)(C) of the proposal required that, regardless of the frequency warranted by an investment's volatility, with regard to at least three of the investment categories designed to satisfy the terms of paragraph (b)(3)(i)(B) (relating to a broad range of investment alternatives), an ERISA section 404(c) plan must at a minimum provide a participant or beneficiary an opportunity to give investment instructions at least once within any three month period (referred to elsewhere herein as the "three-month minimum"). Paragraph (b)(2)(ii)(C)(*1*) of the final regulation clarifies that the minimum of three core alternatives subject to the three-month minimum must itself constitute a broad range of investment alternatives.

Comments

A number of commentators asserted that the general volatility rule was unnecessary and should be eliminated in favor of transfers once every three months for all alternatives, regardless of their volatility. Others urged that, in view of the objective of pension plans to accumulate funds for retirement, the regulation's transferability rules should be structured to require only infrequent ability to transfer to and from investment alternatives.

The Department continues to believe that the ability to transfer to and from each investment alternative with a frequency commensurate with the volatility of the particular investment alternative is needed in order to permit participants and beneficiaries the opportunity to give investment instructions with a frequency commensurate with the volatility of an investment alternative within the framework of a pension plan in any way compromises the general purpose of a pension plan to provide retirement income. Inasmuch as section 404(c) relief under this regulation is conditioned on participants and beneficiaries having the opportunity to give investment instructions with respect to amounts invested in each investment alternative, with a frequency commensurate with the volatility of each such investment alternative, fiduciaries of an ERISA section 404(c) plan should periodically review the volatility of its investment alternatives to ensure that the transfer frequency permitted with respect to each alternative continues to be appropriate.

Other commentators requested that the general volatility rule be clarified by way of example. In this regard, the Department notes that meaningful clarification by way of example is not feasible because the application of the general volatility rule depends upon the particular facts and circumstances which characterize each investment alternative, including its economic environment.

A number of commentators requested clarification of the three-month minimum requirement. Some commentators were concerned that the requirement could be read to require that the three-month period within which participants and beneficiaries must be offered an opportunity to give investment instruction be determined with respect to each participant or beneficiary individually and measured from each individual's last investment instruction. While a plan may offer transfer opportunities on a participant by participant basis, the regulation does not require a plan to do so. In this regard, the Department has included two examples in the regulation at subparagraphs (*2*) and (*3*) of paragraph (f) which are intended to clarify the application of this rule.

One commentator inquired whether investment instructions must be permitted once within any three month period with respect to each core investment alternative, or whether participants and beneficiaries could be limited to transfers with respect to a single investment alternative. The regulation requires that investment instructions must be permitted with respect to each core investment alternative. Several commentators asked if the three-month minimum is applicable only to tranafers among the core investment alternatives. The three-month minimum is applicable only to such transfers and does not apply to transfers between core investment alternatives and other alternatives. For example, if an ERISA 404(c) plan offered participants and beneficiaries the opportunity to invest in real estate limited partnership which prohibited transferability of ownership during the first three years as one of only three investment alternatives available under the plan designed to satisfy paragraph (b)(3)(i)(B), the inability to freely transfer assets out of such investment at least once within any three month interval would cause the plan to fail to meet the requirements of paragraph (b)(2)(ii)(C)(*1*). If, on the other hand, an investment opportunity to invest in such

[10] When referring to the proposal, the final regulation uses the term "category" rather than "alternative" where "category" was used therein. Otherwise, in order to be consistent in usage, the final regulation uses the term "alternative" rather than "category" throughout.

a limited partnership were offered simply as an additional investment alternative and the plan made available at least three other investment alternatives for purposes of satisfying the terms of paragraph (b)(3)(i)(B), and permitted investment instruction no less frequently than once within any three month period with respect to each such alternative, the three month minimum prescribed at paragraph (b)(2)(ii)(C)(*1*) would not apply to the limited partnership interests. Such an investment alternative would, however, be subject to the general volatility rule contained in paragraph (b)(2)(ii)(C) (which requires that the frequency of opportunity to give investment instructions be determined relative to the frequency of opportunity to give investment instructions be determined relative to the anticipated market volatility of the investment) as a condition to affording section 404(c) relief for amounts invested in that alternative#.

Some commentators did not view the three-month minimum as beneficial to plan participants and beneficiaries and requested either no minimum or a different minimum frequency requirement. For example, commentators were concerned that the three-month minimum could adversely impact on the rates of return provided in connection with fixed-rate investment contracts. The Department did not accept these comments. The Department believes that participants and beneficiaries must be afforded the opportunities to give investment instructions at least once within any three month period if they are to have any meaningful control over the assets in their accounts. Moreover, the Department believes that, given the flexibility in plan design afforded by the final regulation, the adoption of the three-month minimum rule should have little, if any, impact on investment returns available to participants and beneficiaries.

A number of commentators inquired about the result under the regulation where a plan which in all other respects meets the requirements for the ERISA section 404(c) plan offers, in addition to three investment alternatives constituting a broad range of investments, an investment alternative with restrictions on investment instructions which would cause the investment alternative to fail the general volatility rule in paragraph (b)(2)(ii)(C). The offering of such an investment alternative would not in and of itself cause a plan otherwise meeting the requirements for an ERISA section 404(c) plan to lose its status as an ERISA section 404(c) plan. However, there would be no section 404(c) relief accorded to plan fiduciaries with respect to amounts invested in an investment alternative which does not permit investment instructions with a frequency commensurate with the reasonably expected volatility of the investment alternative.

With respect to the general volatility rule and the three-month minimum rule, the Department notes that while there is nothing in the regulation that precludes the assessment of a penalty or valuation adjustment for early or premature withdrawals from an investment alternative, any penalties or adjustments for such withdrawals must be reasonable in light of the investment. Substantial penalties or adjustments upon withdrawal from an investment alternative may have the effect of limiting the ability of participants and beneficiaries to give investment instructions in accordance with the general volatility or three-month minimum transferability rules of the regulation, thereby depriving participants and beneficiaries of the opportunity to exercise control with respect to such investment alternative.[11]

The Volatile Investment Transferability Rule

The Proposal

In addition to the foregoing rules, paragraph (b)(2)(ii)(C)(*2*) of the proposed regulation would have required that the least volatile of the core investment alternatives permit the participant or beneficiary to give investment instructions no less frequently than he is permitted to give such instructions with respect to the most volatile investment alternative made available by the plan (referred to elsewhere herein as the "volatile investment transferability rule"). The notice of proposed rulemaking explained that this rule was necessary because the ability to transfer assets to or from a volatile investment has meaning only where there is in fact another investment vehicle available which can just as readily transfer out or accept assets.

Comments

Many commentators expressed the view that the volatile investment transferability rule should either be eliminated or significantly changed. Several commentators indicated that the rule could interfere with the operation of fixed rate investment contracts. Other commentators expressed concern about the necessity of ongoing volatility measurements to permit compliance with the regulation, particularly with regard to core investment alternatives. Commentators also indicated that, if the rule were to be retained, the requirement should apply only to transfers out of the most volatile alternative into the least volatile core alternative, and not to transfer out of the least volatile core alternative. A number of commentators made specific suggestions concerning the kinds of alternatives which would be used to satisfy the requirement that an alternative be available to receive transfers out of the most volatile investments. Suggestions included: a default-type fund; any "temporary investment fund"; any "low-risk" vehicle; and any "less volatile" investment alternative.

A number of commentators expressed the view that the general volatility rule should serve as the standard for determining the required transfer frequency under the volatile investment transferability rule. Accordingly, they urged that, with respect to a plan which permits transfers into and out of its most volatile investment alternative more frequently than would be required by the volatility of the fund, the regulation requires only that a participant or beneficiary be permitted to give investment instructions with respect to transfer into the least volatile core investment alternative no less frequently than would be required by the volatility of the most volatile investment alternative.

The Department continues to believe that, given the transferability and diversification requirements applicable to core investment alternatives, participants and beneficiaries must be afforded the opportunity to direct their investments from more volatile investments into a core investment alternative with a frequency commensurate with the volatility of the more volatile investment alternative. However, in response to the concerns raised by commentators, the Department has provided additional flexibility under the final regulation, which is discussed below.

The Final Regulation

The volatile investment transferability rule contained in the final regulation is substantially different in a number of

[11] Whether any given penalty or adjustment is unreasonable or otherwise limits a participant's or beneficiary's ability to give investment instructions in accordance with the general volatility or three-month minimum rule is a factual determination which must be made on an investment by investment basis, taking into account factors such as the nature of the investment alternative, its rate of return, market forces, *etc.*

respects from the rule that was proposed. First, the final regulation provides two alternative methods for accommodating transfers out of more volatile investments (other than investments in employer securities with respect to which a special rule has been adopted). Second, transfers from more volatile investments are not required to be accommodated by the least volatile of the core investment alternatives. Third, the final regulation requires only that a core investment alternative accept transfers *into* the alternative (rather than both into and out of the alternative) with a frequency commensurate with the more volatile investments. Fourth, the volatile investment transferability rule, as adopted, is framed in terms of when participants and beneficiaries are permitted to give investment instructions with respect to an investment alternative, rather than with respect to the volatility of the investment alternative. This change was made in view of the fact that an ERISA section 404(c) plan could provide for participant instruction with respect to an investment alternative more frequently than would be required by the general volatility rule, which provides that, as a condition to section 404(c) relief, participants and beneficiaries must, at a minimum, be permitted to give investment instruction with a frequency commensurate with the reasonably expected volatility of each investment alternative. Lastly, the volatile investment transferability rule, as adopted, assures that transfers are available from any investment alternative available under the plan which permits participants and beneficiaries to give investment instructions more frequently than once within any three month period. The following is a discussion of the methods for accommodating transfers provided for in the final regulation.

The first method for accommodating transfers is contained in paragraph (b)(2)(ii)(C)(*2*)(*i*). Under this method, at least one of the core investment alternatives meeting the requirements of paragraph (b)(2)(ii)(C)(*1*) (rather than only the least volatile of the core investment alternatives, as in the proposal) must permit participants and beneficiaries to give investment instructions as frequently as they are permitted to give investment instructions with respect to any investment alternative made available by the plan which permits participants and beneficiaries to give investment instructions more frequently than once within any three month period. In addition, as noted above, the core investment alternative selected to satisfy this requirement need only permit such instructions with regard to transfers into the alternative (rather than both into and out of the alternative, as in the proposal).

Rather than permitting transfers directly to a core investment alternative, a plan may elect the alternative method for accommodating transfers, contained in paragraph (b)(2)(ii)(C)(*2*)(*ii*). In general, this method permits the establishment and use of a "cash-equivalency" type fund, subfund or account for the temporary holding of proceeds from investments pending the next opportunity afforded participants and beneficiaries to direct investments into one of the core investment alternatives. Specifically, the final regulation provides that, with respect to each investment alternative which permits participants and beneficiaries to give investment instructions more frequently than once within any three month period, participants and beneficiaries must be permitted to direct their investments from such alternative into an income producing, low risk, liquid fund, subfund or account as frequently as they are permitted to give investment instructions with respect to the particular investment alternative. In addition, participants and beneficiaries must be permitted to direct investments from such low risk fund, subfund or account into one of the core investment alternatives (which must permit investment instructions at least once within any three month period pursuant to paragraph (b)(2)(ii)(C)(*1*)), as frequently as they are permitted to give instruction with respect to such core alternative.

The following example illustrates the application of the second method. In addition to offering three core investment alternatives, which constitute a "broad range" of investments (alternatives A, B and C), Plan P offers a high risk equity fund which permits investment instructions more frequently than once within any three month period and a one year certificate of deposit which is fully insured by a Federal agency. Plan P permits participants and beneficiaries to direct investments from the equity fund into an income producing, low risk, liquid subfund of the equity fund as frequently as they are permitted to give investment instructions with respect to the equity fund. Subsequently, participants and beneficiaries are permitted to direct their investments from the subfund into core investment alternative A at such time as investment instructions are permitted with respect to alternative A. No similar direction into a low-risk fund, subfund or account is permitted with respect to investments from the certificate of deposit. Plan P meets the conditions of the second method for accommodating transfers, provided that the fiduciary of Plan P has determined that the volatility of the certificate of deposit does not require (and the Plan does not permit) investment instructions more frequently than once within any three month period with respect to the certificate of deposit.

The foregoing methods of accommodating transfers apply to investment alternatives, other than investment alternatives which permit the direct or indirect acquisition or sale of any employer security ("employer security alternatives"). As noted earlier, a special rule is contained in the final regulation for employer security alternatives. The Department believes that a special rule for dispositions of interests in employer security alternatives is appropriate given the concerns of Congress and others about the potential for employer influence over participant investment decisions.[12]

In general, the methods for accommodating transfers from employer security alternatives are essentially the same as for other alternatives, except that participants and beneficiaries directing their investments from an employer security alternative (either directly to core investment alternatives or indirectly, through a low-risk, liquid fund, subfund or account, to core alternatives) must be afforded the opportunity to direct their investments from the employer security alternative into any of the available core investment alternatives. The Department believes that affording participants and beneficiaries the opportunity to invest proceeds from an employer security alternative in the core investment alternative of their choice is necessary in order to avoid the intentional or unintentional establishment of disincentives to dispose of interests in an employer security alternative. Such disincentives could result, for example, where plan design requires that participant proceeds from an employer security alternative may only be transferred to a particular core alternative.

Specifically, the final regulation provides that, for each investment alternative which is designed to permit the direct or indirect acquisition or sale of any employer security, contained in paragraph (b)(2)(ii)(C)(*3*)(*i*) of the final

[12] See n.29

regulation, all of the core investment alternatives must permit participants and beneficiaries to give investment instructions with regard to transfer *into* each of the alternatives as frequently as participants and beneficiaries are permitted to give investment instructions with respect to the employer security alternatives(s).

As an alternative, paragraph (b)(2)(ii)(C)(*3*)(*ii*) of the final regulation permits plans to provide for participant and beneficiary direction of investments from each employer security alternative(s) into an income producing, low risk, liquid fund, subfund or account as frequently as the participants and beneficiaries are permitted to give investment instructions with respect to the employer security alternative(s). Under this method, participants and beneficiaries must be permitted to direct investments from such low risk fund into each of the core investment alternatives as frequently as they are permitted to give investment instructions with respect to each such core investment alternative. The special rule is designed to assure that participants and beneficiaries will be permitted to choose from a broad range of investment alternatives when deciding to transfer assets from an alternative which permits the direct or indirect acquisition or sale of any employer security.

The Uniformity Requirement

Paragraph (b)(2)(ii)(C) of the proposed regulation provided that, in order for a restriction to be deemed reasonable, it must be applied on a uniform and consistent basis to all directing participants and beneficiaries of that plan (referred to herein as "the "uniformity requirement").

A number of commentators believed that two requirements contained in the proposed regulation would, if finalized, conflict with the transfer restrictions set forth in the rules under section 16 of the Securities and Exchange Act of 1934 (the '34 Act). These requirements were the uniformity requirement, and the general rule contained in paragraph (b)(2)(ii)(C), which required that the frequency of opportunity to give investment instructions with respect to an investment alternative must be determined relative to the anticipated market volatility of the investment.

Section 16 of the '34 Act imposes sanctions on "insiders", including officers and directors of an issuer of securities, if they do not comply with restrictions on transfers of securities of certain issuers. The restrictions generally impose sanctions if a purchase and sale occur within six months of each other. Rule 16b–3 provides that the plan itself may preclude certain transfers of securities as one method of complying with the restrictions contained in section 16(b). Under the proposal, if a plan imposed such restrictions only upon "insiders", the plan would lose its status as a section 404(c) plan as it would not comply with the uniformity requirements.

In this regard, commentators urged the Department to provide in the final regulation that transfer restrictions on transactions in employer securities by insiders which are included in a plan to compel insiders to comply with section 16 of the '34 Act will not cause a plan to lose its status as an ERISA section 404(c) plan. Another commentator contended that the uniformity requirement should be deleted because there are situations in which plan sponsors have a legitimate need to make distinctions between participants. The commentator stated that a plan sponsor may want to have different rules for participants in a subsidiary's portion of its plan, or for union and non-union employees. Another commentator noted in this connection that fixed rate investment contracts may prohibit the entrance of acquired company participants in order to make the provider's costs and risks predictable. Other commentators were concerned that the uniformity requirement not be interpreted to prohibit variation in frequency restrictions among different plans maintained by the same affiliated group.

In view of the concerns expressed by the commentators, the Department has decided to eliminate the uniformity requirement. Accordingly, under the final regulation, if a plan contains restrictions with respect to investments in securities in order to facilitate compliance with section 16 which are applicable only to "insiders", such restrictions will not affect the plan's status as a section 404(c) plan; but if such restrictions are not consistent with the general volatility rule, investments in securities by "insiders" made subject to the restrictions will not be afforded relief by section 404(c).

While the final regulation does not contain a uniformity requirement, the Department notes that section 401(a)(4) of the Internal Revenue Code prohibits discrimination in favor of highly compensated employees in the contributions or benefits provided under a plan and may be applicable to the specific restrictions contained in an ERISA section 404(c) plan.

D. Other Limitations on the Exercise of Control

The Proposal

Paragraph (b)(2)(ii)(A) of the proposal provided that a plan did not fail to provide the participant or beneficiary with an opportunity to exercise control over his individual account merely because it charges the participant's or beneficiary's account for the reasonable expenses of carrying out his instructions, if reasonable procedures are established under the plan to inform participants and beneficiaries that such charges are made and to inform each participant and beneficiary periodically of the actual expenses incurred with respect to his individual account. Two commentators indicated that expense information is not currently provided and would be very costly to provide, and therefore, urged that only the nature of expenses charged against accounts should be required to be described in the SPD or another document.

The Department continues to believe that participants and beneficiaries should be periodically apprised of the actual expenses charged to their respective individual accounts, as this information is directly relevant to the amount of assets in their account and future investment decisions. Accordingly, this requirement has been retained in the final regulation. However, paragraph (b)(2)(ii)(A) has been modified to delete the requirement to inform participants and beneficiaries that such charges are made inasmuch as this information is required to be disclosed to participants and beneficiaries pursuant to paragraph (b)(2)(i)(B)(*1*)(*v*) of the final regulation.

One commentator inquired whether anything in the regulation would preclude a plan from charging only the accounts of former employees for the expenses of implementing their investment instructions. Nothing in the regulation would prevent a plan from charging such expenses only to the accounts of former employees. However, the Department notes that sections 403, 404 and 408(b)(2) of ERISA would require that such charges be reasonable.[13]

Paragraph (b)(2)(ii)(B) of the proposal provided that a plan did not fail to provide an opportunity for a participant or beneficiary to exercise control merely because the plan permits a fiduciary to decline to implement certain instructions of a participant or

[13] See ERISA section 408(b)(2) relating to the provision of services by a party in interest to the plan, and 29 CFR 2550.408b–2.

beneficiary. As stated in the 1991 proposal, the delineated list was not intended to constitute an exhaustive list of allowable limitations on a participant's or beneficiary's exercise of control. In response to a request for clarification on this point, paragraph (b)(2)(ii)(B) of the final regulation has been modified to make clear that the instructions which a plan may permit a fiduciary to decline are not limited to those listed in the regulation.[14]

Paragraph (b)(2)(ii)(B) of the proposal had listed, among the instructions which a plan could permit a fiduciary to decline to implement, instructions which could result in a loss in excess of the directing participant's or beneficiary's account balance. In the final regulation, this type of instruction has been moved from paragraph (b)(2)(ii)(B) to paragraph (d)(2)(ii)(D) [15] to clarify that a plan fiduciary would not be relieved of liability with respect to a participant's or beneficiary's instructions which could result in a loss in excess of that participant's or beneficiary's account balance.

Another change was made to paragraph (b)(2)(ii)(B) of the final regulation relating to the types of instructions listed in paragraph (d)(2)(ii). Rather than listing instructions which are described at paragraph (d)(2)(ii), as did paragraph (b)(2)(ii)(B) of the proposal, paragraph (b)(2)(ii)(B) of the final regulation provides that a fiduciary may decline to implement participant and beneficiary instructions which are described at paragraph (d)(2)(ii) of this section, as well as instructions specified in the plan, including those which would result in a prohibited transaction and those which would generate income that would be taxable to the plan. This change was made in order to permit a fiduciary to decline to implement participant instructions where the regulation provides that he would not be relieved of any liability resulting from implementing such instructions (see paragraph (d)(2)(ii)), even where the plan does not specifically authorize him to do so.

Comments

Commentators asked for clarification regarding various technical aspects of plan operation which may impact upon a participant's or beneficiary's opportunity to exercise control within the meaning of paragraph (b)(2) or (b)(3) (relating to a broad range of investment alternatives) of the regulation. Some commentators inquired whether a plan may require notice before a designated transfer date to provide time for implementation of instructions. Other commentators requested clarification that, as long as transfer opportunities are provided, an affirmative election may be given effect with respect to all future contributions until it is affirmatively revoked. Similarly, one commentator expressed the view that, with respect to former employees, the requirement that participants be permitted to exercise independent control should be met where a plan provides that the account balances of former employees who are permitted to withdraw their funds at any time will be invested in accordance with the most recent investment election made prior to termination. Another commentator urged the Department to indicate that sufficient control exists where a plan provides that, if a beneficiary fails to direct with respect to assets in his account, the plan will promptly distribute the account assets to the beneficiary.

The Department notes that there is nothing in the final regulation which precludes a plan from providing for a notice period to provide time for implementation of instructions, as long as such notice period does not interfere with or compromise a participant's or beneficiary's opportunity to exercise control. Also, as long as transfer opportunities are made available to participants and beneficiaries in accordance with the regulations including former employee-participants, an affirmative election may be given effect until affirmatively revoked by the participant or beneficiary. With regard to the permissibility of providing that assets will be distributed to a beneficiary if he fails to direct, the Department notes that a distribution pursuant to such a provision would not constitute the exercise of control, within the meaning of the regulation, by the participant or beneficiary. Therefore, the relief afforded by section 404(c) would not be available with respect to the distribution.

A number of commentators requested a clarification regarding the permissibility of specific types of transfer restrictions. For example, some urged the Department to permit provisions requiring direction with respect to specified increments of the account balance. One commentator requested that the Department specifically permit ERISA section 404(c) plans to place maximum limits on the portion of a participants's account balance which may be invested in each equity fund offered by the plan.

In this regard, it is the view of the Department that conditioning the ability of participants and beneficiaries to give investment instruction on the transfer of a minimum amount or percentage, e.g., $100 or 5%, of transferable assets would not, in and of itself, cause the plan to fail to be a section 404(c) plan, provided that the amount or percentage had some reasonable relationship to administrative costs attendant to such transfers and provided that such limitations are applied on a reasonable and consistent basis. On the other hand, it is the view of the Department that limitations on the maximum amount or percentage that a participant or beneficiary may invest in any investment alternative which is necessary to satisfy the broad range requirement of the regulation would so restrict a participant's or beneficiary's opportunity to exercise control that the plan would fail to be a section 404(c) plan. The imposition of such limitations on investment alternatives which do not constitute part of a plan's broad range of investment alternatives, however, would not affect the status of the plan as a section 404(c) plan inasmuch as participants and beneficiaries would nonetheless have the opportunity to exercise control with respect to a broad range of investment alternatives. See example in paragraph (f)(4).

One commentator inquired whether a plan may preclude transfers into an investment vehicle when it decides to eliminate the vehicle as an alternative. Although the regulation would not preclude such a restriction, the Department notes that the plan would nevertheless be required to offer a broad range of investment alternatives within the meaning of the regulation subsequent to elimination of the investment alternative as a condition for section 404(c) relief.

2. Broad Range of Investments

The Proposal

The 1991 proposal provided, in paragraph (b)(3)(i), that a plan offers a broad range of investments only where participants and beneficiaries are afforded a reasonable opportunity to materially affect the potential risk and return on amounts in their accounts; choose from at least three diversified investment categories; and diversify investments so as to minimize the risk of

---

[14] Although a plan may impose other reasonable limitations, the totality of such restrictions must not so restrict a participant's or beneficiary's opportunity to exercise control so as to in effect cause the plan to fail to provide participants and beneficiaries an opportunity to exercise control within the meaning of paragraph (b)(2) of this section.

[15] Paragraph (d)(2)(ii) of the final regulation was designated paragraph (e)(2)(ii) in the proposal.

large losses. Unlike the 1987 proposal, which described the specific categories of investments which were required to be made available by an ERISA section 404(C) plan, paragraph (b)(3)(i)(B) of the 1991 proposal was based upon the general requirement that participants and beneficiaries have the opportunity to choose from at least three diversified categories of investments. Specifically, paragraph (b)(3)(i)(B)(*1*) required that each category have materially different risk and return characteristics. Paragraph (b)(3)(i)(B)(*2*) of the proposal required that the three categories of investments in the aggregate enable the participant, by choosing among them, to achieve a portfolio with aggregate risk and return characteristics at any point within the range normally appropriate for the participant, thereby enabling participants and beneficiaries to construct a portfolio with risk and return characteristics appropriate to their circumstances. Finally, paragraph (b)(3)(i)(B)(*3*) of the proposal required that each of the investment categories, when combined with investments in either of the other categories, must tend to minimize the risk of a participant's portfolio at any given level of expected return. With the exception of certain minor modifications, discussed below, the Department has adopted the proposed broad range of investments requirement in the final regulation.

Comments

Most of the commentators supported the Department's approach to defining a broad range of investment alternatives by reference to risk and return characteristics, rather than prescribing specific investment objectives, as was the case in the 1987 proposal. Nonetheless, a number of comments were submitted on the broad range of investment alternatives provisions of the proposed regulation. These comments are summarized and addressed below.

Several commentators requested clarification that the regulation requires both that the categories be different from each other and that they contain diversified investments. One commentator pointed out that the other requirements in paragraph (b)(3)(i)(B) ensure that the categories must be different from each other, and suggested changing the language of this paragraph to "three categories of diversified investments". In response to these comments, the text of the regulation has been changed to make it clear that each of the three investment alternatives intended to satisfy the broad range requirement must be diversified. (See paragraph (b)(3)(i)(B)(*1*) of the final regulation).[16]

Several commentators argued that the regulation should only require two investment categories. One commentator urged the Department to adopt a special rule in this regard for collectively bargained plans. The Department continues to believe that a plan offers a broad range of investment alternatives only where participants and beneficiaries are provided with the opportunity to invest in at least three investment alternatives meeting the requirements of paragraph (b)(3)(i) of the regulation. The Department is unable to agree that participants and beneficiaries are afforded a reasonable opportunity to exercise meaningful control over the assets in their account where such participants and beneficiaries are limited to two investment choices. Accordingly, the Department has retained the requirement that participants and beneficiaries be provided the opportunity to choose among at least three investment alternatives.

Two commentators urged that the regulation either require or endorse specific types of investment instruments. One of the commentators suggested that the regulation which contains instruments guaranteed either directly or indirectly by the U.S. Government, or permit participants to transfer at five year intervals to a plan in which the investment options are unlimited. The other commentator urged the Department to specify that U.S. Savings Bonds can serve as one of the minimum of three diversified categories required by paragraph (b)(3)(i)(B) and to except them from the minimum transfer opportunity requirement. The Department believes that the general approach of requiring at least three diversified investment alternatives with materially different risk and return characteristics will better serve the needs of both plant sponsors and participants and beneficiaries than would an approach which attempts to specify particular investment alternatives which are necessary to constitute a broard range of investments.

Similarly, several commentators indicated that the standards contained in paragraph (b)(3)(i)(B) for the minimum of three broad range investment alternatives are vague and difficult to apply, and urged the Department to include examples in the final regulation of combinations of investment alternatives which meet the risk and return criteria of the regulation. The final regulation is intended to give plan sponsors broard latitude in developing combinations of investment alternatives which meet the broard range requirement. For this reason, the Department is concerned that providing examples of combinations of investment alternatives which meet the broad range requirement may be construed as an endorsement by the Department of such combinations of investment alternatives and thereby serve, directly or indirectly, to limit the flexibility in plan design intended by the regulation. Therefore, the Department has not adopted this suggestion.

Two commentators raised the question of whether employer securities may be one of the minimum of three broad range investment alternatives. Inasmuch as employer securities would not themselves represent a diversified investment alternative, as required by paragraph (b)(3)(i)(B)(*1*), employer securities or a fund of such securities could not be used as one of the investment alternatives intended to satisfy the broad range of investments requirements of the regulation.

A number of commentators asserted that the types of restrictions often contained in fixed rate investment contracts issued by banks and insurance companies should not cause the contracts to fail to qualify as one of the minimum of three diversified categories of investments required by paragraph (b)(3)(i)(B). The commentators mentioned a number of different types of restrictions, including "equity wash" restrictions, prohibitions on direct transfers from such investment contracts to competing fixed income funds, requirements that investments in contracts remain for a certain minimum period, and a fee or charge for pre-maturity redemption or a market value adjustment for suspension of a contract. An "equity wash" restriction is one which requires that transfers to and or from a fixed rate investment contract be made through an equity fund where the funds must remain for a specified period of time.

There is nothing in the regulation which would specifically preclude offering a bank (or similar institution) or insurance company fixed rate investment contract as one of the investment alternatives intended to satisfy the broad range requirement merely because such contract imposes

[16] Even if a plan offers a diverse portfolio of investments in each of the investment alternatives, it may not meet the general diversification standard of the final regulation. For example, a plan may fail to provide a participant or beneficiary an opportunity to diversify his account if all of the available investment alternatives relate to one industry.

fees or charges for premature withdrawls, provided that, as noted earlier, such fees or charges are reasonable in light of the investment and are not so substantial as to have the effect of depriving participants and beneficiaries of the opportunity to exercise meaningful control over such investment. To the extent that any investment alternative intended to satisfy the broad range requirement of the regulation contained restrictions that would effectively limit the ability of a participant or beneficiary to give investment instructions at least once within any three month period with respect to transfers between the core investment alternatives, the plan would fail to satisfy the requirements of paragraph (b)(2)(ii)(C)(*1*). Thus, an equity wash or similar restriction on any core investment alternative, such as a fixed rate investment contract, which would serve to preclude direct transfers from the core investment alternative to any of the other core investment alternatives meeting the requirements of paragraph (b)(2)(ii)(C)(*1*) would prevent the investment alternative with such a restriction from serving as one of the core investment alternatives. However, there is nothing in the regulation which would preclude an investment alternative with an "equity wash" or similar restriction from being offered as an investment alternative in addition to the core investment alternatives. The mere fact that an "equity wash" restriction may require participants to transfer assets from such a non-core investment alternative into an equity fund, which is offered as one of the core investment alternatives, would not in and of itself affect a plan's status as an ERISA section 404(c) plan, or the availability of section 404(c) relief with respect to transactions involving the non-core investment alternative. An ERISA section 404(c) plan must, however, permit any assets transferred from the non-core investment alternative pursuant to an equity wash or similar restriction to a core equity fund to be transferred to and from the other core alternatives as frequently as are other assets in the core equity fund, and, in no event, less frequently than once within any three month period. (See the general volatility rule in paragraph (b)(2)(ii)(C) and the three month minimum rule in paragraph (b)(2)(ii)(C)(*1*).)

Two commentators requested clarification that the requirement in paragraph (b)(3)(i)(B)(*1*) (designated (b)(3)(i)(B)(*2*) in the final regulation) that each of the categories of investments have materially different risk and return characteristics does not require a 404(c) plan to offer either a very conservative or a very risky investment alternative. The Department notes that paragraph (b)(3)(i)(B)(*2*) of the final regulation merely requires that each of the categories of investments have materially different risk and return characteristics, without specification as to the nature of the risks. Paragraph (b)(3)(i)(B)(*3*) does, however, require, for purposes of the broad range of investment alternatives requirement, that the available investment alternatives enable participants and beneficiaries to achieve a portfolio with aggregate risk and return characteristics at any point within the range "normally appropriate for the participant."

A number of commentators indicated that the language of paragraph (b)(3)(i)(B)(*3*) of the proposal (redesignated (b)(3)(i)(B)(*4*) in the final regulation) should be clarified. This paragraph required that each of the three investment categories intended to satisfy the broad range of investments in either of the other categories, tends to minimize the risk of a participant's portfolio at any given level of expected return. Several commentators made suggestions on how to modify the language, while others suggested that this provision should be deleted or, at a minimum, explained. In an effort to provide clarification, the language of paragraph (b)(3)(i)(B)(*3*) of the proposal has been modified to read: "each of which when combined with investments in the other alternatives tends to minimize through diversification the overall risk of a participant's or beneficiary's portfolio".[17]

The Department believes that the criteria set forth in paragraph (b)(3)(i)(B) reflect well established investment principles which are appropriate to the defining of a broad range of investment alternatives. The Department also believes that adoption of these principles provides plan sponsors the design flexibility necessary to accommodate changes in participant needs and changes in investment products and markets. Accordingly, the Department has retained the criteria set forth in paragraph (b)(3)(i)(B), with the minor modifications discussed above. The purpose of the broad range requirement is to enable participants and beneficiaries to achieve various levels on the risk and return spectrum while at the same time minimizing the risk presented by their portfolio through the allocation of the assets in their accounts.

[17] The language in paragraph (b)(3)(i)(B)(*3*) of the proposal stated: "[e]ach of which when combined with investments in either of the other categories tends to minimize the overall risk of a participant's or beneficiary's portfolio". This language implied that a play may have only three core investment alternatives. The words "either of" were deleted to indicate that three is the minimum number of alternatives required by paragraph (b)(3)(i)(B).

A. Diversification

In addition to requiring that participants and beneficiaries be provided a reasonable opportunity to choose from among at least three diversified investment categories, paragraph (b)(3)(i)(C) of the proposal required that ERISA section 404(c) plans provide participants and beneficiaries the opportunity to diversify the investments of that portion of their individual accounts with respect to which they are permitted to exercise control so as to minimize the risk of large losses, taking into account the nature of the plan and the size of participants' accounts. The proposal explained, in paragraph (b)(3)(ii), that where look-through investment vehicles are available as investment alternatives to participants or beneficiaries, the underlying investments of the look-through investment vehicle shall be considered in determining whether the plan satisfies the requirements of paragraph (b)(3)(i)(B) and paragraph (b)(3)(i)(C) (relating to diversification of investments).[18] With regard to the diversification requirement contained in paragraph (b)(3)(i)(C), the Department recognizes that a participant may need a substantial amount of investment capital to achieve such diversification if investment alternatives are limited to direct investment in individual instruments (such as common stocks, bonds, etc.). However, broad diversification may be achieved with a much smaller amount of capital where assets are held in the form of an undivided interest in a pool of broadly diversified investment instruments. Therefore, paragraph (b)(3)(i)(C) of the final regulation stresses that where a plan provides the opportunity to invest

[18] As is further explained below, the concept of a "pooled investment fund" contained in the 1987 proposal was expanded in the proposal to include investments which do not permit the investors to share in the gains or losses of the underlying assets of the investment vehicle. Thus, the investment vehicles defined in paragraph (e)(1) are referred to in the final regulation as "look-through investment vehicles" because of the treatment provided these vehicles under paragraph (b)(3)(ii). That provision permits consideration of the underlying investments of these vehicles in determining whether the diversification requirements of paragraph (b)(3)(i) are met. Such designation is relevant to this regulation only and should not be read to imply that the underlying assets of such entities include plan assets. (See 29 CFR § 2510.3-101 for plan asset rules regarding investment vehicles).

solely in individual investment instruments, such an opportunity will not meet the broad range requirement of paragraph (b)(3)(i) unless the portion of the account balance over which a plan participant or beneficiary is permitted to exercise control is large enough to permit diversification through that form of investment. Where such portion of the account balance of any participant or beneficiary is not sufficiently large, a plan can meet the requirements of paragraph (b)(3)(i) only by making available the opportunity to invest in look-through investment vehicles.[19] Of course, a plan which permits a participant to invest his account assets in any available investment implicitly makes available all look-through investment vehicles and therefore would meet the requirements of paragraph (b)(3)(i) regardless of the account balances of the participants.

One commentator requested that the Department clarify how frequently the underlying investments of look-through investment vehicles must be monitored for compliance with paragraphs (b)(3)(i)(B) and (b)(3)(i)(C) of the regulation. The extent to which fiduciaries are required to monitor any designated investment will depend on the facts and circumstances of each case and vary from investment to investment, depending on, among other things, the degree of risk and the economic environment.

B. Definition of "Look-Through Investment Vehicle"

Paragraph (f)(1) of the proposed regulation defined "look-through investment vehicle" as: (i) An investment company described in section 3(a) of the Investment Company Act of 1940, or a series investment company described in section 18(f) of the 1940 Act and the regulations thereunder,[20] or any of the segregated portfolios of such companies; (ii) a common or collective trust fund or a pooled investment fund maintained by a bank, a bank deposit, or a guaranteed investment contract of a bank; (iii) a pooled separate account or a guaranteed investment contract or an insurance company qualified to do business in a state; or (iv) any entity whose assets include plan assets by reason of a plan's investment in the entity. For purposes of the final regulation, paragraph (f) of the proposal has been redesignated paragraph (e).

The types of vehicles encompassed within the definition of look-through investment vehicle were intended to be those for which the underlying assets could properly be considered in determining whether the diversification requirement of section 404(a)(1)(C) is met. In this regard, the Conference Report indicates at page 305 that a determination of diversification with regard to a plan investment in a mutual fund, a bank investment vehicle or insurance company contracts would be achieved through an examination of the underlying assets and investments of the bank or insurance company. Paragraph (e)(1) of the final regulation retains the definition of look-through investment vehicle contained in the proposal with minor modifications discussed below.

As noted in the preamble to the proposal, in general, a determination of whether any particular investment vehicle comes within the definition of the term "look-through investment vehicle" is a factual determination and, thus, must be made on a case by case basis. However, the Department did note that group trusts as defined in IRS Rev. Rul. 81–100 would , at a minimum, meet paragraph (f)(1)(iv) of the definition (paragraph (e)(1)(iv) of the final regulation) since they are entities whose assets include plan assets by reason of a plan's investment in them.[21] As such,they would be considered look-through investment vehicles for purposes of the regulation.

Commentators on the 1991 proposal were concerned about the status under the regulation of employer-managed arrangements,[22] commonly referred to as "in-house funds", and which, according to these commentators, are not typically considered to be entities separate from a plan's trust. As described, such arrangements, holding plan assets, would constitute look-through investment vehicles pursuant to subparagraph (iv) of paragraph (e)(1). Other commentators were concerned about the status of other portfolios and subfunds which are not typically considered to be entities separate from a plan's trust. These arrangements also would constitute look-through investment vehicles described in subparagraph (iv) if their assets contain plan assets pursuant to 29 CFR 2510.3–101.

Several commentators requested that the Department clarify whether the term "look-through investment vehicle" is applicable to certain arrangements involving fixed rate investment contracts and investment contract-type instruments and requested that, if not, the regulation be modified to include such investments. In this regard, commentators specifically mentioned "guaranteed investment contracts" funds, "synthetic guaranteed investment contracts", "immediate participation contracts" and "deposit administration contracts". In addition, several commentators urged the Department to amend the definition of look-through investment vehicle to include all insurance company general account products and annuity contracts. In general, the record does not contain sufficient information with respect to these contractual arrangements to permit the Department to make a determination as to whether and to what extent such contracts should constitute look-through investment vehicles for purposes of this regulation. However, the Department notes that funds of fixed rate investment contracts would appear to meet subparagraph (iv) of the definition of look-through investment vehicle because the contracts contained in the funds constitute plan assets. In addition, subparagraph (ii) of the definition of look-through investment vehicle, contained in paragraph (e)(1) of the final regulation, has been modified in the final regulation to indicate that, for example, fixed rate investment contracts issued by savings and loan associations are look-through investment vehicles for purposes of the regulation. Paragraph (e)(1)(ii) of the final regulation now reads: "[a] common or collective trust fund or a pooled investment fund maintained by a bank or similar institution, a deposit in a bank or similar institution, or a fixed rate investment contract of a bank or similar institution."

[19] In this regard, a plan which is designed to be an ERISA 404(c) plan for all plan participants may fail to meet the "broad range of investment alternatives" requirement because the investment alternatives offered by the plan would not permit those participants with small account balances to diversify their investments. In such circumstances, the plan would be considered an ERISA section 404(c) plan solely with regard to those transactions which are directed by a participant or beneficiary who may direct investment of an amount in his account which is large enough to permit broad diversification through the investment alternatives offered by that plan, and only to the extent that all other requirements of this regulation were met.

[20] 17 CFR section 270.18F–2.

[21] This concept is described and clarified in the Department's regulation at 29 CFR 2510.3–101, 51 FR 41262 (November 13, 1986).

[22] ERISA section 404(c) does not provide relief with respect to any section 406 violation which may occur based on a fiduciary's choice of itself or a person or entity in whom it has an interest to provide services for the plan for a fee or other compensation, or based on a fiduciary's limitation of investment alternatives to include those managed by itself or its affiliates.

3. The Special Rule for Designated Look-Through Investment Vehicles and Designated Investment Managers

The proposed regulation included a special rule which would apply to plans which made available one or more designated look-through investment vehicles or one or more designated investment managers as investment alternatives. The proposal provided that a plan whose investment alternatives include any specified look-through investment vehicle or the right to appoint a designated investment manager is an ERISA section 404(c) plan only if, among other things, an independent plan fiduciary is required to designate the look-through investment vehicles or investment managers offered as investment alternatives. The proposal included an exception to the special rule for designated look-through investment vehicles and investment managers for plans sponsored by entities described in section 3(38) of ERISA. The exception permitted such entities (without using an independent fiduciary) to designate themselves or an affiliate as an available investment manager or designate a look-through investment vehicle managed by themselves or an affiliate as an available investment alternative under their own plans under certain limited circumstances.

A number of commentators on the 1991 proposal expressed the opinion that the requirement for an independent fiduciary is unnecessary, since any fiduciary (independent or not) who selects a look-through investment vehicle or an investment manager must bear responsibility under the fiduciary responsibility provisions of ERISA to do so prudently and solely in the interest of participants and beneficiaries.

After carefully reviewing the public comment on this matter, the Department has determined that the general fiduciary provisions are sufficient to ensure that the interests of plan participants and beneficiaries are protected. The Department emphasizes, however, that the act of designating investment alternatives (including look-through investment vehicles and investment managers) in an ERISA section 404(c) plan is a fiduciary function to which the limitation on liability provided by section 404(c) is not applicable. All of the fiduciary provisions of ERISA remain applicable to both the initial designation of investment alternatives and investment managers and the ongoing determination that such alternatives and managers remain suitable and prudent investment alternatives for the plan. Therefore the particular plan fiduciaries responsible for performing these functions must do so in accordance with ERISA. For the aforementioned reasons, paragraph (c) of the proposal has been deleted from the final regulation and the remaining paragraphs of the regulation have been redesignated.

IV. The Independent Exercise of Control

The Proposal

In view of the transactional nature of the relief provided by section 404(c), the 1991 proposal provided that a determination as to whether a participant or beneficiary has in fact exercised control must necessarily be made on a case by case basis, taking into account the relevant facts and circumstances.

The proposal also stated that sections 404(c)(1) and 404(c)(2) apply only where the participant's exercise of control has been independent. This is consistent with the Conference Report discussion of section 404(c).[23] In this regard, the proposal described certain factors that indicate the absence of independent control. These are: (1) Improper influence by a plan fiduciary or plan sponsor with respect to the transaction; (2) concealment from the participant or beneficiary by a plan fiduciary of material nonpublic facts regarding the transaction that are known by the plan fiduciary, unless the disclosure of such information by the plan fiduciary to the participant or beneficiary would violate securities or banking laws; and (3) the legal incompetence of the participant or beneficiary where the plan fiduciary accepting his instructions knows him to be incompetent.[24]

Paragraph (d)(3) of the proposal (redesignated paragraph (c)(3) in the final regulation) also stated that where a participant or beneficiary exercises control over the assets in his account to engage in a sale, exchange or leasing of property, or a loan with a plan fiduciary or an affiliate of such fiduciary, such exercise of control will not be "independent" (regardless of whether it meets the other requirements of the regulation) unless the terms of the transaction are fair and reasonable to the participant or beneficiary at the time of the transaction. A transaction will be deemed to be fair and reasonable to the participant or beneficiary if he pays no more than, or receives no less than, adequate consideration as defined in section 3(18) of the Act in connection with the transaction. These standards were adopted from established principles relating to the circumstances under which consent of a beneficiary of a trust will relieve a trustee from liability for breach of his fiduciary duties.[25]

The Department points out that, for some instructions which would result in a direct or indirect transaction between an ERISA section 404(c) plan and a plan fiduciary or an affiliate of such a fiduciary who is also a plan sponsor or an affiliate of the sponsor, paragraph (d)(2)(ii)(E) provides that no relief is available under section 404(c). For other instructions which would result in such transactions, paragraph (d)(2)(ii)(E) provides that no relief is available unless certain conditions are satisfied.

Paragraph (d)(4) of the proposed regulation (paragraph (c)(4) of the final regulation) contained a provision intended to clarify the effect of the independent exercise of control on the duties of plan fiduciaries. It stated that a fiduciary has no obligation to provide advice to a participant or beneficiary with respect to an investment made pursuant to the participant's or beneficiary's independent exercise of control under an ERISA section 404(c) plan. The wording of paragraph (c)(4) of the final regulation has been modified to clarify that there is no obligation to provide investment advice at any time.

---

[23] Conference Report at 306.

[24] With respect to the third factor, the Department did not intend to impose an affirmative duty on the implementing fiduciary to evaluate a participant's or beneficiary's competence. However, the Department is of the opinion that the implementing fiduciary should not be able to invoke section 404(c) to avoid liability for losses resulting from the imprudent instructions of a participant where the fiduciary has actual knowledge of such incompetence.

[25] Restatement (Second) of Trusts section 216 (1959) provides:

Section 216. Consent of Beneficiary

(1) Except as stated in Subsections (2) and (3), a beneficiary cannot hold the trustee liable for omission of the trustee as a breach of trust if the beneficiary prior to or at the time of the act or omission consented to it.

(2) The consent of the beneficiary does not preclude him from holding the trustee liable for a breach of trust, if—

(a) The beneficiary was under an incapacity at the time of such consent or of such act or omission; or

(b) The beneficiary, when he gave his consent, did not know of his rights and of the material facts which the trustee did not reasonably believe that the beneficiary knew; or

(c) The consent of the beneficiary was induced by improper conduct of the trustee.

(3) Where the trustee has an adverse interest in the transaction, the consent of the beneficiary does not preclude him from holding the trustee liable for a breach of trust not only under the circumstances stated in Subsection (2), but also if the transaction to which the beneficiary consented involved a bargain which was not fair and reasonable.

Comments

The Department received substantive comment on several areas of paragraph (d) of the proposal, *i.e.*, improper influence by a plan fiduciary or the plan sponsor, disclosure of material information, the failure to provide for fiduciary relief in the absence of affirmative instruction, and the lack of an obligation to advise.

One commentator asked for clarification regarding what constitutes improper influence within the meaning of proposed paragraph (d)(2)(i) (paragraph (c)(2)(i) of the final regulation). While the Department is not prepared to give specific examples, the question of whether there has been improper influence by a plan sponsor or fiduciary in a given situation is inherently factual in nature and can only be determined on a case by case basis, taking into account all surrounding facts and circumstances.

A number of commentators urged the Department to either eliminate or clarify or narrow the scope of the disclosure requirement of paragraph (d)(2)(ii) of the proposed regulation. In response to the concerns of the commentators, the Department has modified the disclosure requirement, now set forth in paragraph (c)(2)(ii) of the final regulation. As modified, paragraph (c)(2)(ii) provides that a plan fiduciary must reveal material non-public information regarding the investment unless such disclosure to the directing participant or beneficiary would violate any provision of federal law or any provision of state law which is no preempted by the Act. The only exceptions to this disclosure requirement under the proposal were violations of securities or banking laws. The Department also notes that the regulation is not intended to require a plan fiduciary to disclose information to the general public.

Two commentators expressed concern that paragraph (d)(4) of the proposed regulation might be interpreted to suggest that, in the case of a non-404(c) plan which provides for some degree of participant and beneficiary direction, there may be an affirmative duty to advise participants and beneficiaries. The Department notes that fiduciaries of a plan that is not a section 404(c) plan are not afforded the transactional relief from the ERISA fiduciary responsibility provisions provided by ERISA section 404(c). A discussion of the duties of fiduciaries of non-404(c) plans is beyond the scope of this regulation.

Absence of Affirmative Instruction

A number of commentators on the 1991 proposal requested that section 404(c) relief be extended to certain situations where there is an absence of affirmative participant direction. Such relief was provided in the 1987 proposal if, among other conditions, amounts were invested in a "safe fund", which was required to be one of two specifically described vehicles—*i.e.*, an interest-bearing deposit in a bank or similar financial institution fully insured against loss by the United States or an agency of the United States, or a pooled investment fund, the assets of which consist solely of cash and securities issued or guaranteed by the United States or one of its agencies. This "safe/default" fund was not included in the proposal because commentators indicated that obtaining relief under an approach requiring that amounts be invested in the vehicles described in 1987proposal would interfere with the operation of fixed rate investment contract alternative [26] and that sponsors would rather retain fiduciary responsibility for contributions as to which participants and beneficiaries have not submitted instructions than avail themselves of the relief described in the proposal. Further, the comments and the statistical evidence submitted indicated that very few plans providing for direction by participants and beneficiaries offered the vehicles specified, and that for plans which did, a negligible amount of plan assets was directed into such, options.

Some commentators on the 1991 proposal favored a reinstatement of the 1987 approach, modified to permit the use of other vehicles. Suggestions included: Any "safe" investment vehicle which is "designed to preserve principal and provide income and liquidity", and adding to the types of vehicles included in the 1987 proposal money market mutual funds and bank collective investment funds.

In view of the record indicating that the vehicles described in the 1987 proposal would reduce flexibility in plan design and investments, in addition to the fact that such options were rarely offered or utilized when offered, the Department has decided not to reinstate a default option in the final regulation. Accordingly, the final regulation retains the approach of the 1991 proposal, pursuant to which plan fiduciaries will not be relieved of responsibility for investment decisions under an ERISA section 404(c) plan unless those decisions have affirmatively been made by participants and beneficiaries who have exercised independent control. In this regard, it should be noted that, as in any other type of ERISA-covered plan, fiduciaries of ERISA section 404(c) plans have a duty to provide for the investment of idle plan assets, and lack of participant direction will not absolve a fiduciary from such duties. The Department also notes that plan provisions providing for investments in the absence of an affirmative exercise of control may be followed only if the fiduciary determinations that following such provisions would not violate his fiduciary duties, including his duties under sections 404 and 406 of ERISA.

Once a participant or beneficiary in a section 404(c) plan exercises independent control by giving investment instruction with respect to assets or future contributions, section 404(c) relief will continue to be available with respect to that instruction as long as the participant or beneficiary continues to have the opportunity to exercise control over such assets and contributions. Consistent with this principle, it should be recognized that, until an affirmative instruction is given, there can be no relief under ERISA section 404(c).

Finally, although the regulation requires an affirmative investment instruction from a participant or beneficiary in order for the relief provided by section 404(c) to be available, the final regulation also provides that a participant or beneficiary will be deemed to have exercised control with regard to the exercise of voting, tender and similar rights under the circumstances described in new subparagraph (ii) of paragraph (c)(1). Paragraph (c)(1)(ii) of the final regulation provides that, once 404(c) relief is provided for an investment held in a participant's or beneficiary's account as a result of the independent exercise of control within the meaning of paragraph (c) of this regulation, a participant or beneficiary will be deemed to have exercised control with respect to the incidents of ownership of such investment (i.e., voting, tender and similar rights) to the extent that: (1) The participant or beneficiary is provided a reasonable opportunity to give instruction with respect to such incidents of ownership, including the provision of the information described in paragraph (b)(2)(i)(B)(*1*)(*ix*), and (2) the participant or beneficiary has not failed to exercise independent control with respect to such incidents of ownership by reason of the circumstances described in paragraph

[26] Commentators explained that the issuer of a fixed rate investment contract would view the described alternatives as competing vehicles, and that the availability of such a vehicle in a plan would result in a lowering of the return on the fixed rate investment contract.

(c)(2)). The Department notes, however, that, because the right to tender is fundamental to the ability of a participant or beneficiary to exercise control over his investment in an investment alternative, notwithstanding the fact that the investment was itself the result of an exercise of control within the meaning of paragraph (c) of this section, if an opportunity to exercise the right to tender occurs with respect to the investment and such right is not passed through to the investing participant or beneficiary, the investment will cease to be considered to be held as the result of an exercise of control within the meaning of this section.

Two commentators suggested that a participant or beneficiary should be considered to have made an affirmative instruction where the Summary Plan Description (SPD) discloses the investment alternative which is used when no affirmative instruction is received and where the participant or beneficiary signs an instruction form which notifies him of what will be done with money contributed to the plan if no instruction is received. The Department notes that a participant or beneficiary will not be considered to have given an affirmative instruction merely as a result of being apprised that certain investments will be made on his behalf in the absence of instructions to the contrary. On the other hand, a participant or beneficiary will be considered to have given affirmative instruction where the participant or beneficiary signs an instruction form specifying how assets in his account will be invested if he has exercised independent control in fact within the meaning of paragraph (c) of this section with respect to such signature. In this regard, the Department notes that the form and manner in which investment alternatives are presented to participants and beneficiaries of a plan would be facts taken into consideration in determining whether a participant or beneficiary, in fact, exercised independent control in giving investment instructions.

V. Effect of Independent Exercise of Control

In general. As provided in section 404(c)(1), paragraph (e)(1) of the proposal (paragraph (d)(1) of the final regulation) stated that, if a participant or beneficiary of a 404(c) plan exercises independent control in the manner described in paragraph (d) of the proposal (paragraph (c) of the final regulation), such participant or beneficiary is not a fiduciary by reason of such exercise of control. The two primary effects of this provision are: (1) Because a participant or beneficiary is not a fiduciary, he would not violate the prohibited transaction provisions of Title I of ERISA if he exercises control over assets in his account to engage in a transaction with a party in interest; and (2) other fiduciaries generally would have no co-fiduciary liability under section 405 of the Act with respect to participant and beneficiary investment decisions under ERISA section 404(c) plans.

With regard to other plan fiduciaries, section 404(c) provides that plan fiduciaries are relieved of liability for losses, or with respect to breaches of the requirements of Title I, which "result" from a participant's or beneficiary's exercise of control over individual account assets. Thus, given the transactional nature of the relief provided by section 404(c), it is necessary to determine in any particular case whether alleged losses or violations resulted from participant's or beneficiary's investment decision.

It should be noted that, in following any particular participant's or beneficiary's instruction under a section 404 (c)plan, a fiduciary is relieved of liability only with respect to the consequences to the account of the individual participant or beneficiary whose instruction he is following; that fiduciary is not, however, relieved of any fiduciary obligation he may owe to any other plan participant or beneficiary. The proposal illustrated the scope of the relief provided by section 404(c) by giving an example which stated that, if a participant in an ERISA section 404(c) plan directs the investment of a portion of his individual account in a bank-managed collective trust fund pursuant to an arrangement with the bank manager of the fund under which the manager will loan a portion of the fund's assets to the participant's cousin, who is a service provider to the plan, the fund manager may be relieved of liability with respect to losses sustained by the account of the directing participant by reason of section 404(c), but would not be relieved of liability with respect to any other plans or plan participants that have interests in the collective trust fund. Four commentators asserted that section 404(c) was intended to further limit liability on the part of plan fiduciaries. After careful consideration, the Department has determined not to change the scope of the limitation of liability afforded by the regulation.

The proposal stated that a fiduciary is relieved of responsibility only for the direct and necessary consequences of a participant's exercise of control.[27] Accordingly, if a participant gives investment instruction to a plan fiduciary, and, due to the imprudence of the fiduciary in carrying out the instructions, the participant suffers a loss, then the fiduciary is liable for such loss because it resulted from a breach of his duties as a fiduciary rather than from the participant's exercise of control.

Similarly, the preamble to the proposal stated that if a participant gives investment instructions that may be carried out in more than one way, and the fiduciary chooses a method of carrying out the instructions that results in a breach of his obligations as a fiduciary, then he is liable for any resulting losses because such losses would not be a necessary consequence of the participant's exercise of control. Thus, if a participant directs a fiduciary to acquire certain securities, but does not specify the manner in which the acquisition is to be effected, and the fiduciary causes a party in interest to execute the transaction, the fiduciary would be liable with respect to the resulting prohibited transaction (unless an exemption is otherwise available) notwithstanding the participant's exercise of control. Example 7 in paragraph (f) of the final regulation contains a similar illustration.

Paragraph (e)(2)(iii) of the (proposal (d)(2)(iii) of the final regulation) also specifically stated that the individual investment decisions of an investment manager are not direct and necessary results of the participant's designation of the investment manager or of investment in a pooled investment fund managed by the investment manager. However, the proposal also provided that this rule should not be construed to

[27] In this regard, the Department points out that the act of limiting or designating investment options which are intended to constitute all or part of the investment universe of an ERISA 404(c) plan is a fiduciary function which, whether achieved through fiduciary designation or express plan language, is not a direct or necessary result of any participant direction of such plan. Thus, for example, in the case of look-through investment vehicles, the plan fiduciary has a fiduciary obligation to prudently select such vehicles, as well as a residual fiduciary obligation to periodically evaluate the performance of such vehicles to determine, based on that evaluation, whether the vehicles should continue to be available as participant investment options. Similar fiduciary obligations would exist in the case of an investment universe consisting of investment alternatives which are not look-through investment vehicles but which are specifically designated by plan fiduciaries. In those situations where the ERISA section 404(c) plan by its own provisions limits the investment universe by designating specific investment alternatives which are not look-through investment vehicles, the plan fiduciary must comply with the requirements of ERISA section 404(a)(1)(D

impose co-fiduciary liability on a fiduciary who would otherwise be relieved of liability under section 404(c). Thus, if a participant chooses an investment manager who imprudently invests plan assets, the investment manager will not be relieved of liability because his imprudence is not a direct and necessary result of the participant's exercise of control. However, other plan fiduciaries would be relieved of liability under section 405, even if, for example, they had knowledge of the investment manager's imprudence decisions. The preamble to the proposal explained that a fiduciary that designates an investment manager or pooled fund would, however, be required to take any known imprudence of the manager into account in determining whether to continue the designation of the manager.[28] This paragraph has been retained in the final regulation, and examples 8, 9, 10 and 11 in paragraph (f) of the final regulation illustrate these statements.

Comments

A number of commentators raised questions about liability on the part of both fiduciaries and participants and beneficiaries in 404(c) plans. One commentator asked for clarification that section 405 of ERISA remains applicable to determinations of fiduciary liability in a 404(c) plan. Where a fiduciary is not relieved of co-fiduciary liability by reason of section 404(c)(2), section 405 remains applicable. See examples 7 and 8 in paragraph (f) of the final regulation.

A question was asked about the possible results where a plan permits a fiduciary to decline to implement certain described instructions, but the fiduciary implements one of the described instructions. Under these circumstances, the plan fiduciary has discretion with respect to whether to implement the instruction, and would be responsible for exercising such discretion in a prudent manner (see ERISA section 404(a)(1)(B)). If the fiduciary exercises his discretion in a prudent manner, he would be relieved of responsibility for the results of such decision under paragraph (d)(2) of the final regulation.[29] Under paragraph (d)(1) of the final regulation, the directing participant or beneficiary would continue to be relieved of liability under section 404(c) whether or not the plan fiduciary acts prudently with respect to such instructions.

1. Limitation on Liability of Plan Fiduciaries

Paragraph (e)(2)(ii) of the 1991 proposal (redesignated paragraph (d)(2)(ii) of the final regulation) contained four exceptions to the general rule regarding the relief provided to a fiduciary. Under these exceptions, a plan fiduciary would not be relieved of liability with respect to a participant's instructions which: (a) Would not be in accordance with the documents and instruments governing the plan; (b) would cause a fiduciary to maintain the indicia of ownership of any assests of the plan outside of the jurisdiction of the district courts of United States (other than as permitted by section 404(b) of the Act); (c) would jeopardize the plan's tax qualified status under the Code; or (d) would result in a direct or indirect: (1) sale, exchange, or lease of property between a plan sponsor or any affiliate of the sponsor and the plan except for the purchase or sale of any qualifying employer security which meets the conditions of section 408(e) of ERISA and paragraph (e)(2)(ii)(D)(4) of the proposal (redesignated paragraph (d)(2)(ii)(E)(e) of the final regulation), (2) loan to a plan sponsor or any affiliate of the sponsor, (3) acquisition or sale of any employer real property, or (4) acquisition or sale of any employer security, whether or not the transaction involved the employer, unless it meets the conditions of paragraph (e)(2)(ii)(D)(*4*) of the regulation (paragraph (d)(2)(ii)(E)(*4*) of the final regulation).

The final regulation adds two provisions to paragraph (d)(2)(ii) to clarify the intent of the proposed regulation. First, as discussed earlier, instructions which could result in a loss in excess of a participant's or beneficiary's account balance have been moved from paragraph (b)(2)(ii)(B) to clarify that a plan fiduciary would not be relieved of any liability resulting from implementing such instructions. Second, in response to a request for clarification concerning the effect of implementing an instruction to purchase an interest in a plan sponsor-managed arrangement, often called in "in-house fund", subparagraph (E)(*1*) of paragraph (d)(2)(ii) has been modified to make clear that the relief provided by paragraph (d)(2)(i) of the regulation would not be unavailable to a plan fiduciary for implementing an instruction to purchase or sell any interest in a fund, subfund or portfolio managed by a plan sponsor or an affiliate of the sponsor merely because such an instruction may result in a direct or indirect sale or exchange of property between a plan sponsor or an affiliate of the sponsor and the plan. However, the Department notes that the relief provided by paragraph (d)(2)(i) of the regulation is inapplicable to any section 406 violation which may occur based on a fiduciary's designation of an affiliated entity as an available investment alternative under the plan.

Paragraph (e)(2)(ii) of the proposal (paragraph (d)(2)(ii) of the final regulation) made the exceptions listed therein applicable only to plan fiduciaries. Thus, the effect of paragraphs (1) and (2) of paragraph (e) of the proposal was to provide that plan participants and beneficiaries who exercise independent control to instruct a fiduciary of an ERISA section 404(c) plan to engage in a transaction described in paragraph (e)(2)(ii) were, nonetheless, not fiduciaries by reason of such exercise of control. One commentator inquired whether the distinction between plan fiduciaries and participants and beneficiaries was intended. The distinction was intended. No changes have been made to these provisions in the final regulation.

The Department received a number of comments relating to participant loans and employer securities. Each of these is discussed below.

A. Participant Loans

As noted above, paragraph (e)(2)(ii)(D)(*2*) of the 1991 proposal provided that the relief from fiduciary liability provided under ERISA section 404(c) does not extend to transactions in which assets of a participant's account are loaned to the plan sponsor or any affiliate of the plan sponsor. Paragraph (f)(4) of the proposal defined an "affiliate" of a person as including an employee of that person. Therefore, no relief from fiduciary liability was available under the 1991 proposal for loans of a participant's account assets to the participant. A number of commentators argued that 404(c) relief should be available for participant loans

[28] This provision, dealing with the individual investment decisions of an investment manager relates only to the scope of the relief provided by section 404(c)(2), and is not intended to create fiduciary duties which would not otherwise exist. Thus, even though the individual decisions of the investment manager of an investment company registered under the Investment Company Act of 1940 would not be considered to "result" from a participant's decision to invest in the investment company, the manager would have no liability under ERISA for any losses experienced by the mutual fund because mutual fund assets are not plan assets and, therefore, mutual fund investment advisers are excluded from the statutory definition of "fiduciary" in ERISA (see sections 3(21)(B) and 401(b)(1) of ERISA).

[29] Of course, if the instruction is one which is listed in paragraph (d)(2)(ii) of the final regulation, the limitation on fiduciary liability provided by section 404(c) contained in paragraph (d)(2)(i) of the regulation would be unavailable to the plan fiduciary pursuant to the provisions of that paragraph.

which comply with the terms of ERISA section 408(b)(1), the statutory exemption for such loans. Several of the commentators indicated that the effect of giving 404(c) relief for such loans would be to obviate the need for a prudence determination as to the availability of these loans.

Compliance with the conditions of section 408(b)(1) requires, among other things, that loans bear a reasonable rate of interest and are adequately secured. These and the other conditions of the statutory exemption require a plan to make determinations which are similar to prudence determinations. Therefore, including a provision in the final regulation which would extend section 404(c) relief to participant loans would potentially undermine compliance with the conditions of the statutory exemption. Accordingly, the Department has decided not to extend relief under section 404(c) to such loans. The terms of paragraph (e)(2)(ii)(D)(*2*) of the proposal have been adopted in paragraph (d)(2)(ii)(E)(*2*) of the final regulation, without change.

B. Employer Securities

Paragraph (e)(2)(ii)(D)(*4*) of the 1991 proposal stated that the relief from the fiduciary responsibility provisions provided by section 404(c) of ERISA would extend to any participant instruction which, if implemented, would result in the acquisition or sale of any employer security unless certain conditions were met. The condition which elicited the most comments was the requirement that activities relating to the purchase, sale, and exercise of voting and similar rights with respect to such securities must be the responsibility of an independent fiduciary who carries out such activities on a confidential basis. The proposal provided that, for this purpose, a fiduciary is not independent if the fiduciary is affiliated with any sponsor of the plan.

The Independent Fiduciary and Confidentiality Requirements

A significant number of commentators argued that the independent fiduciary and confidentiality requirements of the proposal are unnecessary. Some of the commentators argue that the general rule in paragraph (d)(2)(i) of the proposed regulation (paragraph (c)(2)(i) of the final regulation), which states that no relief is available under section 404(c) where a participant or beneficiary is subjected to improper influence by a plan fiduciary or the plan sponsor, provides sufficient protection. Other commentators argued that the fact that the burden of proving compliance with section 404(c) is on the person asserting applicability of the section, when combined with all of the provisions of paragraph (d)(2), offered sufficient protection to participants and beneficiaries.

A number of commentators stated that the independent fiduciary and confidentiality requirements should be limited to particular situations where the potential for undue influence is greatest, such as tender offers, exchange offers and contested board elections. Others stated that the requirements may be justified for all voting decisions.

Many commentators argued that, in most or all situations, the regulation should permit internal administration of employer securities transactions as long as adequate safeguards with respect to confidentiality and insulation from improper influence are provided, with the burden of proving that confidentiality had been maintained being placed on the plan sponsor. In this regard, they stated that plan sponsors that had invested significant resources in establishing in-house plan administration should not be forced to choose between restructuring their plan administration and relief under section 404(c) for investments in employer securities.

The discussion in the Conference Room on section 404(c) expresses concern regarding participant-directed investments which may inure to the benefit of a plan sponsor and indicates that Congress expected that regulations under section 404(c) would impose stringent standards with respect to such investments.[30]

In this regard, the Department notes that it received over 32 written comments on the independent fiduciary and confidentiality requirements of the proposal, in addition to testimony at the public hearing. With the exception of one comment from a service provider who offers employer securities administrative services, there were no comments or testimony in support of the proposal's requirement for an independent fiduciary to handle all activities relating to the purchase, sale, and voting of employer securities. Virtually all of the comments on this aspect of the regulation expressed strong objection to the proposal's requirement for an independent fiduciary. These commentators argued that the final regulation should permit in-house administration of employer securities. The majority of these commentators indicated that internal safeguards can be established to ensure that participant investment information relating to employer securities is maintained on a confidential basis and that such safeguards should be required. The majority of commentators also recognized that there may be instances when the engagement of an independent fiduciary may be appropriate, but not with respect to every transaction involving employer securities. There were no comments which suggested that the establishment of internal plan procedures would be inadequate to ensure the confidentiality of participant-directed investments in employer securities.

On the basis of these comments, the Department has determined to modify the conditions under which 404(c) coverage would be extended to participant-directed investments in employer securities. In this regard, the final regulation eliminates the requirement that an independent fiduciary must be responsible for activities relating to the purchase, sale and exercise of rights with respect to employer securities except in situations which involve a potential for undue employer influence. This condition has been replaced by a requirement that an ERISA section 404(c) plan have in place procedures designed to safeguard the confidentiality of information relating to the purchase, sale and holding and exercise of voting and similar rights with respect to such securities. Further, an ERISA section 404(c) plan must designate a plan fiduciary to monitor plan compliance with these procedures. These requirements are contained in paragraphs (d)(2)(ii)(E)(*4*)(*vii*)–(*ix*) of the final regulation. It should be noted that the confidentiality requirements of the final regulation are not limited to only purchases and sales of employer securities, but also apply to the holding of such securities by participants and beneficiaries.

In addition to requiring that a designated plan fiduciary be responsible for monitoring compliance with the confidentiality procedures, paragraph (d)(2)(ii)(E)(*4*)(*ix*) of the final regulation requires that an independent fiduciary

[30] The relevant passage of the Conference Report states:

"The conferees expect that the (section 404(c)) regulations will provide for stringent standards with respect to determining whether there is an independent exercise of control where the investments may inure to the direct or indirect benefit of the plan sponsor since in this case participants might be subject to pressure with respect to investment decisions. (Because of the difficulty of ensuring that there is independence of choice in an employer established individual retirement account, it is expected that the regulations will generally provide that sufficient individual control will not exist with respect to the acquisition of employer securities by participants and beneficiaries under this type of plan)."

Conference Report at 305.

be appointed to carry out activities relating to any situations which the designated plan fiduciary (i.e., the fiduciary responsible for monitoring the confidentiality procedures) determines have a potential for undue employer influence upon participants and beneficiaries. The Department agrees with the commentators who indicated that situations where the potential for undue employer influence may exist include tender offers, exchange offers and contested board elections.

The Department believes that the aforementioned requirements for procedures to ensure confidentiality, for the designation of a plan fiduciary, who is responsible for monitoring compliance with such procedures, and for the appointment of an independent fiduciary when the designated plan fiduciary determines a potential for undue employer influence exists, when combined with the disclosure requirement of paragraph (b)(2)(i)(B)(*1*)(*viii*), the other requirements in paragraph (d)(2) of the final regulation, and the general rule in paragraph (c) of the final regulation that the relief provided by section 404(c) is available only where a participant or beneficiary has exercised independent control in fact with respect to the investment of assets in his individual account, significantly limit the potential for undue influence by the employer. For purposes of subparagraph (*ix*), a fiduciary is not independent if the fiduciary is affiliated with any sponsor of the plan. The term "affiliate" is defined in paragraph (e)(3) of the final regulation.

One commentator inquired whether a bank which serves as the transfer agent for a plan sponsor's stock could be an independent fiduciary. In general, any party, including the transfer agent for a plan sponsor's stock, which is not an "affiliate" of the plan sponsor, as defined in paragraph (e)(3), may be an independent fiduciary for purposes of paragraph (d)(2)(ii)(*4*)(*ix*). However, whether any non-affiliated party is capable of discharging his duties as an independent fiduciary solely in the interest of the plan's participants and beneficiaries and independently of the plan sponsor is a factual determination which must be made on a case by case basis by the designated plan fiduciary responsible for appointing the independent fiduciary. Lastly, it should be noted that the appointment of an independent fiduciary is itself a fiduciary act governed by the provisions of sections 403 and 404 of ERISA.

Publicly Traded Securities

The requirements in paragraphs (e)(2)(ii)(D)(*4*) (*iii*) and (*iv*) of the proposal that employer securities be publicly traded on a national exchange or other generally recognized market with sufficient frequency and in sufficient volume to assure prompt execution of buy and sell orders were proposed to ensure that participants can dispose of such securities in a public market which is not subject to the influence of the employer. These conditions, which have been retained in the final regulation in paragraphs (d)(2)(ii)(E)(*4*) (*iii*) and (*iv*), also limit the potential for overreaching by ensuring that participants have ready access to price quotations for the securities, as well as the ability to direct trades which will be promptly executed.

The requirement in paragraph (e)(2)(ii)(D)(*4*)(*iv*) of the proposed regulation that employer securities for which 404(c) relief is available must be traded with sufficient frequency and in sufficient volume to assure that participant directions to buy or sell the security may be acted upon promptly and efficiently concerned a number of commentators. They urged the Department to permit plan fiduciaries to exercise discretion, while retaining 404(c) relief, in timing the execution of participant instructions to buy and sell employer securities in order to minimize the impact on the market for the employer's securities. In this regard, the Department notes that the relief provided by section 404(c) is transactional in nature and applies only to the direct and necessary consequences of a participant's exercise of control. Therefore, a fiduciary who exercises discretion as to the timing of the execution of transactions in employer securities would be responsible under Part 4 of Title I of ERISA for the exercise of discretion in timing of the purchase or sale.

Shareholder Information

One commentator asked for clarification of the scope of the requirement in subparagraph (*v*) of the proposed regulation that information provided to shareholders of employer securities be provided to participants and beneficiaries with accounts holding such securities. Subparagraph (*v*), which is retained in the final regulation, requires that participants and beneficiaries receive all information provided to non-plan shareholders of employer securities.

Pass-Through of Voting and Similar Rights

Two commentators requested either clarification or elimination of the requirement in subparagraph (*vi*) of the proposal that voting and similar rights with respect to employer securities be passed through to participants and beneficiaries with accounts holding such securities. With regard to this requirement, the Department notes that the word "tender" has been added to subparagraph (*vi*) in the final regulation in order to clarify that tender rights with respect to employer securities must also be passed through. Similarly, the word "tender" has also been added to subparagraph (*vii*) of paragraph (d)(2)(ii)(E)(*4*) of the final regulation to indicate that information relating to the exercise of tender rights with respect to employer securities must be maintained in accordance with procedures designed to safeguard the confidentiality of such information.

Subparagraph (*vi*) of the final regulation requires that all proxies be passed through to participants and beneficiaries. Further, if both information and voting, tender and similar rights are not passed through, no relief under this regulation would be available with respect to any transaction involving employer securities, including the acquisition, holding and sale of such securities. However, the Department notes that paragraph (c)(1)(ii) of the regulation provides that a participant or beneficiary will be deemed to have exercised control with respect to the incidents of ownership of an interest in any investment alternative held in his account as a result of the independent exercise of control if he has a reasonable opportunity to give instruction with respect to such incidents of ownership, and the participant or beneficiary has not failed to exercise control by reason of the circumstances described in paragraph (c)(2). Thus, where participants and beneficiaries have the opportunity to vote securities and the trustee of an ERISA section 404(c) plan has not received direction, the trustee generally has no obligation to vote securities which are held in the accounts of participants and beneficiaries as a result of the independent exercise of control.[31]

[31] As stated above, paragraph (c)(1)(ii) of the final regulation requires that the participant or beneficiary not file to exercise control with respect to incidents of ownership by reason of the circumstances described in paragraph (c)(2). Thus, for example, a participant or beneficiary will not be deemed to have exercised control with regard to a

Continued

If the trustee does exercise voting rights in such cases, it would be responsible under Part 4 of Title I of ERISA for the exercise of such discretion.

Confidentiality Requirement

A number of commentators perceived a conflict between the confidentiality requirement and the reporting requirement under section 16 of the Securities Exchange Act of 1934 (the '34 Act). Under section 16 of the '34 Act, officers, directors and ten percent beneficial owners of a company's class of equity securities registered under the '34 Act ("insiders") are required to file reports with the SEC concerning their ownership of and transactions in any class of equity securities of the company. Insiders are required to file copies of these reports with the issuer (typically the plan sponsor), and the issuer is required to monitor these filings and disclose in Form 10–K reports, Form N–SAR reports and proxy and information statements any violations of reporting requirements. Commentators urged the Department to either specifically exclude purchases and sales by persons covered by section 16 from the confidentiality requirement or clarify that compliance with the securities laws does not cause plan fiduciaries to lose 404(c) relief. The Department agrees that the confidentiality requirement would, if implemented, present the potential for the conflict described by the commentators. Accordingly, the final regulation contains an exception to the confidentiality requirement contained in subparagraph (*vii*) of paragraph (d)(2)(ii)(E)(*4*) which permits disclosure as necessary to comply with other Federal laws or state laws not preempted by the Act.

Employer Stock Funds

Several commentators requested clarification regarding the treatment under the regulation of employer stock funds, in which participants and beneficiaries receive units of interest. They stated that these funds are widely used, and were concerned that the regulation might be read to provide relief only where identified securities are allocated to the accounts of participants and beneficiaries. The final regulation does not preclude the use of such funds. However, the requirements of the regulation, including all of the requirements of paragraph (d)(2)(ii)(E)(*4*), remain applicable to transactions in units of interest in an employer stock fund. Therefore, the underlying securities in the fund must be traded with sufficient frequency and in sufficient volume to assure that participant and beneficiary instructions to buy or redeem units in the fund may be acted upon promptly and efficiently. Further, information provided to non-plan shareholders of employer securities, as well as voting, tender and similar rights with respect to the securities in the fund, must be passed through to participants and beneficiaries invested in the fund. Also, the fund must permit participants and beneficiaries to give investment instructions with a frequency appropriate to the anticipated volatility of the underlying securities.

Qualifying Employer Securities

A number of commentators asked that the regulation permit other types of qualifying employer securities to qualify under paragraph (e)(2)(ii)(D)(*4*) of the proposal (paragraph (d)(2)(ii)(E)(*4*) of the final regulation) for section 404(c) relief. One commentator asserted that convertible securities which have the same dividend and liquidation rights as publicly traded stock should be permitted. Another stated that non-publicly traded securities that are subject to put options should be included. Two stated that publicly traded partnership interests which are qualifying employer securities within the meaning of section 407(d)(5) should be permitted. Finally, one argued that 404(c) relief should be available for all qualifying employer securities.

The Department believes that, for purposes of 404(c) relief, important protections are provided by the requirements relating to employer securities that such securities must be qualifying employer securities which are stock which is publicly traded with sufficient frequency and in sufficient volume to assure that participant and beneficiary instructions to buy or sell the securities may be acted upon promptly and efficiently. The commentators have not suggested alternate mechanisms which would offer similar protections.

Therefore, the final regulation retains these conditions (with one modification) in paragraphs (d)(2)(ii)(E)(*4*) (*i*), (*ii*), (*iii*), and (*iv*) (paragraphs (e)(2)(D)(4) (*i*), (*ii*), (*iii*), and (*iv*) of the proposal). However, because section 407(d)(5) of ERISA defines the term "qualifying employer security" to include certain publicly traded partnership interests, and because such securities are publicly traded, the Department has amended paragraph (d)(2)(ii)(E)(*4*)(*ii*) to include such publicly traded partnership interests which are equity interests. All of the requirements of paragraph (d)(2)(ii)(E)(*4*) are applicable to such partnership interests. For example, such partnership interests must be traded with sufficient frequency and in sufficient volume to assure that participant and beneficiary directions to buy or sell the interests may be acted upon promptly and efficiently.

Effect of Failure to Comply

A number of commentators asked for clarification that a plan which fails to comply with the requirements of paragraph (d)(2)(ii)(E)(*4*) loses section 404(c) protection only for transactions in employer securities. A plan which otherwise qualifies as an ERISA section 404(c) plan would not cease to be an ERISA section 404(c) plan merely because a particular non-core investment alternative offered under the plan (e.g., an employer security investment alternative) fails to meet the requirements for section 404(c) relief. Accordingly, to the extent that an employer security investment alternative fails to comply with the requirements of paragraph (d)(2)(ii)(E)(*4*), the fiduciaries of a plan which otherwise meets the requirements of section 404(c) would lose section 404(c) protection and would be responsible as fiduciaries only with respect to transactions involving the employer security investment alternative. Relief under section 404(c) for other investment alternatives would not be affected.

2. Tax on Prohibited Transactions

Paragraph (e)(3) of the proposal explained that the relief provided by section 404(c) of ERISA applies only to the provisions of part 4 of Title I of ERISA. There is no provision in the Internal Revenue Code corresponding to section 404(c) of Title I. Thus, there is no statutory exemption from the excise taxes imposed by the Code on prohibited transactions involving an ERISA section 404(c) plan. Moreover, the authority to grant administrative exemptions for section 404(c) transactions remains with the Treasury Department pursuant to the Reorganization Plan No. 4 of 1978. Thus, nothing in section 404(c) or the regulation would relieve a disqualified person from the taxes imposed with respect to prohibited transactions by section 4975 of the Internal Revenue Code even though the transaction was a direct and necessary result of a participant's instructions. Two commentators expressed the opinion

---

proxy where he is subjected to improper influence by a plan fiduciary or the plan sponsor with respect to the proxy. See paragraph (c)(2)(ii). The trustee may have an obligation to vote in this situation.

that disqualified persons should be relieved of those taxes.

Section 404(c) of ERISA expressly states that where a plan participant exercises control over his account assets in the manner contemplated by that section, no fiduciary with respect to that plan will be liable "under this part," i.e., under Part 4 of Title I of ERISA. No similar relief is granted with respect to any other provision of law, including the Internal Revenue Code. Moreover, as explained in the preamble to the proposal, the Department has no authority to provide exemptive relief for a disqualified person's liability for the excise taxes imposed by section 4975 of the Code with respect to a transaction that results from a participant's exercise of control. The Internal Revenue Service (the Service) has, however, informed the Department that interested parties who wish the Service to consider exemptive relief for participant-directed transactions with respect to which section 404(c) relief would be available under this final regulation, but which may nevertheless result in a prohibited transaction under section 4975 of the Code, should file an exemption request with the Service in accordance with Rev. Proc. 75–26, 1975–2 C.B. 722.

For the foregoing reasons, the provisions of paragraph (e)(3) of the proposal have been retained without modification as paragraph (d)(3) of the final regulation.

VI. Reporting and Disclosure

As with the proposal, the final regulation does not address the reporting and disclosure provisions of ERISA with respect to their applicability to ERISA section 404(c) plans. The Department invited comments in the proposal discussing the application of the existing reporting and disclosure requirements of ERISA to such plans and whether it would be appropriate for the Department to develop an alternative method of compliance under section 110 of ERISA for ERISA section 404(c) plans. No comments were received regarding this issue. Therefore, the final regulation does not address the reporting and disclosure provisions of ERISA.

VII. Effective Date

The 1991 proposal provided that the regulation would have been effective with respect to transactions occurring 180 days after the date of publication of a final regulation. Many commentators expressed the view that the proposed effective date did not provide adequate time for modifying existing self-directed plans to conform with the regulation. Several commentators suggested a special effective date for collectively bargained plans. Other commentators suggested special effective dates or other provisions to accommodate plans with insurance company or bank fixed rate investment contracts entered into prior to the effective date of the regulation and which do not expire until a date subsequent to the effective date of the regulation.

In order to provide existing participant directed plans more time to accommodate the provisions of the final regulation, the Department has extended the effective date of the final regulation. In this regard, the final regulation will generally be effective with respect to transactions occurring on or after the first day of the second plan year beginning after the date of publication of the final regulation. Further, in response to comments, the regulation provides for a special effective date for collectively bargained plans. For these plans, the regulation is effective for transactions occurring after the later of the date determined under the general rule or the date on which the last collective bargaining agreement terminates, determined without regard to any extension or renegotiation of such agreement which is ratified on or after October 13, 1992. The Department believes that the extended effective dates will serve to accommodate many of the problems identified by the commentators. Moreover, the Department believes that, given the significant modifications contained in the final regulation, sponsors and fiduciaries will be able to conform to the requirements of the regulation in a shorter period of time than that which may have been required under the 1991 proposal. Finally, the regulation provides that transactions occurring before the applicable effective date of the final regulation will be governed by section 404(c) of the Act without regard to the regulation.

VIII. Regulatory Impact of the Regulation

In the preamble to the 1991 proposal, the Department expressed the view that, as a result of the plan design flexibility afforded by the regulation, adoption of the proposal as a final regulation would have little, if any, impact, economic or otherwise, on the establishment and maintenance of participant directed individual account plans. In order to fully analyze the effect of the proposed regulation, however, the Department invited interested parties to include with their comments information and data on questions relating to the following topics: Investment alternatives; frequency of investment direction, investments selected by participants; and administrative costs. The following discussion summarizes the questions posed by the Department and information received by the Department which addressed those questions.

In general, information received by the Department in response to these questions supports the Department's view that adoption of the proposed regulation would have little, if any, adverse impact on the establishment and maintenance of participant directed individual account plans. The Department believes, moreover, that to the extent that the regulation does have any impact, it will encourage the establishment and maintenance of participant-directed individual account plans by clarifying, through the establishment of general principles, the circumstances under which relief is afforded by section 404(c) of ERISA, while at the same providing plan sponsors with the plan design flexibility necessary to accommodate changes in the needs of plan participants and beneficiaries and changes in investment vehicles and markets.

1. *Investment alternatives.* The Department asked several questions relating to the number and types of investment alternatives offered in participant-directed plans, the number of plans offering competing interest-sensitive investment alternatives (such as a fixed rate investment contract issued by an insurance company or a bank—a "GIC" or "BIC"—and a money market fund) and any conditions imposed with respect to transfers between such alternatives. The Department also asked about the effects that the proposed regulation might have on participants, investment alternatives and rates of return thereon, various industries, and the economy as a whole.

Information received by the Department indicated that the vast majority of participant-directed plans offer specific combinations of investment alternatives, and that most currently offer at least three investment alternatives. According to information provided in the form of both surveys and comments, the most frequently offered investment alternatives were "GICs", diversified equity funds, employer stock funds, money market mutual funds, balanced funds, and bond funds.

Commentators indicated that competing interest-sensitive investment alternatives (e.g., fixed rate investment contracts issued by banks, savings and loans or insurance companies and money market funds) were not uncommon. Where such competing investments were offered, comments

indicated that the majority of such plans did not permit direct transfers between the competing investment alternatives, but did allow indirect transfers provided that assets were first transferred into a third fund (often an equity fund) for some period of time, usually three to six months. Some commentators indicated that, if frequent opportunities for direct transfers between competing interest-sensitive investments were to be necessary for compliance with section 404(c), rates of return on fixed rate investment contracts would be reduced. In this regard, the Department notes that the final regulation's three-month minimum transfer opportunity requirement applies only to the three core investment alternatives, and not to additional investment alternatives that may be offered by a plan. Thus, this problem is avoided if only one of the competing interest-sensitive investments is used as one of the three core alternatives. Furthermore, the preamble explains that an equity fund to which assets are required to be transferred (from a non-core interest-sensitive investment alternative) which permits transfers at least once within any three month period could itself serve as a core alternative if it meets the other requirements of the regulation.

According to the information received, the types of investment alternatives generally offered did not seem to be affected significantly by plan size, although larger plans were somewhat more likely to offer more investment alternatives. Some commentators indicated that they would have to add investment alternatives in order to comply with the proposed regulation. A few commentators indicated that adding additional investment alternatives would be costly to the plan and not important to participants. Although one commentator felt that the regulation might have a deleterious effect on the insurance industry, this did not appear to be the view of most insurance industry commentators. Another commentator stated that extra paperwork and administrative costs will be inefficient for the economy. While a few commentators suggested that the regulation would cause some plans to terminate and therefore have an adverse effect on coverage, those comments appeared to be based in large part upon a misunderstanding of section 404(c) of ERISA, which is not mandatory.

2. *Frequency of transfer opportunities.* The Department requested information with regard to how often participants are permitted to transfer between investment alternatives and how often they make transfers; what restrictions exist with regard to transfers; and the incremental costs of increasing transfer opportunities from two to three times a year and from three times a year to quarterly. The Department also asked who bears transfer costs, and what factors affect the types of restrictions that are placed on transfers.

Responses indicated that a majority of participant-directed individual account plans permit quarterly or more frequent transfers. According to information received, quarterly or more frequent transfer opportunities were more common in plans with 500 or more participants and plans offering mutual fund investments. One large survey that broke down frequency of transfer opportunities by plan size found that approximately 46 percent of plans with 250 or fewer participants, and also of plans with 250 to 500 participants, offer quarterly or more frequent transfer opportunities. According to this survey, between 53% and 69% of larger plans offered quarterly or more frequent transfers. This information also showed that approximately 80% of the plans that did not permit quarterly or more frequent transfer opportunities allowed transfers on a semiannual basis. Comments consistently indicated that the majority of participants transfer much less often than they are permitted to under the plan.

Comments also indicated that restrictions on transfers vary widely. Commentators stated that most plans having competing interest-sensitive investment alternatives do not allow direct transfers between such interest-sensitive alternatives. Others indicated that they restricted or did not permit transfers out of the employer stock fund or ESOP. Some plans reported that they offered more frequent opportunities to re-allocate new contributions than to transfer amounts already in the plan's investment alternatives. Comments indicated that many plans require changes in specific percentage increments, most often in increments of 5% or 10%. While several commentators stated that their plans required transfers in increments of 25%, information included with another comment indicated that there was a movement among such plans to change to 10% increments. Only one commentator mentioned plans requiring transfer in increments larger than 25%. Some plans reported no transfer restrictions. Other commentators stated that their plans require that any changes be requested in writing a certain number of days before the effective date of a transfer.

The Department received only two comments that specifically addressed a question regarding the incremental costs of increasing the frequency of investment direction opportunities from two to three times a year and from three to four times a year. These two commentators estimated cost increases of 30 and 50 percent for changing frequency of transfer opportunities from two to three times a year, and of 33 and 60 percent, for increasing transfer opportunities from three to four times a year. Most commentators who attempted to answer this question stated that they did not know what additional costs would be incurred.

A number of other commentators commented on the general issues of costs associated with the proposal's requirements regarding frequency of transfer opportunity. While some indicated that they expected no additional costs or that any additional costs would be negligible or not unduly high, others stated that a quarterly or more frequent transfer opportunity requirement would impose significant or high additional costs, primarily due to more frequent valuations, and additional accounting and transfer costs. One of these commentators estimated that moving from annual to quarterly transfer opportunities would increase administrative costs by approximately 200 percent to 250 percent. Others projected increases of varying amounts due to plan amendments and communication materials, transaction fees, and reprogramming of accounting systems. One plan projected savings as a result of changes it was making which were consistent with the proposed regulation.

The extent to which additional administrative costs were expected to be incurred as a result of increasing the frequency of transfer opportunities appeared to vary depending upon the types of investment alternatives offered, the frequency with which they were valued and the size of the plan. The costs of moving to quarterly transfers appeared to be of greatest concern to smaller plans (200 or fewer participants) with investments that are not frequently valued, many of which indicated that they currently permit only semi-annual or annual transfers. Two commentators that provide services to smaller plans indicated that their fees would increase substantially due to increases in the number of investment alternatives to be accounted for, increased frequency of transfer opportunities, and increased administration of transfer activity. Several commentators also expressed concern that additional transfer opportunities would encourage plan participants to attempt to "time" the

market, thereby reducing returns on their investments.

Commentators indicated that, in general, all administrative costs associated with investment transfers (e.g., allocation costs) are borne by the plan sponsor. Operating costs are borne by the funds experiencing those costs (e.g. investment management fees), which in turn are allocated among participants investing in the fund. A few commentators stated that they anticipated that as plan-level administrative costs rise, some of the costs associated with transfers may be shifted from plan sponsors to participants, possibly in the form of transfer fees.

3. *Investments selected by participants.* The Department asked about the value of assets in participant directed individual account plans; the percentage of assets invested in various types of investment alternatives and whether this varied by plan size or other factors; and what effect investment preferences of plan participants had on the investment alternatives offered.

Information about the value of assets in participant directed individual account plans showed that these plans vary widely in asset size. None of the commentators attempted to provide information on what the total value of such assets might be.

Comments on the percentages of assets invested in various types of investment alternatives varied widely but indicated that, in general, over half (approximately 50 to 70 percent) of all plan assets was invested in fixed rate investment contract-type funds. The next largest percentages (approximately 10 to 50 percent) were reported to be in diversified equity funds or employer stock funds, followed by smaller percentages in balanced funds, money market mutual funds, government securities funds and other bond funds. The percentages of assets invested in various alternatives did not appear to vary much by plan size, but did seem to be affected by other factors. For example, commentators noted that some employers offer matching contributions to participants investing in employer stock and/or restrict transfers out of the employer stock funds. Another commentator stated that its 401(k) plan provided fewer investment options for amounts representing "before-tax contributions" than for amounts representing "after-tax contributions". Comments consistently indicated that participants tend to put the largest percentage of their account assets in what they perceive to be the safest investment alternatives.

Comments indicated that the preferences of participants have little, if any, effect on investment alternatives offered by a plan, although some plans reported that they do take such preferences into consideration. Most who responded to this question stated that they generally select a set of investment alternatives that meet employee needs and that give participants distinct choices in terms of risk and return. One commentator noted that plans of law firms and medical partnerships were more likely to reflect participant preferences than plans of other employers, and that participants in these plans tended to be more risk tolerant.

4. *Administrative costs.* Information was requested on what, if any, increases in administrative costs would result from requiring a minimum of three diversified investment alternatives having different risk and return characteristics and to what these costs would be attributable. The Department also asked how plan size would affect these administrative costs, and to what extent any increases in administrative costs attributable to plan changes required to accommodate the regulation would outweigh the benefits of limiting fiduciary liability. Finally, the Department asked what cost savings would be attributable to limiting fiduciary liability.

Several commentators indicated that they would have no additional costs as a result of meeting the three diversified investment alternatives requirement, or that any such costs would be nominal. As mentioned earlier, a few commentators stated that adding additional investment alternatives would be costly. Further, several others indicated that plans needing to add investment alternatives to their plans will incur some additional administrative expense in connection with selection of managers, recordkeeping, monitoring the experience of the added alternatives and effecting transfers. One commentator estimated the additional costs associated with the establishment and maintenance of one additional investment alternative to be approximately 15 percent of the plan's administrative costs for a typical plan with three investment alternatives including an employer stock fund.

Commentators indicated that administrative costs for small plans tend to be larger as a percentage of assets than they are for larger plans, because of economies of scale. In general, however, the requirement of a minimum of three diversified investment alternatives with different risk and return characteristics did not, in and of itself, cause a great deal of concern among commentators about costs. Rather, commentators were more concerned by additional administrative costs incurred in connection with complying with the requirements of the proposed regulation regarding frequency of transfer opportunities, as well as its requirements that an independent fiduciary designate "look-through investment vehicles" which are managed in-house, and that an independent fiduciary be retained for plan administration in plans desiring section 404(c) protection for employer stock funds.

In response to the Department's inquiry into whether cost savings would be attributable to limiting the liability of the plan fiduciaries, some commentators stated that any such cost savings are uncertain. Others indicated that there would be no cost effect. The Department also asked to what extent any increases in administrative costs attributable to plan changes required to accommodate the regulation would be outweighed by the benefits attributable to limiting the liability of plan fiduciaries. The Department received a wide variety of responses to this question. Some commentators stated that any increased compliance costs would be more than outweighed by the benefits of the limitation on liability. Others stated that the costs and benefits of the regulation represented a modest trade-off or that the benefits were somewhat outweighed by the additional costs that would be incurred to comply. Many commentators indicated that they did not know whether any increases in costs would be outweighed by the benefits of limiting the liability of plan fiduciaries. A few commentators expressed the view that the regulation does little to limit the liability of plan fiduciaries, and some comentators stated that the costs of compliance with the proposed regulation would not be outweighed by its limitation of the liability of the plan fiduciaries. Other commentators mentioned other benefits of the regulation, such as the ability of plan participants to exercise greater control over their investments.

The Department notes that several modifications have been made in the final regulation to accommodate concerns expressed by commentators about administrative costs. As noted in the discussion of the final regulation elsewhere in this notice, the Department has substantially curtailed or eliminated the requirements that were of most concern to commentators. For example,

the Department eliminated the requirement that an independent fiduciary must be responsible for activities relating to the purchase, sale, and exercise of rights with respect to employer securities, except for situations which a designated plan fiduciary determines involve a potential for undue employer influence, such as tender offers or contested board of directors elections.

Paragraph (e) of the proposal, which contained the requirement that an independent fiduciary designate any designated look-through investment vehicles and investment managers was also eliminated from the final regulation.

Technical Revisions

Pursuant to recent amendments to the rules for publication of the Office of the Federal Register, this final regulation contains an amendment of the authority citation for part 2550 of chapter XXV of title 29 of the Code of Federal Regulations.

Executive Order 12291 Statement

The Department has determined that this final regulatory action would not constitute a "major rule" as that term is used in Executive Order 12291 because the action does not result in: an annual effect on the economy of $100 million; a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act Statement

The Department has determined that this regulation would not have a significant economic impact on small entities. While small plan sponsors that want to take advantage of the relief provided by this regulation may need to amend their plans in order to meet the requirements necessary to obtain relief under the regulation, no small entity is required to amend its plan under the regulation. Thus, unless a small entity voluntarily decides to modify its plan, this regulation would not impose any increased burden on small entities that sponsor pension plans that conform with ERISA generally. Although it would not be appropriate to provide simplified requirements for small entities under the regulation, it should be noted that in response to public comments the burden associated with plan amendments necessary to obtain relief has been reduced for all plan sponsors regardless of size.

Paperwork Reduction Act Statement

This regulation is not subject to section 3504(h) of the Paperwork Reduction Act, 44 U.S.C. 3504(h), since it does not involve the collection of information from the public.

Statutory Authority

The final regulation set forth herein is issued pursuant to sections 404(c) (Pub. L. 93–406, 88 Stat. 877, 29 U.S.C. 1104) and 505 (Pub. L. 93–406, 88 Stat. 894, 29 U.S.C. 1135) of the Act and under Secretary of Labor's Order No. 1–87.

List of Subjects in 29 CFR Part 2550

Employee benefit plans, Employee Retirement Income Security Act, Employee stock ownership plans, Exemptions, Fiduciaries, Investments, Investments foreign, Party in interest, Pensions, Pension and Welfare Benefit Programs Office, Prohibited transactions, Real estate, Securities, Surety bonds, Trusts and Trustees.

In view of the foregoing the Department proposes to amend part 2550 of chapter XXV of title 29 of the Code of Federal Regulations as follows:

PART 2550—RULES AND REGULATIONS FOR FIDUCIARY RESPONSIBILITY

1. By revising the authority citation for part 2550 to read as set forth below and the authority citations following all the sections in part 2550 are removed.

Authority: 29 U.S.C. 1135.

§ 2550.401b–1 also issued under sec. 102, Reorganization Plan No. 4 of 1978 (43 FR 47713, Oct. 17, 1978), effective December 31, 1978 (44 FR 1065, Jan. 3, 1979), 3 CFR, 1978 Comp., 332.

§ 2550.404c–1 also issued under 29 U.S.C. 1104.

§ 2550.407c–3 also issued under 29 U.S.C. 1107.

§ 2550.412–1 also issued under 29 U.S.C. 1112.

§ 2550.414b–1 also issued under 29 U.S.C. 1114. Secretary of Labor's Order No. 1–87.

2. By adding a new § 2550.404c–1 to read as follows:

§ 2550.404c–1 ERISA section 404(c) plans.

(a) *In General.* (1) Section 404(c) of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) provides that if a pension plan that provides for individual accounts permits a participant or beneficiary to exercise control over assets in his account and that participant or beneficiary in fact exercises control over assets in his account, then the participant or beneficiary shall not be deemed to be a fiduciary by reason of his exercise of control and no person who is otherwise a fiduciary shall be liable for any loss, or by reason of any breach, which results from such exercise of control. This section describes the kinds of plans that are "ERISA section 404(c) plans," the circumstances in which a participant or beneficiary is considered to have exercised independent control over the assets in his account as contemplated by section 404(c), and the consequences of a participant's or beneficiary's exercise of control.

(2) The standards set forth in this section are applicable solely for the purpose of determining whether a plan is an ERISA section 404(c) plan and whether a particular transaction engaged in by a participant or beneficiary of such plan is afforded relief by section 404(c). Such standards, therefore, are not intended to be applied in determining whether, or to what extent, a plan which does not meet the requirements for an ERISA section 404(c) plan or a fiduciary with respect to such a plan satisfies the fiduciary responsibility or other provisions of Title I of the Act.

(b) *ERISA section 404(c) plans*—(1) *In general.* An "ERISA section 404(c) Plan" is an individual account plan described in section 3(34) of the Act that:

(i) Provides an opportunity for a participant or beneficiary to exercise control over assets in his individual account (see paragraph (b)(2) of this section); and

(ii) Provides a participant or beneficiary an opportunity to choose, from a broad range of investment alternatives, the manner in which some or all of the assets in his account are invested (see paragraph (b)(3) of this section).

(2) *Opportunity to exercise control.* (i) a plan provides a participant or beneficiary an opportunity to exercise control over assets in his account only if:

(A) Under the terms of the plan, the participant or beneficiary has a reasonable opportunity to give investment instructions (in writing or otherwise, with opportunity to obtain written confirmation of such instructions) to an identified plan fiduciary who is obligated to comply with such instructions except as otherwise provided in paragraph (b)(2)(ii)(B) and (d)(2)(ii) of this section; and

(B) The participant or beneficiary is provided or has the opportunity to obtain sufficient information to make informed decisions with regard to investment alternatives available under

the plan, and incidents of ownership appurtenant to such investments. For purposes of this subparagraph, a participant or beneficiary will not be considered to have sufficient investment information unless—

(*1*) The participant or beneficiary is provided by an identified plan fiduciary (or a person or persons designated by the plan fiduciary to act on his behalf):

(*i*) An explanation that the plan is intended to constitute a plan described in section 404(c) of the Employee Retirement Income Security Act, and title 29 of the Code of Federal Regulations Section 2550.440c–1, and that the fiduciaries of the plan may be relieved of liability for any losses which are the direct and necessary result of investment instructions given by such participant or beneficiary;

(*ii*) A description of the investment alternatives available under the plan and, with respect to each designated investment alternative, a general description of the investment objectives and risk and return characteristics of each such alternative, including information relating to the type and diversification of assets comprising the portfolio of the designed investment alternative;

(*iii*) Identification of any designated investment managers;

(*iv*) An explanation of the circumstances under which participants and beneficiaries may give investment instructions and explanation of any specified limitations on such instructions under the terms of the plan, including any restrictions on transfer to or from a designated investment alternative, and any restrictions on the exercise of voting, tender and similar rights appurtenant to a participant's or beneficiary's investment in an investment alternative;

(*v*) A description of any transaction fees and expenses which affect the participant's or beneficiary's account balance in connection with purchases or sales of interests in investment alternatives (e.g., commissions, sales load, deferred sales charges, redemption or exchange fees);

(*vi*) The name, address, and phone number of the plan fiduciary (and, if applicable, the person or persons designated by the plan fiduciary to act on his behalf) responsible for providing the information described in paragraph (b)(2)(i)(B)(*2*) upon request of a participant or beneficiary and a description of the information described in paragraph (b)(2)(i)(B)(*2*) which may be obtained on request;

(*vii*) In the case of plans which offer an investment alternative which is designed to permit a participant or beneficiary to directly or indirectly acquire or sell any employer security (employer security alternative), a description of the procedures established to provide for the confidentiality of information relating to the purchase, holding and sale of employer securities, and the exercise of voting, tender and similar rights, by participants and beneficiaries, and the name, address and phone number of the plan fiduciary responsible for monitoring compliance with the procedures (see paragraphs (d)(2)(ii)(E)(*4*) (*vii*), (*viii*) and (*ix*) of this section); and

(*viii*) In the case of an investment alternative which is subject to the Securities Act of 1933, and in which the participant or beneficiary has no assets invested, immediately following the participant's or beneficiary's initial investment, a copy of the most recent prospectus provided to the plan. This condition will be deemed satisfied if the participant or beneficiary has been provided with a copy of such most recent prospectus immediately prior to the participant's or beneficiary's initial investment in such alternative;

(*ix*) Subsequent to an investment in a investment alternative, any materials provided to the plan relating to the exercise of voting, tender or similar rights which are incidental to the holding in the account of the participant or beneficiary of an ownership interest in such alternative to the extent that such rights are passed through to participants and beneficiaries under the terms of the plan, as well as a description of or reference to plan provisions relating to the exercise of voting, tender or similar rights.

(*2*) The participants or beneficiary is provided by the identified plan fiduciary (or a person or persons designated by the plan fiduciary to act on his behalf), either directly or upon request, the following information, which shall be based on the latest information available to the plan:

(*i*) A description of the annual operating expenses of each designated investment alternative (e.g., investment management fees, administrative fees, transaction costs) which reduce the rate of return to participants and beneficiaries, and the aggregate amount of such expenses expressed as a percentage of average net assets of the designated investment alternative;

(*ii*) Copies of any prospectuses, financial statements and reports, and of any other materials relating to the investment alternatives available under the plan, to the extent such information is provided to the plan;

(*iii*) A list of the assets comprising the portfolio of each designated investment altenaive which constitute plan assets within the meaning of 29 CFR 2510.3–101, the value of each such asset (or the proportion of the investment alternative which it comprises), and, with respect to each such asset which is a fixed rate investment contract issued by a bank, savings and loan association or insurance company, the name of the issuer of the contract, the term of the contract and the rate of return on the contract;

(*iv*) Information concerning the value of shares or units in designated investment alternatives available to participants and beneficiaries under the plan, as well as the past and current investment performance of such alternatives, determined, net of expenses, on a reasonable and consistent basis; and

(*v*) Information concerning the value of shares or units in designated investment alternatives held in the account of the participant or beneficiary.

(ii) A plan does not fail to provide an opportunity for a participant or beneficiary to exercise control over his individual account merely because it—

(A) *Imposes charges for reasonable expenses.* A plan may charge participants' and beneficiaries' accounts for the reasonable expenses of carrying out investment instructions, provided that procedures are established under the plan to periodically inform such participants and beneficiaries of actual expenses incurred with respect to their respective individual accounts;

(B) *Permits a fiduciary to decline to implement investment instructions by participants and beneficiaries.* A fiduciary may decline to implement participant and beneficiary instructions which are described at paragraph (d)(2)(ii) of this section, as well as instructions specified in the plan, including instructions—

(*1*) Which would result in a prohibited transaction described in ERISA section 406 or section 4975 of the Internal Revenue Code, and

(*2*) Which would generate income that would be taxable to the plan;

(C) *Imposes reasonable restrictions on frequency of investment instructions.* A plan may impose reasonable restrictions on the frequency with which participants and beneficiaries may give investment instructions. In no event, however, is such a restriction reasonable unless, with respect to each investment alternative made available by the plan, it permits participants and beneficiaries to give investment instructions with a frequency which is

appropriate in light of the market volatility to which the investment alternative may reasonably be expected to be subject, provided that—

(*1*) At least three of the investment alternatives made available pursuant to the requirements of paragraph (b)(3)(i)(B) of this section, which constitute a broad range of investment alternatives, Permit participants and beneficiaries to give investment instructions no less frequently than once within any three month period; and

(*2*)(*i*) At least one of the investment alternatives meeting the requirements of paragraph (b)(2)(ii)(C)(*1*) of this section permits participants and beneficiaries to give investment instructions with regard to transfers into the investment alternative as frequently as participants and beneficiaries are permitted to give investment instructions with respect to any investment alternative made available by the plan which permits participants and beneficiaries to give investment instructions more frequently than once within any three month period; or

(*ii*) With respect to each investment alternative which permits participants and beneficiaries to give investment instructions more frequently than once within any three month period, participants and beneficiaries are permitted to direct their investments from such alternative into an income producing, low risk, liquid fund, subfund, or account as frequently as they are permitted to give investment instructions with respect to each such alternative and, with respect to such fund, subfund or account, participants and beneficiaries are permitted to direct investments from the fund, subfund or account to an investment alternative meeting the requirements of paragraph (b)(2)(ii)(C)(*1*) as frequently as they are permitted to give investment instructions with respect to that investment alternative; and

(*3*) With respect to transfers from an investment alternative which is designed to permit a participant or beneficiary to directly or indirectly acquire or sell any employer security (employer security alternative) either:

(*i*) All of the investment alternatives meeting the requirements of paragraph (b)(2)(ii)(C)(*1*) of this section must permit participants and beneficiaries to give investment instructions with regard to transfers into each of the investment alternatives as frequently as participants and beneficiaries are permitted to give investment instructions with respect to the employer security alternative; or

(*ii*) Participants and beneficiaries are permitted to direct their investments from each employer security alternative into an income producing, low risk, liquid fund, subfund, or account as frequently as they are permitted to give investment instructions with respect to such employer security alternative and, with respect to such fund, subfund, or account, participants and beneficiaries are permitted to direct investments from the fund, subfund or account to each investment alternative meeting the requirements of paragraph (b)(2)(ii)(C)(*1*) as frequently as they are permitted to give investment instructions with respect to each such investment alternative.

(iii) Paragraph (c) of this section describes the circumstances under which a participant or beneficiary will be considered to have exercised independent control with respect to a particular transaction.

(3) *Broad range of investment alternatives.* (i) A plan offers a broad range of investment alternatives only if the available investment alternatives are sufficient to provide the participant or beneficiary with a reasonable opportunity to:

(A) Materially affect the potential return on amounts in his individual account with respect to which he is permitted to exercise control and the degree of risk to which such amounts are subject;

(B) Choose from at least three investment alternatives:

(*1*) Each of which is diversified;

(*2*) Each of which has materially different risk and return characteristics;

(*3*) Which in the aggregate enable the participant or beneficiary by choosing among them to achieve a portfolio with aggregate risk and return characteristics at any point within the range normally appropriate for the participant or beneficiary; and

(*4*) Each of which when combined with investments in the other alternatives tends to minimize through diversification the overall risk of a participant's or beneficiary's portfolio;

(C) Diversify the investment of that portion of his individual account with respect to which he is permitted to exercise control so as to minimize the risk of large losses, taking into account the nature of the plan and the size of participants' or beneficiaries' accounts. In determining whether a plan provides the participant or beneficiary with a reasonable opportunity to diversify his investments, the nature of the investment alternatives offered by the plan and the size of the portion of the individual's account over which he is permitted to exercise control must be considered. Where such portion of the account of any participant or beneficiary is so limited in size that the opportunity to invest in look-through investment vehicles is the only prudent means to assure an opportunity to achieve appropriate diversification, a plan may satisfy the requirements of this paragraph only by offering look-through investment vehicles.

(ii) *Diversification and look-through investment vehicles.* Where look-through investment vehicles are available as investment alternatives to participants and beneficiaries, the underlying investments of the look-through investment vehicles shall be considered in determining whether the plan satisfies the requirements of subparagraphs (b)(3)(i)(B) and (b)(3)(i)(C).

(c) Exercise of control. (1) *In general.* (i) Sections 404(c)(1) and 404(c)(2) of the Act and paragraphs (a) and (d) of this section apply only with respect to a transaction where a participant or beneficiary has exercised independent control in fact with respect to the investment of assets in his individual account under an ERISA section 404(c) plan.

(ii) For purposes of sections 404(c)(1) and 4040(c)(2) of the Act and paragraphs (a) and (d) of this section, a participant or beneficiary will be deemed to have exercised control with respect to the exercise of voting, tender and similar rights appurtenant to the participant's or beneficiary's ownership interest in an investment alternative, provided that the participant's or beneficiary's investment in the investment alternative was itself the result of an exercise of control, the participant or beneficiary was provided a reasonable opportunity to give instruction with respect to such incidents of ownership, including the provision of the information described in paragraph (b)(2)(i)(B)(*1*)(*ix*) of this section, and the participant or beneficiary has not failed to exercise control by reason of the circumstances described in paragraph (c)(2) with respect to such incidents of ownership.

(2) *Independent control.* Whether a participant or beneficiary has exercised independent control in fact with respect to a transaction depends on the facts and circumstances of the particular case. However, a participant's or beneficiary's exercise of control is not independent in fact if:

(i) The participant or beneficiary is subjected to improper influence by a plan fiduciary or the plan sponsor with respect to the transaction;

(ii) A plan fiduciary has concealed material non-public facts regarding the investment from the participant or beneficiary, unless the disclosure of

such information by the plan fiduciary to the participant or beneficiary would violate any provision of federal law or any provision of state law which is not preempted by the Act; or

(iii) The participant or beneficiary is legally incompetent and the responsible plan fiduciary accepts the instructions of the participant or beneficiary knowing him to be legally incompetent.

(3) *Transactions involving a fiduciary.* In the case of a sale, exchange or leasing of property (other than a transaction described in paragraph (d)(2)(ii)(E) of this section) between an ERISA section 404(c) plan and a plan fiduciary or an affiliate of such a fiduciary, or a loan to a plan fiduciary or an affiliate of such a fiduciary, the participant or beneficiary will not be deemed to have exercised independent control unless the transaction is fair and reasonable to him. For purposes of this paragraph (c)(3), a transaction will be deemed to be fair and reasonable to a participant or beneficiary if he pays no more than, or receives no less than, adequate consideration (as defined in section 3(18) of the Act) in connection with the transaction.

(4) *No obligation to advise.* A fiduciary has no obligation under part 4 of Title I of the Act to provide investment advice to a participant or beneficiary under an ERISA section 404(c) plan.

(d) *Effect of independent exercise of control*—(1) *Participant or beneficiary not a fiduciary.* If a participant or beneficiary of an ERISA section 404(c) plan exercises independent control over assets in his individual account in the manner described in paragraph (c), then such participant or beneficiary is not a fiduciary of the plan by reason of such exercise of control.

(2) *Limitation on liability of plan fiduciaries.* (i) If a participant or beneficiary of an ERISA section 404(c) plan exercises independent control over assets in his individual account in the manner described in paragraph (c), then no other person who is a fiduciary with respect to such plan shall be liable for any loss, or with respect to any breach of part 4 of Title I of the Act, that is the direct and necessary result of that participant's or beneficiary's exercise of control.

(ii) Paragraph (d)(2)(i) does not apply with respect to any instruction, which if implemented—

(A) Would not be in accordance with the documents and instruments governing the plan insofar as such documents and instruments are consistent with the provisions of Title I of ERISA;

(B) Would cause a fiduciary to maintain the indicia of ownership of any assets of the plan outside the jurisdiction of the district courts of the United States other than as permitted by section 404(b) of the Act and 29 CFR 2550.404b–1;

(C) Would jeopardize the plan's tax qualified status under the Internal Revenue Code;

(D) Could result in a loss in excess of a participant's or beneficiary's account balance; or

(E) Would result in a direct or indirect:

(*1*) Sale, exchange, or lease of property between a plan sponsor or any affiliate of the sponsor and the plan except for the acquisition or disposition of any interest in a fund, subfund or portfolio managed by a plan sponsor or an affiliate of the sponsor, or the purchase or sale of any qualifying employer security (as defined in section 407(d)(5) of the Act) which meets the conditions of section 408(e) of ERISA and section (d)(2)(ii)(E)(*4*) below;

(*2*) Loan to a plan sponsor or any affiliate of the sponsor;

(*3*) Acquisition or sale of any employer real property (as defined in section 407(d)(2) of the Act); or

(*4*) Acquisition or sale of any employer security except to the extent that:

(*i*) Such securities are qualifying employer securities (as defined in section 407(d)(5) of the Act);

(*ii*) Such securities are stock or an equity interest in a publicly traded partnership (as defined in section 7704(b) of the Internal Revenue Code of 1986), but only if such partnership is an existing partnership as defined in section 10211(c)(2)(A) of the Revenue Act of 1987 (Public Law 100–203);

(*iii*) Such securities are publicly traded on a national exchange or other generally recognized market;

(*iv*) Such securities are traded with sufficient frequency and in sufficient volume to assure that participant and beneficiary directions to buy or sell the security may be acted upon promptly and efficiently;

(*v*) Information provided to shareholders of such securities is provided to participants and beneficiaries with accounts holding such securities;

(*vi*) Voting, tender and similar rights with respect to such securities are passed through to participants and beneficiaries with accounts holding such securities;

(*vii*) Information relating to the purchase, holding, and sale of securities, and the exercise of voting, tender and similar rights with respect to such securities by participants and beneficiaries, is maintained in accordance with procedures which are designed to safeguard the confidentiality of such information, except to the extent necessary to comply with Federal laws or state laws not preempted by the Act;

(*viii*) The plan designates a fiduciary who is responsible for ensuring that: The procedures required under subparagraph (d)(2)(ii)(E)(*4*) (*vii*) are sufficient to safeguard the confidentiality of the information described in that subparagraph, such procedures are being followed, and the independent fiduciary required by subparagraph (d)(2)(ii)(E)(*4*)(*ix*) is appointed; and

(*ix*) An independent fiduciary is appointed to carry out activities relating to any situations which the fiduciary designated by the plan for purposes of subparagraph (d)(2)(ii)(E)(*4*)(*viii*) determines involve a potential for undue employer influence upon participants and beneficiaries with regard to the direct or indirect exercise of shareholder rights. For purposes of this subparagraph, a fiduciary is not independent if the fiduciary is affiliated with any sponsor of the plan.

(iii) The individual investment decisions of an investment manager who is designated directly by a participant or beneficiary or who manages a look-through investment vehicle in which a participant or beneficiary has invested are not direct and necessary results of the designation of the investment manager or of investment in the look-through investment vehicle. However, this paragraph (d)(2)(iii) shall not be construed to result in liability under section 405 of ERISA with respect to a fiduciary (other than the investment manager) who would otherwise be relieved of liability by reason of section 404(c)(2) of the Act and paragraph (d) of this section.

(3) *Prohibited Transactions.* The relief provided by section 404(c) of the Act and this section applies only to the provisions of part 4 of title I of the Act. Therefore, nothing in this section relieves a disqualified person from the taxes imposed by sections 4975 (a) and (b) of the Internal Revenue Code with respect to the transactions prohibited by section 4975(c)(1) of the Code.

(e) *Defintions.* For purposes of this section:

(1) *Look-through investment vehicle* means:

(i) An investment company described in section 3(a) of the Investment Company Act of 1940, or a series investment company described in

section 18(f) of the 1940 Act or any of the segregated portfolios of such company;

(ii) A common or collective trust fund or a pooled investment fund maintained by a bank or similar institution, a deposit in a bank or similar institution, or a fixed rate investment contract of a bank or similar institution;

(iii) A pooled separate account or a fixed rate investment contract of an insurance company qualified to do business in a State; or

(iv) Any entity whose assets include plan assets by reason of a plan's investment in the entity;

(2) *Adequate consideration* has the meaning given it in section 3(18) of the Act and in any regulations under this title;

(3) An *affiliate* of a person includes the following:

(i) Any person directly or indirectly controlling, controlled by, or under common control with the person;

(ii) Any officer, director, partner, employee, an employee of an affiliated employer, relative (as defined in section 3(15) of ERISA), brother, sister, or spouse of a brother or sister, of the person; and

(iii) Any corporation or partnership of which the person is an officer director or partner.

For purposes of this paragraph (e)(3), the term "control" means, with respect to a person other than an individual, the power to exercise a controlling influence over the management or policies of such person.

(4) A *designated investment alternative* is a specific investment identified by a plan fiduciary as an available investment alternative under the plan.

(f) *Examples.* The provisions of this section are illustrated by the following examples. Examples (5) through (11) assume that the participant has exercised independent control with respect to his individual account under an ERISA section 404(c) plan described in paragraph (b) and has not directed a transaction described in paragraph (d)(2)(ii).

(1) Plan A is an individual account plan described in section 3(34) of the Act. The plan states that a plan participant or beneficiary may direct the plan administrator to invest any portion of his individual account in a particular diversified equity fund managed by an entity which is not affiliated with the plan sponsor, or any other asset administratively feasible for the plan to hold. However, the plan provides that the plan administrator will not implement certain listed instructions for which plan fiduciaries would not be relieved of liability under section 404(c) (see paragraph (d)(2)(ii)). Plan participants and beneficiaries are permitted to give investment instructions during the first week of each month with respect to the equity fund and at any time with respect to other investments. The plan provides for the pass-through of voting, tender and similar rights incidental to the holding in the account of a participant or beneficiary of an ownership interest in the equity fund or any other investment alternative available under the plan. The plan administrator of plan A provides each participant and beneficiary with the information described in subparagraphs (*i*), (*ii*), (*iii*), (*iv*), (*v*), (*vi*) and (*vii*) of paragraph (b)(2)(i)(B)(*1*) upon their entry into the plan, and provides updated information in the event of any material change in the information provided. Immediately following an investment by a participant or beneficiary in the equity fund, the plan administrator provides a copy of the most recent prospectus received from the fund to the investing participant or beneficiary. Immediately following any investment by a participant or beneficiary in any other investment alternative which is subject to the Securities Act of 1933, the plan administrator provides the participant or beneficiary with the most recent prospectus received from that investment alternative (see paragraph (b)(2)(i)(B)(*1*)(*viii*)). Finally, subsequent to any investment by a participant or beneficiary, the plan administrator forwards to the investing participant or beneficiary any materials provided to the plan relating to the exercise of voting, tender or similar rights attendant to ownership of an interest in such investment (see paragraph (b)(2)(i)(B)(*1*)(*ix*)). Upon request, the plan administrator provides each participant or beneficiary with copies of any prospectuses, financial statements and reports, and any other materials relating to the investment alternatives available under the plan which are received by the plan (see paragraph (b)(2)(i)(B)(*2*)(*ii*)). Also upon request, the plan administrator provides each participant and beneficiary with the other information required by paragraph (b)(2)(i)(B)(*2*) with respect to the equity fund, which is a designated investment alternative, including information concerning the latest available value of the participant's or beneficiary's interest in the equity fund (see paragraph (b)(2)(i)(B)(*2*)(*v*)). Plan A meets the requirements of paragraphs (b)(2)(i)(B)(*1*) and (*2*) of this section regarding the provision of investment information.

Note: The regulation imposes no additional obligation on the administrator to furnish or make available materials relating to the companies in which the equity fund invests (e.g., prospectuses, proxies, etc.).

(2) Plan C is an individual account plan described in section 3(34) of the Act under which participants and beneficiaries may choose among three investment alternatives which otherwise meet the requirements of paragraph (b) of this section. The plan permits investment instruction with respect to each investment alternative only on the first 10 days of each calendar quarter, i.e. January 1–10, April 1–10, July 1–10 and October 1–10. Plan C satisfies the condition of paragraph (b)(2)(ii)(C)(*1*) that instruction be permitted not less frequently than once within any three month period, since there is not any three month period during which control could not be exercised.

(3) Assume the same facts as in paragraph (f)(2), except that investment instruction may only be given on January 1, April 4, July 1 and October 1. Plan C is not an ERISA section 404(c) plan because it does not satisfy the condition of paragraph (b)(2)(ii)(C)(*1*) that instruction be permitted not less frequently than once within any three month period. Under these facts, there is a three month period, e.g., January 2 through April 1, during which control could not be exercised by participants and beneficiaries.

(4) Plan D is an individual account plan described in section 3(34) of the Act under which participants and beneficiaries may choose among three diversified investment alternatives which constitute a broad range of investment alternatives. The plan also permits investment instruction with respect to an employer securities alternative but provides that a participant or beneficiary can invest no more than 25% of his account balance in this alternative. This restriction does not affect the availability of relief under section 404(c) inasmuch as it does not relate to the three diversified investment alternatives and, therefore, does not cause the plan to fail to provide an opportunity to choose from a broad range of investment alternatives.

(5) A participant, P, independently exercises control over assets in his individual account plan by directing a plan fiduciary, F, to invest 100% of his account balance in a single stock. P is not a fiduciary with respect to the plan by reason of his exercise of control and F will not be liable for any losses that necessarily result form P's investment instruction.

(6) Assume the same facts as in paragraph (f)(5), except that P directs F to purchase the stock from B, who is a party in interest with respect to the plan. Neither P nor F has engaged in a transaction prohibited under section 406 of the Act: P because he is not a fiduciary with respect to the plan by reason of his exercise of control and F because he is not liable for any breach of part 4 of Title I that is the direct and necessary consequence of P's exercise of control. However, a prohibited transaction under section 4975(c) of the Internal Revenue Code may have occurred, and, in the absence of an exemption, tax liability may be imposed pursuant to sections 495 (a) and (b) of the Code.

(7) Assume the same facts as in paragraph (f)(5), except that P does not specify that the stock be purchased from B, and F chooses to purchase the stock from B. In the absence of an exemption, F has engaged in a prohibited transaction described in 406(a) of ERISA because the decision to purchase the stock from B is not a direct or necessary result of P's exercise of control.

(8) Pursuant to the terms of the plan, plan fiduciary F designates three reputable investment managers whom participants may appoint to manage assets in their individual accounts. Participant P selects M, one of the designated managers, to manage the assets in his account. M prudently manages P's account for 6 months after which he incurs

losses in managing the account through his imprudence. M has engaged in a breach of fiduciary duty because M's imprudent management of P's account is not a direct or necessary result of P's exercise of control (the choice of M as manager). F has no fiduciary liability for M's imprudence because he has no affirmative duty to advise P (see paragraph (c)(4)) and because F is relieved of co-fiduciary liability by reason of section 404(c)(2) (see paragraph (d)(2)(iii)). F does have a duty to monitor M's performance to determine the suitability of continuing M as an investment manager, however, and M's imprudence would be a factor which F must consider in periodically reevaluating its decision to designate M.

(9) Participant P instructs plan fiduciary F to appoint G as his investment manager pursuant to the terms of the plan which provide P total discretion in choosing an investment manager. Through G's imprudence, G incurs losses in managing P's account. G has engaged in a breach of fiduciary duty because G's imprudent management of P's account is not a direct or necessary result of P's exercise of control (the choice of G as manager). Plan fiduciary F has no fiduciary liability for G's imprudence because F has no obligation to advise P (see paragraph (c)(4)) and because F is relieved of co-fiduciary liability for G's actions by reason of section 404(c)(2) (see paragraph (d)(2)(iii)). In addition, F also has no duty to determine the suitability of G as an investment manager because the plan does not designate G as an investment manager.

(10) Participant P directs a plan fiduciary, F, a bank, to invest all of the assets in his individual account in a collective trust fund managed by F that is designed to be invested solely in a diversified portfolio of common stocks. Due to economic conditions, the value of the common stocks in the bank collective trust fund declines while the value of publicly-offered fixed income obligations remains relatively stable. F is not liable for any losses incurred by P solely because his individual account was not diversified to include fixed income obligations. Such losses are the direct result of P's exercise of control; moreover, under paragraph (c)(4) of this section F has no obligation to advise P regarding his investment decisions.

(11) Assume the same facts as in paragraph (f)(10) except that F, in managing the collective trust fund, invests the assets of the fund solely in a few highly speculative stocks. F is liable for losses resulting from its imprudent investment in the speculative stocks and for its failure to diversify the assets of the account. This conduct involves a separate breach of F's fiduciary duty that is not a direct or necessary result of P's exercise of control (see paragraph (d)(2)(iii)).

(g) Effective date. (1) *In general.* Except as provided in paragraph (g)(2), this section is effective with respect to transactions occurring on or after the first day of the second plan year beginning on or after October 13, 1992.

(2) This section is effective with respect to transactions occurring under a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before October 13, 1992 after the later of the date determined under paragraph (g)(1) or the date on which the last collective bargaining agreement terminates. For purposes of this paragraph (g)(2), any extension or renegotiation of a collective bargaining agreement which is ratified on or after October 13, 1992 is to be disregarded in determining the date on which the agreement terminates.

(3) Transactions occurring before the date determined under subparagraph (g)(1) or (2) of this section, as applicable, are governed by section 404(c) of the Act without regard to the regulation.

Signed at Washington, DC, this 2d day of October 1992.

David George Ball,

Assistant Secretary for Pension and Welfare Benefits, U.S. Department of Labor.

[FHWA Docket No. 92-35]

Studies of the Regulation of Emergency Vehicles on the Interstate System and Transporters of Water Well Drilling Rigs on Public Highways; Request for Comments

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice; request for comments.

SUMMARY: This is a request for information to assist the Secretary in responding to a provision of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) requiring two studies of vehicle weight laws. One is a study of State laws regulating the use of the Interstate System by emergency vehicles during delivery to or operation by a firefighting agency, as well as the issuance of permits to exempt such vehicles from the maximum weight limits on the Interstates. The other is a study of State or Federal regulations which place a burden on transporters of water well drilling rigs on public highways without enhancing safety or preservation of public highways. The emergency vehicle study must be submitted to Congress by June 18, 1993 and the water well drilling rig study by December 18, 1993. All the responses and comments will be fully considered before the studies are submitted to Congress.

DATES: Responses to this request must be received on or before January 11, 1993.

ADDRESSES: Submit written, signed comments to FHWA Docket No. 92-35, Federal Highway Administration, room 4232, HCC-10, Office of the Chief Counsel, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., e.t., Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped envelope or postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Klimek, Office of Motor Carrier Information Management, at (202) 366-2212 or Mr. Charles Medalen, Office of the Chief Counsel, at (202) 366-1354, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: Sections 1023(e)(2), (3), and (4) and 1023(g) of the ISTEA (Pub. L. 102-240, 105 Stat. 1914, 1954-1955) require the Secretary to conduct two studies of vehicle weight limits, one involving vehicles used for the purpose of protecting persons and property from fires and other disasters that threaten public safety (hereafter referred to collectively as emergency vehicles) when being delivered to or operated by a firefighting agency, and the other involving water well drilling rigs.

Emergency Vehicle Study

This study consists of two parts. The first part is to determine if emergency vehicles being delivered to or operated by a firefighting agency should be exempted from Interstate gross weight limits, or if any Interstate weight limits, including the bridge formula, should be modified to accommodate emergency vehicles. The purpose of the bridge formula is to protect bridges by allowing gross vehicle weight to increase only as the distance between axles or axle groups increases, up to an overall maximum gross weight limit. This protects bridges by spreading the weight of heavier vehicles over a larger area of bridge decking and supporting members.

The second part is to study the issuance of permits by States which allow emergency vehicles to exceed the federally required axle, gross, and bridge formula maximum weight limits on the Interstates. Permits are issued for two types of overweight vehicles and loads, those which are divisible and those which are not. Divisible vehicles or loads are those which can be easily divided, such as grain. Nondivisible vehicles or loads are those which cannot be easily divided, such as large generators.

Authority for individual States to issue divisible load permits for emergency vehicles to exceed Interstate weight limits depends on whether they issued such permits in 1956 when the Interstate System was authorized. If they did so, they may continue to issue such permits under what is called "grandfather" authority. A similar "grandfather" authority was established in 1974 when the Federal bridge formula was adopted.

Federal law allows all States to issue overweight permits for nondivisible vehicles or loads on the Interstates. Some States may be defining emergency vehicles with some or all of their equipment and supplies as nondivisible and issuing overweight permits for them to operate on the Interstates.

In a notice of proposed rulemaking published on March 20, 1992, 57 FR 9900, the FHWA proposed to define "Loads Which Cannot Be Easily Dismantled or Divided." Until such time as that proceeding is concluded, States may, within reason, define what constitutes a divisible or nondivisible vehicle or load. The definition is of interest here, however, since it would affect whether States could issue divisible or nondivisible permits for overweight emergency vehicles in the future.

The study covers emergency vehicles being delivered to or operated by a firefighting agency. We are seeking information about what types of firefighting agencies there are and what kind of emergency equipment they operate. This would include not only Federal, State, and local political jurisdictions but also the Forest Service, the military services, and any other firefighting organizations that operate emergency equipment.

Water Well Drilling Rig Study

Section 1023(g)(1) of the ISTEA requires the Secretary to conduct a study of State and Federal regulations pertaining to transporters of water well drilling rigs on public highways to identify any requirements which place a burden on such transporters without enhancing safety or preservation of the highways. Unlike emergency vehicles, water well drilling rigs are not exempted by 49 CFR 390.3(f)(5) from the Federal Motor Carrier Safety Regulations published in 49 CFR 350 to 399. Therefore, information is sought on weight, safety, and any other Federal or State regulations applicable to water well drilling rigs which do not enhance safety or the preservation of the highways.

In order to conduct these studies, comments are requested on the following matters and any others relating to the subject matter of the studies.

Emergency Vehicle Study

1. What types of emergency vehicles are there (pumpers, ladder trucks, foam spreaders, ambulances, etc.)? (Pictures or illustrations showing the distinguishing features of each would be helpful.)

2. How much weight is carried on each single axle or set of axles (such as tandems or tridems) for each type of emergency vehicle when ready for use? When being delivered to a firefighting agency?

3. What are the shortest, longest, and average distances, in feet and inches, between all axles on such vehicles? (Pictures or illustrations showing the distances would be helpful.)

4. What are the weight limits for emergency vehicles operating on the Interstate System (single axle, tandem axle, tridem axle, maximum gross weight, pounds per inch of tire width)?

5. In your opinion, is there a need to change the axle, gross, or bridge formula Interstate System weight limits for overweight emergency vehicles on the Interstate System? If so, please specify what changes should be made.

6. Are all or some emergency vehicles divisible or nondivisible? Please specify which are and which are not and why.

7. If the State allows operation of overweight emergency vehicles on the Interstate System under permit, what conditions in addition to weight limits are imposed, such as driver or vehicle requirements?

8. If permits are issued for overweight emergency vehicles to operate on the Interstate System, what basis is used to determine the cost of such permits? Is it the cost of highway damage, the administrative cost, the value of the service, or some other basis?

9. Please explain any significant regulatory problems encountered during movements of emergency vehicles on the Interstate System when responding to or returning from emergencies, during training, or when vehicles are being delivered to a firefighting agency.

10. What agencies fight fires? (Federal, State, or local governments, Forest Service or military services, or other agencies?) What kind of emergency equipment is operated on the Interstates when being delivered to or operated by each such agency?

11. Describe design changes that could bring emergency vehicles into conformity with State and Federal regulations, such as the use of lightweight materials, multiple axles, etc. What costs or operational problems would be associated with these designs?

12. How many miles per year is each type of emergency vehicle driven in response to emergencies? How many miles is each type driven for training and other purposes? How many of these miles are on the Interstate System?

13. Do you have any further comments regarding the use of the Interstates by emergency vehicles?

Water Well Drilling Rig Study

1. What types of water well drilling rigs are there? (Pictures would be helpful).

2. How much weight is carried on each axle or set of axles (such as tandems or tridems) for each type of water well drilling rig when ready for use?

3. What are the shortest, longest, and average distances, in feet and inches, between all axles on such vehicles? (Pictures or illustrations showing the distances would be helpful.)

4. What impact do State weight limits, on and off the Interstate System, have on the operation of water well drilling rigs?

5. If water drilling rigs have a problem complying with weight limits, could they be redesigned using light-weight materials, multiple axles, or other techniques to conform to legal weight limits? Please explain the basis for your answer.

6. What State or Federal regulations governing the use of water well drilling rigs on public highways need to be changed? What would be the effect on safety or the preservation of highways and why?

7. Does lack of uniformity between the laws or regulations of various States or among local communities within a State place a burden on the highway movement of water well drilling equipment? If so, please give examples.

8. Do you have any other comments regarding State or Federal regulations which place a burden on water well drilling rigs on public highways? Please be as specific as possible.

Authority: Sec. 1023, Pub. L. 102–240, 105 Stat. 1914; 23 U.S.C. 315; 49 CFR 1.48.

Issued on: October 2, 1992.

Federal Aviation Administration

14 CFR Part 91

Interpretation of the Regulations; Transition to an All Stage 3 Fleet Operating in the Contiguous United States; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 91

Interpretation of the Regulations Regarding the Transition to an All Stage 3 Fleet Operating in the Contiguous United States

AGENCY: Federal Aviation Administration, DOT.

ACTION: Interpretation of rules.

SUMMARY: This document presents a compilation of requests for interpretation of the regulations regarding the transition to an all Stage 3 fleet operating in the contiguous United States. These requests have been submitted to the Federal Aviation Administration (FAA) since the regulations became effective on September 25, 1991. The FAA is aware that significant public interest in these opinions exists, and this document is being published to give notice of the issuance of these interpretations to all interested parties.

ADDRESSES: Further requests for interpretation of these regulations may be addressed to: Federal Aviation Administration, Office of the Chief Counsel, ATTN: Assistant Chief Counsel for Regulations, AGC–200, 800 Independence Ave., SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Karen L. Petronis, Airworthiness Law Branch, AGC–210, Office of the Chief Counsel, FAA, 800 Independence Ave., SW., Washington, DC, 20591; telephone (202) 267–8018.

SUPPLEMENTARY INFORMATION: On September 25, 1991, the Federal Aviation Administration (FAA) published regulations governing the operation of large Stage 2 airplanes in the contiguous United States. These regulations codified into the Federal Aviation Regulations the provisions of sections 9308 and 9309 of the Airport Noise and Capacity Act of 1990 (ANCA) (49 U.S.C. App. 2157, 2158).

Since that time, the FAA has received many requests for interpretations of the regulations. Because of the broad scope of the regulations, many persons have expressed an interest in these interpretations and have requested that they be made available generally. To facilitate the dissemination of the information contained in these interpretations, the questions and responses are being published here. The questions are presented by topic area. Individual topic areas may include questions from several requesters, and individual requesters are not identified.

Return of Foreign-leased Airplanes

1. *Question:* If a U.S.-owned Stage 2 airplane is leased to a non-U.S. operator, must it physically return to the United States within six months after expiration of the lease before being re-leased to qualify under the return rule of § 91.855(f)?

Response: No. Nothing in the language or legislative history of ANCA § 9309 suggests that physical contact with U.S. soil is necessary to make a leased airplane returnable, nor does any practical argument exist for such a requirement. This applies to any number of successive leases to the same or other non-U.S. airline so long as no more than six months elapses between the end of one lease period and the beginning of the next.

The FAA cautions that the eligibility of a Stage 2 airplane to return after a foreign lease in no way confers any operational status as far as the phased transition requirements of part 91 are concerned. Any operator that chooses to use a returned Stage 2 airplane to conduct operations in the contiguous United States must ensure that the airplane fits in the operator's fleet requirements under § 91.865 or § 91.867.

Alaskan Operations

2. *Question:* Since operations in the state of Alaska are not affected by either the nonaddition rule or the phased transition, are operators that operate exclusively in Alaska exempt from §§ 91.851 through 91.875?

Response: No. Each operator of a large Stage 2 airplane is subject to the transition rules, including the nonaddition rule and the reporting requirements of § 91.875. Each operator of a covered airplane must establish its base level and report its compliance. Section 91.801(c) indicates that the operating noise limits and related requirements codified in §§ 91.851 through 91.875 apply to:

> Any civil subsonic turbojet airplane with a maximum certificated weight of more than 75,000 pounds operating to or from an airport in the 48 contiguous United State and the District of Columbia under this part [part 91], part 121, 125, 129, or 135 of this chapter on and after September 25, 1991.

The fact that an operator restricts operation of its airplanes to Alaska is not relevant to coverage. It is true, however, that the operation of Stage 2 airplanes in Alaska is not affected by the statutory prohibition or the interim compliance requirements. At this time, the FAA foresees allowing operators of affected airplanes that operate solely outside the contiguous United States to amend their operations specifications to remove these airplanes from operation in the contiguous United States. Any airplane that is restricted to operation outside the noncontiguous United States may be used to achieve compliance with the statutorily mandated restriction on the operation of Stage 2 airplanes.

The FAA realizes that operators that operate airplanes solely in Alaska (or other locations outside the contiguous United States) fall into a special category as far as the transition to an all Stage 3 fleet. While these operators must be treated the same as other domestic operators, they nonetheless present a special case since their Stage 2 airplanes are not restricted from their usual flight areas. For this reason, all operators are required to establish a base level and phase into an all Stage 3 fleet of airplanes operating in the contiguous United States. Any operator may comply with the transition requirements by removing its Stage 2 airplanes from operation in the contiguous United States.

While § 91.857 addresses the operation of Stage 2 airplanes that are "imported" into the noncontiguous United States, these same provisions would apply to any currently operated airplane that an operator wishes to remove from operation in the contiguous United States. Thus, an operator may take advantage of § 91.857(a) to change its operations specifications to meet the interim compliance dates, as necessary, and may use § 91.857(b) to obtain a special flight authorization to operate a restricted Stage 2 airplane into the contiguous United States for the purpose of maintenance.

Dual-Certificated 747–100 Aircraft

3. *Question:* Since a number of Boeing 747–100 airplanes were originally certificated to operate as either Stage 2 or Stage 3 airplanes, what is the status of these airplanes under the phased transition rules?

Response: Until notified, the FAA considers all dual-certificated Boeing 747–100 airplanes to be Stage 2 airplanes for noise compliance purposes. Each operator of these airplanes may choose to permanently reclassify these airplanes as Stage 3 to count them toward compliance with the Stage 3 transition rules.

This reclassification involves changes in the airplane flight manual to delete the parameters that describe Stage 2 operation, and the addition of a placard in the affected airplane indicating that the airplane may not be flown in a Stage 2 configuration. In addition, the FAA

will require each operator to submit a written statement identifying the reclassified airplane and certifying that the airplane will not afterward be flown as a Stage 2 airplane to or from a point in the contiguous United States.

The only exception to this permanent reclassification is in the case of leased airplanes. The lessee of a dual-certificated 747 will be allowed to make the Stage 3 reclassification election effective for the length of the airplane lease. This exception provides that no lessor/owner of a dual certificated 747 is bound irrevocably by the action of its lessee, while the lessee retains the flexibility to continue operation of the airplane in a configuration that is compatible with its needs under the Stage 3 transition.

While notice to the FAA must be made in writing, there is no precise form in which the owner or operator must declare its actions to reclassify an individual airplane. The FAA is looking into the development of an optional form for this purpose. The FAA anticipates that operators would file these certifications at the time it submits its annual report, but they may be filed at any time. This form, or any such written certification from an owner or operator, will not fulfill any other recordkeeping requirement made necessary by changes to the airplane flight manual or the airplane itself.

Airplanes Leased From Non-U.S. Entities

4. *Question:* Section 91.855(c) allows for the operation of Stage 2 airplanes that were leased by non-U.S. owners to U.S. operators before September 25, 1991. May a wholly-owned U.S. subsidiary of a non-U.S. corporation take advantage of this provision?

Response: If the wholly-owned U.S. subsidiary has established a voting trust to register its airplanes in the United States, it may not claim that it leased the airplane as a non-U.S. entity under § 91.855(c). The voting trust means that the subsidiary's airplanes are considered U.S.-owned. If the trust acquired a Stage 2 airplane before November 5, 1990, it may lease the airplane to another U.S. entity to operate in the contiguous United States without restriction. If a Stage 2 airplane was acquired after November 5, 1990, by a subsidiary, the airplane could not be leased to a U.S. operator for operation in the contiguous United States because of the nonaddition rule.

5. *Question:* For a Stage 2 airplane operating under the leasing provisions of § 91.855(c), may that airplane be sold to another non-U.S. entity and continue to operate subject to that lease? May it be sold to a U.S. entity and continue to operate subject to the lease?

Response: If a Stage 2 airplane is owned by a non-U.S. entity and transferred to another non-U.S. entity subject to a lease to a U.S. operator, the airplane may continue to operate under § 91.855(c). The FAA will not view the continuation of the lease as a violation of § 91.855(c), as though a new lease from a non-U.S. entity were occurring.

This allowance presumes that the airplane is sold subject to the express terms of the existing lease. Any change in the terms of the lease at the time of the sale would be considered a new lease from a foreign entity. Any extensions of that a lease would be limited to the terms in the original lease. Once the lease expires, the airplane may not be operated in the contiguous United States by a U.S. operator.

Conversely, a non-U.S. owned Stage 2 airplane that is currently leased by a U.S. operator may not continue to operate if the airplane is sold to a U.S. entity. Stage 2 airplanes purchased by a U.S. entity after November 4, 1990, are prohibited from operating in the contiguous United States. To allow a newly purchased airplane to continue operation based on the original lease from the non-U.S. entity is clearly prohibited by the terms of the statutory nonaddition rule. If the airplane is allowed to transfer to a U.S. entity and is allowed to continue operating subject to the lease, the transfer would serve as a means around the nonaddition rule. By protecting the lease, the receiving U.S. entity would be purchasing an airplane that, without the lease, would be prohibited from operation in the contiguous United States.

The continued operation of this airplane, if sold to a U.S. entity, could be viewed as consistent with the nonaddition rule since it does not increase the amount of Stage 2 noise in the United States—the airplane is already operating here. However, a change to U.S. ownership thwarts the very intent of Congress in codifying the nonaddition rule—to limit the liability of all U.S. owners of Stage 2 airplanes to that which existed on November 5, 1990. While it may be argued that limiting operation to the length of the lease would not effect any change as far as operation of Stage 2 airplanes, the new U.S. owner would enjoy a benefit unavailable to most others, and that benefit would have been gained by a means that clearly violates the nonaddition rule.

The anomaly that arises from this situation was recognized by the FAA at the time the regulations were promulgated, and is caused by the difference between the statutory cutoff for importation of Stage 2 airplanes and the regulatory cutoff for leasing non-U.S. airplanes. The anomaly resulted when the FAA "closed the loophole" of leased non-U.S. airplanes. The FAA concluded that the September 25, 1991, cutoff date was the only viable alternative to declaring those leases void retroactively, since they were expressly limited by the ANCA.

The FAA will not now interpret the rule in a manner that would, in effect, violate the spirit of the legislation by allowing the continued operation of these leased airplanes should they become U.S.-owned. Allowing this operation could easily lead to numerous sales of leased non-U.S. Stage 2 airplanes, effectively foiling the purposes of the nonaddition rule and unfairly favoring those who already have the advantage of a previously-leased Stage 2 airplane. Further, allowing these operations would place upon the FAA the burden of monitoring leases to which it is not a party and over which it exercises no control.

Base Level

6. *Question:* Can base level be held by anyone other than an operator of Stage 2 airplanes?

Response: Yes. Base level is created by operators (or others in certain other circumstances) because it is based on the number of Stage 2 airplanes on their operations specifications as of a chosen day. Base level is thus held by an operator until the operator decides to transfer it.

Section 91.863 does not specify either who may hold base level, or who makes the decision whether base level will transfer in a given transaction. Because base level may be transferred to non-operators, the FAA has no way of knowing the parties involved in any individual transfer. Once an operator establishes its base level, it holds that base level until it decides to transfer all or part of it with the corresponding airplanes. The FAA's statement in the preamble to the final rule establishes the starting point by saying that base level established with leased airplanes stays with the operator.

The decision on whether the base level will transfer thus belongs to the party that holds the base level and airplanes before the transaction. In a chain of airplane transfers together with base level, any party may choose to transfer the airplanes and retain the base level.

7. *Question:* May a transfer of base level be made now for an airplane

transfer that occurred before the issuance of § 91.863?

Response: Yes. Since the establishment of base level was a "look back," the FAA currently allows the transfer of base level for airplane sales or lease returns made *after* the transferring owner/operator established its base level. These transactions are to be negotiated by the parties to the airplane transfer and are to be reported pursuant to § 91.863(c).

The transferring parties must report the original date of the airplane transfer. The related base level transfer will be valid only if the airplane transfer occurred after the date established by the transferring party as its base level date. Airplane transfers that predate the establishment of the transferring party's base level would be invalid since no base level had yet been established to transfer.

The FAA anticipates that this "look back" procedure may not exist indefinitely. After gaining more experience with base level transfers and the complexity of tracking base level, the agency may decide that after a certain date, no further "look back" transactions will be approved. If made, the FAA will publish a notice of this decision before the cutoff date.

8. *Question:* If an airplane is returned by a lessee to the lessor without base level, and the airplane is subsequently re-leased without base level, may the subsequent lessee obtain the base level from the original lessee without the involvement of the lessor under § 91.863(a)?

Response: No. This transfer is prohibited under § 91.863. Base level may only transfer with a Stage 2 airplane and cannot "leapfrog" an intervening transferee of the Stage 2 airplane. Base level does not attach to an individual airplane and follow wherever the airplane goes. Base level may be transferred only with a Stage 2 airplane, and may be either (1) retransferred with the subject airplane, (2) retained by the receiving party, or (3) transferred with another Stage 2 airplane of the receiver's choosing. Base level may transfer only at the discretion of the parties to individual Stage 2 airplane transfers.

In the situation described in the question, the original lessor may choose to hold onto its base level from the transferred airplanes, transfer the base level with other Stage 2 airplanes, or transfer the base level to the recipient of the subject Stage 2 airplanes, its lessor. The subsequent transferee of the airplanes is not eligible to receive base level directly from the original lessee because it did not obtain the airplanes from the original lessee.

9. *Question:* Can a bankrupt operator hold base level even through it has no valid use for it? Does base level automatically transfer to the lessor of an aircraft when the operator/lessee has declared bankruptcy and returned the airplane to the lessor?

Response: A bankrupt operator may validly hold base level. The transition rule makes no provision for the FAA to decide that base level may only be held by operators that have a "valid" use for it. If that were true, then a logical extension of that premise would allow base level to be held only by viable operators, since no one else will ever "need" it for compliance purposes. When the FAA decided to make base level transferable, it did so to facilitate the trade in Stage 2 airplanes and with the intent that these transfers would be negotiated between the parties to the transfer. At no time did the FAA anticipate having any decisionmaking authority over whether base level would transfer in an individual transaction. The FAA reserved only the right to approve transfers pursuant to its policies and deny the use of base level for compliance if the transfers involved compromise the transition goals.

The creation of base level is unrelated to the provisions of the Bankruptcy Code that deal with the disposition of the original lease of an airplane. Unless that original lease included the airplane's base level in its provisions, the lessor has no right to demand its transfer. The FAA does not view the retention of base level by any party validly holding it to diminish the value of any airplane when the base level was not part of the original transaction, and the base level is validly in the possession of the holder.

Base level is established by the fact that an airplane appeared on an operator's operations specification on the date the operator chose to establish its base level. Base level is otherwise severable at the discretion of the holder. Section 1110 of the Bankruptcy Code appears irrelevant to the discussion of base level since base level does not "attach" to the airplane itself, nor become part of the leased property.

Accordingly, the FAA will not interpret the rule to require the "automatic" transfer of base level from an operator that has ceased operations to the lessor of its airplanes. To do so would violate the policy established in the final rule that the decision to transfer base level remains with the party holding it at the time an airplane is transferred. To require transfers in the case of operators that have filed for bankruptcy would further involve the FAA in a matter over which it has no control. The transfer of base level may well be viewed by a bankruptcy court as a disposition of an operator's assets, a matter in which the FAA will play no role.

Base level, as a concept, was created by the Federal Aviation Administration (FAA) as a means to tract the compliance of operators in their transition to an all Stage 3 fleet. This is the reason that base level is presumed to remain with the operator when a leased airplane is returned to a lessor, unless the parties otherwise agree and inform the FAA of the transfer. Compliance is required by the operators, not by the lessor of the airplanes. If an operator chooses the phaseout method of compliance, it demonstrates its compliance by the base level it holds. The FAA will not interpret any of the transition regulations to take away base level from an operator without its consent.

10. *Question:* If an aircraft is held "in reserve" by one operator for another operator's occasional use, may it be counted in the base level of the operator for who it is held in reserve?

Response: Section 91.861 allows each operator to choose the date on which it establishes its base level. Only airplanes that appeared on an operator's operations specifications on the date chosen may be counted. A Stage 2 airplane that was on an operator's operations specifications on the day the operator chooses its base level may be included, even if the airplane was returned subsequently to the lessor.

Airplanes that are held in reserve for use but that did not appear on operations specifications on the date chosen to establish base level may not be counted in establishing base level. The right to count those airplanes and the responsibility for them under the transition rule belong to another entity. The reserved airplane may continue to be used after the first interim compliance date provided that the operator otherwise meets the criteria of the transition rules as to the number of Stage 2 airplanes eligible for operation in the contiguous United States.

11. *Question:* Can base level be leased?

Response: Yes. Section 91.863(a) states that base level may be transferred only with a corresponding number of Stage 2 airplanes. By choosing the word "transfer," the FAA intended that all airplane transactions be included. The FAA specifically foresaw the inclusion of base level in the lease of Stage 2

airplanes, with the base level "leased" as part of the deal.

The FAA anticipated that the final disposition of the base level would appear in the lease agreement—whether it would be returned to the lessor or retained by the lessee. The regulation was written so as not to preclude any transaction involving the transfer of the airplane from including a disposition of the base level that is available to transfer with it.

12. *Question:* Does leased base level return automatically to the lessor at the end of a lease?

Response: No. While return of base level may be a term of the lease, there is no automatic transfer in FAA records.

At present, if a Stage 2 airplane was leased to an operator at the time the operator established its base level (between January 1, 1990 and July 1, 1991), then the base level is presumed to stay with the operator at the termination of the lease. This may be changed by an amendment to the lease concerning base level as negotiated by the parties.

For any other airplane that was the subject of a lease agreement dated after July 1, 1991, if the lease agreement is silent as to the base level, it is assumed that no base level was transferred as part of the lease; there is no presumption that the lessor had any base level to transfer. Again, this may be amended at the agreement of the parties to the lease.

The FAA has determined that this disposition of "leased" base level is the most consistent with other base level concepts and is the fairest to all parties. Operators need to be able to rely on their base level, which they were allowed to establish based on their individual circumstances. After the period for choosing the base level date closed, however, operators can have no such expectation and the forces of the market take over.

Further, this interpretation addresses the possibility that a lessee might refuse to sign a recordation of transfer of base level. Either the lessee created the base level itself, in which case it is presumed retained, or base level must be a subject of the lease itself. If a lessee refuses to honor the terms of a lease agreement, the FAA presumes that the lessor would pursue its legal remedies under the contract, a situation that does not involve the FAA.

Moreover, no "automatic" statute will be presumed for reporting purposes. The FAA will not assume the responsibility for tracking the expiration of leases that would transfer base level back to the lessor. There are several circumstances under which a lease agreement might end. The FAA is not a party to these agreements and presumes no knowledge of them, nor will the FAA assume the responsibility to monitor individual leases.

As to the terms and conditions of the lease, the FAA has no expectations. The FAA considers the transfer of base level at the inception of the lease to be covered under § 91.863(c), a transfer that must be reported to the FAA. At present, the FAA expects only the information required by that section, plus the fact that the reported base level is part of a lease transaction. Accordingly, the transfer back to the lessor at the termination of the lease must also be reported as a transfer of base level under § 91.863(c). During the term of the lease, the base level will appear as being held by the lessee.

The FAA will take no other action under the lease, including enforcement of the terms of the lease regarding the base level. The parties to the transaction are expected to protect themselves. At no time will the FAA accept the lease document as a report of base level transfer, nor accept any responsibility for staying abreast of the terms of a lease over which it has no interest or control. For this reason, the original transfer and return of leased base level are considered separate base level transactions for FAA reporting purposes.

Further, since base level can only be "transferred" with a Stage 2 airplane, base level alone cannot be leased or sold, and the transaction in base level must be coincident with the transfer of airplane, whether by lease or sale. The terms of the lease or sale cannot provide for the base level to transfer before or after the lease begins or ends or the sale is consummated by transfer of the airplane. The only exception is the FAA's current policy of allowing transfers of base level to "look back" to airplane transfers made before the regulations were promulgated.

13. *Question:* Can a lessee of an airplane with base level sublease the base level?

Response: As indicated previously, the FAA presumes that the terms of any lease of base level would establish the rights of the lessee with regard to the use of the leased base level. The regulation does not specifically restrict any transfer of base level, as long as it accompanies the transfer of a Stage 2 airplane.

14. *Question:* Does § 91.861 allow every U.S.-owned Stage 2 airplane that was leased to a foreign entity to increase a U.S. operator's base level when it returns, regardless of when the airplane was leased to the non-U.S. entity?

Response: No. The FAA interprets § 91.861 as allowing a U.S.-owned Stage 2 airplane to increase the base level of a U.S. operator when the airplane returns from a foreign lease within six months of the expiration of that lease. However, the limiting factor on this rule is not when the airplane was leased to the non-U.S. entity, but whether the airplane had previously been used by a U.S. operator to establish base level.

For example, if a Stage 2 airplane was originally leased to a non-U.S. entity before January 1, 1990, then it may return to the United States and increase the base level of the operator that buys or leases it. However, for airplanes leased to non-U.S. entities after January 1, 1990, further base level may only be established if the airplane was not used to establish base level before it left the United States, i.e., was not on the operations specifications of a U.S. operator at the time that operator established its base level.

This limitation is essential to the integrity of the base level concept. If the airplane had already been used to establish base level domestically, it will not be allowed to generate base level domestically again. Were this permitted, the FAA anticipates that a steady market in short-term leases to non-U.S. entities would arise solely to create new base level upon return of the airplanes. This overcreation of base level directly contradicts both the goals of the legislation and the purposes behind the creation of the base level concept.

The statutory allowance in 49 U.S.C. 2158(c) is not rendered meaningless by this interpretation. The legislation states that a U.S.-owned airplane returning from a non-U.S. lessee within six months of the end of that lease shall not be considered an imported airplane for purposes of the nonaddition rule. This provision allows these airplanes to escape the operating limitation imposed by the nonaddition rule, in case there was any question as to their status. The status of those airplanes in connection with the regulatory base level system is a separate consideration. In creating the base level system, the FAA was well aware that the mere ability to operate domestically is meaningless without the right to do so. Accordingly, a returning airplane is allowed to increase the base level of the U.S. operator that subsequently operates it, as long as it was not used in the prior establishment of base level.

This interpretation is not inconsistent with the FAA's statement that an airplane may be leased at any time and still return if it does so within six months of the end of the lease. In

drafting this statement, the FAA was aware that the statutory ability to return as a U.S.-owned airplane did not guarantee the unconditional right to fly the airplane until the 1999 statutory deadline. For that reason, the actual right to return is presented in § 91.855 and the establishment of base level is presented in § 91.861. The Congress left the FAA to establish the method by which Stage 2 airplanes would be phased out of operation. To interpret section 2158 of the Airport Noise and Capacity Act of 1990 as an unrestricted right to operate at every return would result in returned airplanes having a higher status than those that stayed in the United States, an interpretation that the FAA is confident was not the intent of Congress in its inclusion of the import limitation in 49 U.S.C. 2158(c).

Nor does the FAA consider this interpretation inconsistent with the fact that one airplane may have been used to establish base level for two or more operators by virtue of its appearance on the operations specifications of two or more operators. The FAA knew this situation could occur, and accounted for it when the rule was written. However, the FAA recognizes that the number of these occurrences is limited and that they cannot occur again. Further, the transfers that occurred during the base level establishment period were done without knowledge of the base level system, and therefore cannot be interpreted as an attempt to manipulate that system. Finally, instances of base level being created by two U.S. operators does not carry the possibility of constant overcreation, since the situation can no longer occur.

The FAA will not allow an expansion of this concept that results in the unlimited creation of base level by the manipulation of short-term foreign leases by persons familiar with the system. If the airplane already created base level by its presence on a U.S. operator's operations specifications, its ability to create base level is exhausted. The underlying theme of the base level system is one-per-Stage-2-airplane. The exception noted above prevents U.S. operators from being harmed by a system they did not know would exist later. This harm is not imposed on a U.S. owner whose airplane was used to establish base level and now has full knowledge of the system.

15. *Question:* Will the FAA establish a "safe harbor" of base level that results from bankruptcy or liquidation transfers, with these transfers free from the review function established in § 91.863(d)?

Response: The FAA will not make these types of decisions on individual transfers, whether in the context of an interpretation or at the time of an individual transfer. The FAA views this as the equivalent of a request for a "no action" statement as is sometimes issued by other federal agencies, but which the FAA does not use.

As indicated in the preamble to the final rule and reiterated in the question, the FAA has reserved the right to review any transaction or series of transactions that appear to have been made to avoid compliance with the regulations. That series of transactions may take place over time, and the FAA will not make individual determinations that insulate a transaction from any later transfers.

The FAA understands that this review function may cause some transferring parties to lack a sense of finality in a transfer. However, the FAA has intention of scrutinizing every simple transaction or imputing bad intent upon the parties to every transaction. While several ways of circumventing the base level rules were foreseen, the agency is sure that not every permutation was considered. Accordingly, § 91.863 was inserted to give the agency the ultimate right of review when abuse is suspected.

For these same reasons, the FAA will not create a "safe harbor" of base level transactions that result from transfers made pursuant to bankruptcy or liquidation actions. It appears that the concern is if one "bad" transfer is identified, all related transfers of base level will be invalidated for compliance purposes. The FAA does not anticipate that, in the case of a suspect transaction, every related transaction would be found tainted. While it is impossible to judge every possible future transaction in a vacuum, parties may presume that a transfer mandated by a bankruptcy court would be difficult to challenge retroactively.

16. *Question:* Is the beneficiary of a trust able to acquire base level in a transaction although the airplane actually transfers between the owner trustee and a lessee?

Response: For several reasons, these transfers will not be allowed. Acceptance of these circumstances would require that an entity not even party to the transfer of the airplane be designated as the transferee of base level. This is expressly denied by the language of the regulation that indicates that base level transfers must accompany the transfer of a Stage 2 airplane. To allow this transfer would be to deny the right of the owner-trustee that is expressed in the regulation.

Second, by allowing this transaction, the FAA would be responsible for determining the identity of the trust beneficiary in an arrangement to which the FAA is not a party. The FAA will not assume this liability. Further, the FAA must be able to easily track the ownership of the base level and the subject airplane. Presumable, a transfer of base level to the beneficiary would result in another transfer by the beneficiary, although at neither time would the beneficiary transfer a Stage 2 airplane. The FAA will not allow a third party uninvolved in the transfer of Stage 2 airplanes to trade in base level; to do so would violate the reasons for the prohibition that was built into the regulation.

Finally, allowing the transfer of base level to a beneficiary would be in direct opposition to the interpretation concerning leased base level. Transactions in base level are not allowed to skip over any transferee of the subject airplane, regardless of the financing circumstances of an individual airplane.

The FAA does not consider the problem faced in the transfer of a Stage 2 aircraft held in trust to be insurmountable. As we have indicated previously, any person may hold or transfer base level as long as it is transferred with a Stage 2 airplane. Although the transfer process may involve more pieces of paper than would otherwise be desired, the FAA will consider any unique multiparty transfer documentation as long as the transfer does not violate the basic policies expressed here and in the regulations.

17. *Question:* Must an airplane be on a transferring party's operations specifications for the transfer to include base level?

Response: No. The transferring party need only have the legal right to transfer a Stage 2 airplane (and actually accomplish the transfer) to transfer base level with that airplane. Anyone is allowed to hold base level, or transfer it with a Stage 2 airplane, but only operators have operations specifications. The only use of operations specifications with regard to base level is the initial establishment of base level by an operator. Base level is created only by an airplane's appearance on an operator's operations specifications (or other limited circumstances under § 91.855) on the date chosen by the operator. The subsequent transfer of an airplane with base level is unrelated to its appearance on any operator's operations specifications at the time of the transfer.

Issued in Washington, DC, on October 6, 1992.

Kenneth P. Quinn,

Chief Counsel.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List October 9, 1992

ELECTRONIC BULLETIN BOARD

Free Electronic Bulletin Board Service for Public Law Numbers is available on 202–275–1538 or 275–0920.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to (202) 512-2233.

Individual copies		2.00	1992

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1991. The CFR volume issued January 1, 1987, should be retained.

[5] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar 31, 1991. The CFR volume issued April 1, 1990, should be retained.

[6] No amendments to this volume were promulgated during the period Apr. 1, 1991 to Mar 30, 1992. The CFR volume issued April 1, 1991, should be retained.

[7] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1992. The CFR volume issued July 1, 1989, should be retained.

[8] No amendments to this volume were promulgated during the period July 1, 1990 to June 30, 1991. The CFR volume issued July 1, 1990, should be retained.

[9] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1992. The CFR volume issued July 1, 1991, should be retained.

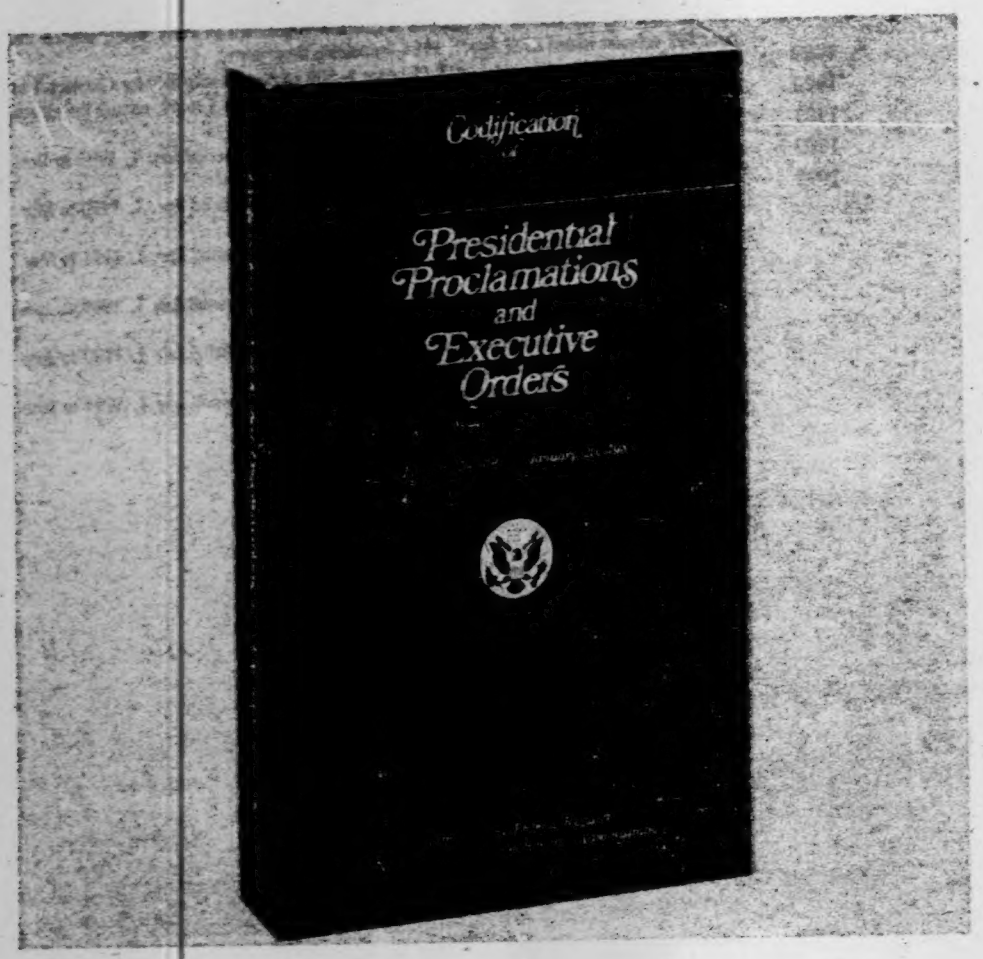
.... Order now ! . . . .



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.
